

# Digest 176

Global Specialist in Energy Management

Power Management

Process & Machines Management

IT/Server Room Management

Building Management

Security Management

# The only good watt is a negawatt.

Due to intrinsic inefficiencies, 33 units of energy consumed at the point of use require 100 units of primary energy.

What's a negawatt? The one you didn't use.

## Energy saved is money saved.

Yes, the smart grid is coming and we are actively implementing intelligence and innovations to help make it a reality. But we need a solution that will save energy and drive efficiency today as we are building the smarter grids of tomorrow.

## Introducing EcoStruxure: Active Energy Management Architecture from Power Plant to Plug™.

Right now, EcoStruxure™ solutions from Schneider Electric™ can reduce your energy use by up to 30% while cutting capital and operational costs. End-use efficiency is where our focus needs to be! The percentage of revenue spent on energy by companies could reach 30% by 2020. And there is an urgent need to reduce CO<sub>2</sub> emissions, especially as energy demand escalates. Energy management is the key – the fastest and most effective solution to curb greenhouse gas emissions while improving business performance. In fact, by 2030, energy efficiency and behavior change will offset more CO<sub>2</sub> than all the new wind, solar, and other alternative energy generation methods combined.\*

## EcoStruxure™

## EcoStruxure solutions cut energy costs today.

As energy prices continue to climb, every unit of energy you save matters. One unit saved at the point of use means three units of primary energy not consumed. Today, only EcoStruxure Active Energy Management architecture can deliver up to 30% energy savings across your buildings, industrial plants, and data centers. You deserve an Efficient Enterprise™!

## How to Use Digest 176

Welcome to the first full color version of the Schneider Electric Digest!

Digest 176 is organized into 29 product sections listed at the right, with color-coded tabs to help you quickly find major product categories. We've added two new sections: Section 28 Universal Enclosures, and Section 29 Advanced Products, with new product offerings that include: Electric Vehicle Charging Stations, Efficient Homes, and Residential Solar Power Solutions.

To aid navigation, a detailed Table of Contents is provided for each section, as well as two indexes in the back of the book: an alphabetical listing and an alphanumeric listing.

The first 32 pages of this Digest highlight a winning lineup of Schneider Electric products, services, and solutions, followed by a two page listing of What's New in each product section.

For the most up-to-date Product Information, visit:

[www.schneider-electric.us](http://www.schneider-electric.us)

## Customer Services

### Customer Literature Center

To obtain literature for product or application needs, contact the Schneider Electric Customer Literature Center. When requesting additional technical catalog information, refer to the catalog section listed at the top of the Digest pages.

**1-800-392-8781**

### Customer Training

Schneider Electric offers performance-based training for Square D™ and Telemecanique™ products. Whether you have purchased equipment to modernize an operation, or are equipping a new site with the most advanced automation solutions, distribution and power equipment, we have the training to meet your needs.

For more information, select Customer Training from the Support and Resources area:

[www.schneider-electric.us](http://www.schneider-electric.us)

**1-866-507-0894**

**Have questions?  
Need technical support or onsite service?**

**Now there's one toll-free number  
to get all the information you need.**

**1-888-778-2733**

The **Customer Care Center** (CCC) is a single point of contact where qualified personnel answer your customer service and technical support questions. Serving all Schneider Electric authorized distributors and customers anywhere in the United States.

**Schneider Electric Services** provides you with power, automation and control, and energy management services to support the lifecycle of your system, process or installation. Our solutions help you get the most out of your investment and keep your facility at peak operational performance. Any brand. Any industry. Any time.

## Schneider Mobile

Access a mobile-friendly version of our website, from the web browser on your mobile device. We have developed a specially formatted version of our most popular web content, including the Digest, for mobile devices.

A mobile version of Schneider Electric's MYSE for distributors is also available

[mobile.schneider-electric.us](http://mobile.schneider-electric.us)

## Energy Efficiency

**Leading the way in  
Energy Efficiency:**

Schneider Electric provides integrated solutions for residential market, buildings, industry and infrastructure, and data centers. Now, you can build a long lasting energy strategy for a growing performance while preserving the environment.

## SolutionOne

An internet based tool that will allow communications with multiple product configurators within Schneider Electric North America to create a "Customer Solution" project bill of material.

**Questions?**

**Send an email to:  
SolutionOne@Schneider-  
Electric.com**

## Seismic Qualification and Capabilities

### Seismic Equipment Ratings

Schneider Electric self certifies seismic equipment ratings to meet the most stringent requirements.

Please contact your local field sales engineer for assistance.

## Selective Coordination

### NEC Requirements for Selective Coordination

Schneider Electric is providing our customers with valuable selective coordination solutions. Contact your local sales office to learn more.

# Schneider Electric brands that deliver the solutions you demand.

## Square D power solutions – ready for the future.

Stamped steel version of the enclosed safety switch with the Detroit Fuse and Manufacturing Company's new trademark – the capital "D" in a square (circa 1915).

Square D™ by Schneider Electric brand NEMA power and control solutions have been trusted over 100 years for performance, reliability, and energy saving design. From residential load centers and metering products to commercial panelboards, energy conserving transformers and safety switches, Square D brand products provide you with quality solutions for distributing and monitoring electrical power. It's more than an electrical system. It's the backbone of today's energy demanding homes and businesses.

## Taking lighting technology to a new level.

Juno™ by Schneider Electric is a leading manufacturer of energy-efficient commercial and residential lighting solutions and advanced system controls. Since 1976, we have been serving customers throughout North America, including electrical distributors, lighting showrooms, contractors, architects, engineers, lighting designers, and commercial establishments, offering them high-quality, innovative products, designed and engineered in the United States. The Juno Lighting Group product family includes over 50,000 items for commercial and residential construction, and includes a rapidly expanding line of eco-friendly LED fixtures for outdoor, recessed, track, decorative, and under cabinet applications.

JUNO LIGHTING GROUP  
by Schneider Electric

## Delivering the best image quality in video security.

Pelco™ by Schneider Electric is a world leader in the design, development, and manufacture of video and security systems ideal for any industry. From megapixel cameras to video management and recording to display, Pelco solutions deliver the best image quality in video security.

> [www.pelco.com](http://www.pelco.com)

## Committed to data center critical power and cooling.

APC by Schneider Electric™ is a global leader in critical power and cooling, providing industry leading hardware, software, and services designed to ensure availability and higher energy efficiency across the residential, business network, data center, and manufacturing environments. The position of APC on the cutting edge of Data Center thought leadership for over two decades has changed the way the world designs, installs, operates, and maintains data centers. APC has unparalleled commitment to innovation and the world's leading R&D investment (more than \$90 million annually) dedicated to critical power and cooling issues.

# PowerPact with Micrologic molded case circuit breakers

Direct access to energy management

## PowerPact™ with Micrologic 15-3000 A

**New-generation circuit breakers with industry leading performance and protection.**

- > Smart – A meter in every breaker
- > Safe – Combines safety and performance with Micrologic™ reliability
- > Simple – Easy to select, install, and use

Increased energy availability

Safety and protection

Energy measurement and control

# TeSys

## Motor starters and IEC contactors

### TeSys™ U self-protected combination motor starters

Used in a single combination, two power bases and five separate control modules cover all motor control applications from 0.15 A through 32 A; 1/4 hp to 20 hp at 480 V

- NEMA® rated for motor control
- UL 508 Type E certified
- 65 kA SCCR rating at 480 V
- Incredible energy savings!
  - » 75 percent less than traditional NEMA motor starters
  - » 50 percent less than traditional IEC

### TeSys D IEC contactors

The best-selling line of contactors and starters in the world, offering high reliability with long mechanical and electrical life. Available in 11 contactor ratings from 9 A up to 150 full-load amps for inductive loads and up to 200 A resistive loads.

- Component high-fault short circuit current ratings (available mid-2012):
  - » 9 A to 32 A: 65 kA
  - » 40 A to 150 A: 100 kA
- Energy efficient
  - » 50 percent less than traditional NEMA motor starters
- Dual mounting options: panel and DIN-rail
- IP20 finger-safe screw connections terminals
- Wiring connection flexibility, including spring, ring tongue, slip-on, and screw clamp terminals
- Everlink® termination technology (on 40-65 A products)
- Easy-to-install accessories are common for entire line

# Engineering Services

Schneider Electric Engineering Services offers power system design and upgrade, as well as studies and assessments to promote safety and to help ensure reliable and continuous power.

With over 40 years of experience and over 100 professional engineers strategically located throughout the U.S., the Engineering Services team has the knowledge and experience to get the job done.

## Power system design and upgrade projects

- Turnkey Solutions, including Solar and Brownfield Projects
- Electrical Design for Relay Upgrades
- Design for Generator and Synchronous Motor Exciter Packages
- Grounding System Evaluation and Design

## Power system studies and assessments

- Power System Assessments and Code Audits
- Arc Flash Analysis
- Circuit Loading Study
- Harmonics Assessment
- Power Factor Analysis
- Power Quality Analysis
- Short Circuit Study
- Time-current Coordination Study

# Industrial Repair Services

Schneider Electric Industrial Repair Services is the leader in industrial electronic repair management, repairing over 120,000 different products from more than 2,500 manufacturers.

With over 30 years of industry experience and over 70 highly-trained technicians, the Industrial Repair Services team provides dependable, cost-effective repairs.

## Testing and repair services

- PLCs
- I/O Modules
- AC and DC Drives
- Stepper Drives
- Servo Motors and Amplifiers
- HMI/Operator Interfaces
- Clutch Controls
- Power Supplies
- Counters and Timers
- Machine-specific Controls

## And more!

- Certified, Remanufactured Electronics for sale or exchange
- Engineered Replacement Boards
- Integrated Manufacturing Service Solutions (IMSS)
- Schneider Electric™ Automation Product Upgrades

>> For more information on Schneider Electric Services, visit: [www.schneider-electric.us/go/services](http://www.schneider-electric.us/go/services)

# Electrical Distribution Services

Schneider Electric offers a broad range of electrical distribution services to support the life cycle of any manufacturer's equipment.

Whether you are concerned with providing a safe workplace, increasing electrical reliability, boosting productivity, or reducing operating costs, **you can count on our nationwide network of professional engineers and qualified service representatives** to address your specific requirements.

Our full-range of electrical distribution services include:

## Engineering Services

The power system engineering team from Schneider Electric™ has the knowledge and experience to help facilities manage their energy and solve complex power system issues that may involve equipment, automation, the electrical system, or the utility.

Our engineering services include:

- Power System Assessment and Design Services
- Power Quality Correction
- Power System Analysis including Arc Flash Studies (NFPA 70E Compliance)

## New Installation Services

Reduce risk and help ensure reliable installation and equipment performance.

Our new equipment services include:

- Start-up and Commissioning
- Turnkey Solutions
- Extended Warranty
- Customer Training

## Modernization and Upgrade

Modernization solutions from Schneider Electric Services will upgrade your existing switchgear or motor control centers to current technology. These engineered solutions are available for most major brands and are designed to minimize downtime, improve reliability, and extend the life of your equipment.

Our modernization and upgrade solutions include:

- Direct Replacement and Retrofill Solutions for LV and MV Switchgear
- Direct Replacement Units for LV Motor Control Centers
- Circuit Breaker Reconditioning

 **Want to extend the life of your existing switchgear?**

Register to download our FREE white paper to discover the right solution for your application! Visit [www.SEreply.com](http://www.SEreply.com) and enter key code **b653v**.

emergency services

**24** hours a day

**7** days a week

### **☑ Maintenance and Testing**

If your power system isn't performing, your facility isn't performing. To help ensure the reliable operation of your electrical equipment, periodic maintenance, cleaning, and lubrication is needed. Failure to do so could result in costly downtime.

Our maintenance and testing services include:

- Preventive Maintenance
- Maintenance Record Services
- Service Agreements

#### **Is your maintenance program meeting your expectations?**

Register to download our FREE White Paper "Understanding Maintenance Contracts and Requirements for Low Voltage Power Distribution Equipment." Visit [www.SEreply.com](http://www.SEreply.com) and enter key code **b653v**.

### **⚡ Substation Solutions**

Schneider Electric sets the standard in quality for the electric industry and serves utilities with highly-reliable products and services.

Our substation solutions include:

- Design and Construction Services to 765 kV
- PowerSub™ MV Vacuum Substation Breakers
- Substation Service & Repair

### **💡 Custom Solutions**

Do you have unique product requirements or complex power issues? Regardless of the application or location, our engineering, manufacturing, field service, and project management teams can evaluate your situation and propose a cost-effective solution that minimizes downtime or lead-times.

Our custom solutions include:

- Special Application Switchgear
- Solar Power Systems
- Turnkey Installations

#### **Additional Schneider Electric service teams include:**

##### **Automation and Control Services**

Our services support the latest innovations in industrial automation. In addition, they ensure our legacy products function at modern performance levels.

##### **Building Lifecycle and Energy Services**

Our focused approach integrates multiple systems to achieve enterprise-wide facilities management that uses less energy, tightens security, speeds response times, and maintains optimal occupant comfort while reducing overall operating costs.

##### **Critical Power & Cooling Services**

Whether you are planning, building, or operating a data center, we have the expertise and services to support you through the many phases of the data center lifecycle and keep your mission-critical applications operating at optimum performance.

##### **Energy Sustainability Consultation Services**

Our energy experts work on-site with knowledgeable plant personnel to develop a long-term "Energy Action Plan" that serves as the blueprint for ongoing energy savings.

##### **Power Monitoring Services**

Our power monitoring services increase the reliability and efficiency of your installation by providing detailed reporting, testing, and analysis capabilities for your systems and related components.

##### **Projects and Engineering Center**

Our Projects and Engineering Center provides full-service contract and project management capabilities to assist with complex or high-risk projects, resulting in a streamlined, reliable project solution.

For more information call 1-888-778-2733 or visit [www.schneider-electric.us/go/services](http://www.schneider-electric.us/go/services)

### Energy and Sustainability Consultation

Our experts develop your blueprint for energy savings.

### Energy Monitoring

Gain visibility to analysis of your facility's energy performance — even when you're off-site.

### Energy Savings Projects

Realize energy savings and reduce utility bills by up to 30%.

# Your building's energy: See it, manage it, and save it with our life cycle services.

## Why spend tomorrow what you can save today?

### How much did you spend on your building's energy today?

As regulations tighten and rates rise, businesses are learning that wasted energy is wasted money. Fortunately, the right partner will show you how much energy your building consumes, and more importantly, where energy — and money — can be saved.

### Our energy services deliver immediate value to your business.

Efficiency improvements reduce the total cost of energy per square foot over the life cycle of your facility. And only we provide the expertise of a Certified Energy Architect, scalable EcoStruxure Active Energy Management™ architecture, and much more that can deliver energy savings of up to 30%, starting today.

### 30% energy savings is just the beginning.

As The Global Specialist in Energy Management™, we are the only provider of comprehensive services and open system architecture that guarantee compatibility among the energy management domains of Power, IT Room, Process & Machine, Building, and Security, allowing businesses to scale up the savings and efficiency from the building to the enterprise level.

It is no wonder that about 75% of *Fortune* 500 companies choose Schneider Electric™ to meet their energy needs. With a savings opportunity like this, future-ready companies know that efficiency initiatives they couldn't afford to implement in the past are projects they can't afford to put off another day.

Schneider Electric is your ideal energy manager, energy expert, and green partner with specialized services for these facilities and more:

#### Healthcare

Provide superior patient care while controlling costs, eliminating waste, and doing more with less.

#### Hotels

Maximize guest delight while reducing OpEx, improving your carbon footprint, and offering a safe hotel stay.

#### Retail

Reduce costs and keep customers safe and comfortable while complying with environmental efforts and regulations.

#### Office Buildings

Provide a flexible and productive atmosphere while retaining long-term income and asset value under tightening environmental regulations.

#### Education

Make buildings and campuses safe and efficient while providing a greener, more productive learning environment.

#### Life Sciences

Create a sustainable business while meeting regulations, reducing time to market, and enhancing the security of employees and assets.

# 30%\* off your building's energy bill is just the beginning.

Imagine what we could do for the rest of your enterprise.

Managing complex building environments while meeting your energy efficiency targets is no small task. Our EcoStruxure™ energy management architecture achieves this elegantly through intelligent integration of building systems on a single IP platform.

## The savings go far beyond buildings.

Today, only EcoStruxure energy management architecture by Schneider Electric™ delivers up to 30% energy savings, uniting energy-intensive systems like HVAC, access control, video security management, and lighting control across your entire enterprise. Saving up to 30% of a building's energy is a great beginning, and thanks to EcoStruxure energy management architecture, the savings don't have to end there.

Learn about saving energy from the experts!

## EcoStruxure™

Active Energy Management  
Architecture from Power Plant to Plug™

### Data centers

From the rack to the row to the room to the building, energy use and availability of these interconnected environments are closely monitored and adjusted in real time.

### Industrial plants

Open standard protocols allow for system-wide management of automated processes with minimized downtime, increased throughput, and maximized energy efficiency.

### Buildings

Intelligent integration of security, power, lighting, electrical distribution, fire safety, HVAC, IT, and telecommunications across the enterprise allows for reduced training, operating, maintenance, and energy costs.

# 30%

Schneider  
Electric™

# There's more than the "tip of the iceberg"

Typically, we think of them as huge peaks rising above the water. In reality, the majority of an iceberg is actually under the water, out of view. Utility savings at most facilities can be thought of in much the same way.

Think of your utility bills as being the peak, easy to see every month. By simply installing different light bulbs or a PowerLogic™ power monitoring system, you can realize 1 – 4 percent savings — but that's just the "tip of the iceberg" in terms of your potential savings.

The majority of savings, using Schneider Electric™ energy solutions, can be derived by looking beyond a utility bill — or below the surface. An additional 2 – 5 percent can be saved through better equipment utilization and energy monitoring tools. Another 10 percent can be found by improving power system reliability, and the savings that derive can be utilized towards the capital purchase with a performance contract.

At Schneider Electric, we pride ourselves on reliable Square D™ by Schneider Electric products, innovative solutions, expert engineering services, and our ability to provide single-source power management solutions. It's not just a concept to us, it's a legacy and a promise. We are the Energy Management specialists, striving to help you Make the Most of Your Energy<sup>SM</sup>. For more information contact your representative or go to [www.schneider-electric.com](http://www.schneider-electric.com).

Square D PowerLogic systems offer end-to-end advanced solutions for a high return on investment in achieved energy savings.

## Commercial/retail centers

- Attract high-quality, long-term tenants
- Implement in a nationwide chain or one site
- Allocate costs according to actual energy used

## Medical complexes

- Experience outstanding quality and reliability
- Verify utility bills and eliminate errors
- Improve power system uptime

## Education campuses

- Reduce expenses
- Provide environmental leadership
- Gain insights into how to reduce energy use in common areas

## Upgrade payback

Average payback period and ROI of single-technology projects

Technology	Average Payback Period	Average ROI
Meters and Monitors	.5	200%
Lighting	2.2	45%
Controls	2.3	43%
Motors and Drives	2.4	42%
HVAC	3.6	28%
Onsite Power	4.3	23%
Building Automation	5.9	17%

## Three dimensions of energy and power management savings

### [ Reduce energy costs ]

- Access automatic meter reading from revenue, piped utility pulses, and sub-metering
- Verify and reconcile utility bills to catch errors
- Reveal energy inefficiencies and waste
- Allocate or sub-bill energy costs
- Optimize procurement through forecasting, load aggregation, and rate analysis
- Implement power factor correction, lighting control, and fact-based reduction strategies
- Reduce demand through load scheduling, load control, or generator control
- Respond to utility curtailment signals
- Make smart energy efficiency decisions by combining your experience with ours for Total Energy Control strategies that result in an actionable energy plan with quick payback

### [ Optimize equipment utilization ]

- Maximize use of existing equipment capacity to defer capital expenses
- Benchmark, profile, and compare the performance of facilities or processes
- Document emergency power system testing results
- Prolong equipment life by identifying transformer and other equipment stresses
- Balance loads on substations, panelboards, and other power equipment
- Perform proactive equipment maintenance and equipment monitoring of transformers, MCCs, switchgear, switchboards, circuit breaker status, protective equipment, capacitors, generators, panelboards, PDU, UPS, and other piped utilities

### [ Improve reliability and uptime ]

- Get early warning and remote alarm notification of impending problems
- Isolate problem sources quickly using real-time, historical, and event data
- Pinpoint root cause with precise GPS time and event sequence recording
- Verify reliable equipment operation and identify vulnerabilities
- Diagnose transients, disturbances, power quality, and harmonics
- Determine appropriate corrective measures based on accurate data
- Automate power system throw over and load preservation schemes
- Leverage Energy Solutions' Engineering Services as your single source energy and power management solution provider — product, implementation, consulting, assessment, and support services

# Our energy expertise will help sustain America's bright future.

Federal Buildings

Laboratories

Data Centers

Defense Installations

Hospitals

## Together, we will meet your facility's energy management challenges of today and tomorrow.

### Your energy expert and green partner

Our experience with government facilities and campuses allows you to realize customized, integrated solutions with up to 30% energy savings, starting today.

Schneider Electric™ specializes in these critical domains of government facilities:

- > Power Management: Experience efficient power use, reliable power supply, low equipment failure rates, and minimized downtime with our proven solutions.
- > IT Room Management: Optimize data center availability and efficiency through monitoring, automation, planning, and implementation.
- > Building Management: Leverage existing investments to achieve reduced energy costs, improved comfort, and increased productivity with our integrated building systems.
- > Process and Machine Management: Eliminate downtime and optimize your systems' performance with our specialized solutions.
- > Security Management: Reduce risks with our integrated security solutions that create the most secure environment possible.

### EcoStruxure: Active Energy Management Architecture from Power Plant to Plug™

EcoStruxure architecture, our approach to integration, saves CapEx and OpEx over your facility's life cycle, from streamlined procurement through long-term maintenance and support. This innovation optimizes energy measurement, management, reliability, efficiency, and security across your entire enterprise.

Visit our NEW **Government Knowledge Portal** for FREE white papers, like this one: "Enacting a Life Cycle Approach in Federal Facilities."

Make the most of your energy<sup>SM</sup>

### Flexible Machine Control:

100 percent flexibility of your machines with a single software suite, SoMachine, plus multiple hardware control platforms.

### Tested, Validated Architectures and Functions:

Predefined and dedicated to your specific needs for optimum results.

### Co-Engineering Services:

Design optimal machine solutions with innovative help from our experts.

# MachineStruxure™ cuts time to market by up to 50 percent.

New integrated machine building solution features single software, proven architectures, and design experts.

Machines today need to be faster, more flexible, and must be able to solve more complex automation functions than ever before. As a machine builder you must constantly look at innovative ways to build more energy-efficient machines, reduce development costs, and get your machines to market much faster.

Our new MachineStruxure™ solution is designed to answer these challenges and to help you take complexity out of the business through use of:

- **Flexible Machine Control:** SoMachine™ is a single software suite that runs on multiple hardware control platforms to achieve 100 percent machine flexibility: HMI, motion, drive, and logic controllers. With SoMachine, you need only one software, one cable, and one download to design, commission, and service your machines from a single point.
- **Tested, Validated Architectures and Functions:** Build a strong automation platform through the use of our ready-to-use, proven, and fully transparent automation architectures and application function libraries implemented with FDT/DTM technology. Our architectures are predefined and dedicated to your specific needs for optimum results.
- **Co-engineering Services:** Design the optimal solutions for your customers with innovative help from our experts! We implement the latest technological evolutions and provide a unique hands-on industry application knowledge that helps you stay ahead of the competition.

**“SoMachine offers optimal flexibility when implemented on a standard machine, and it has huge potential in terms of system implementation.”**

Fabrizio Ghio, software designer and machine developer at Costa Levigatrici in Italy

**Schneider**  
Electric™

# A lighting control solution for every need...

Powerlink intelligent panelboards, Relay Panels, C-Bus network lighting control, and Occupancy Sensors from Schneider Electric create one of the most comprehensive energy-saving offers in the industry. They combine automated and web-enabled control with occupancy-based solutions and dimming capabilities.

Powerlink Intelligent Lighting Panel

## Powerlink

It takes more than just energy-efficient lighting to significantly reduce your energy costs. Powerlink™ lighting control systems reduce energy costs as much as 30 percent by automatically turning off lighting during unoccupied periods. Retrofit is also easy with Powerlink lighting control systems, with payback periods often less than two years. Compared with other energy savings technologies, a Powerlink control system can provide both a lower initial capital outlay and greater energy savings.

Relay Panels

- Eliminate unnecessary energy consumption by switching lights off during non-occupied periods
- Reduce demand by shedding lights during peak demand periods
- Improve productivity by controlling and monitoring panels from remote locations
- Reduce potential lost time and liability by receiving instant alerts to important occurrences with remote email alarming
- Gain important insights into lighting system performance with integral metering

## Relay panel

The Lighting Control Relay Panel family offers both standalone and integrated customized solutions that combines ease of use, versatility, and durability. Each system offers an energy saving solution as unique as your needs.

- LPS Standalone panel
- LPB panel with BACnet capabilities
- LPL LonWorks console-operated panel

Three solutions that adapt to your particular configuration needs.

C-Bus Lighting Control

## C-Bus

C-Bus™ Network Lighting and Whole Home Controls provide a vast array of capabilities, scalable for virtually any size job, from a single room to an entire network. Eliminate wall clutter with programmable multi-function touch screens and keypads. Dim lights, control lighting scenes, HVAC, and audio, while integrating with third party devices using the same touch screen or keypad.

## Occupancy sensors

Occupancy sensors help building owners achieve energy savings and energy code compliance with sensors that are easy to select, install, and commission. Automatically turn lights on/off based on occupancy. Use sensors for Daylight Harvesting to adjust light levels based on natural lighting in areas with large windows or skylights. Use either passive infrared (PIR), ultrasonic, or dual-technology models for ultimate detection capability.

## Service and support

Reliable lighting control systems deserve reliable support to match. With Schneider Electric™ lighting controls, you can always count on our Schneider Electric field sales engineers and factory-trained experts for help when you need it — before, during, or after installation. Whether that means local support, troubleshooting, or on-site commissioning.

**From smaller residential lighting control installations, to entire facility-wide control, Schneider Electric Lighting and Whole Home Controls has the precise solution to meet your needs.**

Occupancy Sensors

# Diversify your offer with the EcoXpert certification program.

Developed specifically for electrical contractors to grow their business and increase revenue. The Schneider Electric EcoXpert™ program helps you to **advise, sell, and install** a broad range of pre-engineered energy solutions across commercial, industrial, and high-end residential applications.

