## COST ADDERS FOR SPECIAL FINISHES

Philips Alkco has the ability to paint most fixtures in custom finishes to match specific job requirements. To ensure an acceptable color match, please provide a paint chip which is large enough to be split into 3 pieces (one to keep in Customer Service, one to keep at Philips Alkco Quality control and one to be sent to the Philips Alkco paint supplier).

**Custom finishes are quoted on a job by job basis.** Normally a \$330 lot paint match & set-up charge is applied to each order release.

### **Undercabinet Fixtures**

When undercabinet fixtures are to be painted a special color which is of dark reflectance, the inside usually will be painted white. This will normally entail a \$330 lot charge for the custom color plus a \$11 per fixture mask and paint charge for the white. *The lot charge will apply per order release.*