## Program benefits:

- **Accreditation:** gain knowledge and skills to improve your professional recognition and marketability
- **Specialized training:** access to ongoing technical, installation, and best practices curriculum courses
- **Marketing collateral:** enhance your ability to market your business with customizable materials
- **Communication strategies:** includes: how to sell, who to speak to, key questions to ask, and much more
- **Technical expertise:** 24/7 access to tools that help facilitate site assessments and ROI estimates
- **Pre-engineered solutions:** ability to sell a broad range of energy efficient and renewable energy solutions

## Certification Paths:

### Energy Efficiency

Lighting and Lighting Controls

Power Distribution

Secure Power

HVAC Controls

Energy Monitoring

### Renewable Energy

Electric Vehicle Charging

Solar

# Driving energy efficient solutions from Power Plant to Plug™.

Schneider Electric™ is committed to developing energy efficient solutions that support sustainable development, and our electric vehicle (EV) chargers are no exception. EVlink™ charging solutions promote a greener, more economical transportation option while helping to reduce the world's global footprint. Schneider Electric offers a wide range of EVlink charging stations that allow users to recharge where they live, work, and play.

## The total package from one provider

- **Compatibility:** UL listed and SAE J1772 compliance ensures compatibility with any plug-in hybrid or electric vehicle entering the market.
- **Support:** Installation and maintenance provided by certified EcoXpert™ contractors, who have been trained to install EVlink solutions and are able to offer an extended warranty option.
- **Efficiency:** Smart-grid connectivity allows for maximum energy management capabilities, assisting with energy control and efficiency.
- **User friendly:** Status indicator lights identify when the charger is ready to charge, if the vehicle is charging, or if the charger requires attention.
- **Safety:** An integral ground fault interrupter set at 5mA provides protection if a fault is detected from a power outage or lost connectivity. Automatic recovery and restart functionality ensures charging will resume following a power loss or ground fault detection.

Exclusive for  
US electrical  
contractors

# Empower your operations with the Schneider Electric Advantage.

Get FREE business, marketing, training, and product resources developed exclusively for electrical contractors.

Now more than ever, you need real-world solutions to grow your business and meet customer needs. You need a partner who can help you tap into market-leading business, marketing, and electrical industry expertise to enhance your operations.

The **Schneider Electric Advantage** gives you access to:

## Marketing tools

Market your business and improve customer relations with new tools including radio scripts, customizable collateral, and promotional items.

## Training and education

Get ahead with a broad range of educational courses designed specifically for electrical contractors through web-based curriculum and instructor-led training.

## Product information

Find the latest product, service, and solution information for Schneider Electric™ brands including troubleshooting, technical documents, and online tools.

Access our **FREE** online training  
when you register for

# Building a smarter grid with reliable, efficient energy

How Schneider Electric smart grid-ready products and solutions help balance your grid equation

The electricity market is changing. And every day, end-users' expectations increase in terms of reliability and quality, and they gain greater awareness of energy's environmental impact.

It's an evolution. But as our reliance on electricity grows globally, the ways in which we produce, distribute, and use energy must also evolve. The solution will not only involve smarter demand, but also smarter supply — and as such, a smarter grid is at the heart of the issue.

As The Global Specialist in Energy Management,<sup>™</sup> **Schneider Electric<sup>™</sup> is smart grid-ready**, enabling the products and solutions that support and connect the five key domains of a smarter grid:

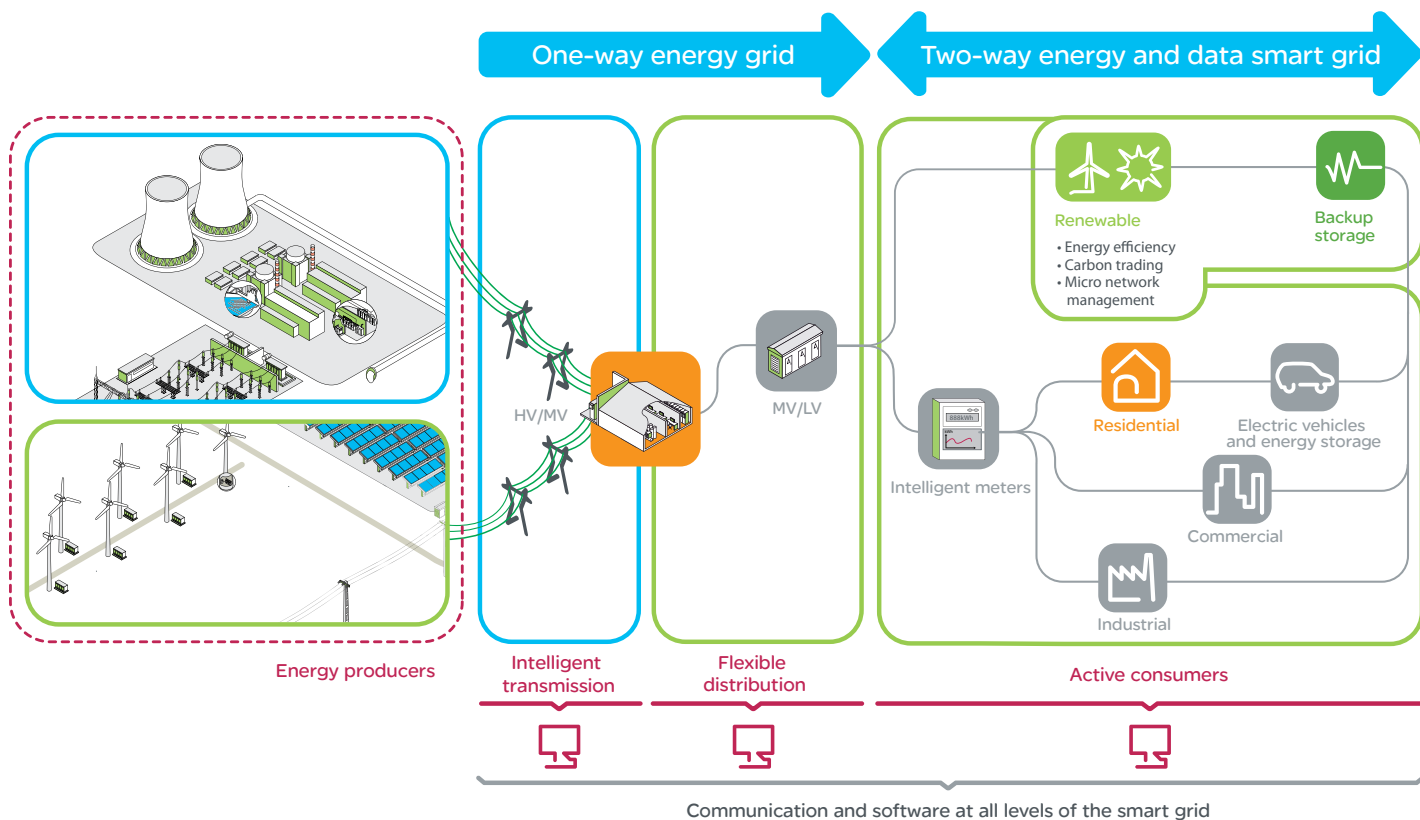

- Flexible distribution
- Smart generation
- Demand-side management
- Efficient Home<sup>™</sup> (including electric vehicles)
- Efficient Enterprise<sup>™</sup> (buildings, industrial facilities, and data centers)

Our vision isn't just to connect our customers to the smart grid — but also to connect them with each other, facilitating smarter interactions and leading to increased energy management capabilities.

## Our smart grid solutions include:

- **HV/MV Substations**
  - » Substation automation and protection systems compliant with IEC 61850
  - » Gas-insulated switchgear
  - » Station breakers from 15 kV to 38 kV
  - » Capacitor banks and control
  - » Power quality and grid revenue metering
  - » Phasor measurement units
- **Feeder Automation**
  - » Volt/Var management
  - » Automated load break switches
  - » Reclosers and sectionalizers
  - » Communicating faulted circuit indicators
  - » Private license and public mesh network radios
- **Renewable Energy Connectivity**
  - » Switchgear
  - » Protection and control
  - » Power quality and revenue metering
  - » Harmonic filtering
  - » Grid-tie substations
  - » Turnkey project design and management
  - » Smart solar inverters for residential through utility scale projects
  - » Pre-fabricated inverter and transformer stations
  - » Remote SCADA software
- **Electric vehicle load management**
  - » Smart charging stations for residential and commercial applications
  - » Charging station infrastructure management software and services
  - » Communications and integration with other systems
- **Demand Response Consulting**
- **Energy Management Services**
  - » Power system assessments
  - » Equipment upgrades and retrofits
  - » Maintenance and testing
  - » Asset management
  - » Design services
  - » Project management

### HV/MV substations

Complete grid-connection turnkey project management including design, engineering, installation, and maintenance to increase service continuity through trouble-free and reliable operations.

### Demand response programs

Energy auditing services and consultation to assess the best load reduction strategy, including estimating the financial opportunity of Demand Response activities. Comprehensive offer including energy meters and software tools for control, metering, and data management.

### Renewable energy connectivity

Solar and Wind solutions compliant with local regulations enabling uninterrupted connectivity of intermittent sources through end-to-end electrical operation (conversion, transformers, MV network, grid connection, control, supervision, monitoring, and security). Packaged solutions allow for maximum return on investment, driving the cost of renewable energy to grid parity.

### SCADA distribution management systems

Efficient solutions for underground and overhead network management through status updates, complex switching assistance, multitasking control, monitoring functions, and network evolution planning.

### Feeder automation

Flexible, scalable, and simple solutions to reduce outage duration and operate distribution networks more efficiently.

### Energy management services

Prevention- and prediction-focused asset productivity management based on maintenance and retrofitting solutions, system assessments, and uptime audits as well as network planning and demand response consulting.

## Welcome to the 2020 home.

It might have been built in 1925, but it's the most contemporary home in the neighborhood. Thanks to the Wis<sup>er</sup>™ energy management system from Schneider Electric™, any home can be brought into the Twenty-First Century.

The addition of a Wis<sup>er</sup> energy management system not only improves a home's energy efficiency, but adds up to significant savings on utility bills that can even offset the cost of other remodeling upgrades. The Wis<sup>er</sup> system helps homes use less power and lower utility bills by employing user-friendly technology that's easy for homeowners to understand, manage, and control, even remotely, anytime from anywhere. The Wis<sup>er</sup> systems' smart thermostat, in-home display, and energy dashboard provide real-time energy information to homeowners, alerting them when a home's energy usage is high, so adjustments can be made accordingly, saving them from paying higher rates during peak demand times.

The great news is that any home, no matter its age or architectural style, can be retrofitted and benefit from the Wis<sup>er</sup> energy management system. Just knowing a home is environmentally friendly and energy efficient is not only a major attraction to today's homeowners, but adds great equity in a home.

The **Wis<sup>er</sup> energy management system** enables innovative energy conservation that helps homeowners use less power while significantly lowering utility bills.

Green: Low (least expensive)

Blue: Medium

Orange: High

Red: Warning, extremely high (most expensive)

Control your HVAC system-based on the pricing you program into Wis<sup>er</sup> EMS' smart thermostat. The backlit feature visibly displays real-time energy output and costs incurred, then alerts you with unique color-coded warning screens when energy output is high and needs to be adjusted.

Find out just how **simple and cost effective** installing the Wis<sup>er</sup> energy management system can be, and how it will continue to significantly impact energy bills in the years ahead.

Visit [www.SEreply.com](http://www.SEreply.com) and enter key code **j566v** for more information.

**Schneider**  
Electric™

## A home is more than rooms of a house.

It is a refuge, a place of comfort designed to provide an environment where memories can be made, relationships built, lives nurtured, and dreams realized. Additionally, a home is an investment vehicle where the returns are counted as appreciation in value, but also in the monthly energy savings you generate. At Schneider Electric™ we help you create quality, efficient, and productive homes with smart, next generation residential energy technology that takes a home to an unprecedented level.

Adding energy efficient solutions through installing Juno™ by Schneider Electric LED fixtures, reliable Square D™ by Schneider Electric power distribution products, advanced APC by Schneider Electric™ power protection devices, state-of-the-art solar inverters, or electric vehicle charging stations, couldn't be easier and comes without sacrificing comfort or convenience.

Our active energy monitoring technology empowers you to minimize wasted energy and take control of your home's energy usage and output without sacrificing comfort or convenience. From the home office to the bedroom, from the kitchen to the home theater and garage, Schneider Electric transforms every room of a house into the type of efficient, model environment homeowners seek today.

 Learn about the complete residential solutions of Schneider Electric, visit [www.SEreply.com](http://www.SEreply.com) and enter key code **j562v** for more information.

### Looking to upgrade a residential service while saving time and effort?

Make your life easier with the Square D Service Upgrade Load Centers. Its inventive design makes challenging flush-mount service upgrade jobs faster, easier, and cleaner.

The uniquely designed load center end-plate features four removable end plates with four feed-through points, which allow the enclosure to be positioned in the wall in as little as five minutes. The lengthier cover and door eliminate any need for drywall repairs.

*Thanks Schneider Electric! The Square D Service Upgrade Load Center is a fantastic product! It makes my life easier and reduces installation time!*

# How can Schneider Electric help your designs meet today's demands?

## Smart intelligent designs

Make your designs smart from the very beginning of conception, to the final design.

### Design solutions

The task of designing has never been more difficult — new codes, standards, and evolving technology, such as Building Information Management (BIM), all impact a building's design, speed, and efficiency. With teams of on-staff professional engineers and regulatory experts, Schneider Electric™ provides the support you need to accomplish your projects on-time, with intelligence included.

### Energy management solutions

As The Global Specialist in Energy Management™, Schneider Electric focuses heavily on solutions and strategies around sustainable design and energy management. Codes and standards such as NEC® 2011 and ASHRAE 90.1 are under continuous maintenance, as well as the constant evolution of federal and state energy regulations. Our energy experts can help you stay up-to-date. Today project designs require more focus on energy efficiency. Schneider Electric can provide the insight to help your next design exceed its energy goals.

### New web site

Schneider Electric is committed to providing consulting engineers access to comprehensive engineering information that can help you throughout your design process. The consulting engineer website of Schneider Electric is built for you.

Easy access to:

- Design/application guides
- Product specifications
- Technical white papers
- Codes and standards
- Product data bulletins
- Calculators and online tools

### Safety solutions

Safety is a critical component of any design, and safety regulations must be kept in order to maintain maximum protection against dangerous hazards. Our experts can provide the design information and recommendations you need to understand the dangers of arc flash and how to mitigate risks while complying with current guidelines. Your designs need to be safe and reliable in order to protect and save lives for years to come. Get Schneider Electric involved early in the design process to insure ongoing safety is built-in.

# Square D Integrated Power and Control Solutions (IPaCS)

## Innovative solutions that save space, labor and time

For over 30 years, Square D by Schneider Electric™ IPaCS™ business has been providing integrated electrical solutions for retail construction, commercial, and industrial projects.

The Square D IPaCS family combines electrical distribution equipment, building controls and automation into a single factory-assembled and pre-wired enclosure. These innovative solutions save valuable floor space, shorten construction cycle times, and reduce installation and material handling costs.

## Why specify solutions from Square D IPaCS?

### Minimize space requirements.

Electrical panels and transformers are stacked in a modular line-up, which saves valuable floor and wall space.

### Reduce contractor labor risks.

Because the contractor is swapping a variable cost (labor) for a fixed cost (product), their risk on the overall project is reduced.

### Reduce material handling.

Fewer items to receive, inventory, and move around the jobsite because components are factory-installed and pre-wired into a single lineup or enclosure.

### Save design time.

For designs with multiple locations, standardized designs can be created to provide consistency between sites.

### Shorten construction cycle times.

Pre-assembled construction means less time required on-site to install, reducing the overall construction cycle.

### Single point of responsibility.

Third-party controls/components can be installed, wired, and tested in IPaCS integrated equipment at the factory to assure it works like it's supposed to when it gets to the jobsite.

Integrated power center with third-party controls

## Solutions available from Square D IPaCS

### Modular Panel System (MPS)

Tailored to customer specifications and typically includes panels, lighting control, and equipment spaces.

### Integrated Power Center (IPC™)

For more complex applications, including HVAC controls, lighting controls, power quality and power conditioning products, TVSS, building management systems, and power metering/monitoring solutions, as well as electrical distribution equipment.

### Integrated Power Center 2 (IPC2™)

Features include those found in the IPC and are provided in a free-standing enclosure that can be front and rear aligned when transformers are included. IPC2 is seismically qualified. Enclosure options include NEMA® 1, NEMA 1 with driphood and NEMA 3R.

### Standby Power Connection Solutions (SPQ)

Provides the ability to quickly connect to a portable standby power generator. Suitable for N-3R (outdoor) installations.

## Are you overlooking an enormous market?

With the demand for energy skyrocketing, customers will require more sustainable energy solutions. Schneider Electric™ EVlink™ charging stations were developed with this key factor in mind, providing a greener, more economical transportation option while helping to reduce the world's global footprint. EVlink electric vehicle (EV) charging solutions are designed to meet the needs of any customer, while providing the safety you demand from a partner you trust.

- All charging stations are designed and manufactured in-house by Schneider Electric
- UL listed and SAE J1772 compliant to ensure compatibility with any EV entering the market today
- An integral ground fault interrupter set at 5 mA provides superior protection to users if a fault is detected

# Schneider Electric makes the connections.

## Maximum efficiency and availability from rack to row to room to building

### Making the connection between IT and facilities

With today's technology challenges, Schneider Electric™ understands that data centers must be viewed as interconnected environments — from rack to row to room to building. We call this integration the data center physical infrastructure or DCPI. The only clear path to the highest availability and maximum efficiency, DCPI comprises power, cooling, physical security, and rack systems and is monitored and managed via software solutions and professional services.

### Making the connection between efficiency and availability

Today, maximized energy efficiency and guaranteed availability must work hand in hand. So Schneider Electric offers integrated cooling strategies across the DCPI. This hybrid approach delivers true energy savings — but never at the expense of availability. And we further optimize availability and efficiency with an integrated software platform that enables end-to-end monitoring and management of all DCPI domains. This holistic solution provides visibility and interoperability across the DCPI.

### Making the connection with key industry partners

Data centers can't be built without constant communication and coordination with vendors and other key players. Only Schneider Electric has the consulting and services network, personal relationships, and real-world experience to give you the single point of contact you need to take your integrated data center from envisioned to online.

### Integrated architectures for Active Energy Management™

- > **Power** The power domain connects it all — from generators to UPSs to PDUs — for cross-vendor interoperability.
- > **Cooling** Our highly efficient integrated solutions combine chillers, perimeter cooling, hot aisle containment, and row-based options to maximize efficiency and guarantee availability.
- > **Physical Security** Our single-pane view includes access control and surveillance across one or multiple facilities.
- > **Rack Systems** Interconnected, any-IT, vendor-compatible rack enclosures, accessories, and air containment solutions support HD processing needs.
- > **Services** The professional services of Schneider Electric provide one point of contact for data center planning, building, and operation.
- > **Management** Our exclusive integrated software architecture removes management “silos” for greater energy awareness and efficiency and higher availability across the entire DCPI.

## Seeing is believing

When you're trying to solve a business or engineering challenge, you need a team of industry experts with extensive knowledge of your industry, as well as the willingness to go anywhere, work with any supplier, to find the most cost-effective, complete solution for you.

As The Global Specialist in Energy Management™ and sustainable manufacturing, we're always coming up with new ways to help businesses work better, faster, more efficiently, and profitably.

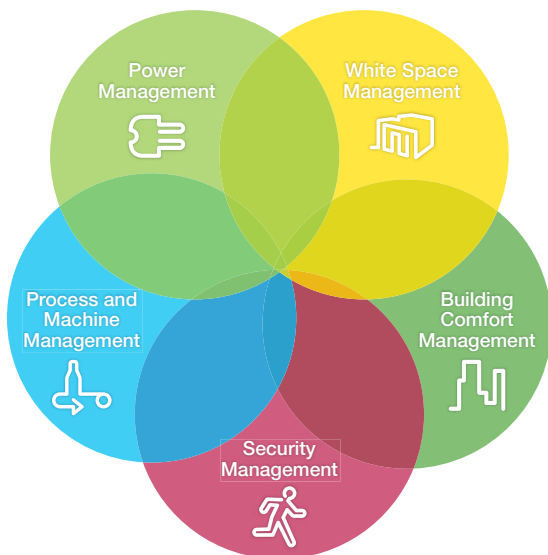

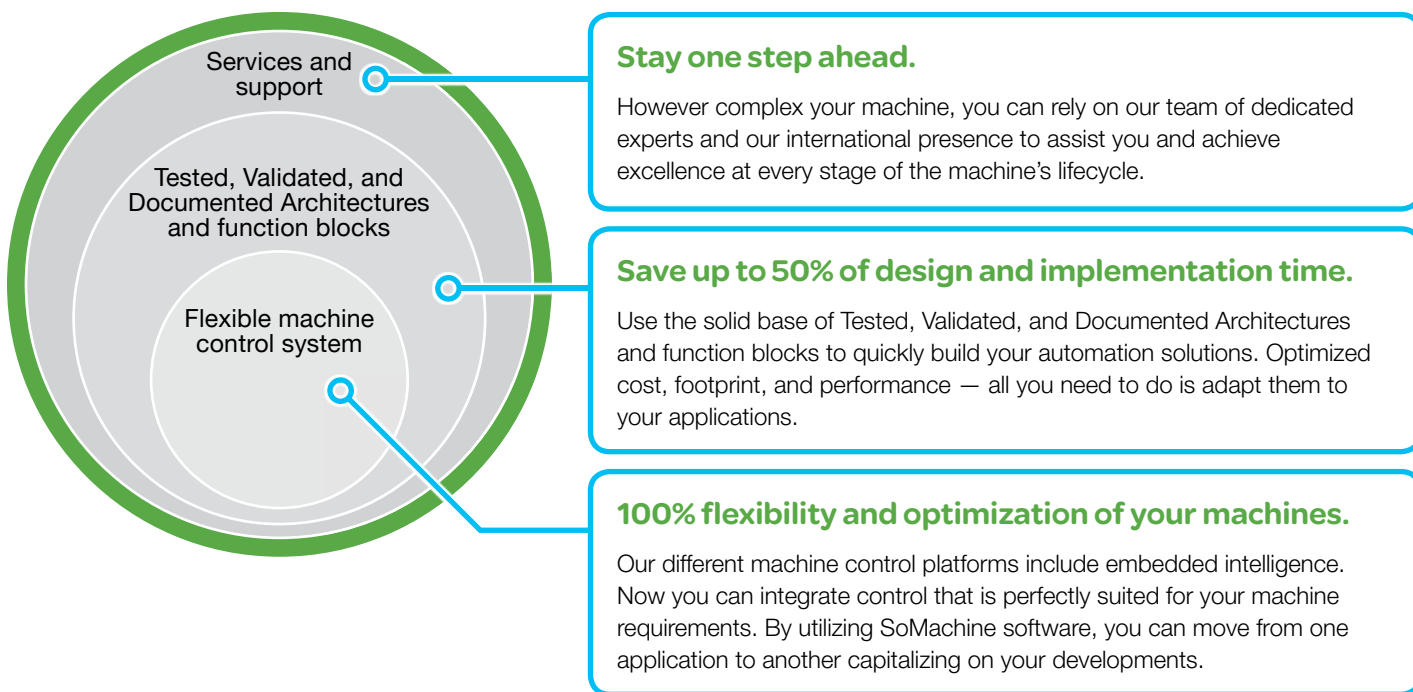

That's why we have developed the Schneider Electric™ Centers of Excellence and Innovation Centers. To simplify your understanding of the broadest range of power, control, automation, safety, security, and energy management solutions, and how they can benefit your business.

These facilities give you the ability to see and touch live demonstrations of the innovative solutions for both OEM manufacturers and industrial facilities. You also get access to the multi-disciplined teams that can configure and customize your solutions to meet your specific needs and further minimize your future risk. These experts have access to fully-equipped laboratories, numerous technical experts and the resources of the global Schneider Electric organization all with the sole purpose of demonstrating to you the commitment of Schneider Electric to delivering best-in-class solutions to your business challenges.

# MachineStruxure solutions

Automation solutions for industrial machines that can save you up to 50% of design and implementation time.

MachineStruxure™ helps you design integrated, energy-efficient, and cost-effective machines, while maximizing performance and reducing design time and time to market. Based on Tested, Validated, and Documented Architectures (TVDA), MachineStruxure incorporates flexible and scalable hardware platforms with SoMachine,™ a comprehensive single software suite with application function block libraries. Plus, our hardware control platforms optimize control through embedded intelligence in drives, HMI, motion, and logic controllers.

## MachineStruxure, one of the mainstays of EcoStruxure

EcoStruxure™ is a system based on Active Energy Management™ architectures, from an electrical power plant to a single electrical socket. EcoStruxure enables you to benefit from intelligent and simplified energy management systems, to reduce your investment and operational costs, and reduce waste resulting in energy savings up to 30%.

>> Learn more about MachineStruxure, visit [www.SEreply.com](http://www.SEreply.com) and enter key code **j546v**.

# Plantstruxure solutions

As the foundation of the Schneider Electric™ EcoStruxure Active Energy Management™ architecture for industrial customers, the PlantStruxure™ collaborative automation solution enables the achievement of both energy and productivity objectives.

This scalable solution delivers a single environment to measure energy use, process data, asset utilization, and machine performance by:

- Reducing engineering, operations, and maintenance costs
- Maximizing plant and production efficiency
- Improving production quality
- Protecting people, plant assets, and the environment
- Supporting production and business decisions

## What makes PlantStruxure unique?

### Scalable for changing times

From tens of I/O to hundreds of thousands, the scalability of our system means that you can start out small and grow as your requirements change.

### Flexible because your process is unique

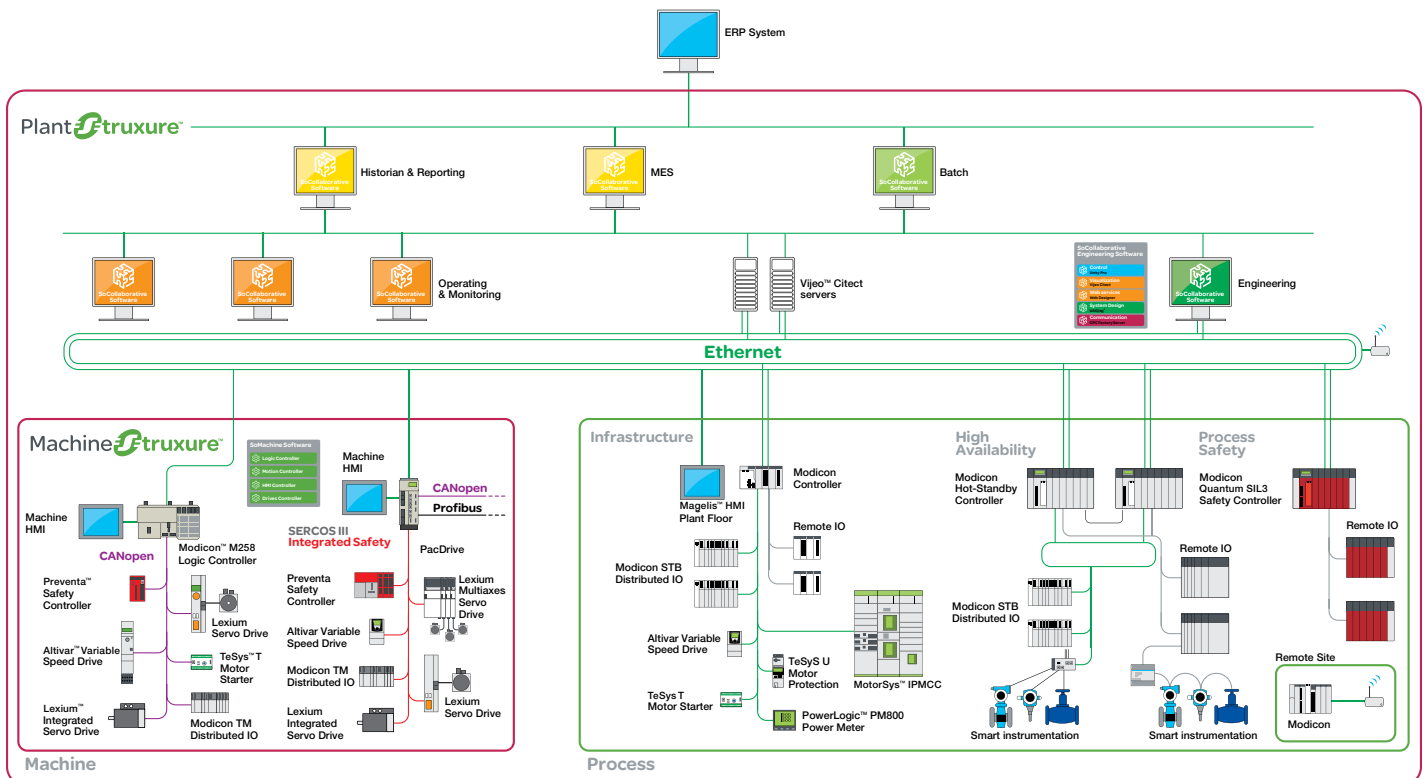

Our system supports the architectures that you need for your application. Single site, multiple sites, distributed control, local control, discrete, process, safety, and batch all within one system.

### Integrated to reduce risk

The entire system, from the manufacturing execution system (MES) to component devices to functionality, are designed to work together with your chosen technology partners.

### Collaborative to increase efficiency

Our system is open to exchange information with other plant and business software, and fosters an environment of collaboration by delivering the process information you need in the way that you like to see it.

# Simplify your machine designs

with Schneider Electric 2-D and 3-D CAD library.

Schneider Electric™ has simplified the design and development of your machines and applications by publishing a growing list of 2-D and 3-D CAD files for your use. With a broad line of power, control and automation products, Schneider Electric 3-D Library is the perfect place to find detailed product models and specifications.

Built with compatibility to your design tools in mind, the 2-D and 3-D CAD library allows you to simply pick your format, download the file, and insert it into your design. The catalog delivers advanced 2-D and 3-D viewing technology that enables users to pan, zoom, and rotate.

>> Learn more about 2D and 3D CAD library, visit [www.SEreply.com](http://www.SEreply.com) and enter key code **j564v**.

# Automation & Control Excellence (ACE)

Need help developing a solution and improving the performance of your facility?

Your Local Schneider Electric™ ACE Distributor is there to provide the answers and deliver the solutions you need. This exclusive group of Schneider Electric distributors has distinguished themselves as Schneider Electric best source of service and support for the unique challenges of the automation and control markets. They specialize in offering:

## The right inventory – when and where you need it

ACE distributors have a wider array of available automation and control inventory on their shelves in your local market. They are your fastest and best source for Schneider Electric products to meet your automation and control needs.

## Unparalleled technical capability

ACE distributors set the standard for Automation & Control Excellence. They offer decades of experience working with leading-edge automation and control solutions.

## A thorough understanding of your business

You can count on our ACE distributors to keep pulse of advancing technology and best practices. ACE distributors have access to Schneider Electric vast array of product, segment, and solution specialists who assist them in understanding which products and solutions are tailored to your business.

### Become an ACE distributor

The ACE program provides its members with a number of exclusive joint market development activities, including local trade shows, sales support tools and resources, marketing programs, and advertising campaigns to help you reach out to customers and prospects in your local market.

Becoming an automation and control expert requires a significant investment in training and resources by knowledgeable personnel. The Automation & Control Excellence program not only promotes development of these capabilities, but also provides a number of resources to make it simple.

For more information on becoming an Automation & Control Excellence Distributor, visit [www.schneider-electric.us/go/ACE](http://www.schneider-electric.us/go/ACE) or email [se-ace@schneider-electric.com](mailto:se-ace@schneider-electric.com).

# Tested, validated, documented architectures

Improving your machine and business performance.

Our new MachineStruxure™ solution is designed to help you achieve faster, lower risk, and more energy-efficient and cost-effective designs and installations through the use of proven and innovative tested, validated, documented architectures that shorten time to market. MachineStruxure incorporates flexible and scalable hardware platforms and a comprehensive software suite with application function libraries.

## Increase machine performance and innovation

- Speed up machine concept to design and adapt them to your needs using our best-in-class product offer, predefined machine architectures and application function blocks.

## Reduce total cost of ownership

- Using our international offers, experience, presence, and international post sales support.

## Shorten time to market

- Save up to 50 percent in control system design and installation time with tested, validated, and documented architectures, ready-to-use function blocks, predefined CAD panel designs and wiring diagrams, fully-documented system user guides.
- Select the control solution to meet your machine requirements with our flexible and scalable machine control platform.
- Choose the appropriate controller with embedded intelligence in drives, HMI displays, motion and logic control products.
- Simplify and speed up control system programming and commissioning with an easy-to-use, single software suite, providing one tool, one connection, one project file and one download with complete openness and transparency.

## Performance automation tested, validated, documented architecture

An excellent solution using simple controls architecture dedicated to machines requiring performance and robustness. This architecture combines the new Modicon™ M258 logic controller, SoMachine™ software, Altivar™ 312 variable speed drive, TeSys™ U motor starters, Lexium™ 32 servo drive, and a Magelis™ XBTGT/GK/GH display unit, with traditional hardwired cabling.

## OEM Technology and Solutions Center

### Complete Development and Support Services Throughout Your Project Lifecycle

Machines today are characterized by a growing need to perform faster and have greater flexibility to solve more complex automation challenges than ever before. In addition, engineering costs have an increasingly important impact across the lifecycle of the machine, from concept and design to installation, maintenance, and service. The ability to reduce the time to market and the total cost of the machine, while achieving innovation and increased performance, is a machine builder's continuous challenge.

What's more, we take it one step further with our OEM Technology and Solutions Center — removing the complexity of machine building by offering start-to-finish project lifecycle expertise, including project management, electrical panel design, application co-design, joint marketing, testing, training, and services resources.

At Schneider Electric, we are more than a component supplier. We are your partner for a full range of technical and support solutions.

### OEM Knowledge Base – Dedicated support for your success

Providing expert project management skills to you and your company is one of the OEM Technology and Solutions Center's greatest values. We're totally committed to our mission of giving you a leg up over the competition and saving you time and budget by utilizing our comprehensive project management services to ensure your project's successful execution. We are your solutions partners throughout the entire project lifecycle, providing a single point of contact, while developing and managing customized solutions, and providing clear communication and project reporting. Whether it's recommending productivity-boosting, efficient designs and innovative solutions, or assisting with conversions or codes and standards issues, our multi-disciplined teams are prepared to meet your specific needs.

### Engineered Panel Solutions

Expand your engineering services without the additional cost through the OEM Technology and Solutions Center. This includes Schneider Electric Engineered Panel Solutions business line that provides original equipment panel design and manufacturing process services for application-based solutions. We serve as an extension of your engineering arm without the overhead costs, thereby freeing up your engineering resources and allowing you to focus on your market offering. We offer application consulting, turn-key engineered solutions, specialized enclosure manufacturing, and turn-key motor control machine solutions.

### Solutions Testing and Training Center

Learn how to simply and easily build and commission flexible machines that reduce costs and time to market — all by the time you complete training. We offer basic and advanced training classes, hands-on testing, and demonstration offered through the OEM Technology and Solutions Center. We also offer on-demand training, schedule at your request and customized to your specific machine and application needs.

Square D brand QO miniature circuit breakers are plug-on products for use in QO load centers, NQOD and NQ panelboards, NQOD and NQ OEM interiors or Speed-D™ switchboard distribution panels. Bolt-on QOB circuit breakers are for use in NQOD and NQ panelboards or interiors.▲ The Square D exclusive Qwik-Open™ mechanism, with a trip reaction within 1/60th of a second, is standard on all 1P 15 A and 20 A QO circuit breakers.

- ▲ See Digest Section 1 for load centers, and Section 9 for panelboards and interiors.
- 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–125 A circuit breakers are suitable for use with 75°C conductors.
- ◆ UL Listed 5 k AIR on corner grounded Delta systems.
- ★ UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.
- ▼ UL Listed as SWD (switching duty) rated. Suitable for switching 120 Vac fluorescent lighting loads.
- △ Requires four spaces (1 AWG–300 kcmil Al/Cu.) Suitable for switching 120 Vac fluorescent lighting loads to permit their application at 22 kA fault level.
- UL Listed for use ahead of QO, QO-GFI, QO-EPD, QOT, QO-AFI, and QO-PL 10 k AIR circuit breakers
- ◇ 100 A maximum branch mounted opposite.
- ☆ Order only. Contact your local Field Office.
- ▼ Includes two circuit breakers (one QO2030 and one QO3020) and handle tie QOTHT.
- Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.

**QOT Tandem**

Current limiting QOT tandem circuit breakers have a mounting cam as shown. Installation into a QO load center can only be made in those positions having a mounting pan rail slot. Meets Paragraph 408.15 of the NEC®. UL Listed as Class CTL

**QO Arc-Fault Circuit Breaker**

QO arc-fault circuit breakers provide protection for Series and Parallel Type Arcing as required by the NEC and local code adoption, and comply with UL1699.

Three-wire  
QO-SWN

Two-wire  
QO-SWN

**QO-GFI**

Qwik-Gard™ circuit breakers provide overload and short circuit protection, combined with Class A ground fault protection. Class A denotes a ground fault circuit interrupter that will trip when a fault current to ground is 6 mA or more, for people protection. Do not connect to more than 250 feet of load conductor for the total one-way run to prevent nuisance tripping.

**Table 1.8: QO-GFI Circuit Breakers** *New!*

**QO-EPD/EPE**

QO-EPD/EPE circuit breakers provide overload and short circuit protection combined with Class B ground fault protection. They are designed to provide ground fault protection of equipment at a 30 mA level (EPD) or 100 mA level (EPE). They are not designed to protect people from electrical shock.

**Non-automatic (Standard) Miniature Switches**

Miniature non-automatic switches have the same physical packaging as miniature circuit breakers, but open only when the handle is switched to the OFF position.

Non-automatic switches provide no overcurrent protection or short circuit protection. They must not be used on systems that have an available fault current greater than the values listed in the table.

Non-automatic switches are UL Listed per UL 1087 and are CSA certified.

**Table 1.13: QO Non-Automatic Miniature Switches, 240 Vac 10 kA**

- ▲ UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.
- UL Listed as SWD (switching duty) rated. Suitable for switching 120 Vac fluorescent lighting loads.
- ◆ 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–60 A circuit breakers are suitable for use with 75°C conductors.
- ★ Suitable only for feeding 240 Vac and 208 Vac two-wire loads. Does not contain load neutral connection.
- ▼ See note in Instruction Bulletin when using in an enclosure with a QO403 or QON prefix.
- △ For 120/240 V only, not for 208Y/120 V.

▲ Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.

**Factory-Installed Accessories for use with QO and QOB Miniature Circuit Breakers**

Factory-installed electrical accessories take up an additional pole space on QO, QO-GFI, QO-EPD, QO-SWN and QOU circuit breakers. All AC electrical accessories shown below are rated for 50/60 Hz. Accessories are not available for QOB-VH (2P 150 A and 3P 110–150 A) circuit breakers or QO, QOU molded case switches. QO circuit breakers will accept only one accessory per circuit breaker. Undervoltage trip is not available on miniature circuit breakers. Factory-installed accessories are not available for QO-AFI or QO-CAFI Arc Fault Circuit Breakers or on QO2150, QO2175, or QO2200 circuit breakers.

Above listings through 200 A mains rating meet Federal Specification W-P-115C as Type 1, Class 2.

- ▲ Maximum single pole branch circuits utilizing QO and/or QOT circuit breakers.
- UL short circuit current rating depends on lowest interrupting rating of circuit breaker installed.
- ◆ Will not accept QO-EPD or Qwik-Gard™ QO-GFI or QO-AFI circuit breakers.
- ★ Mains rated 25 A when Al wire is used.
- ▼ Order F for flush device or S for surface device.
- △ Use 10 AWG maximum size wire for GFI and AFI circuit breakers.
- 70 A Max. branch circuit breaker and 70 A max. back fed main circuit breaker.
- ◇ CU indicates copper bus.
- ☆ Copper bus.
- ▽ UL Listed 5000 A short circuit current rating for corner grounded Delta systems. Use QO-H circuit breakers only.
- Supplied with feed-thru lugs.
- \* Factory-included.
- ◆ Interior only, order box separately.
- PK27GTA includes a 6–2/0 AWG Al/Cu lug.
- PE1A Discount Schedule.

Above listings through 200 A mains rating meet Federal Specification W-P-115c as Type 1, Class 2.

- ▲ Maximum single pole branch circuits utilizing QO and/or QOT circuit breakers.
- 22 k AIR main circuit breaker UL Listed for use ahead of QO, QOT and QO-PL 10 k AIR branch circuit breakers to permit their application on systems with up to 22 kA available fault current.
- ◆ UL short circuit current rating depends on lowest interrupting rating of circuit breakers installed. Also, UL Listed 5000 A short circuit current for corner grounded Delta systems. Use QO-H circuit breakers only.
- ★ Interior only, order box separately.
- ▼ PK27GTA includes a 6-2/0 Al/Cu lug.
- △ PE1A Discount Schedule.
- Factory included.
- ◇ Supplied with feed-thru lugs.

1Ø, Field-Installed Main Lugs Kits

Table 1.19: Use with Convertible Main Load Centers Only

Main Lugs Rating★	Use on Convertible Load Center with Mains Rating	Cat. No.	\$ Price	Lug Wire Size▽ AWG/kcmil Al or Cu
125 A	100-125 A	QOL125○	44.10	6-2/0
225 A	150-225 A	QOL225○	104.00	6-300

- ★ Do not exceed the load center mains rating.
- ▽ Wire range listed for QOL lug kits is the wire range of that lug. To find out maximum wire size permitted in a particular load center per UL, see pages 1-5 through 1-11 under main wire size.
- If main circuit breaker knockout has been removed from the load center's trim, order appropriate filler plate from page 1-13.

	<b>QO Load Center Manual Power Transfer Accessories</b>									<b>Cat. No.</b>	<b>\$ Price</b>	<b>Schedule</b>
<b>Manual Transfer Equipment Kit</b>	For interlocking the handles of two 2P or one 2P and one 1P QO and Q1 circuit breakers mounted side-by-side so that only one circuit breaker can be “ON” at a time.								QO2DTI	24.90	DE2E	
	QO2DTI mechanical interlock attachment with retaining kits for securing two adjacent back-fed circuit breakers in dual power supply applications. Can be used with (2) 2P or (1) 2P and (1) 1P QO circuit breakers in QO816L100 load centers.								QO2DTIM	63.00	DE2E	
	Secures two 2P circuit breakers to right side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.								PK4DTIM4LA	102.00	DE3A	
	Secures two 2P circuit breakers to left side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.								PK4DTIM4HA	102.00	DE3A	
<b>Generator Circuit Breaker Interlock Kit</b>	For use on “G” and “S” Series NEMA 1 and “G”, “S1” and “S2” Series NEMA 3R load centers. Interlocks a QOM1 2P main circuit breaker of a load center (100–125 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.								QOCRBGK1	105.00	DE3A	
	For use on “G” and “S” Series NEMA 1 and “G” and “S1” Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.								QOCGK2	105.00	DE3A	
	For use on “S2” Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.								QORBGK2	105.00	DE3A	

- ▲ Maximum single pole branch circuits utilizing QO and/or QOT circuit breakers.
- One main circuit breaker is included with panel. NEMA 1 indoor device requires cover ordered separately. Alternate source main circuit breaker (QO 125 A max.) ordered separately. Automatic Transfer Switch and Generator for secondary power source are ordered through a Kohler authorized dealer or contractor.
- ♦ Universal mains – No factory-installed main circuit breaker or main lugs. QOM2 frame size, field-install 22 k AIR. Main circuit breaker or main lugs (see pages 1-5 or 1-6).
- ★ Supplied with feed-thru lugs.
- ▼ Device is rated NEMA 3R and can be used for indoor or outdoor applications.

Above listings through 200 A mains rating meet Federal Specification W-P-115c as Type 1, Class 2.

- ▲ Maximum single pole branch circuits utilizing QO and/or QOT circuit breakers.
- Order F for flush device or S for surface device.
- ◆ Mains rating 25 A when Al wire is used.
- ★ Will not accept Qwik-Gard™ QO-GFI or QO-AFI circuit breaker.
- ▼ Use 10 AWG maximum size wire for GFI and AFI circuit breakers.
- Δ Main circuit breaker is a field-installed standard QO single pole circuit breaker. Order separately from page 1-2.
- 70 A max. branch circuit breaker and 70 A max. back fed main circuit breaker.
- ◇ UL short circuit current rating depends on lowest interrupting rating of circuit breaker installed.
- ☆ UL Listed 5000 A short circuit current rating for corner grounded Delta systems. Use QO-H circuit breakers only.
- ▽ 22 k AIR main circuit breaker UL Listed for use ahead of QO, QOT and QO-PL 10 k AIR branch circuit breakers to permit their application on systems with up to 22,000 A available fault current.

<b>Manual Transfer Equipment Kit</b>	For interlocking the handles of two 2P or one 2P and one 1P QO and Q1 circuit breakers mounted side-by-side so that only one circuit breaker can be "ON" at a time.	QO2DTI	24.90	DE2E
	QO2DTI mechanical interlock attachment with retaining kits for securing two adjacent back-fed circuit breakers in dual power supply applications. Can be used with (2) 2P or (1) 2P and (1) 1P QO circuit breakers in QO816L100 load centers.	QO2DTIM	63.00	DE2E
	Secures two 2P circuit breakers to right side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.	PK4DTIM4LA	102.00	DE3A
	Secures two 2P circuit breakers to right side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 150–225 ampere convertible main load centers. Series S01 and S02.	PK4DTIM4HA	102.00	DE3A
	Secures two 2P circuit breakers to left side of interior when used as back-fed mains, a QO2DTI Kit included for back-up power supply applications. For 1Ø 100–125 ampere convertible main load centers. Series S01 and S02.	PK4DTIM4LAL	102.00	DE3A
<b>Generator Circuit Breaker Interlock Kit</b>	For use on "G" and "S" Series NEMA 1 and "G", "S1" and "S2" Series NEMA 3R load centers. Interlocks a QOM1 2P main circuit breaker of a load center (100–125 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.	QOCRBGK1	105.00	DE3A
	For use on "G" and "S" Series NEMA 1 and "G" and "S1" Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.	QOCGK2	105.00	DE3A
	For use on "S2" Series NEMA 3R load centers. Interlocks a QOM2 2P main circuit breaker of a load center (150–225 A) with a QO 2P (15–125 A) branch circuit breaker. Includes a retaining kit.	QORBKG2	105.00	DE3A
	For interlocking the handles of two 2P or one 2P and one 1P QO and Q1 circuit breakers mounted side-by-side so that only one circuit breaker can be "ON" at a time.	QO2DTI	24.90	DE2E

Above listings through 200 A mains rating meet Federal Specification W-P-115c as Type 1, Class 2.

- ▲ Maximum single pole branch circuits utilizing HOM and/or HOMT circuit breakers.
- C at end of catalog number indicates combination flush/surface cover included with device.
- ♦ F/S at end of catalog number indicates to order F for flush device or S for surface device. The cover does not have a door.
- ★ HOM-GFI and HOM-AFI branch circuit breakers are limited to number 10 maximum wire.
- ▼ 70 A maximum branch circuit breaker, 100 A maximum back feed main circuit breaker.
- Δ Supplied with feed-thru lugs.

Conduit Size	1/2 in.	3/4 in.	1 in.	1-1/4 in.	1-1/2 in.	2 in.	2-1/2 in.	3 in.

"RB" Hub

**Bolt-On Hubs**

Square D equipment with "R" or "RB" suffix, designated NEMA 3R rainproof construction, utilizes bolt-on hubs listed below. "RB" devices will accept 3/4 in. through 2-1/2 in. bolt-on hubs without the use of reducers. Off-center conduit thread openings and elongated mounting holes provide quick and easy adjustment to eliminate costly conduit offsets and bends. Catalog suffix "R" devices require 3 in. through 4 in. field cut opening. Hubs are suitable for use with conduit having ANSI standard taper pipe thread.

**Table 1.53: Bolt-On Hubs UL Listed for "RB" Devices**

Conduit Size	3/4 in.	1 in.	1-1/4 in.	1-1/2 in.	2 in.	2-1/2 in.

- ▲ Service disconnect supplied factory-installed.
- 125 A Homeline™ 2P circuit breaker can be installed in top position only. All other positions are limited to 100 A max.
- ◆ UL short circuit current rating is equal to the lowest interrupting rating of any circuit breaker installed.
- ★ Suitable for OH service with addition of tunnel kit SCTK20. Order separately.
- ▲ Supplied with load side feed-thru lugs, for 4 AWG–250 kcmil (Al/Cu) conductors.
- ▽ Convertible to semiflush with SC200F flange kit (order separately).
- ◇ Device supplied with barrel lock provisions factory-installed.
- —
- ★ 5th jaw factory-installed.
- ▽ Use only 15–100 A and 150–200 A circuit breakers.
- ◆ Use only 15–100 A and 150 A circuit breakers.
- ★ A 100 A circuit breaker can be installed in bottom position only, all other positions are limited to 70 A max.
- ◆ Use only 15–110 A and 150–200 A breakers.
- Use only 15–110 A and 150 A breakers.
- Knockout provided in cover for use with barrel lock kit SCBRLOCK (see Accessories, page 1-22).
- Suitable for load wires to exit top endwall with addition of Tunnel Kit OHBS, see accessories p 1-22, check with local utility for approval.
- ◆ Suitable for load wires to exit top endwall with addition of Tunnel Kit OHBL, see accessories p 1-22, check with local utility for approval.

**Meter Mains and All-In-Ones**

- Ring or ringless type meter socket designs available
- UL Listed, suitable only for use as service equipment
- Meets EUSERC standards
- Service disconnect(s) are supplied factory-installed, except where noted
- Semiflush-reverse design available, supplied with load center (indoor access)
- Supplied with 100% branch neutrals, all unused terminals may be used for equipment grounding wires.
- Meets Federal Specification W-P-115c as Type 1, Class 2

- ▲ UL short circuit current rating is equal to the lowest interrupting rating of any circuit breaker installed.
- For 400 A device with suffix CB, CK, CL, or CN, surface-mount convertible to semiflush with FK400 flange kit (order kit separately). Devices with suffix FB, FL, FN or FK are semiflush only, with the top endwall factory-installed and flanges factory-included.
- ◆ For use only on 120/240 Vac 1Ø3W system (4-jaw meter socket).
- ★ Service disconnect supplied factory-installed.
- ▼ Additional service disconnect for field-installation: order prefix QBL at 10 kA, QDL at 25 kA, QGL at 65 kA, or QJL at 100 kA. Order separately. For complete circuit breaker catalog number, see Section 7.
- Δ Option for field installation of two Q-frame, 200 A max. 2-pole branch circuit breakers used as mains for two downstream load centers. Purchase installation kit BMK2Q400 and two Q-frame circuit breakers separately. Order QBL prefix at 10 kA, QDL prefix at 25 kA, or QGL prefix at 65 kA.
- Fifth jaw factory-installed.
- ◇ QO panel is rated 200 A maximum.
- ☆ Supplied with load side feed-thru lugs for 6 AWG-250 kcmil (Al/Cu) conductors.
- ▼ Knockout provided in cover for use with barrel lock kit SCBRLOCK (see Accessories, page 1-22).
- Device configuration is not included in EUSERC standards. Consult applicable utility for acceptance.
- \* Device with suffix L has Class 320 lever bypass and device with suffix K has a K-4 bolt-on, no bypass.
- ◆ Order two pole circuit breakers for field installation: order catalog designation QO for 10 kA, QO-VH for 22 kA or QOH for 42 kA short circuit current rating. See page 1-22 or 1-2.

Accessories				
Description	Cat. No.	\$ Price	Disc. Sch.	
Generator Kit: Interlocks main service disconnect and generator circuit breaker (order separately). For:				
• Homeline™ CSED Devices RC816F-, RC2040M-, SO2040M-	RCGK2	245.00	DE4	
• QO CSED Devices QC816F-, QC2442M-	QCCK3	245.00	DE4	
Backfed inverter circuit breaker retaining kit for SC2636M200FPV and SC2636M225FPV	PK2SCPV	47.40	DE4	
<b>Fifth Jaw Kit for:</b> Meter Main Types: C, RC, SC, QC All-In-One Types: SC, SU (100–225 A), QC, RC, SO	5J	18.30	DE4	
Bypass (Horn Type) for Ringless Type Meter Mains and All-In-Ones (100–200 A) (except for RC8L125S, RC1624M100S and RC1624M125S—use RCHB).	MMHB	16.70	DE4	
Lexan Meter Socket Cover Plate for:	29007	10.10	DE4	
• Ring and Ringless Type Meter Mains				
• Ring and Ringless Type All-In-Ones				
Meter Socket Sealing Rings for Ring Type Meter Mains and All-In-Ones:				
• Snap Type Aluminum (Std.)	2920910001	7.95	DE5	
• Screw Type Aluminum	29008W	20.10	DE4	
• Snap Type Stainless Steel	ARP00026	16.70	DE4	
Anti-Inversion Kit. For use ONLY on 400 A Meter Mains and All-In-Ones with lever bypass.	MMLRK	12.00	DE4	
Trim Kit for 2 in. X 6 in. stud wall, used with Reverse All-In-Ones, SU3040M200R, and SU3040M225R	SU2X6TRIM	266.00	DE4	
Barrel Lock Kit (Barrel Lock not included), supplied with bracket and mounting screw, refer to listings for where used.	SCBRLLOCK	53.00	DE4	
<b>Semiflush Flange Kit for:</b> Meter Mains: SC816D150/200C and RC816D200CH All-In-Ones: SC2040M200C	SC200F	31.80	DE4	
Semiflush Flange Kit for ring- and ringless-type Meter Mains and All-In-Ones (400 A Only)	FK400	197.00	DE4	
Ringless Type Utility Cover for RU3040D400CL/FL, QU12L400CL/FL, and QU816D400CL/FL. Includes one piece meter socket and pull box cover with handles and closing plate.	R400L	266.00	DE4	
Lug Kit includes (4) lugs, for use with 2 AWG–600 kcmil Al/Cu conductors. Lugs are for standard 2-hole mounting. Meter Main and All-In-One units supplied with (2) studs per phase and neutral will accept one lug per phase and neutral. Not for use on 400 A devices with "K" suffix.	CMEK4	137.00	DE4	
Branch Circuit Breaker Field Installation Kit for two Q-Frame Circuit Breakers (QBL, QDL, or QGL, order separately). For CUM400CB, QUM400CL or QUM400CK - includes (2) mounting pans, (4) wires.	BMK2Q400	153.00	DE4	
Overhead Feed Trough for 400 A ring- and ringless-type Meter Mains and All-In-Ones.	OCK400	567.00	DE4	
Touch-Up Paint (ASA49 Gray)	PK49SP	39.00	DE1	
Ground Bar Kit, Meter Mains and All-In-Ones QC, RC, and SC (100–225 A)	PK15GTA	17.10	DE3A	
<b>Filler Plate for:</b> Meter Main Types: QC, CU All-In-One Types: QC	QOFP	3.60	DE3A

**Meter Mains and All-In-Ones**

- Ringless Meter Sockets with barrel lock provisions factory installed except for Cat. No. SO2040M200SS which is a Ring Style meter socket with no provisions for barrel lock to secure the meter cover.
- UL Listed, suitable only for use as service equipment
- Service disconnect(s) are supplied factory-installed, except where noted
- Supplied with 100% branch neutrals, all unused terminals may be used for equipment grounding wires.
- Meets Federal Specification W-P-115c as Type 1, Class 2
- Solar Ready kit SR69064A fits All Devices Below, order from Table 1.70
- All devices have a 3" KO in the bottom endwall.
- Provisions for Field Installed CTs All Devices

(Order Q-Frame circuit breaker separately)

- ▲ Not suitable for service equipment.
- Maximum 10 hp 240 Vac.
- ♦ Top endwall has no hub opening.
- ★ Maximum 20 hp 240 Vac.
- ▽ Order F for flush, S for surface.
- △ Equipment ground bar kit PKOGTA2 factory-included.
- Factory-installed groundable neutral assembly includes (2) ground lugs and (2) neutral lugs. Equipment ground kit PKOGTA2 also included.
- ◊ Accepts 200 A max. 2P Q Frame circuit breakers.
- ✱ Add suffix 1021 for 120, 208 or 240 Vac shunt trip. Add \$126.
- ▽ When these 3P circuit breakers are mounted in an enclosure, the maximum AIR rating is 65 kA at 240 Vac and 100 kA at 208 Vac.
- ◊ DE3A Discount Schedule.

(For Dimensions/Drawings go to Supplemental Digest, hardcopy or on-line version.)

**For Construction Sites**

- Provide temporary power at construction sites.
- Each receptacle protected by QO-GFI circuit breaker in compliance with NEC® requirements.
- Each enclosure is rainproof.
- 10 kA short circuit current rating.
- UL Listed as suitable for use as temporary site service equipment.
- Provided with neutral bonding provisions.
- Boxes have provisions for type “B” hubs to be field-installed.

**For Recreational Vehicle Parks**

- Provide electrical power to individual recreational vehicle park sites.
- Each receptacle protected by appropriate GFI or Standard QO™ circuit breaker.
- All receptacles and circuit breakers included.
- 10 kA short circuit current rating.
- UL Listed.
- All enclosures are rainproof.
- No neutral bonding provisions.
- Loop-feed provisions.

- ▲ (1Ø2W 120 Vac) (1Ø3W 120/240 Vac)
- 20 A receptacles protected by 20 A GFI circuit breaker.
- ◆ Devices have a bolt-on factory-installed closing cap. Order type “B” bolt-on hub separately from page 1-18.
- ★ Equipment ground terminal suitable for (2) 14 or 12 AWG Cu or (2) 12 or 10 AWG Al.
- ▼ Receptacles in this device are in bottom endwall and are accessible with outer door padlocked. “Order Only” from Lexington—Minimum order quantity is 50 devices.
- △ Two wires each per phase, neutral, and equipment ground—for loop feed (except PAK75CTG).
- Equipment ground terminal suitable for (2) 14-12 AWG Cu or (2) 12-10 Al.
- ◇ GFI circuit breaker can be substituted for standard 30 A circuit breaker. For 30 ampere receptacles add \$140.00 per circuit breaker. Add suffix “FI” to catalog number. Example: PAK41CTGFI.
- ☆ Stabilizer foot available for use in unstable ground, order HNPSF \$27.50 list.
- ▽ Equipment ground terminals suitable for (2) 10-2/0 AWG Cu or (2) 6-2/0 AWG Al.

LOAD CENTERS

**QO-K**

Key operated QO circuit breakers are available in single-pole construction and can be mounted in any single-pole space which will accept a standard QO. These circuit breakers can be turned ON or OFF or to RESET with a special key (catalog number QOK10) included with the circuit breaker. These circuit breakers are UL Listed and available as shown in the table.

3 Phase Branch Devices	2-13
3 Phase Branch Devices and Main Devices with Busway Taps	2-14
Tenant Circuit Breakers and EZM Accessories	2-15
Dimensions	2-16

- Available single or three phase, 600 Vac max., with and without horn or lever bypass, overhead and underground service feed.
- 10 kA short circuit current rating (or higher with utility approval).
- UL Listed, NEMA 3R enclosure.
- Units supplied with bonded neutral.
- Units supplied with hub opening in top endwall require the use of a bolt-on hub, or closing plate.
- Units supplied with solid top are for underground feed only.
- Accessories, refer to page 2-3.

This metering is generally utility specific. Always check with local utility company before installing. Contact your nearest Field Sales Office for additional catalog numbers, if required by utility.

- ▲ Device requires approval from the serving utility, consult your nearest Schneider Electric sales office.
- Order appropriate bolt-on hub or closing plate separately and install on TOP endwall.
- ◆ Device supplied with 1-1/4 in. bolt-on hub (Cat.No. A125) mounted on TOP endwall.
- ★ Device supplied with solid top endwall (without hub opening).
- ▼ When unit is installed for underground feed, the appropriate closing plate must be ordered separately and installed over hub opening in TOP endwall of device.
- △ Device supplied with closing plate ACP mounted on TOP endwall.
- Device supplied with two closing plates ACP mounted in TOP endwall.
- ◇ Contains "Duquesne Light Co." approved label.
- ☆ Order lugs separately, refer to accessories, page 2-3.
- ▽ Rating is continuous.

**Horizontal Ganged Meter Sockets**

- 1Ø, 600 Vac max., main lugs only, 2 through 6 meter positions, with and without horn or lever bypass, end or center feed, overhead and underground service feeds.
- 10 kA short circuit current rating (or higher with utility approval).
- UL Listed, NEMA 3R enclosure.
- Supplied with ground lugs.
- Supplied with hub opening in top endwall, requires the use of a bolt-on hub, or closing plate.

**This metering is generally utility specific. Always check with local utility company before installing. Contact your nearest Field Sales Office for additional catalog numbers, if required by utility.**

**Ring and Ringless Type Devices**

MP44125

- Consult local utility for approval before installation.
- 120/240 Vac 1Ø3W.
- Main lugs only—two to six meter sockets.
- Enclosures are indoor/rainproof NEMA 3R construction.
- Suitable only for use as service equipment.
- Swingable mounting feet supplied at bottom of device.
- Factory-installed mechanical lugs, alternate lugs and NEMA/EUSERC lug landing kits available.
- Surface mount, convertible to semi-flush with field installed flange kit.
- Ring type devices supplied with 4-jaw meter sockets (5th jaw kits available, order separately).
- Ringless type devices supplied with 5-jaw meter sockets, available with and without horn or lever bypass.
- Provisions for mounting 2-pole circuit breaker for each meter socket position (order circuit breakers separately).
- Mounting channel supplied, except for box 1R (125 A, 2-position).
- Combination overhead/underground feed.

## NEMA 3R Construction

**240 Vac Maximum**, for use on AC systems, suitable for use as Service Equipment.

**Utility Company Requirements Review local utility requirements to ensure that metering equipment meets their standards.**

**EZ Meter-Pak** meter center enclosures meet NEC wire bending requirements, and are designed for wall mounting only (not suitable for floor mounting). All unmetereed conductor compartments may be sealed by the utility company.

**EZ Meter-Pak** meter centers have UL Listed short circuit current ratings up to 100 kA at 240 Vac when properly applied. For three-tier series ratings refer to Data Bulletin 4100DB0301 and Instruction Bulletin 80043-303-22.

**Suitable incoming services for an EZM main device and available outgoing feeder(s) to downstream panelboards from EZM branch section(s)—**

### Incoming Service to Main Device 120/240 Vac, 1Ø3W

Available outgoing feeder(s) to downstream panelboards:

- 120/240 Vac, 1Ø3W  
(4-jaw ring type meter sockets, two-pole circuit breakers)  
(5-jaw ringless meter sockets, two-pole circuit breakers).

### Incoming Service to Main Device 240/120 Vac, 3Ø4W Delta

Available outgoing feeder(s) to downstream panelboards:

- 120/240 Vac, 1Ø3W (Fed from transformer's "A-Phase" and "C-Phase" only.) NOTE: Connection to High-Leg "B-Phase" not permitted for this service  
(4-jaw ring type meter sockets, two-pole circuit breakers)  
(5-jaw ringless meter sockets, two-pole circuit breakers)  
Standard 3Ø IN/1Ø OUT branch units **are not suitable for use on this Delta System**. Special branch units are available for this System by adding suffix: "**CA**" to catalog number (Typical Examples: EZM313125CA, EZM313125XCA, EZM313125CUXCA, EZM314225CA, EZM314225XCA, EZM314225CUXCA, EZM315225CA, EZM314225CUCA, etc.).
- 240/120 Vac, 3Ø4W Delta (7-jaw meter sockets, three-pole circuit breakers).

### Incoming Service to Main Device 208Y/120 Vac, 3Ø4W

Available outgoing feeder(s) to downstream panelboards:

- 120/208 Vac, 1Ø3W (5-jaw meter sockets, two-pole circuit breakers)
- 208Y/120 Vac, 3Ø4W (7-jaw meter sockets, three-pole circuit breakers).

## Main Devices

- 400, 600 and 800 A main disconnects may be end mounted with branch units having 800 A or 1200 A continuous horizontal cross bus.
- 1000 and 1200 A main disconnect or terminal box **must be center mounted** when used with branch devices with main bus rated 800 A continuous.
- 1600 A main disconnect or terminal box **must be center mounted**.
- 2000 A main disconnect **must be center mounted** and requires use of branch units having 1200 A continuous horizontal cross bus.
- 400, 800 and 1200 A Type EZM-TBU terminal boxes supplied with lug landings to meet EUSERC requirements.

**Main Circuit Breaker ratings:** 400, 600, 800, 1000, 1200, 1600 and 2000 A

**Main Fusible Switch ratings:** 400, 600, 800, and 1200 A (1Ø3W only)

**Main Lugs Terminal Box ratings:**  
225, 400, 600, 800, 1200, 1600, and 2000 A

## Branch Units

- **125 A and 225 A residential branch units** are available in ring type or ringless type construction and are supplied with 800 A continuous aluminum horizontal cross bus as standard (Example: EZM314125). For optional 1200 A continuous copper horizontal cross bus with aluminum vertical connectors, add suffix "**X**" to catalog number (Example: EZM314125X). For optional 1200 A continuous all-copper bussing, add suffix "**CUX**" to catalog number (Example: EZM314125CUX). NOTE: 5-gang 225 A EZM, EZMR and EZMH residential branch units are supplied with 1200 A continuous Cross Bus as standard, do not add suffix "X" or "CUX" to these units (Examples: EZMR315225 or EZMR315225CU). Plug-in style residential meter sockets are available as ring type **EZM** without bypass, ringless type **EZMR** without bypass, and ringless type **EZMH** with horn bypass.

Tenant circuit breakers must be ordered separately for these branch units. 125 A max. units make use of Type QO, QO-VH or QO-H two-pole tenant circuit breakers (40–125 A). 225 A max. units make use of Type QDP-TM, QBP-TM, QGP-TM and QJP-TM two-pole tenant circuit breakers (70–225 A), and may also make use of two-pole Type QO (40–125 A at 10 kA max.), two-pole Type QO-VH (40–60 A at 100 kA max.), or two-pole Type QO-H (40–60 A at 100 kA max.) tenant circuit breakers.

- **225 A commercial branch units** are available in ring type or ringless type construction and are supplied with 1200 A copper horizontal cross bus with aluminum vertical connectors as standard (Example: EZML314225). For optional 1200 A continuous all-copper bussing, add suffix "**CU**" to catalog number (Example: EZML314225CU). Plug-in style commercial meter sockets are available as ring type **EZMT** with test block bypass (meets EUSERC requirements), ringless type **EZMR** without bypass, and ringless type **EZML** with lever bypass.

225 A max. units make use of type QDP-TM, QBP-TM, QGP-TM and QJP-TM two-pole or three-pole tenant circuit breakers (70–225 A), and may also make use of two-pole type QO (40–125 A at 10 kA max.), two-pole type QO-VH (40–60 A at 100 kA max.), or two-pole type QO-H (40–60 A at 100 kA max.) tenant circuit breakers.

**Note:** QO, QO-VH and QO-H tenant circuit breakers used in 225 A branch units require the use of adapter **EZM125QOA** (purchased separately). Refer to page 2-15 for pricing.

- **400 A branch units** are available in ringless type construction only, and are supplied with 1200 A continuous all-copper bussing as standard (Example: EZML332400). These branch units are supplied with factory-installed type DJM tenant circuit breakers that have a field adjustable ampere rating trip setting from 160 A min. to 400 A max. A tamper-evident seal kit is available where needed, order seal kit **29375** (refer to NEC 240-6 [c]). 400 A branch units are available as Type **EZML** with plug-in style lever bypass type meter sockets, or Type **EZMK** with bolt-on style with manual bypass type meter sockets.
- Units having **800 A continuous horizontal cross bus** WILL CONNECT with units having **1200 A continuous horizontal cross bus**.
- **Single phase units** (three bus bars in horizontal cross bus) WILL NOT CONNECT with **three phase units** (four bus bars in horizontal cross bus).

**For Load Center Three-Tiered Series Ratings used downstream from Metering Equipment, refer to Data Bulletins : 4100DB0301 and 2700DB9901.**

- Review local utility requirements to ensure that metering equipment meets their standards.
- Check local utility to determine available fault current at the meter center.
- Using the SCCR table:
  - Select meter center configuration, main lugs only (Six Disconnect Rule), or remote main, main circuit breaker, or main fusible switch.
  - Read down to select SCCR equal to, or greater than desired rating.
  - Read across to select branch unit tenant circuit breaker type.
  - Continue reading across to select EZM main device type.

**Table 2.12: UL Listed Meter Center Short Circuit Current Ratings (SCCR)**

Tenant circuit breakers of same frame size having higher AIR values may replace tenant circuit breakers as listed in tables below and maintain the series rating.

Figures	Short Circuit Current Rating (240 Vac Maximum)▲■	EZM Meter Center Overcurrent Protection Devices

▲ Meter center short circuit current rating is equal to the lowest short circuit current rating given in table for any circuit breaker installed in any meter panelboard in the meter center.  
 ■ Short circuit current rating is measured at the LINE SIDE terminals of the integral mounted or remote mounted main providing overcurrent protection for the EZM metering equipment lineup.  
 ◆ 3P only tenant circuit breaker(s) are limited to: 100 kA Max. at 208Y/120 Vac or 65 kA Max at 240/120 Vac.  
 ★ Requires use of EZM125QOA adapter (order separately). Refer to page 2-15 for pricing.  
 ▼ Supplied with factory-installed circuit breaker(s), with an adjustable trip range of 160–400 A.  
 △ For three-tier series ratings refer to Data Bulletin 4100DB0301 and Instruction Bulletin 80043-303-22.

**1Ø 3W 120/240 Vac EZ Meter-Pak Meter Centers—1Ø, Indoor/Rainproof, UL Listed**

**1200 A Main CB/Fusible Switch Devices come Standard with 2-STEP Removable Service Entrance Endwalls**

Select EZM meter center short circuit current rating from Table 2.12 on page 2-9. Using this table as a reference, make the following selections:

1. Select EZM 1Ø main device from Table 2.13 or 2.14, below, with an equal or higher short circuit rating than the application.
2. Select EZM 1Ø branch units from Tables 2.15, 2.16 or 2.17.
3. Select proper 2P type QO, QO-VH, QOH, QBP-TM, QDP-TM, QGP-TM or QJP-TM branch circuit breakers for use as tenant mains in branch unit from Table 2.24, page 2-15.
4. Select accessories as required from Table 2.25, page 2-15.
5. Dimensions; page 2-16.

- ▲ Available by special order with main circuit breaker supplied with other standard ampere ratings, consult local Field Office (allow 6 weeks for delivery).
- Ampere rating of the circuit breaker supplied with this device can be changed to a LOWER value in the field by changing the setting on the circuit breaker.
- ◆ Supplied with copper horizontal bus bars and aluminum vertical bus bars.
- ★ 225 A terminal box supplied with isolated neutral that cannot be bonded Not suitable for use on the LINE side of service equipment.
- ▼ For mechanical lugs (3/0 AWG–600 kcmil) order kit CMEK4, Price \$91.00. Kit includes 4 lugs only. Multiple kits may be required, consult factory. For crimp-type lugs refer to Anderson Electrical Connector Products Catalog AEC-40R.
- △ Does not meet EUSERC Standards.
- Terminal box is suitable for use on LINE or LOAD side of service equipment. Supplied with isolated neutral and provided with neutral bonding kit for use as required. Refer to page 2-9 for appropriate short circuit current ratings.
- ◇ Feed-thru lug kit available, see Accessories, page 2-15.
- ★ For field installed Lug Landing Kit Order catalog number EZM1200ULL, List Price \$460.00, order lugs separately.
- ▽ Top feed only.

- ▼ 2P Type QO (40–125 A, 10 kA max. meter center SCCR) or QO-VH and QO-H (40–60 A, 100 kA max. meter center SCCR) may be installed using EZM125QOA adapter kit, refer to page 2-15.
- Δ Supplied with bondable neutral, suitable for use as service equipment. Use main lugs terminal box type EZM-TBU for Six Disconnect Rule applications to feed this device. Supplied with copper horizontal bus bars and aluminum vertical bus bars.
- Supplied with removable drip hood and equipped with an indoor top endwall with knockouts provided.
- ♦ Does not meet EUSERC 48 in. minimum / 75 in. maximum meter height requirements for outdoor installations. The bottom meter socket is 37 inches above ground when the device is mounted with the top meter socket at 75 inches above ground. EUSERC indoor requirements are 36 in. minimum / 75 in. maximum.

- ◻ Terminal box is suitable for use on LINE or LOAD side of service equipment. Supplied with isolated neutral and provided with neutral bonding kit for use as required. Refer to page 2-9 for appropriate short circuit current ratings.
- ◊ Feed-thru lug kit available, see Accessories, page 2-15.
- ★ For field installed Lug Landing Kit order catalog number EZM1200ULL, List Price \$460.00, order lugs separately.
- ▼ Does not meet EUSERC requirements.
- Top feed only.

- ▲ For 1200 A main cross bus, add suffix "X" to catalog number. Example: EZMR313125X. Add 3% adder to list per device. Allow 6 weeks for delivery.
- Snap-On aluminum sealing rings supplied as standard.
- ♦ For 240/120 Vac Delta Systems add Suffix "CA" to catalog number (Example: EZM314125CA). All meter sockets are phased A and C only. Price remains the same as the base catalog number. Order only branch units, not stocked in PDS (6-week delivery).
- ★ Supplied with removable drip hood and equipped with an indoor top endwall with knockouts provided.
- ▼ Distance between meter sockets as measured from centerline to centerline is 10 inches.
- △ 2P Type QO (40–125 A, 10 kA max. meter center SCCR) or QO-VH and QO-H (40–60 A, 100 kA max. meter center SCCR) may be installed using EZM125QOA adapter kit, refer to page 2-15.

- ▲ DJM circuit breaker has adjustable trip settings from 160–400 A. If required, order seal kit, catalog number 29375. DJM circuit breaker terminal lug kit 32508 factory-installed and accommodates (1) 2 AWG–500 kcmil Al or (1) 2 AWG–600 kcmil Cu per phase. Alternate lug kit 32510 for DJM circuit breaker is available, see Accessories, page 2-15. Additional field-installed DB circuit breaker accessories are available, see page 7-35.
- Supplied with Class 320 lever bypass meter socket. Use anti-inversion clip kit, catalog number MMLRK, if required. Order from page 2-15.
- ♦ For 240/120 Vac Delta Systems add Suffix "CA" to catalog number (Example: EZML312400CA). All meter sockets are phased A and C only. Price remains the same as the base catalog number. "Order only" branch units, not stocked in PDS (4–6 week delivery). Order point Lexington.

EZMK311400

EZM Main with Busway Tap

EZ Meter-Pak metering equipment is available for use in high rise applications for connection to 800–5000 A I-Line™ or I-Line II plug-in busway installed as a vertical riser. Three phase only EZM main devices in the form of a main circuit breaker or main fusible switch are available with an integral busway tap extending from the right or left side of the main device and phased to align with the busway for either neutral front or neutral back installations.

Busway Mains, 3Ø only (Indoor only) ordering instructions:

- Step 1: Determine height to center line of busway plug-in opening, check local utility requirements for minimum and maximum meter socket heights.
- Step 2: Determine side of EZM main section for busway tap to extend from (busway tap is an integral part of the main and extends to the left or right on the EZM device as viewed from the front).
- Step 3: Check phasing of busway riser to insure that it matches phasing of busway tap on main section (indicated as neutral front or neutral back as viewed from the front).
- Step 4: Select Cat. No. from tables below.
- Step 5: Busway main devices are build to order specials and require 4 to 6 weeks for delivery (order point Lexington).

- ★ Has a maximum 65 kA short circuit current rating.
- ▼ Has a 100 kA short circuit current rating. Requires Class T (300 Vac) fuses, order separately.
- △ Supplied with copper horizontal bus bars and aluminum vertical bus bars.
- Requires use of branch units supplied with 1200 A horizontal cross bus.
- ◇ Has a 100 kA short circuit current rating.

Note: Dimensions shown will position the centerline of top meter socket of a 125 A, 5-Gang or 6-Gang branch unit at 72" above floor level. Check with utility to meet local requirements.

	Latch-Type (Aluminum)—standard	2920910001	8.00
Barrel Lock Kit	For use on ringless EZM or MP branch unit covers, includes 6 each of head protectors, lock nuts and sealing caps. (Barrel lock not included.)	MMBLC	66.00
Tenant Circuit Breaker Filler Plates	125 A Branches—2P Type QO (2 per opening)	QOFP	3.60
	225 A Branches—2P and 3P Q-Frame	EZMPCP	26.00

▼ Consult your nearest Schneider Electric sales office for details.  
 ▲ All sockets include 5th Jaw factory-installed except EZM11\_ devices.  
 □ Meter center short circuit current rating is 10,000 RMS symmetrical amperes with manual circuit closers installed (bypass is not designed for use as continuous duty).  
 ◇ For use on ring type meter sockets only.

**Busway Transition Section**

EZM busway transition section provides no overcurrent protection for the downstream EZM branch units. Tenant main circuit breakers in these branch units must be selected as “fully rated” equipment. (Examples: QO for 10 kA, QO-VH for 22 kA or QOH for 42 kA.)

▲ For single phase hp rating, use two switching poles.

**General Duty—Up To 100 kA Short Circuit Current Rating With Proper Current Limiting Fusing**

General duty safety switches are designed for residential and commercial applications where durability and economy are prime considerations. Typical loads are lighting, air conditioning, and appliances. They are suitable for use as service equipment when equipped with a factory- or field-installed neutral assembly or a field-installed service grounding kit, (see Table 3.6) as applicable.

General duty safety switches are UL Listed, File E2875, and meet or exceed the NEMA Standard KS1.

▲ Bolt-on hubs—Refer to page 3-10.

■ When installed, this kit rejects all but Class R fuses.

♦ For corner grounded delta systems only. Use switching poles for ungrounded conductors. See data bulletin 2700DB0202 for additional information.

★ If corner grounded delta, use outer switching poles for ungrounded conductors.

▼ For 200% neutral, order (1) additional neutral kit SN20A and (1) neutral jumper kit SN20NI.

△ Class T 400–800 A general duty safety switches use 300 Vac Class T fuses and are UL Listed for use on systems with up to 100 kA available fault current.

□ Order Class J fuse kit: GDJK600 for Class J fuses.

♦ Bolt-on hubs—Refer to page 3-10.

★ Enclosed molded case switch—Refer to page 1-24.

▼ Includes factory-installed grounding kit.

◊ Not service entrance rated—Refer to page 1-19 for more information.

\* If a neutral assembly is required, order and field-install SN0610.

◊ If a neutral assembly is required, order and field install a SN20A Neutral Assembly Kit. For a 200% neutral application, order and field install (2) SN20A Neutral Assembly Kits and (1) SN20NI Neutral Jumper Kit.

◊ If a neutral assembly is required, order part number D600SN. Available for field-installation.

◊ For single phase hp rating, use two switching poles.

■ To accept J class fuses, move fuse bases to the embossed guide inside of the switch.

UL Listed Short Circuit Withstand Rating		
Switch Type	Fuse Class	Short Circuit Rating
Fusible	Plug	10 kA
	H	10 kA
	K	10 kA
	J	100 kA
	R	100 kA
Non-Fusible▲	T	100 kA
	H	10 kA
	K	10 kA
	J	100 kA
	R	100 kA■
	T	100 kA

▲ The UL Listed short-circuit current rating for Square D general duty, not fusible switches is based on the switch being used in conjunction with fuses. Evaluation of non-fusible switches in conjunction with molded case circuit breakers above 10,000 amps has not been performed. For applications requiring greater protection, consider using a heavy duty safety switch. Refer to UL Listed Maximum Short Circuit Current Ratings—AC only—on page 3-6. If a UL Listed short-circuit current rating is required, this non-fusible switch must be replaced with a Square D general duty fusible safety switch equipped with the appropriate class and size fusing. Consult the wiring diagram of the switch to verify the UL Listed short-circuit current rating.

■ 50 kA for 60 A non-fusible switch.

▲ Series E switch only.  
■ Series F switch only.

**Field-Installed Electrical Interlock Kits**

Electrical interlocks for Series F 100-200 A general duty safety switches and Series F 60 A fusible general duty safety switches are available in kit form for field installation. Each kit contains instructions for proper field mounting. A pivot arm operates from switch mechanism, breaking the control circuit before the main switch blades break. Switches with electrical interlocks installed are UL Listed.

**Table 3.7: Electrical Interlock Kit**

Switch's Amperes Rating	Series	Electrical Interlock Kit Cat. No. ▲	\$ Price
60	F ■	EIK031 or EIK032	218.00
100-200	F	EIK1 or EIK2	311.00

▲ Electrical interlock kit catalog numbers with -1 suffix indicates one normally open and one normally closed contact; -2 indicates two normally open and two normally closed contacts. Kits are UL Listed.

NEMA 1      NEMA 3R      NEMA 4, 4X and 5      NEMA 12  
Stainless Steel

Visible blade heavy duty safety switches are designed for application where maximum performance and continuity of service are required. All heavy duty safety switches feature quick-make, quick-break operating mechanism, a dual cover interlock and a color coded indicator handle. They are suitable for use as service equipment when equipped with a field- or factory-installed neutral assembly or equipment grounding kit, unless a 600Y/347 V or 480 Y/277 V, 1000 A or greater, solidly grounded WYE system is used, per NEC 215-10. Heavy duty safety switches are UL Listed (except as noted), File E2875 and 154828 and meet or exceed the NEMA Standard KS1. For UL Listed short circuit current ratings, see page 3-6.

- ▲ Complete rating is NEMA 3, 3R, 4, 4X, 5 and 12.
- Also suitable for NEMA 3R application by removing drain screw from bottom endwall.
- ♦ For corner grounded delta systems only and with neutral assembly installed. Use switching poles for ungrounded conductors.
- ★ For switching dc use two outside switching poles.
- ▼ 60 A switch with 30 A fuse spacing and clips. Must use 60 A enclosure accessories including electrical interlocks.
- ▲ Suitable for NEMA 5 applications with drain screw installed.
- Not suitable for use as service equipment.

**Class H Fuse Provisions:**

Fusible Square D 30 through 600 A heavy duty safety switches accept Class H fuses as standard. With Class H fuses installed, the switch is UL Listed for use on systems with up to 10 kA available fault current.

**Class R Fuse Provisions:**

Fusible Square D 30–600 A heavy duty safety switches will accept Class R fuses as standard. A field-installed rejection kit is available which, when installed, rejects all but Class R fuses. With the installation of the rejection kit and Class R fuses, the switch is UL Listed for use on systems with up to 200 kA available fault current. See Class R fuse kits on page 3-10.

**Class J Fuse Provisions:**

Provisions for installing Class J fuses are included in 30 through 400 A 600 Volt, and 100 through 400 A 240 Volt, fusible heavy duty safety switches. Conversion to Class J fuse spacing requires relocating the load side fuse base assembly from the standard Class H fuse location to an alternate position as marked in the enclosure. With Class J fuses installed, the switch is UL Listed for use on systems with up to 200 kA available fault current. Switches rated 600 A, 240 or 600 Volt, require the addition of an adapter kit, H600J at \$456. One kit per 3P switch.

**Class L Fuse Provisions:**

Fusible 800 A and 1200 A safety switches use Class L bolt-in fuses and are rated for use on systems with up to 200 kA at 600 Vac maximum. 1200 A switches accept class L fuses from 601–1200 A, 800 A switches accept class L fuses from 601–800 A.

- ▲ Complete rating is NEMA 3, 3R, 4, 4X, 5 and 12.
- Also suitable for NEMA 3R application by removing drain screw from bottom endwall.
- ◆ For switching dc, use two outside switching poles.
- ★ Suitable for NEMA 5 applications with drain screw installed.
- ▼ Switches with EI suffix are stocked with factory-installed electrical interlocks with one normally-open and one normally-closed contact.
- Δ Use 60 A enclosure accessories, including electrical interlocks.
- No knockouts are provided.
- ◇ Requires 60 A accessories. See page 3-14 for series rating..
- ★ HU461AWK (Series F6) is rated 5 hp@250 Vdc, 10 hp@600 Vdc.
- ▽ Not suitable for use as service equipment.
- ⊙ One enclosure for NEMA 1, 3, 3R or 12 applications. UL Listed.

**UL Listed Maximum Short Circuit Current Ratings—AC only**

**NOTE:** Consult the wiring diagram of the switch to verify the UL Listed short circuit current rating.

**Table 3.12: Fusible Safety Switches**

For the short circuit current rating, refer to the table below.

Heavy Duty Safety Switch Type	UL Listed Fuse Class	UL Listed Short Circuit Current Ratings
Fusible	H, K	10 kA
	R, J, L	200 kA*

\* On 600 V, 200 A switches, 100,000 A max. on corner grounded delta when protected by Class J or R fuses.

**Non-Fusible Safety Switches**

Any brand of circuit breaker or fuse not exceeding the ampere rating of the switch may be used in conjunction with an non-fusible safety switch when there is up to 10 kA short circuit current available (see table below).

**Above 10 kA**—When applied on systems with greater than 10 kA short circuit current available, the UL Listed short circuit current rating for Square D non-fusible switches is based upon the switch being used in conjunction with fuses or Square D circuit breakers or Mag-Gard motor circuit protectors.

**Table 3.13: Non-Fusible Safety Switches**

Heavy Duty Safety Switch Type	Switch Rating (A) ♦	Fuse or Circuit Breaker Type ⊙	3-Phase		
			240 Vac	480 Vac	600 Vac
Non-Fusible Switches	All	Any brand circuit breaker	Up to 10 kA		
		H, K			
		R, T, J, L	200 kA	200 kA	200 kA
	30–100	H ⊙	65 kA	35 kA	35 kA
	30–100	FA	14 kA	14 kA	14 kA
	30–100	FH	18 kA	18 kA	18 kA
	200	H, J ⊙	65 kA	35 kA	35 kA
	400	LA	22 kA	22 kA	22 kA
400	LH	25 kA	25 kA	25 kA	

- ♦ Applies to NEMA 1, 3R, 4X stainless, 12 switches.
- ⊙ Ampere rating of fuse or circuit breaker not to exceed switch ampere rating.
- ⊙ All H and J circuit breakers are acceptable, but will only support the noted Short Circuit Current Ratings.

H361SS

**316 Grade Stainless Steel—NEMA 3, 3R, 4, 4X, 5, 12**

Type 316 stainless steel enclosure safety switches offer superior corrosion resistance to a wider range of chemicals than Type 304 stainless switches. Type 316 better resists chloride and is often used in marine, waste treatment and transportation applications. Use watertight hubs from page 3-10. Equipment grounding lugs are supplied as standard. (For Type 304 stainless switches see pages 3-4–3-6.)

H363DF

**Fiberglass Reinforced Polyester Enclosures—NEMA 4X**

Fiberglass reinforced polyester enclosures are watertight, corrosion resistant, and impervious to windblown dust, rain, and splashing liquid. The molded fiberglass is extremely stable in a wide range of operating temperatures and can withstand heavy impact. Switches are furnished with hubs (page 3-14) and equipment grounding lugs. UL Listed.

SAFETY SWITCHES

3

The MD motor disconnect switch is listed UL508 Suitable For Motor Control (UL File E164864). It is in a compact NEMA 4X enclosure suitable for use in NEMA Type 1, 3, 3R, 4, 4X and 12 applications. The MD's key benefits are an extremely small footprint, a more economically efficient NEMA 4X solution and a handle interlock preventing cover removal when the switch is in the ON position.

**Table 3.18: MD Motor Disconnect Switch—Non Metallic NEMA 1, 3, 3R, 4, 4X and 12 Enclosure▲■◆**

Amperes	Cat. No.	Maximum Horse Power Ratings			\$ Price	Height (in.)	Width (in.)	Depth (in.)

MD Motor Disconnect Switches

**Interlocked Receptacle Switches**

**Interlocked Receptacle Switches** are furnished with a factory-installed three-phase four-wire Appleton Powertite™, Crouse-Hinds Style 2 Arkrite™, or Hubbellock™ receptacle. The fourth wire is connected to the switch equipment grounding terminal and is not a neutral termination. Interlocking linkage between the receptacle and switch mechanism prevents insertion or removal of the plug while the switch is in the "ON" position or insertion of any plug other than specified. Grounding lugs are included.

**Appleton Powertite Receptacle**

- Devices are UL Listed and CSA Certified, suitable for use as service equipment.
- Receptacles are epoxy powder coated over copper-free cast aluminum and NEMA 3, 3R, 4, 4X and 12 rated. Appleton receptacles are UL Classified for use with the Crouse-Hinds plugs listed below.
- Short circuit rating: 10 kA when used in conjunction with Class H or K fuses; 200 kA when used in conjunction with Class R or J fuses.

**Electrical Interlock Kits**

Electrical interlocks for heavy duty 30–1200 A safety switches are available factory-installed or in kit form for field installation. Each kit contains instructions for proper field mounting. A pivot arm operates from switch mechanism, breaking the control circuit before the main switch blades break. Switches with electrical interlocks installed are UL Listed. For factory-installed electrical interlocks add EI (for one contact) or EI2 (for two contacts) suffix to catalog number. See Supplemental Digest page 2-3 for electrical interlock contact ratings.

**Table 3.22: Electrical Interlock Kit ▲**

Switch's Amperes Rating	Series Number (See pages 3-13, 3-14)	Electrical Interlock Kit Cat. No. ■	\$ Price	Factory-Installed \$ Price

**Internal Barrier Kits**

Internal Barrier Kits provide an additional barrier that helps prevent accidental contact with live parts. Field-installed transparent barriers do not restrict visual inspection of the switch. Barriers provide IEC529 IP2X "finger safe" protection when door of enclosed disconnect switch is open. Convenient door allows use of test probes without accessing fuses and replacement of fuses without removing barrier. Barrier can also be used with the skirt kit to enclose a panel mounted Type 9422 disconnect.

Cat. No.	Description	Safety Switch Application (F Series Only)	9422 Type T Disconnect Application	\$ Price
SS03	Interior Barrier for 30 A Safety Switch▼	240 / 600 Vac – 30 A	NA	150.

- ◆ The following Series F5-F6 devices use GTK0610(C): H-361-2 and H-361-2RB.
- ★ 4- and 6-pole 30 A F Series.
- ▼ Two required if grounding conductors are run in parallel.
- △ PE1A Discount Schedule
- Equipment Ground Kits are factory-installed standard in 30–200 A series F NEMA 4-4X-5 (stainless) and 12. Equipment Ground Kits are standard on all NEMA Types, Series F 30–200 A 4 and 6 pole switches.

**Table 3.25: Square D Gray Paint**

Description	Cat. No.	\$ Price
16 oz. Aerosol Paint Can, Square D Gray Paint	PK49SP	39.00 ea.

Note: Shipped in quantities of 6.

**Special Paint**

UL Listed heavy duty switches are available painted with special safety colors. To order safety colored switches add suffixes as noted in Table 3.26 to the standard switch commercial reference number.

All colors comply with OSHA Standard 1910.144 and ANSI Specification Z535.1 for marking physical hazards.

**Table 3.26: Safety Colors**

Safety Color	Suffix
Black	SP0
Red	SP2
Orange	SP3
Yellow	SP4
Green	SP5
Blue	SP6
Purple	SP7
Gray	SP8
Gray ANSI 61	SP861▲
White	SP9

▲ Standard Square D ANSI 49 grey paint, when selecting this suffix, switches will receive additional coat of paint.

**A minimum quantity of 10 is required.** Not available for NEMA Type 7/9 or stainless steel products.

**Price Adder Each Switch**

Quantity	\$ Price							
	30 A	60 A	100 A	200 A	400 A	600 A	800 A	1200 A
10	242.00	278.00	434.00	479.00	1137.00	2801.00	3501.00	4376.00

**Lock-Off Guard Kits★**

Available factory- or field-installed the lock-off guard works by covering the lockout/tagout opening whenever the switch is in the ON position. This prevents a padlock from being inadvertently inserted into the switch lockplate. The device is designed to help prevent accidental misapplication of a lockout device. These kits are marked cURus (UL Component Recognized) for field or factory installation.

Amperes◆	Kit Cat. No.	Field-Installed \$ Price	Factory-Installed \$ Price
30 A	LOGK1	44.30	146.00
60 A 240 V			
60 A 600 V	LOGK2	45.00	177.00
100 and 200 A			

- For factory installation, add suffix "LOG" to the switch catalog number.
- ◆ For use with 30–200 Ampere Series F NEMA 1, 3R, 12 and 12K switches only.
- ★ Factory install and kits are available for NEMA 1, 3R, 12 and 12K switch enclosures only.

## Key Interlock Systems

Factory-installed only on heavy duty safety switches and double throw safety switches. Interlocks are used to prevent the authorized operator from making an unauthorized operation. Not available on hazardous location devices (NEMA 7/9) or fiberglass reinforced polyester (NEMA 4X). The key interlock system is a simple and easy method of applying individual key interlock units and assemblies to the above equipment so as to require operation in a predetermined sequence. UL Listed.

### Quoting:

Contact Schneider Electric for catalog number, availability, and pricing prior to quoting a job.

Detailed information is required before an order can be processed. Please see Supplemental Digest Section 2 for further information.

Use these suffixes on switch catalog numbers:

- KI = 1 lock per switch
- KI2 = 1 lock with 2 cylinders (2 keys) per switch
- KIKI = 2 separate locks per switch

Table 3.27: Price Adder Per Lock ▲

Switch Type	\$ Price
30–1200 A Heavy Duty	2055.00
30–600 A Double Throw	1988.00

▲ Prices do not apply when more than three devices are interlocked, as these schemes normally require more than one key assembly per device.

## Lock-On Provisions

Lock-off provisions are standard on all heavy duty safety switches. Provision for one 3/8-inch hasp padlock is available factory-installed on NEMA 1, 3R, 4-4X-5 stainless steel and 12 switches. This modification will allow the switch to be locked in the “ON” position. UL Listed.

Table 3.28: Price Adder Per Each Switch

Safety Switch Rating	\$ Price
30–1200 A	155.00

To order, add suffix SPLO to standard catalog number. Example: H364-SPLO

## Cover Viewing Window

Optional cover viewing window is positioned over the blades to allow visual verification of “ON-OFF” status. Available on 30 through 1200 A heavy duty switches, all NEMA Types. (Not available on NEMA 4X fiberglass reinforced polyester, Krydon™ enclosures, or NEMA 7 and 9 devices.)

Factory-installed only: add “VW” suffix to the Cat. No. See table below for price adder.

Table 3.29: Price Adder Per Switch—UL Listed

Class	Amperes	2- and 3-Pole	4- and 6-Pole
Heavy Duty	30–100 A	38.00	75.00
Heavy Duty	400–1200 A	2297.00	—
Double Throw	30–100 A	255.00	510.00

## Switch Lubricant

Field maintenance lubricant is available for servicing blade and jaw components in switches 600 V and below. Catalog number SWLUB (list price \$24.14) consists of one tube of BG20 High Performance Synthetic Grease manufactured by Dow Corning®. SWLUB is available in warehouse stock, shipped individually or in multiples of 12 units per carton.

## Copper Only Lug Kits

Heavy duty safety switches are supplied standard with Al lugs, which accept both Cu and Al wires. For field installation of copper-only lug kits, order kits below. For factory installation of copper only lugs, add suffix SLC to standard Cat. No. Note: 30 through 200 Amperes NEMA 12, 12K and stainless steel switches with factory-installed lugs bear the UL Marine Listed manifest for use on vessels over 65 feet long. 30 through 200 Amperes NEMA 12, 12K and stainless steel switches using field-installed copper only lug kits are UL Marine Listed, but do not bear the marine manifest.

Al/Cu to Cu Only

Table 3.30: Kits—Wire size (pp 3-13)

Amperes	Lug Kit Cat. No. ■	Kit \$ Price	Factory-Installed Adder per Switch
30	CL0306F	69.00	224.00
60	CL0306F	69.00	224.00
100	CL10F	159.00	431.00
200	CL20F	264.00	717.00
400	CL40F	549.00	1490.00
600	CL60F	893.00	2426.00
800	—	—	—
1200	—	—	—

■ One kit includes all phase line/load lugs for a 3-pole switch.

## Double Lug Kits

200 A heavy duty F-series switches are supplied standard with lugs listed on page 3-13 (one wire per phase). For lugs that accept two wires per phase and neutral, order the following kit:

Amperes	Lug Kit Cat. No. ▲	Kit \$ Price★	Lug wire range per phase and neutral AWG/kcmil	Switch wire range per phase and neutral AWG/kcmil
200	AL20DTF	159.00	(2) 6–300 Cu/Al	(2) 6–250 Cu/Al

▲ Not UL Listed.

★ Kit contains 3 lugs. For double lugs for line and load, order 2 kits.

Table 3.31: 800 and 1200 A Compression Lug Kits—

Field-Installed (See page 3-13 for 100–600 A Switches)

Series E4 800 and 1200 A safety switches are equipped as standard with mechanical lugs. Alternate compression lug kits are available for field installation and are UL Listed. Each kit consists of VCEL07512H1 Versa-Crimp™ Compression Lugs and lug landing connectors capable of converting line and load side of one switch pole or neutral.

Order one field-installed kit per pole or neutral per table below.

Example: Three-pole three-wire requires three kits; three-pole, four-wire requires four kits.

Amperes	Lug Kit Cat. No.	\$ Price Per Pole or Neutral
800	H8LKE2	893.00
1200	H12LKE2	1109.00

Note: For terminal lug data, refer to table below.

Table 3.32: Factory-Installed

Series E4 800 and 1200 A safety switches are available with factory-installed VCEL-075-12H1 Versa-Crimp compression lug kits (above). For factory installation, add suffix LK to standard Cat. No. (Example: H367LK) and use price adder from table below based on system type.

Amperes	System	Factory-Installed \$ Price Adder Per Switch
800	2 Wire	2106.00
	3 Wire	2972.00
	4 Wire	3839.00
1200	2 Wire	2591.00
	3 Wire	3696.00
	4 Wire	4806.00

Note: For terminal Lug data refer to table below.

Table 3.33: Terminal Lug Data—800 and 1200 A Compression Lugs

Amperes	Conductors Per Phase	Compression Lug (VCEL-075-12H1) Wire Range
800	(3) Line and (3) Load	500–750 kcmil (Al) or 500 kcmil (Cu)
	(4) Line and (4) Load	500–750 kcmil (Al) or 500 kcmil (Cu)

**30–100 A Types DT, DTU (Series F)**

- Fusible (DT) and non-fusible (DTU) switches available
- Manually-operated switch suitable for use in accordance with article 702 of the NEC, ANSI/NFPA 70
- Standards: UL 98, NEMA KS1, CSA, and NOM
- Modular design—switch handle, lock-plate, switch mechanism; line and load bases are field replaceable
- UL Listed short circuit current ratings up to 200 kA (using Class R, J, or T fuses—see table for rating)
- Load make/break rated
- Meets NEMA hp ratings
- Dual cover interlock
- May be padlocked ON (I) or OFF (O)
- Lock-off accepts up to three padlocks
- Side-opening door
- Quick make / quick break mechanism
- Meets NEMA requirements as heavy duty switch
- Field-installed electrical interlock kits
- Field-installed neutral assembly kits (2P and 3P switches)
- UL Listed as suitable for use as service equipment
- Supplied as standard for switching one load between two power sources, and may be field-converted to switch on power source between two loads.

**30 (Series T4), 200–600 A Types 82,000 and 200 A DTU (Series E, A)**

- Non-fusible
- Designed for manual transfer of loads from one supply to another
- UL Listed switches are suitable for use in accordance with Article 702 of the National Electrical Code, ANSI / NFPA 70
- All 82,000 and DTU double throw switches are continuous duty rated for their nameplate ampere rating
- The 82,000 and DTU (Series E, A) switches are load make/break rated
- UL Listed as suitable for use as service equipment
- Horsepower rated only as footnoted.

**Field-Installed Accessories:**

- Neutral
- Electrical Interlock
- Grounding Terminals

200 A Type 82000 and DTU (Series E) ■	▲	▲	1110.00	—	—	—
400 A Type 82000	DT400N	(1) 4–600kcmil or (2) 1/0–250kcmil	105.00	—	—	—
600 A Type DTU (Series A)	DT600NKD	250–500kcmil	452.00	—	—	—

▲ For Type 82,000 switches, neutral is available factory-installed on 2P and 3P double throw switches. Not UL Listed. To order, add suffix N to the standard catalog number and add the above price to the list price of the switch. For DTU switches, neutral is factory-installed in standard device and is UL Listed.  
■ Neutral assembly catalog number DT200N can be added to 4P Type 82000 switches in the field.

**Table 3.39: Electrical Interlocks (For Electrical Interlock Contact Ratings, see Supplemental Digest page 2-4.)**

Switch	Field-Installed Electrical Interlock Kit Cat. No. ♦	\$ Price	Factory-Installed \$ Price Adder Per Switch
30–100 A Type DT, DTU (Series F)	EIK1, EIK2 ★♦	311.00	905.00▼
200 A Type 82000 and DTU (Series E) Δ	□	—	1113.00▼
400 A Type 82000	EK400DTU2	260.00	1533.00
600 A Type DTU (Series A)	DS200EK2D	438.00	—

♦ Electrical interlock kit catalog numbers with "1" suffix indicate one normally open and normally closed contact; "2" indicates two normally open and two normally closed contacts. See page 3-10 for electrical interlock ratings.  
★ 30–100 A Type DT, DTU (Series F) switches contain (2) separate switching mechanisms. Each mechanism will accept an electrical interlock. Some applications may therefore require (2) electrical interlocks.  
▼ 30–100 A Type DT, DTU (Series F) switches with factory-installed electrical interlocks installed are UL Listed and interlocks are furnished with 2 N.O./2 N.C. contacts installed in both "ON" positions. To order, add suffix EI to standard catalog number.  
Δ Electrical interlock EK400DTU2 can be added to 4-pole Type 82000 switches in the field.  
□ Type 82000 and DTU switches are available with electrical interlock factory-installed only. Not UL listed. Electrical interlocks are furnished with 2 N.O./N.C. contacts and are installed in both "ON" positions. To order, add suffix EI to standard switch catalog number.  
♦ Double throw switches 92251, 92351, and 92451 are not available with factory or field installed electrical interlocks.

**Table 3.40: Service Grounding Kit (Required for service equipment use.)**

**Situations Requiring Fuses**

30–100 A Type DT (Series F):

Select DT switches from pages 3-16, 3-17, which have provisions for accepting fuses.

30 A, 200–600 A Type 82,000 (Series E, T4, A), all DTU devices:

Use the non-fusible double throw switches from pages 3-16, 3-17 in conjunction with standard fusible devices, and install them according to diagram 1 or 2, below.

**Diagram 1**

**Diagram 2**

**Table 3.44: UL Listed Short Circuit Current Ratings**

Switch Type	Amperes	Voltage Rating	UL Listed Fuse Class	Short Circuit Current Rating ▲ (A)
Type DT (Series F)	30–100 A	240 V or 600 V	H, K	10,000
			R, J	200,000
Type DTU ■ (Series F)	30–100 A	240 V or 600 V	H or K	10,000 ◆
			R, J or T	200,000
DTU224NRB and DTU324NRB (Series E)	200 A	240 V	H, K	10,000 ◆
DTU324N (Series E)	200 A	240 V	H, K	10,000 ◆
			R, J	100,000
Type 82,000	all	240 V	H, K	10,000 ◆
			R, J	100,000 ★
		600 V	H, K	10,000 ◆
			R, J, T	100,000
Type DTU (A series)	600 A	240 V or 600 V	H, K	10,000
			R, J, T	100,000

- ▲ Rating applies to AC only. The UL Listed short circuit current rating for non-fusible switches is based on the switch being used in conjunction with the corresponding fuse type. Evaluation of non-fusible switches in conjunction with molded case circuit breakers has not been performed.
- The DTU361 and DTU361RB are also suitable for use on a circuit capable of delivering not more than (A) 18 kA, 600 Vac maximum when protected by Type FH circuit breaker rated 30 A maximum or (B) 14 kA, 600 Vac maximum when protected by Type FA circuit breaker rated 30 A maximum.
- ◆ Any brand of circuit breaker or fuse not exceeding the ampere rating of the switch may be used ahead of a non-fusible safety switch when there is up to 10 kA short circuit current available.
- ★ 400 A 82,000 switch is only 10 kA.

Put over 100 years of Schneider Electric's experience as a global specialist in energy management to work on your photovoltaic (PV) project. The Square D™ 1000 Vdc disconnect switch is the perfect solution for your 1000 Vdc

PV disconnect applications. It is compact and available in both a 100 and 200 amp non-fusible versions. IEC 60947-1 and 3 certified (file 136861) and UL 98 certified (file E343341).

**Extended Life Expectancy**

- Exceeds IEC 60947-3 mechanical endurance requirements by factor of 18
- Exceeds IEC 60947-1 electrical endurance requirements by factor of 10
- Exceeds NEMA KS-1 mechanical endurance requirements by factor of 3.

**Designed for Harsh PV Environments**

- NEMA Type 3 and IP63 enclosure
- Resists windblown dirt/dust
- Exceeds NEMA Type 1, 3R and 12
- Operating range of -37°C to 50°C
- Specially designed PV paint reduces solar gain up to 35% over standard grey enclosures

**Easy to Install**

- Preconfigured solar solution
- Familiar enclosed safety switch design
- Suitable for both grounded and ungrounded PV

 ◆ Accommodates (2) 250 max Cu or (1) 1/0 max Cu wiring; Order SN20CPV for field-installed kit \$246.00.

Schneider Electric gives the Photovoltaic market place the most comprehensive one stop shop for Residential and Light Commercial Photovoltaic Balance of System components. Schneider Electric's Inverters, and Square D brand DC and AC disconnect switches and Load Centers are ideal solutions to your Balance of Systems requirements. See the Balance of System solution chart below for your single phase PV system.

200 A Enclosed Switch Dimensions (inches)

For internal 600 Vdc PV combiner box switches please see our offering of 9422 switches 600 Vdc UL98 listed in digest pages 8-14.

For our 600 Vdc PV switch offering please see digest pages 3-5-3-6.

Square D PV string combiner boxes are used to integrate multiple PV strings into one output circuit. Its tough exterior and safety features protect wiring from weather and overcurrent. The exterior coating ensures low operating temperatures and longer life of internal components. The specially engineered enclosure is designed to provide dust tight and rain tight protection; it meets or exceeds NEMA<sup>®</sup> 3R, 12, and 4 requirements. Traditional Square D visible blade switch architecture confirms disconnection, while touch-safe interior shielding protects against accidental contact with live components.

**Features**

**Flexible**

- Vertical, horizontal, and angled mounting options
- Flexible installation with top, bottom, and side entry
- Substantial wire-bending space

**Robust**

- Dust tight and rain tight engineered enclosure for outdoor use
- UV-resistant white exterior coating to reduce solar gain by 35%
- Meets or exceeds NEMA 3R, 12, and 4 requirements

**Safe**

- Square D traditional visible blade switch architecture for confirmation of disconnect
- Touch-safe interior shielding guards against accidental contact with current-carrying components
- Seismic-certified 100–400 amp string combiner boxes for earthquake safety
- Optional integrated 2.5 kV surge arrestor to protect PV electronics from lightning strikes

**Listings**

- UL 1741
- Switches tested to UL98B
- CSA C22.2 Spec 107.1

▲ For factory installed surge protection device add the suffix “S” to the catalog number.

Typical String Combination Box Dimensions

**Surge Protection Device**

The 600 Vdc Type 2 Surge Protection Device (SPD) is for medium risk PV applications. The SPD when installed in a Square D combiner box protects solar modules, power tracking and blocking diodes from physical damage resulting from lightning induced transients. The SPD device uses Metal Oxide Varistor (MOV)/Gas-Filled Spark Gap (GSP) protection circuits for longer life and no current leakage. The devices are UL1449 ed 2 compliant Low Voltage TVSS. The SP are available as factory installed by adding the suffix “S” to the combiner box catalog number or as kits a kit: REHTYPE2SP.

### Three dimensions of energy and power management savings

Volatile energy prices and stringent emissions standards have made it more challenging to control operational costs thus putting profits at risk. Square D PowerLogic™ energy and power management systems will help you make the most of your energy by:

#### Reducing Utility Costs & Increasing Energy Efficiency

Achieve significantly reduced direct consumption-related costs through improved efficiency, lower emissions and more accountability. And if you're a property manager, you can increase the accuracy of energy settlements that can help attract or retain tenants. By simply installing a PowerLogic™ power monitoring system, our customers over the past twenty years have reported realizing a 2–4% savings in utility costs-but that's just the "tip of the iceberg" in terms of your potential savings.

#### Optimizing Equipment Utilization

Avoid or defer capital costs by better utilizing existing electrical infrastructure typically results in another 2–5% savings. By monitoring key points and collecting system loading information, engineering is able to make decisions on a plant's capacity to handle new production lines or to determine if additional distribution equipment is required for a building expansion.

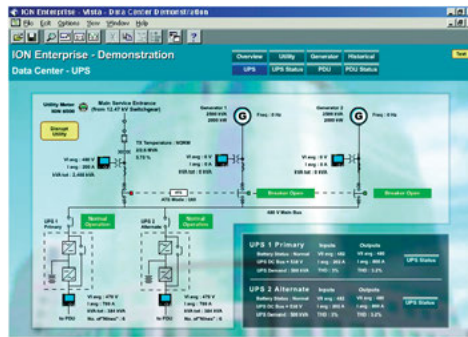

#### Improving System Reliability & Safety

Typically, another 10% can be found by discovering power system reliability improvements with powerful PowerLogic™ metering that offers extremely accurate and high speed event capture information. Once detected, future power disturbances are often correctable and can help facilities avoid expensive and often hidden risks to productivity. As an added benefit, PowerLogic monitoring system information is accessible from the safety of your personal computer. This offers improved worker safety since it is not necessary to suit up in personal protective equipment to access energized equipment over the network.

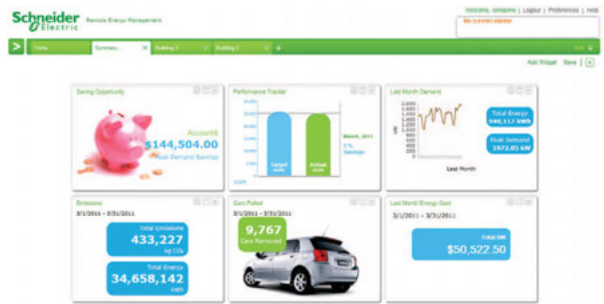

PowerLogic™ systems give you the power to achieve this kind of savings, resulting in a quick return on your investment. We pride ourselves on reliable products, innovative systems, expert engineering services, and our ability to provide single-source energy and power management solutions. It's not just a concept to us, it's a legacy and a promise-for companies that seek an edge in productivity. That's why leaders turn to Schneider Electric.

ION Enterprise Software

Remote Energy Management

**PowerLogic ION Enterprise Software**

PowerLogic ION Enterprise software is an all-in-one package for operational power system monitoring, analysis and control that helps you reduce energy-related costs. It offers control capabilities, comprehensive power quality and reliability analysis and helps reduce energy related costs. The software is a suite of applications that allows you to collect, process, analyze, store, and share data across your entire enterprise. PowerLogic ION Enterprise software is designed to give you the information and analysis tools you need to make sound decisions. Its cutting-edge flexibility and compatibility allow you to extend your energy management system at your own pace, adding newer components as they become available, without interrupting or impacting existing functions. PowerLogic ION Enterprise collects data through serial, wireless, modem or Ethernet links and can manage a single site or, through the Internet, connect a global network of devices.

▲ Every new system must be ordered with 1 IONE56-Base software and a minimum of 5 IONE56-DL device licenses.  
Note: Software versions may have upgraded since release of this digest. Please check with your Schneider Electric Sales Rep or local distributor for latest ION Enterprise version.

**Remote Energy Management Web-Hosted Service**

Schneider Electric Remote Energy Management (REM) is a web-hosted service that easily turns energy usage data into actionable information, accessible via any standard web browser. With REM, users can easily identify energy waste, reduce energy consumption, save on utility bills, and measure, report on and implement energy and emission reduction initiatives...all easily made available through predefined reports and customizable dashboards

- Compare energy usage among similar facilities to establish benchmarks and identify poorly performing facilities.
- Normalize consumption against weather, production, hours of operation, sq footage, and occupancy.
- Measure the effectiveness of various energy efficiency efforts.
- View carbon emissions reports.
- Easily view all monitored sites around the globe on a single screen through the Enterprise Map View.
- Optimize equipment run hours and setting to avoid setting costly new demand peaks.
- Compare consumption data between different meters or a group of meters.
- Identify exceptional usage patterns.
- Track, report, and analyze information from all utility sources including water, gas, electric, and steam.
- Compare usage to utility bills to verify correct billing from the utility.
- Use "what if" analysis tools to make accurate assessments of what utility costs would be on different utility rates.

Contact your local Schneider Electric sales office for pricing and availability.

PowerLogic Scada Software

### PowerLogic SCADA

PowerLogic™ SCADA software was created to meet the requirement for real-time monitoring and control of electrical distribution systems, including fast response times and high reliability through redundancy. PowerLogic SCADA is powered by Citect™ SCADA technology but is specifically designed for electrical power systems applications. The complete PowerLogic supervisory control and data acquisition (SCADA) solution includes a dynamic graphical user interface, enhanced alarm management, one second response times for control operation and status, transparent redundancy, and reliable communications (through hardware components and network topology). The system also features Sequence of Events Recorder (SER) logs with time stamps of 1ms resolution. PowerLogic SCADA software includes a web-based client for remote viewing capability. The graphical user interface consists of animated objects which change according to status information. The flexible graphics editor includes both ANSI and IEC electrical symbols to facilitate easy one-line diagram creation. Real-time and historical trending is also supported.

For pricing information, please contact your local PowerLogic representative.

Personalized dashboards help management and operations personnel monitor all aspects of energy use and respond to opportunities or threats.

Produce aggregate billing, load profile, cost allocation, power quality, forecasting or budget reports to help inform stakeholders and track results against goals.

Use advanced billing functions to support energy procurement and manage load or generation assets in response to curtailment or pricing signals.

Monitor power quality risk factors, benchmark performance, determine impacts, validate contract compliance, isolate problem sources, and confirm your return-on-investment.

PowerLogic ION EEM is a complete enterprise energy management solution that unites business and energy strategies across your entire enterprise by unifying and extending the benefits of your existing energy-related data resources. Stakeholders from management to operations will be empowered by actionable energy intelligence to reveal opportunities, isolate problems and drive cost and risk reduction strategies.

PowerLogic ION EEM automatically acquires data from power monitoring and control systems, building and process automation systems, utility information systems, weather services, spot-market energy pricing feeds, and enterprise business applications, cleanses and warehouses it. Personalized, browser-based dashboards and innovative visualization and modeling tools then make the information available to whomever needs it, so you can accurately monitor, validate, predict and control energy-related expenses.

From operational cost reductions to procurement support through cost allocation, benchmarking and budgeting, key performance indicators and advanced analytics, PowerLogic ION EEM helps you manage energy in financial terms. It also helps you gain unique insight into the impacts of power quality on your business and all energy assets. From the service entrance to the boardroom, PowerLogic ION EEM software allows energy to be managed as a variable cost.

**Key features**

- True enterprise-level software architecture: data quality assurance, data warehouse, web framework
- Web portal: personalized dashboards, key performance indicators, charts, trends, real-time conditions
- Reporting: rich and customized content, support for complex data and graphics, scheduled distribution
- Trending: advanced visualization, dimensional analysis, prediction, statistical rollups
- Modeling: regression analysis, normalization, correlation, integration of all relevant drivers and contextual data
- Billing: built-in rate engine and rate wizard
- Power quality analysis: wide-area event monitoring, classification, filtering, correlation
- Alarms and events: triggering on complex conditions, notification, logging
- Integration: data acquisition systems, weather and pricing feeds, other enterprise applications (e.g. BAC, ERP)
- CO<sup>2</sup> Report

**Typical applications**

- Manage all utilities (electricity, gas, water, etc.) and emissions through a single, unified interface
- Benchmark facility performance across an entire enterprise to identify energy inefficiencies
- Measure and verify savings from energy conservation projects or performance contracts
- Reduce operational costs, improve processes, and prolong asset life
- Meet corporate environmental stewardship goals or mandated impact targets
- Manage demand control schemes, load shedding, peak shaving, base loading or on-site generation
- Enable participation in real-time pricing and load curtailment programs
- Optimize procurement by forecasting and budgeting for energy needs and comparing utility rates
- Identify utility billing errors and validate contract compliance
- Allocate and recover utilities costs from tenants, departments, processes, etc.
- Maximize the use of existing infrastructure capacity and avoid overbuilding
- Identify and reduce risks to uptime

**Data presentation tier**

Web portal delivers enterprise-wide access through personalized dashboards, reports, detailed analytics, and integration of views from third-party systems. Schedule information and report distribution to the people who need it, for use on their desktop or mobile devices.

**Business applications tier**

Standard and optional modules tailor functionality to specific needs. Advanced analytics and reporting on every driver and relationship affecting energy cost and reliability.

**Data management tier**

Integration of data from many sources: power monitoring and control systems (PowerLogic or third party), utility metering systems (water, air, gas etc.), Internet weather, real-time energy pricing feeds, manual input, energy assets (power distribution and reliability equipment, generators), line-of-business systems (BAC, DCS, ERP, EAM, accounting). Data quality module assures complete and reliable data from all inputs.

For price and ordering information, contact your local PowerLogic Sales Specialist or PowerLogic Inside Sales at 615-287-3535.

**ION8650/7550/7650 Power and Energy Meters**

The web-enabled PowerLogic ION8650 is used to monitor electric distribution networks, service entrances and substations. It enables businesses to manage complex energy supply contracts that include power quality guarantees. Low-range current accuracy makes it ideal for independent power producers and cogeneration applications that require the accurate bi-directional measurement of energy. It is well suited to load curtailment, equipment monitoring and control and energy pulsing and totalization applications. Integrate it with PowerLogic ION EEM enterprise energy management software, PowerLogic ION Enterprise operations software or other energy management and SCADA systems.

**PowerLogic ION8650 Power and Energy Meter Features**

**Feature set C includes:**

- 9S, 35S, 36S socket and switchboard cases
- True RMS 3-phase voltage, current, power and meets stringent ANSI revenue metering standards including ANSI C12.20 0.2 and Class 2, 10, & 20
- Power quality: sag/swell, individual, even, odd, total harmonics to the 31st and symmetrical components
- 32MB log/event memory, min/max for any parameter, historical logs up to 64 channels, timestamp resolution to 0.001 seconds and GPS time synchronization
- Transformer/line loss compensation and Instrument transformer correction
- Communications: Ethernet, Serial, Modem, Internet and Ethernet to serial gateway and ION, DNP 3.0, Modbus RTU, Modbus TCP, MV-90 protocols, IEC 61850
- Dial-out capability when memory is near full
- Multi-user, multi-level security with control and customized access to sensitive data for up to 16 users
- Data push capability through SMTP (email)
- 65 setpoints — math, logic, trig, log, linearization formulas

- Password protection and anti-tamper seal protection
- Built-in I/O: 4 KYZ digital outs and 3 form A digital ins, 4 KYZ digital outs and 1 form A digital out and 1 form A digital in, an optional external I/O expander provides additional I/O

**Feature set B adds the following to feature set C:**

- Harmonics—individual, total even, total odd up to the 63rd
- 64MB standard memory
- Historical logs up to 320 channels
- Modbus RTU Master on serial ports
- Cycle setpoint minimum response time

**Feature set A adds the following to feature sets C and B:**

- Waveform capture up to 1024 samples/cycle, PQ compliance monitoring, flicker to EN50160, IEC 61000-4-7/4-15 (also configurable to IEEE 519-1992, IEEE159, SEMI) CBEMA/ITIC
- Transient detection to 6517µs at 60Hz;
- Harmonics: magnitude, phase and inter-harmonics to the 50th
- 128MB standard memory
- Max 96 cycles of waveform logs and 800 channels of historical logs

**Table 4.3: Typical PowerLogic ION8650 Power and Energy Meter Ordering Configurations**

Description	Catalog No.	\$ Price
ION8650, feature set A, 9S socket base, 5 A nominal current inputs, 10MB memory, 127–177 Vac, 60 Hz, communications card with: 10BaseT, RS-232/485, RS-485, Optical port, 4 Digital Outputs, 3 Digital Inputs	S8650A0C0E6E0B0A	7077.00
ION8650, feature set A, 35S socket base, 5 A nominal current inputs, 10MB memory, 120–480 Vac, 60 Hz, communications card with: 10Base T, RS-232/485, RS-485, Optical port, 4 Digital Outputs, 3 Digital Inputs	S8650A1C0E6E0B0A	7077.00
ION8650, feature set C, 9S socket base, 5 A nominal current inputs, 2MB memory, 120–277 Vac, 60 Hz, communications card with: RS-232/485, RS-485, Optical port, 4 Digital Outputs, 3 Digital Inputs	S8650C0C0E6A0B0A	2889.00
ION8650, feature set C, 35S socket base, 5 A nominal current inputs, 2MB memory, 120–277 Vac, 60 Hz, communications card with: RS-232/485, RS-485, Optical port, 4 Digital Outputs, 3 Digital Inputs	S8650C1C0E6A0B0A	2889.00

**PowerLogic ION7550 and ION7650 Power and Energy Meters**

Used at key distribution points and sensitive loads, the web-enabled PowerLogic ION7550 and PowerLogic ION7650 meters combine a wealth of advanced features from power quality analysis capabilities, revenue accuracy and multiple communications options, through web compatibility, and control capabilities. Both are compatible with PowerLogic ION EEM enterprise energy management software, PowerLogic ION Enterprise operations software can be integrated with other energy management or building control systems through multiple communication channels and protocols.

The meters are ideal for compliance monitoring, disturbance analysis, cost allocation and billing, demand and power factor control and equipment monitoring and control. The meters have a high visibility, adjustable front panel display that can depict TOU, harmonics, event logs, phasers, and instantaneous power parameters. They meet stringent ANSI C12.20 0.2, Class 10 & 20 revenue metering standards.

**PowerLogic ION7550 and ION7650 Power and Energy Meter Features**

**The PowerLogic ION7550 includes:**

- 3.5" x 4.5" (87 x 112 mm) backlit LCD display
- True RMS 3-phase voltage, current, and power that meets stringent ANSI C12.20 0.2, Class 2, 10, & 20
- Power quality: sag/swell, harmonics - individual, even, odd, total to the 63rd, waveform capture at 256 samples/cycle
- 5MB log/event memory (10MB optional), waveform logging up to 96 cycles, up to 800 channels historical, min/max, timestamp resolution to 0.001 seconds, GPS time synchronization and historical trends through front panel
- Communications: fiber, Ethernet, serial, internal modem, optical port, and a gateway functionality, ION, DNP 3.0, Modbus RTU - master & slave, Modbus TCP, MV-90, and IEC 61850. IEC 61850 only available with 5MB memory and Ethernet options
- Dial-out capability when memory is near full
- Data push capability through SMTP (email)

- Multi-user, multi-level security with control and customized access to sensitive data for up to 16 users
- 65 configurable 1/2 cycle setpoints for single, multi-condition and dial out on alarm and math, logic, trig, log, linearization formulas
- Password protection and anti-tamper seal protection enhance meter security
- Extensive standard I/O includes: 8 digital inputs, 4 digital outputs and 3 onboard relays

**The ION7650 has all the features of the ION7550 and adds:**

- Waveform capture up to 1024 samples/cycle
- Transient detection to 17µs at 60Hz
- Harmonics: magnitude, phase and inter-harmonics to the 40th
- Flicker to EN50160 and IEC 61000-4-7/4-15 (also configurable for IEEE 519-1992, IEEE159, SEMI), plus CBEMA/ITIC
- Symmetrical components
- Power quality measurements per IEC 61000-4-30 Class A, Ed. 2

Note: Please refer to powerlogic.com for the most complete and up-to-date list of feature availability. Some features are optional.

Used in diverse applications such as feeder monitoring and sub-metering, the PowerLogic ION7300 series meters are also suitable for high-accuracy power and energy metering, bill verification, cost allocation and billing, demand and power factor control, load studies, circuit optimization, equipment monitoring and control and preventative maintenance. They are ideal replacements for analog meters, with a multitude of power and energy measurements, analog and digital I/O, communication ports and industry-standard protocols. The ION7330 meter adds on-board data storage, emails of logged data and an optional modem. The ION7350 meter is further augmented by more sophisticated power quality analysis, alarms and a call-back-on-alarm feature. They are compatible with PowerLogic ION Enterprise energy management software, PowerLogic ION Enterprise operations software or can be integrated with other energy management or building control systems through multiple communication channels and protocols.

**PowerLogic ION7350, ION7330 and ION7300 Power and Energy Meter Features**

**The PowerLogic ION7300 includes:**

- Multiple form factors: transducer integrated and remote display models
- True RMS 3-phase voltage, current, and power that meets stringent ANSI C12.16, Class 10
- Power quality: harmonics—individual, even, odd, total to the 15th, maximum 32 samples/cycle
- Communications: 1 RS-485 port, 1 optional Ethernet port, 1 ANSI Type 2 infrared optical port, 1 PROFIBUS DP port (ION7300 only), onboard web server
- Supported protocols include: ION, Modbus RTU slave on serial, modem, I/R ports, Modbus TCP through Ethernet
- Extensive standard I/O includes: 4 analog inputs, 4 analog outputs, 4 digital relay outputs
- Minimum/maximum recording

**The ION7330 adds the following features:**

- Time of use - multi-year scheduling, hourly activity profiles
- 4 digital inputs for status monitoring and pulse counting
- Communications: a second RS-485 port, internal modem, DNP 3.0 through serial, modem and I/R ports, EtherGate and ModemGate, data/alarms via e-mail and MV-90 on serial and Ethernet ports
- 12, one second setpoints for single, multi-condition alarms, plus math, logic, trig, log, and linearization formulas
- Non-volatile onboard memory capacity of 300kb, min/max logging, min/max logging, up to 32 channels of historical logs, timestamp resolution to 0.001 seconds

**The ION7350 includes the following additional features:**

- Power Quality: sag/swell, individual, even, odd, total harmonics up to 31st, maximum 64 samples/cycle
- Up to 96 channels of logs and up to 48 cycles of waveform logs
- Alarm notifications via e-mail

The modular PowerLogic ION6200 is a low-cost, ultra-compact meter that offers outstanding versatility and functionality. It is simple to use, and has a big, bright LED display. It offers four-quadrant power, demand, energy, power factor and frequency measurements, and is available in a variety of flexible configurations. It is available as a low-cost base model to which enhanced functionality can be added over the long term. The PowerLogic ION6200 is ideal for customers who need revenue-accurate and/or certified measurements and want easy integration with power distribution assemblies and building automation systems. A Megawatt version is available for applications requiring readings in megawatts and kilovolts. It is well suited for sub-metering, energy cost tracking load profiling, and substation panel metering and is an ideal replacement for analog meters. It can be used for stand-alone metering in custom panels, switchboards, switchgear, gensets, motor control centers and UPS systems.

The meter consists of a base unit with options card and a power supply pack, with a remote display being optional.

**PowerLogic ION6200 Power and Energy Meter Features**

- Only two inches deep, and fits a standard ANSI four-inch switchboard cutout, or as a TRAN model with no display and can be fastened to a flat surface with a 4" (10cm) ANSI bolt pattern or mounted to a DIN rail. A remote display module (RMD) can be ordered for the TRAN and mounted through an ANSI 4" (10cm) and DIN 96 cutout.
- LED display with twelve 3/4" (19mm) high digits that display all basic power parameters
- Pulse Outputs: optional kWh, kVARh and/or kVAh pulsing
- Via two Form A outputs
- Communications: optional RS-485 port with Modbus RTU and ION compatible
- 64 samples per cycle true RMS
- 3-phase voltage and current inputs

**The standard ION6200 is available with the following parameters:**

Voltage L-N average and per phase, Voltage L-L average and per phase, Current average and per phase

**Option EP#1, includes the standard measurements and provides the following additional parameters:**

I4, kW/mW total, kWh/mWh total, kW/mW peak, Current demand average and per phase, Current peak demand average and per phase, Power factor total

**Optional Enhanced Package, includes the standard measurements and provides the following additional parameters:**

kW/mW per phase, kVAR/mVAR total and per phase, kVA/mVA total and per phase, kWh/mWh and del/rec per phase, kVARh/mVARh total and del/rec per phase, kVAh/mVAh total and per phase, kW/mW demand, kVAR/mVAR demand and peak, kVA/mVA demand and peak, Power Factor per phase, Voltage THD per phase, Current THD per phase

**Table 4.6: Typical PowerLogic ION6200 Power and Energy Meter Ordering Configurations**

Description	Catalog No.	\$ Price
Integrated display, 10 A inputs, standard 100–240 Vac power supply, RS485 port (Modbus RTU), 2 pulse outputs, Enhanced Package #2	S6200A0A0B0A0B0R	1021.00
TRAN Model, with remote display, 10 A inputs, standard 100–240 Vac power supply, RS485 port (Modbus RTU), 2 pulse outputs, Enhanced Package #2	S6200R1A0B0A0B0R	1055.00
TRAN Model, (no display), 10 A inputs, standard 100–240 Vac power supply, RS485 port (Modbus RTU), 2 pulse outputs, Enhanced Package #2	S6200T1A0B0A0B0R	831.00

### PowerLogic DM6200 Panel Meter and PowerLogic PM1200 Multifunction Power Meter

The PowerLogic DM6200 digital panel meter and the PM1200 multifunction power meter provide all the basic features needed to monitor an electrical panel or circuit affordably. Rugged enough to withstand industrial and commercial environments, these meters will help save on energy and installation costs, are easy to use, and adapts to various circuit requirements onsite.

#### DM6200 Features

- Measures basic measurements (V, A, Hz & PF).
- Used for equipment monitoring, preventative maintenance scheduling, monitoring load locally, and replacing multiple analog meters.
- Onsite configuration of CT and PT ratios and various other set points.
- Configurable analog bar for at-a-glance check of load on feeders.
- Standard modbus output for remote monitoring and data logging.

#### PM1200 Features

- Measures basic measurements (V, A, Hz & PF) PLUS energy, power, demand, and THD.
- Used for energy and power monitoring, demand monitoring, load studies and circuit optimization, energy balancing and optimization, etc.

Table 4.8:

Description	Catalog No.	\$ Price
Basic V, A, F, PF meter w/display, Modbus RS 485 comm port	METSEDM6200	400.00
Power Meter w/display basic readings, THD, demand, Modbus RS 485 comm port	METSEPM1200	550.00

### PowerLogic Series 700 Power Meter

The PowerLogic PM700 series power meters offer all of the measurement capabilities required to monitor an electrical installation in a single 96 x 96 mm unit extending only 50 mm behind the mounting surface (less than 2 inches).

With its large display, you can monitor all three phases and neutral at the same time. The anti-glare display features large 11 mm high characters and powerful backlighting for easy reading, even in extreme lighting conditions and viewing angles.

- Panel instrumentation (OEMs)
- Sub-billing and cost allocation
- Remote monitoring of an electrical installation
- Harmonic monitoring (THD)

#### Power and current demand, THD and min/max reading in basic version

A high-performance solution for trouble-free monitoring of your electrical installation.

#### Energy IEC 62053-22 Class 0.5S (PM750 Only) and IEC62053-21 Class 1 (PM710)

Suitable for sub-billing and cost-allocation applications.

#### Alarms and Digital I/O

The PM750 adds alarming functionality (no RTC) and two digital inputs and one output.

Table 4.9:

Description	Catalog No.	\$ Price
<b>Series 700 Power Meters</b>		
PM710 Class 1 (IEC62053-21) Power Meter with integrated display and RS-485 communications port	PM710	710.00
PM750 Class 0.5S (IEC 62053-22) Power Meter with integrated display, alarms (no RTC), (2) digital inputs, (1) digital output and RS-485 communications port	PM750	950.00

### PowerLogic Series 800 Power Meters

The PowerLogic PM800 series Power Meter is a high-performance power-monitoring unit able to provide advanced power measurement capabilities in a compact 96x96 mm unit. Its large, easy to read display allows you to monitor all three phases and neutral simultaneously. With its easy to use intuitive interface and self guiding menus, the large anti-glare and back lit display makes this meter the easiest yet to navigate and use. The modular design allows for flexibility with an easy upgrade path to grow the meter's capabilities with the addition of Communication and I/O Modules.

- Monitor current, voltage, power and energy simultaneously
- Trending/Forecasting Curves functionality (PM850/870)
- 128 samples/cycle-zero blind metering
- Waveform capture (PM850), configurable waveform capture (PM870)
- Onboard logging (80k in PM820, 800k in PM850/PM870)
- Detection of sub-cycle sags/swells on both voltage and current (PM870 Only)
- V & I individual harmonics up to 31st (PM820) or up to the 63rd for the PM850 and PM870.
- Five input metering channels WAGES
- PQ Advanced Evaluation (EN50160, ITI/CBEMA, SEMI F-47) for the PM850 and PM870
- Type 12 Remote Display Compliant
- Complies with ANSI C37.90 for Surge Withstand Capability (SWC) and IEC 61000-4-12 for Surge Immunity
- Available with 2 standard Digital I/O
- Field installable Digital and Analog I/O
- THD measurement
- Meets ANSI 12.20 Class 0.2 and IEC 62053-22 Class 0.5S accuracy for active energy.
- Optional field installable Ethernet communications card with standard and custom web pages
- GPS Time Synchronization

PM870 Meter unit only without display	PM870U	4460.00
<b>Series 800 Power Meter Accessories</b>		
PM800 Display for integrated meter unit	PM8D	443.00
PM800 remote display and adapter with 12' cable	PM8RD	584.00
PM800 remote display adapter only	PM8RDA	428.00
PM800 Module, 2 digital outputs (relays), 6 digital inputs	PM8M26	635.00
PM800 Module, 2 digital out, 2 digital in, 2 analog out, 2 analog in	PM8M2222	856.00
PM800 Mounting adapter for CM2000	PM8MA	267.00
PM8ECC Ethernet Communications Card; provides a 10/100 Base Tx UTP port, an RS-485 Modbus serial master port, Ethernet-to-serial line gateway functionality, and an embedded web server that is fully compliant with Transparent Ready—Level 1 (TRe1) systems. The PM8ECC supports a private host PM8ECC MIB. Use of this MIB allows the reading of Basic Metering Data, Configuration and Status of I/Os and Configuration and Status of Alarms, plus SNMP Trap generation in response to any PM8 on-board alarms.	PM8ECC	1150.00

**PowerLogic Series 4000 Circuit Monitor**

The award winning, Web-enabled PowerLogic Series 4000 Circuit Monitor (CM4250) is the most advanced permanently mounted circuit monitor in the industry today. Designed for critical power and large energy users who cannot afford to be shut down, the CM4250 provides the ability to monitor, troubleshoot and preempt power quality problems. Transients (disturbances lasting less than one cycle) are particularly difficult to detect, due to their short duration. The CM4000T detects and captures oscillatory and impulsive transients (up to 10,000V peak, line-to-line at 5 MHz per channel) as short as one microsecond in duration. The CM4000T automatically performs a high-speed transient waveform capture and a longer disturbance capture to show the conditions surrounding an event. The CM4000T maintains a complete historical record of the number of transients per phase, along with the magnitude, duration and time of occurrence of each. It also performs a stress calculation to determine the circuits that have received the greatest stress from transient overvoltages.

CM4000T with VFD Display

- Waveform capture with up to 512 samples/cycle
- Built-in Trending and Forecasting functionality allows you to forecast energy usage up to 4 days in advance
- Sag/Swell disturbance monitoring
- Two option card slots for field installable cards
- Optional field installable Ethernet communications card with standard and custom web pages
- Alarm Setpoint Learning feature allowing optimum threshold setting (patent pending)
- Multiple alarms including standard, digital, Boolean, high-speed, and disturbance alarms
- Waveshape alarm monitoring
- High speed transient voltage detection at 5 MHz per channel with field installable CVMT current/voltage module
- True RMS Metering through the 255th harmonic
- Extended waveform capture (up to 110 seconds)
- Field installable Digital/Analog I/O cards and flexible I/O extender modules
- Harmonic powerflows up to the 40th harmonic
- Standard KYZ pulse output
- Standard 32 MB of non-volatile memory
- Integrated power quality standards including EN50160, IEC 61000-4-15 (Flicker)
- Sequence of events recording using GPS synchronization technology
- Oscillatory transient detection and recording
- UL Listed, CSA Approved, CE Marking, NOM Approved, FCC compliant

**PowerLogic Series 4000 Circuit Monitor Optional Displays**

- High visibility remote VF (vacuum fluorescence) display
- Displays metering data, min/max values, alarms, inputs
- Remote LC (liquid crystal) display with backlighting also available
- Optional user configurable display screens

ECC21

IOC44 I/O Card

**PowerLogic Submetering**

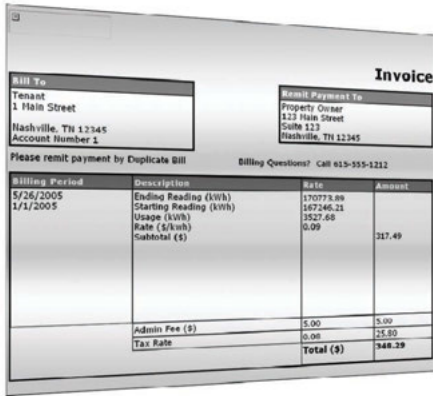

In today's increasingly competitive commercial property market, attracting and retaining high-quality, long-term tenants by offering exceptional value is the primary goal. Balancing these premium services and reliable infrastructure vs. the financial exposure to volatile utility costs is the challenge.

Minimizing energy costs requires information on how energy usage translates into money spent. PowerLogic energy sub-metering systems are specifically engineered to address the measurement, verification and billing needs of multi-tenant properties.

- Residential high-rise and low-rise
- Campuses
- Shopping centers
- Malls / food courts
- Offices
- Commercial buildings

PowerLogic energy management and metering systems are ideal for multi-tenant buildings providing:

- Metering & Verification tools to assure compliance to Energy Policy Act 2005
- Integrated approach from simple energy allocation requirements to high-end power quality
- Monitor energy usage and efficiency to accurately recover the costs while providing tenants with energy and a reliable infrastructure
- Implement energy efficiency initiatives essential to obtaining LEED certification

**PowerLogic E5600 Socket Meter**

The E5600 is a cost effective socket meter that combines high accuracy, superior quality and wide-ranging capability in a device that is simple to install. The PowerLogic E5600 socket meter can help reduce electrical costs, increase property values and attract good tenants by providing the information needed to manage energy costs. Track and allocate costs by circuit or suite, accurately bill tenants for energy used, and verify energy conservation efforts. It is a foundational component for LEED and Energy Star certification as a part of green buildings. Green buildings enjoy higher tenant retention, higher tenant quality, and recognition by the community while typically allowing property managers to charge more for rent.

Unlike traditional sub-metering solutions, which must be manually read or may lack software for effective sub-billing or comprehensive energy management, the PowerLogic E5600 enables businesses to utilize their existing S-based socket infrastructure with a low-cost meter that is part of an end-to-end solution for tenant sub-metering.

- Real, reactive, and apparent energy values.
- Onboard interval data logging (load profiles).
- Revenue grade accuracy – ANSI C12.20 0.2% / 0.5%.
- Automatic configuration of service type and voltage.
- Onboard diagnostics continually monitors for equipment failures, improper installation wiring, poor load conditions, poor power quality conditions and tampering.
- S-base meter socket compatible.

PowerLogic E5600 Socket Meter

**PowerLogic High Density Metering**

High Density Metering (HDM) is engineered to answer the metering and billing needs of multi-tenant properties:

High Density Metering factory assembled enclosure for multi-tenant properties

**Features and Benefits**

- HDM comes standard with the PowerLogic PM210, PM750, PM820 or ION6200 meters.
- Lockable, 16 gauge NEMA Type 1 enclosure provides tamper-resistant security.
- NEMA Type 3R also available. Please consult factory.
- Mounting channel and surface-mount flanges simplify installation.
- Factory installed cover plates are included to cover empty meter spaces.
- Factory installed wiring harness simplifies installation of additional meters and provides future system expansion.
- Each High Density Metering cabinet is provided with standard RS485 Modbus®, and optional Modbus Ethernet TCP communications are available. For wireless communications, please consult factory.
- Available in the following configurations: 208 Y/120 V wye; 240 V delta, 48 = 480 Y/277 V wye (PM210, PM750, and PM820), and with provided 2.5:1 CPT (control power transformer) 480 Y/277 V wye (6200); 480 V delta (6200, PM210, PM750 or PM820).
- CTs required. Must select separately.

**Table 4.15: High Density Metering Cabinet**

Category	Meter Series	Voltage	Phasing	Enclosure Size	# Meters	Enclosure Rating	Description
HDM	ION6200	12, 4T▲	3	1 or 4	1-4■	R◆ or 1	1 or 4 High Density Meter Enclosure with ION6200 meters; ideal for outdoor as well as indoor applications at all voltage levels including 600V delta and 347/600 V wye systems

**Multi Circuit Energy Meters**

The PowerLogic EM4800 multi-circuit energy meter combines accurate electricity sub-metering with advanced communications technology. They are ideal for multi-tenant or departmental metering applications within office towers, condominiums, apartment buildings, shopping centers and other multi-point environments, metering up to 24 individual circuits from the same meter. The EM4800 series has an accuracy of Class 0.5% for power and energy. Each meter is available separately or as part of a Square D integrated power center (IPC) for use in building retrofits or new construction.

Energy Meter

**PowerLogic Energy Meter**

The Energy Meter is ideal for stand-alone and systems-based submetering applications. It is easy to install and provides exceptional metering accuracy. Available in Basic and Extended Range models. The Basic model is designed for metering of 120/240 and 208Y/120 volt services. The Extended Range model will meter 120/240 volt up to 480 volt Wye connected services. Extended Range meters come with pulse output and phase loss output not available on the Basic unit. Optional Modbus™ RS-485 serial communications are provided with the Energy Meter Comms Board, EMCB. Optional kW demand is also provided by the EMCB.

Meter up to 3 individual services with one Energy Meter. The Energy Meter will allow the addition of up to 3 sets of parallel CTs for metering multiple electric loads. Additional sets of CTs can be ordered separately. Please refer to the multiple CT application notes in the Energy Meter instruction bulletin for the proper installation procedures.

**PowerLogic Enercept™ Meter**

The Enercept Meter is the ideal solution for submetering electric loads where space is at a premium. The compact design consists of three interconnected split-core CTs with the metering and communication electronics built into the CT housing. Simply snap on the CTs, connect the voltage inputs, the communication lines, and installation is complete. Both versions can be connected to either three-phase or single-phase circuits.

Enercept meters employ the Modbus™ RTU 2-wire communication protocol, and can utilize the same communication network and PowerLogic System Manager™ software as other PowerLogic devices. Data from the Enercept meters can be presented in tabular or graphical format, used for alarming and historical logging and trending, and to produce reports.

Optional Submeter display (SMD) acts as a stand-alone operator interface supporting up to 32 meters (63 with a repeater). In addition, the Submeter display (SMD) can act as a network adapter allowing Enercept meters to be incorporated into a network.

**PowerLogic Split Core Current Transformers-Instrument Grade 5 Amp Split-Core Current Transformers**

The 3090 SCCT series of split-core current transformers provide secondary amperage proportional to the primary (sensed) current. For use with Circuit Monitors, Power Meters, data loggers, chart recorders and other instruments the 3090 SCCT series provides a cost-effective means to transform electrical service amperages to a 0-5A level compatible with monitoring equipment.

3090SCCT164	Split Core CT—1600 A (sz.4): 2.45" x 5.50	165.00

**Note:** Max. Voltage without additional insulation 600 Vac. Do not apply 600 V Class current transformers to circuits having a phase-to-phase voltage greater than 600 V, unless adequate additional insulation is applied between the primary conductor and the current transformers. Square D assumes no responsibility for damage of equipment or personal injury caused by transformers operated on circuits above their published ratings.

SA Split-Core Current Transformers

BCPM Solid Core CT Power Meter

### PowerLogic Branch Circuit Power Meter

The Branch Circuit Power Meter (BCPM) is ideal for data center customers who are focused on eliminating costly downtime, managing existing capacity efficiently, and reducing energy cost. The BCPM helps data center managers by providing alarms that signify potential issues within the power system and supplying power and energy data down to the circuit level. This data can indicate areas wither over-used or under-used within the facility. It can also be used to effectively control energy cost.

The BCPM can monitor up to 84 circuits and fits any Power Distribution Unit (PDU) or Remote Power Panel (RPP) with minimal space requirements. It has a wide monitoring range allowing customers to monitor circuit current from 0.25 A to 100 A with high accuracy (3% for current 0.25 A to 2 A and 2% for current 2 A to 100 A). It can also measure power and energy readings at the circuit level as well as the incoming main. This eliminates the need for two different meters. The BCPM also has a flexible numbering scheme which allows customers to match that of the PDU or RPP and field configuration adds ease to either a new or a retrofit installation.

#### Key features:

- Full PDU monitoring
- Flexible configuration
- Split core version for retrofit installations
- Wide monitoring range
- Low current monitoring
- Advanced alarming
- Cost effective communications
- Easily integrates into a PowerLogic system or other existing networks using Modbus™ communications

### PowerLogic Multi-Circuit Meter

Designed for OEM style placement in electrical distribution equipment the MCM8364 is configurable to meter 1 or 3 phases of up to eight individual loads, six loads if neutral monitoring is required. The MCM will monitor up to 10,000 amps per service using standard 5 Amp CTs. All of the metered circuits must share a common voltage source. The MCM8364 is a great solution for monitoring critical power distribution equipment and provides 24 different electrical metering quantities plus an additional nine Modbus register alarms.

With one RS-485 connection, the multi-circuit meter provides Modbus RTU communications output that communicates to each individual metered circuit. Up to 30 multi-circuit meters can be addressed on the same Modbus network. The multi-circuit meter can provide warnings to the central monitoring computer via its Modbus output using the MNode software provided or can be integrated into PowerLogic SMS software. The MCM also works with the submeter display as shown below.

#### Electrical Data:

Energy Consumption (kWhr), Real Power (kW), Reactive Power (kVAR), Apparent Power (kVA), Power Factor Total, Voltage, L-L, avg. of 3 phases, Voltage, L-N, avg. of 3 phases, Current, average of 3 phases, Real Power (kW) phase A, B, & C, Power Factor, phase A, B, & C, Line to Line Voltage, phase A-B, B-C, A-C, Line to Neutral Voltage, phase A-N, B-N, C-N, Current, phase A, B, & C, Frequency (measured from phase A) (Hz).

#### Modbus Alarms:

Over Voltage, Under Voltage, Over Current, Under Current, Over kVA, Under kVA, Phase Loss A, Phase Loss B, Phase Loss C

### PowerLogic Submeter Display

The PowerLogic Submeter Display (SMD) is a comprehensive electrical submetering display that provides a view of electrical parameters from multiple metering products with one networked LCD. In addition to viewing system data on the display itself, you can also view data on a remote PC via a network connection. Touch pad buttons provide a convenient way to view downstream devices on the power-monitoring network. The display is RS-485 Modbus RTU compatible. It has additional RS-485 and RS-232 Modbus ports for networking to additional displays or to a master PC. The submeter display is compatible with the following metering devices: BCM, MCM, & Enercept™ meters.

Table 4.29:

Submeter Display

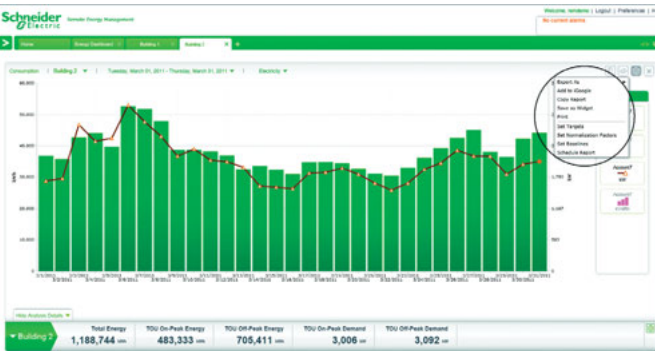

Easily view information that is most important to you through a customizable dashboard

View your environmental impact from a single screen to track emission reduction initiatives

Easily save reports and export them to a personal web-page for easy tracking and reporting

## Web Hosted Solutions

Schneider Electric Remote Energy Management solutions are web-hosted, subscription based Software-As-A-Service (SaaS) offers. This means that all of our data is hosted at a secure Schneider Electric data center facility available for you to view from any web-enabled device, 365 days per year, 24 hours per day, 7 days per week. No additional servers, PCs, software or IT personnel are needed when utilizing a remote hosted solution. All data is easily obtained through standard communications methods (Ethernet) from multiple device types and sources such as meters, existing systems, and building management systems (BMS).

A remote energy management solution allows you to easily:

### Identify energy waste

- View energy profiles to quickly identify energy waste in a single facility or across your enterprise
- Lower capital expenses with better utilization of current infrastructure (i.e. HVAC and Lighting)

### Reduce energy consumption

- Use historical comparisons to determine profiles of day-to-day, month-to-month, and year-to-year energy consumption
- Compare energy usage around similar facilities to establish benchmarks and identify poor performing facilities
- Normalize facility consumption against weather, production, hours of operation, square footage, and occupancy to measure the true energy content
- Measure the effectiveness of various energy efficiency and conservation efforts

### Save on utility bills

- Compare usage to utility bills to ensure the utility is billing correctly
- Optimize equipment run hours and setting to avoid setting new demand peaks
- Make accurate assessment of what utility costs would be on different utility rates

### Measure, report on and implement energy and emission reduction initiatives

- Utilize emissions reporting to determine the CO<sub>2</sub> baseline, establish targets, and monitor improvements to help manage your carbon footprint

Bill estimates provide valuable information for budgeting and forecasting

### PowerLogic Energy Profiler Online

PowerLogic Energy Profiler Online (EPO) is a web-hosted service that is the industry's foremost load data visualization and analysis application. This flexible, easy to use system turns customer usage data into actionable information, freely accessible to all customers and internal users. For commercial and industrial energy customers, managing energy costs is the primary objective, but they can't control what they can't measure. EPO enables energy customers to take control of their costs by providing the information they need to understand how their organization uses energy. They can then take steps to reduce costs by implementing conservation measures, investing in more efficient equipment, or participating in new pricing or load curtailment programs.

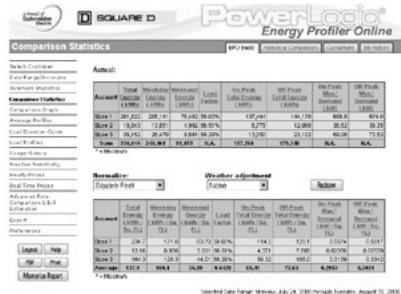

For the utility, EPO provides an intuitive, easy-to-maintain tool for better understanding customer usage patterns and meeting customers' growing need for information. It also provides a convenient platform from which to administer real-time pricing (RTP) or load curtailment programs. EPO's instinctive online functionality gives first-time users an extremely short learning curve, while its powerful configuration options address the needs of more sophisticated users. The service is available to users at their convenience, 24/7, and regular updates ensure that customers get the most current information.

#### Key features:

- Data access and analysis
- Automated reporting
- Estimated bills and rate comparisons
- Demand response and curtailment programs
- RTP programs
- Alarming
- Administration tool

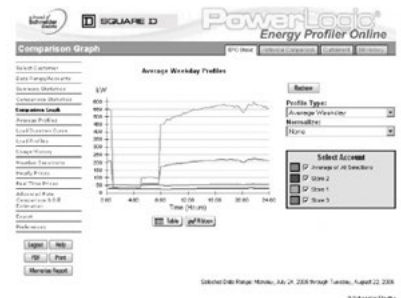

#### Applications:

- Energy load analysis
- Energy budgeting and bill forecasting
- Demand response and load curtailment program management
- Real-time pricing program management
- EPO's Real-Time Pricing module lets users see interval data for accounts with future pricing information, and multiply that data against a price stream.

Comparison statistics display

Typical comparison graph showing time of usage

**Communications for high-speed access to critical information**

From a single building to a multi-site enterprise, PowerLogic Web-Enabled Network Components provide fast, reliable serial to Ethernet connectivity in the most demanding applications:

- Energy management
- Power distribution
- Building automation
- Factory automation

PowerLogic Ethernet Gateways are available in two models-EGX100 and provide direct connection to Ethernet-Modbus™/TCP networks to make energy and power monitoring information available over local and wide area networks.

- The EGX100 provides low-cost, reliable, Ethernet to serial-line connectivity in a compact, DIN-rail mounted package. Enabled by Power over Ethernet (PoE IEEE 802.3af), the EGX100 simplifies installation by eliminating the need for power supplies plus provides a Web-based interface for configuration and diagnostics.
- The EGX300 is an integrated gateway-server that is web based with 1 serial port and has the ability to connect to an additional 32 devices remotely through Ethernet, plus log/trend historical data allowing electrical distribution systems to be better managed by utilizing Ethernet and Internet technologies.

EGX100 Ethernet Gateway

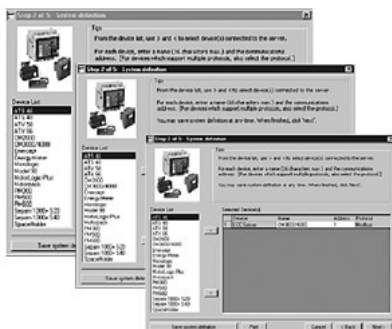

EGX100 lets the Administrator assign access to setup pages by user groups

Built in tabs provide easy DIN rail mounting solution.

EGX300 Ethernet Gateway offers you a "window" into your power equipment

**Advantages**

- Easy to install—easy DIN rail mounting solution.
- Easy to setup—No special software required. Configuration via Microsoft Internet Explorer or Hyperterminal.
- Easy to troubleshoot—Detailed diagnostics for communication ports through a Web interface.
- Easy to maintain—Field upgradable firmware lets you add new features while reducing costly downtime.
- Secure—Customizable, password-protected access to configuration.
- Cost-effective, high-speed communications—Use existing LAN infrastructure to reduce communications wiring and network management costs.
- Open platform provides broad connectivity—Modbus TCP/IP over Ethernet allows transparent access via intranet/internet. Each gateway supports up to 32 Modbus or PowerLogic protocol devices.
- Subnet initiated communications—The gateway supports a slave mode for connecting a serial-line based system to Ethernet. For example, a building management system with a Modbus serial interface can route to 16 remote Modbus TCP/IP interfaces supporting up to 128 serial-line devices.
- Extended temperature range— -25 to 70°C enables operation in harsh environments.

**Table 4.30:**

Type	Part No.	EGX100	EGX300
		\$ Price	
		950.00	1895.00
<b>Control Power</b>			
24 Vdc / 7W DIN mount power supply (SOLD SEPARATE)	3090PS24	157.00	157.00
Power Over Ethernet Injector Kit (SOLD SEPARATE)	TCSEAV0100	185.00	185.00
<b>Protocols</b>			
Ethernet: HTTP, FTP, Modbus TCP/IP, SMTP, SNMP (MIB2), SNMP, TCP, UDP, ICMP, ARP		x	x
Serial: Modbus RTU, Modbus ASCII (EGX100 only), JBUS, PowerLogic (SY/MAX)		x	x
<b>Ports</b>			
Serial: RS485			1
Serial: RS232/485 configurable		1	1
Ethernet UTP (10/100)		1	1
Fiber (100 Mb)			1
<b>Integral web server</b>			
Web page generation tool			x
Maintenance/diagnostics		x	x
Gateway administration setup		x	x
Comprehensive meter reading			x
Interval logging/trends			32 devices
User defined custom pages			x
<b>Historical Data Logging</b>			
Interval data			x
Transfer files on an interval and periodic scheduled basis			email
Export to Excel via web query			x
Export files by e-mail, FTP, or HTTP			x

**PowerLogic WebPageGenerator**

The PowerLogic WebPageGenerator (WPG) creates and downloads application specific web pages to PowerLogic Ethernet gateways (EGX300, ECC21, PM8ECC) with minimal user intervention. The user simply identifies the serial devices connected to the Ethernet gateway in this wizard-based software utility. The utility takes care of the rest. This utility is available for download from www.powerlogic.com.

## Consulting & Analysis

### Power System Engineering

The Square D Power System Engineering team offers a wide range of engineering services to improve the safety, efficiency and reliability of your power distribution system. The team is comprised of registered professional engineers, safety trained and equipped, to perform a variety of engineering functions.

### Power System Studies

The Square D Power System Engineering Team provides expertise for a variety of electrical power system studies. Some of the more common system studies include...

- Short-circuit analysis
- Time-current coordination
- Motor starting/voltage drop
- Motor starting/torque-speed
- Safe motor re-energization
- Harmonic analysis
- Transient analysis
- Power factor correction analysis
- Other system specific analysis

### Arc Flash Analysis

Square D offers on-site services to perform arc flash analysis for a facility, complex, office, or campus. An Arc flash analysis is used to determine ...

- Flash Protection Boundary
- Incident Energy Value
- Hazard/Risk Category
- Appropriate Personal Protective Equipment (PPE)
- Low cost arc flash reduction methods

Features of Square D arc flash analysis include...

- Time current coordination analysis showing both existing and recommended over/current device settings
- Short-circuit study to ensure adequacy of equipment
- Onsite verification and documentation of equipment
- Arc flash labels (populated with the results of the arc flash analysis)
- Arc flash label affixation
- NFPA 70E—Safe Workplace Practices Training provided by OSHA authorized outreach instructors
- Recommendations and solutions to reduce potential arc flash hazards

### Power Quality Studies

Square D offers onsite power quality engineering studies and solutions to eliminate process disruptions, power system shutdowns, and equipment damage due to electrical power system disturbances. A power quality study is used to...

- Determine compliance with the IEEE 519-Recommended Practices and Requirements for Harmonic Control in Electrical Power Systems guidelines
- Identify most cost-effective solution to power quality problems
- Solve process disruptions due to power disturbances
- Reduce economic effects of poor power quality
- Identify disturbances originating on electric utility system and improvements to reduce the number and severity

### Power System Assessment

Square D offers engineering services to meet a variety of power system needs ...

- Basic codes and standards compliance
- Protective coordination assessment
- Maintenance program review
- Recommendations for power system optimization
- Power quality troubleshooting and analysis
- Power factor and harmonics analysis
- Electrical safety hazards
- Short-circuit withstand overview
- Single-line documentation of power system
- Power monitoring recommendations
- Loading measurements

### Power System Improvement Projects

Square D offers engineering services for ...

- New equipment installation
- Existing equipment modification
- Ground Fault Schemes for multiple source distribution systems
- High Resistance Grounding (HRG) Conversion
- Automatic Transfer Control Schemes & Generator Operations

Square D professional engineers - safety trained and equipped - will listen to your concerns and goals, define the problem or enhancement, and engineer the solution that best satisfies your needs.

For additional information on power system engineering services and pricing, contact your nearest Square D/Schneider Electric office.

### Industrial Energy Efficiency

Schneider Electric Certified Energy Managers (CEM's) work on-site with knowledgeable plant personnel to develop a long-term, comprehensive, "Energy Action Plan", that serves as the blueprint for energy savings. Unlike performance contracts or one-time energy audits, the Total Energy Control<sup>SM</sup> program offers a strategic partnership for energy-intensive industrials who want to improve energy efficiency.

- Total Energy Control – Comprehensive integration of all three areas affecting energy efficiency
  - Procurement (electricity and gas)
  - Demand management
  - Optimization of process and plant utilities
- Program deliverables:
  - Long-term Energy Action Plan
  - Energy efficiency projects
  - Ongoing accountability for results

**Engineered Solutions**

Schneider Electric provides an engineered solution approach to your specific power system applications. Our total solutions for power monitoring and power system controls allow greater safety, reliability, and energy efficiency of your power systems. As a long standing industry leader in Power Monitoring and Control Systems, we understand your power system requirements and needs.

All of our Engineered Solutions are tailored to your specific system requirements. Schneider Electric is your total Solution provider.

**Power Monitoring Applications**

**Increased Reliability and Energy Efficiency**

Increased Reliability and Energy Efficiency are key results produced from our Power Monitoring Applications. Schneider Electric power monitoring applications provide detailed reporting, testing and analysis capabilities for your systems and related components.

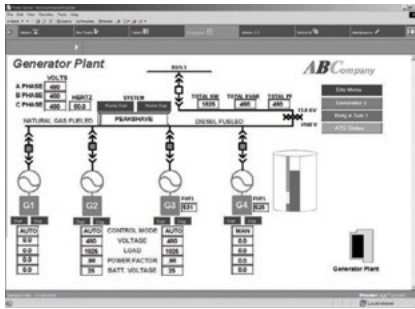

- **EPSS Emergency Power Supply Systems** – The PowerLogic EPSS Test Report provides information regarding the health and status of the emergency power supply system, including automatic transfer switches and generators.
- **SER Sequence of Events Recording** – The PowerLogic Sequence of Events Recorder (SER) Module is a root-cause analysis tool for rapid response for problem resolution that is ideal for pinpointing the cause of a service disruption in very large complex power systems.
- **WAGES Water, Air Gas, Electric, Steam** – PowerLogic energy and power management systems can provide instantaneous readings, alarm notifications, and graphical diagrams for monitoring electrical and piped utilities (Water, Air, Gas, Electric, Steam).
- **APM Active Pager Module** – The PowerLogic Active Pager Module allows automatic paging to alphanumeric pagers, cell phones and PCs.

**Power System Control Applications**

**Automated solutions for increased Reliability and Energy Efficiency**

Schneider Electric engineers provide Power System Control Applications with automated solutions for addressing your system reliability and efficiency control needs. Our offer covers Automatic Throwover Schemes, Load Shedding/Peak Shaving, and Load Preservation.

- **Automatic Throwover Systems** – Automatic selection of available utility or generator sources to maintain service continuity to connected loads.
- **Load Shedding/Peak Shaving** – Control peak demand levels or ensure service continuity to critical load or operate breakers in accordance with user specified sequences and time delays such as bringing large motors online across several billing kw demand periods to avoid demand penalties.
- **Load Preservation** – Fast acting sophisticated control systems designed to stabilize critical power systems to the greatest extend possible by monitoring frequency and power sources from utility plus generator capacity versus total circuit load.

PowerLogic Engineers provide graphic solutions for realtime monitoring of power systems.

**System Integration**

**System Design and Engineering**

Our Square D Engineering Services solution specialists can work with you to design or upgrade your existing system to best achieve your energy and power management objectives and informational needs. With expertise in electrical systems, communications, and automatic control systems, we can integrate, install, and commission your system for optimal performance.

- System Design and Bill of Material Recommendations
- Power Monitoring and Control
- WAGES (Water, Air, Gas, Electric, Steam)
- Enterprise web-based monitoring
- Specification development, drawings, documentation
- Enclosure panel design and build
- Metering Connection Verification/Testing
- Power distribution automation
- On-Site Installation Assistance, Component Configuration & Startup
- Turn-key project management
- Third Party Device and communication interfaces
- Configured Workstations, User Software Interfaces
- Interactive Graphic Design to mimic facility layout, one-lines, equipment status
- Custom Software, Reports & Applications – Billing and Paging

PowerLogic Engineers specialize in the design and setup of Emergency Power Supply Systems (EPSS).

PowerLogic Engineers design power control systems that meet your operational requirements.

For additional information, contact your nearest Square D / Schneider Electric office.

## Factory Assembled Equipment

Square D™ PowerLogic™ Factory Assembled Equipment offers a wide range of designs for metering, communications, and control applications to simplify retrofit installations. Our equipment is designed to order as a free-standing or wallmounted system. With PowerLogic™ Factory Assembled Equipment, you'll receive professionally crafted, factory tested, pre-wired equipment that will greatly improve the speed of your system startup. All backed by the Square D™ quality standard of excellence.

- Assemblies include meters & devices wired to terminal blocks, disconnects, and shorting blocks or test switches
- Tailored to any system voltage :
  - 208/120 V, 480/277 V & 600/347 V Wye
  - 240 V, 480 V & 600 V Delta
  - Utilization of PT's required for higher voltage levels
- Wall mountable and easy to install using concealed holes in the back of the enclosure.
- Complete with necessary documentation and mounting hardware for quick and easy installation
- Carbon steel construction, with industry standard ANSI 61 gray powder coat finish
- Equipped with concealed hinged door, and universal pad-lockable latch.
- Custom engraved nameplates available for all units.

**Table 4.31: Industrial Enclosure Types 1\*, 12, & 4, UL & CUL 508A Listed**

Available Meter Types	Digital Inputs	Digital Outputs	Analog Inputs	Analog Outputs
PM 810, 820, 850 & 870 CM 4250 & 4000T ION 6200	Up to 11 / Meter Up to 8 / Meter N/A	Up to 7 / Meter Up to 7 / Meter Up to 2 / Meter	Up to 2 / Meter Up to 1 / Meter N/A	Up to 2 / Meter Up to 1 / Meter N/A
ION 7300, 7330 & 7350 ION 7550 & 7650*	Up to 4 / Meter Up to 16 / Meter	Up to 4 / Meter Up to 7 / Meter	Up to 4 / Meter Up to 4 / Meter	Up to 4 / Meter Up to 4 / Meter

- Supports Single or Multiple Voltage Sources for Indoor (Type 1 and 12) & Outdoor (Type 4) applications
- Available with 1–4 meters per panel. Serial & Ethernet Communications are options for all units
- EGX & ION RTU Communication Enclosures with 1–4 devices per panel also available

### Light Industrial Enclosure Type 1, UL & CUL 508A Listed

- Available for the following meter types: PM820 (with ethernet), and ION6200
- Supports Single Voltage Source only for Indoor (Type 1) applications.
- Available with 1–12 meters per panel. Serial Communications are standard for all units.
- No Digital or Analog I/O is available for this option.

### Service Entrance/Utility Socket Enclosure Type 3R, UL & CUL 508A Listed

- Available for ION8600 only, with up to 3 Digital Inputs and 4 Digital Outputs and ION5600 2 Digital Inputs and 2 Digital Outputs.
- Supports Single Voltage Source only for Indoor & Outdoor (Type 3R) applications.
- Units are Ring Type with removable cover.
- Available with 1 meter per panel. Serial & Ethernet Communications options available.
- Supports Form 9S, 35S, 36S, 39S and 76S configurations for ION8600 and forms 9S and 36S for ION5600.
- Options available for remote mounted CTs
- Options available for integrated, bar type CTs
- Optional Test Switch.

### Additional engineered to order products are available for a wide variety of design solutions.

- Switchgear Transfer Control Panels
- Generator Control Panels
- Load Shed Control Panels
- Sequence of Events Recording (SER) Panels
- Control System Mimic Panels
- Lighting Control Interface Panels
- Programmable Logic Controller (PLC) Control Panels (Hot Standby, Relay Control, Data Concentration etc. ...)
- Emergency Power Supply Systems (EPSS) Control Panels
- Water, Air, Gas, Electrical, and Steam (WAGES) Monitoring Panels
- Input Status Monitoring & Alarming Panels
- Remote Annunciator Control Panels
- Remote Operator Control Panels
- Serial, Ethernet, and Cellular Wireless Systems
- Server Rack and Network Equipment (Servers, Switches, UPS's) for Energy Management Systems.
- Industrialized PC's, Touch Screens (Magelis), and Human Machine Interfaces (HMI's) with Custom System Graphics.
- Designed to fit any environment – Indoor (Type 1 & 12) & Outdoor (Type 3R & 4) applications

**For additional information and pricing please contact your local PowerLogic sales specialist or PowerLogic Inside Sales Support at 615-287-3535. Equipment pricing and literature available for download on our website at [www.powerlogic.com/products/enclosures](http://www.powerlogic.com/products/enclosures).**

### To better serve you please have the following information on hand when calling.

- Enclosure type (Indoor or Outdoor) and Environment details (Corrosive or Non-Corrosive)
- Power System Voltage Level and Type (Direct Current (DC) or Alternating Current (AC))
- Digital & Analog Input and Output requirements
- Device Type and Quantity per enclosure
- Ethernet and Serial Communication Requirements
- For Drawout Retrofits, need existing cradle type (i.e. GE, Westinghouse, etc.)

**Technical Support**

There are several ways to receive top quality support on PowerLogic products:

**Priority Support: Excellent Service, Free Software Upgrades, Training Discounts & More!**

- Latest PowerLogic SMS and ION software upgrades to ensure up-to-date systems
- Direct access to expertise for quick issue resolution
- More efficient PowerLogic SMS and ION system utilization
- Higher reliability
- Improved productivity and personal efficiency on the job

**Priority Support: Tenant Metering**

Now the great support provided to SMS and ION systems is now available for Tenant Metering systems. Support includes ...

- Direct email (4-hr response time) and toll-free 800 number support for prompt response to urgent or non-urgent requests from highly trained support engineers.
- Hours of service 7:30am to 7pm US Central time
- PowerLogic™ Tenant Metering software upgrades at no charge
- Proactive notification of software service packs and fixes
- Remote diagnostics support engineer can troubleshoot any issues of the TMS system remotely without the customer's help.

**Premium Support: Priority + Proactive System Checks + Sr. Technician Assigned to your site**

Choose Premium Support when you need to ...

- Enhance your PowerLogic SMS and ION system's operation with single-sourced pro-active problem identification, solutions recommendations and change management skills
- Partner with technical experts who help coordinate support, provide hands-on assistance, and share knowledge and know-how with you
- Obtain personalized services tailored to your business environment and objectives
- Take advantage of remote software upgrade capabilities
- Anticipate and communicate necessary change

**Additional Support Options:**

**7x24 Support Option**

- PowerLogic 7x24 support provides 1-hour phone response by senior support engineer during off-hours.
- Additionally, 4-hour response (max) for remote connection to customer system for advanced troubleshooting.

**On-Site Maintenance Option**

On site maintenance includes pre-scheduled visits by PowerLogic system engineers who perform software upgrades, updates to custom graphic screens, device firmware upgrades, and system performance analysis and correction. Scope of work is determined by customer request.

**Power Management University**

Our training centers offer a variety of training courses designed to improve your total energy management skills. Our instructor led courses are 70% hands-on, with each student having their own lab workstation. We have two main training centers located in Nashville, TN and Victoria, BC and offer training at a variety of Square D sites across the US and Canada.

**Table 4.32:**

### Series 20, 40, 60 and 80

The Sepam family of protective relays, Series 20, 40 and 80, are the newest generation of Sepam relay, a time tested product with a 29-year worldwide history. Modular relay design allows quick and easy future upgrades to communications, digital I/O, analog output or temperature acquisition. The 64x128 bit, graphic LCD display and keypad permit relay setting of Series 20 and 40 without a PC. Comprehensive self-testing provides assurance of readiness to protect. The Sepam family also has exceptional withstand to environmental electromagnetic disturbances. An optional 128x240 LCD display for the Series 80 relay can show an animated one-line with front panel control. The Sepam Relays and remote modules come with a 10 year warranty and conformal coating for harsh environment as standard.

### Sepam Series 60 and 80 Relay Features

- Standard footprint for enhanced protection of Mains/Feeders, Transformer, Motor, Generator, Capacitor, Bus Applications
- Differential protection of transformer or machine transformer units
- Differential protection of motors and generators
- Protection for mains and ties and important feeders including pre-programmed or customized ATS/ATO Schemes
- 42 programmable logic inputs and 23 relay outputs
- Increased accuracy metering capabilities, I, V, E, P, PF, THD, vector diagram
- Expanded logic equation capabilities (an option for Logipam PLC ladder logic)
- Setting Software (SF2841) with graphical assistance, optional mimic-based display
- Battery backup for historical and fault waveform data retention, 24–250 Vdc control power
- 2 independent RS485 (2 or 4 wire) communication ports: connection of each to port 1 or 2 S-LAN and/or E-LAN networks ModBus™, ModBus TCP/IP, IEC60870-5-103, DNP3 and IEC61850 communication protocol with GOOSE messaging.
- Software tools: Sepam parameter and protection setting and control function customization programming of specific functions (Logipam-Series 80) recovery and display of disturbance recording data local or remote operation via an E-LAN
- Synch-check option
- Includes all Series 20 and Series 40 features

### Sepam Series 40 Relay Features

- Compact standard footprint (< 4" deep) for enhanced protection of Mains/Feeders, Transformer, Motor, General Applications
- Directional overcurrent protection for dual mains and ties and closed loop feeders
- 10 programmable logic inputs and 8 relay outputs

- Current and voltage inputs I, V, E, P, PF
- Setting software with Boolean logic equation assistance for customized protections and ATS/ATO schemes
- CT/VT and Trip Circuit supervision
- Sixteen seconds of fault recording, last 5 trip reports, and last 200 time-tagged alarms
- Rear communication port connection to 1 or 2 S-LAN and/or E-LAN networks ModBus™, Modbus TCP/IP, IEC60870-5-103, DNP3 and IEC 61850 communication protocols TCP/IP redundancy RS 485 (2 or 4 wire) or fiber optic network
- Temperature data from 16 RTD's, Pt100, Ni100, or Ni120
- Includes all Series 20 features

### Sepam Series 20 Relay Features

- Backlit LCD graphic bitmap display
- Compact standard footprint (< 4" deep) for basic protection of Mains/Feeders, Transformer, Motor, Bus (Voltage) Applications
- Current or voltage inputs I, or V
- 10 programmable logic inputs and 8 relay outputs
- 16 inverse time overcurrent characteristic curves and customized protection curves (Series 80)
- Two 86 cycle records of fault recording, last trip fault values, and last 64 time-tagged alarms retained
- Provides trip diagnostic information for analysis of faults
- Self-test diagnostic ensures correct operation of relay and integrity of protection
- Wide range of control power inputs
- Application specific design for Main/Feeder, Transformer, Motor, Bus (Voltage) zones
- Zone selective interlocking (ZSI) improved protection coordination as a cost effective alternate to Buss Differential (87B) application
- Rear communication port connection to 1 or 2 S-LAN and/or E-LAN networks ModBus, ModBus TCP/IP, IEC60870-5-103, DNP3 and IEC 61850 communication protocols TCP/IP redundancy RS 485 (2 or 4 wire) or fiber optic network.
- Temperature data from 8 RTD's, Pt100, Ni100 or Ni120.
- 1 programmable analog output, 0–1, 0–10 mA, 4–20 mA or 0–20 mA
- Modular architecture
- Breaker maintenance diagnostics
- Two groups of current protection settings (logic input selectable) with built in breaker failure (50BF) to allow reduced arc-flash hazard and PPE rating during maintenance operation

Three relay series with increasing protection capabilities for six types of applications to provide all possible protection configurations

### VAMP 221 System Highlights

- VAMP 221 is a flexible and easily adaptable arc flash protection system for the protection of electrical distribution systems.
- VAMP 221 significantly reduces damage to electrical power equipment in the event of an arc fault and through this the risk of potential personal injury, and production losses.
- VAMP 221 is a modular system consisting of central units, I/O units, arc sensors and contact multiplying relays. The system can be easily used from the simplest to the most complicated applications.
- The VAMP 221 arc flash protection system is suitable for both low and medium voltages in any metal enclosed, metal clad or arc resistant switchgear. It is applicable in any new or existing switchgear where an arc flash hazard exists and reduction of fault level is seen as beneficial.

### System Features

- Current light tripping criteria (optional of tripping by light only)
- Operating time 7 ms or less (electromechanical contact)
- Accurate location of arc fault utilizing point sensors
- Four selective protection zones per central unit
- Can be used as an alternative to bus differential and ZSI schemes
- Self supervision of the entire system
- Easy interconnect utilizing prefabricated (CAT6) cables
- Phase current measuring
- Ground fault current measuring
- Personal protector option
- Panel or rail mount I/O units
- Circuit breaker fail protection (50BF)

VA1EH-x

**Point sensor VA1EH-x (pipe)**

Installed typically in the tube or next to the compartment window.

VA1DA-x

**Point sensor VA1DA-x (surface)**

Compartment wall or mounting plate installation.

Arc SLM-x

**Arc SLM-x**

Used when a large number of compartments are to be monitored.

VA1DP

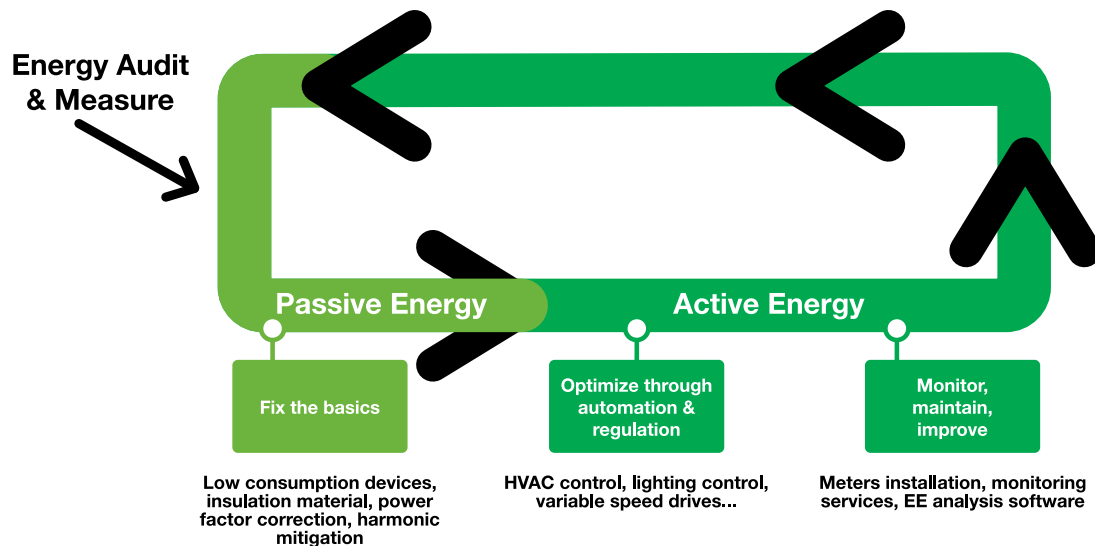

**Point sensor VA1DP**

The snap-in connection to the VAMP arc flash protection system improves work safety.

**Device Track Record**

- Schneider Electric's VAMP Range specializes in arc flash protection and mitigation relays for power system.
- Schneider Electric VAMP's arc flash fault protection functionality enhances the safety of both people and property and has made Schneider Electric VAMP a pioneer in the field of arc flash protection with more than 10,000 arc flash systems and units with over 150,000 arc detecting sensors inservice worldwide.
- All Schneider Electric VAMP products meet the latest international standards and regulations.
- Our success is based on competitive standard products, constant development by our designers possessing experience from arc flash relay generations.

How can reactive power compensation and harmonic mitigation solutions be part of your energy efficiency programs?

Power factor is a measure of how efficiently you are using electricity. In an electric power system, a load with low power factor draws more current than a load with a high power factor for the same amount of real power transferred. Utility customers with a low power factor could realize an increase or penalty in their electric bill. Over time, these penalties may reach into thousands of dollars, depending upon the utility’s rate structure.

Harmonics may disrupt normal operation of other devices and increase operating costs. Symptoms of problematic harmonic levels include overheating of transformers, motors and cables, thermal tripping of protective devices, logic faults of digital devices and drives.

Harmonics can cause vibrations and noise in electrical machines (motors, transformers, reactors).

The life span of many devices can be reduced by elevated operating temperature.

Schneider Electric provides different solutions to meet different application requirements.

Table 4.35:

Product Description	LV	MV	Application	Product Features
ReactiVar Fixed Power Factor Capacitors	X	X	Power Factor correction	Suited for applications where the load does not change or where the capacitor is switched with the load, such as on the load side of a motor contactor.
ReactiVar Standard Automatic Power Factor Capacitor Banks (AV5000/MV5000)	X	X	Power Factor correction	Suited for centralized power factor correction in applications where plant loading is constantly changing, resulting in the need for varying amounts of reactive power. Designed for electrical networks with little or no harmonic content.
ReactiVar Anti-Resonant Automatic Power Factor Capacitor Banks (AV6000/MV6000)	X	X	Power Factor Correction and Harmonics Filtering	Suited for centralized power factor correction in applications containing harmonic energies that would otherwise damage standard fixed or automatic capacitor banks.
ReactiVar Harmonic Filtering Automatic Power Factor Capacitor Banks (AV7000/MV7000)	X	X	Power Factor Correction and Harmonics Filtering	Provides power factor correction as well as harmonic filtering with specific harmonic order (5th) in industrial networks.
ReactiVar Transient Free Reactive Compensation Systems (AT6000/AT7000)	X		Power Factor Correction and Harmonics Filtering	Enhanced technology utilizing solid state switching elements that replace standard electromechanical contactors. Provides quicker response to load fluctuations with transient free capacitor switching.
AccuSine™ (PCS) Active Harmonic Filter	X	X▲	Active Harmonic Filtering	Monitors a distorted electrical signal and determines the frequency and magnitude of harmonics in the signal. Cancels the harmonic content with the dynamic injection of opposing phase current in the distribution system or individual load.
ReactiVar Hybrid VAR Compensator (HVC)	X	X▲	Reactive Power Compensation (Real-time)	Provides real-time reactive power compensation, and voltage support in networks with highly cyclical load profiles.

▲ With transformer.

**Low Voltage Fixed Capacitors**

ReactiVar low voltage fixed capacitors are ideally suited for power factor correction applications where the load does not change or where the capacitor is switched with the load, such as on the load side of a motor starter. ReactiVar fixed capacitors are best suited for applications where there are no harmonic currents or voltages present.

**Features:**

- Heavy edge, slope metallizations and wave-cut profile to ensure high inrush current capabilities.
- Special resistivity and profile metallization for better self-healing and enhanced life (up to 130,000 hours).
- Unique safety feature which disconnects the capacitors at the end of their useful life electrically.
- Less than 0.5w/kVAR losses, including discharge resistors.
- Constructed with a dry type metalized polypropylene capacitor element with no liquid dielectrics.
- Can be easily mounted inside panels or in a stand alone configuration.

**Application Note:** Capacitors are low impedance path for the harmonic currents produced by variable frequency drives, motor soft starters, welders, computers, PLCs, robotics and other electronic equipment. These harmonic currents can cause the capacitor to overheat, and shorten its life. Furthermore, the resonant circuit formed by shunt capacitors coupled with system inductances (motors and transformers) can amplify harmonic currents and voltages in the electrical network. This amplification can cause nuisance fuse operation and/or damage to electrical equipment including capacitors and other electronic devices. If power factor correction is required in the network where harmonic is present, please contact your nearest Square D/Schneider Electric sales office for assistance.

The AV5000 is suitable for use where harmonic generating loads are less than 15% of the total connected load (AV5000 shown here).

**Low Voltage Standard Automatic Capacitor Banks**

The AV5000 standard automatic power factor correction banks are designed for centralized power factor correction to supply varying amounts of reactive power required to compensate for changing load conditions. The AV5000 banks are ideally suited for facility electrical distribution systems with TDD (total harmonic current distortion) <= 5% and THD(V) (total harmonic voltage distortion) <= 5%. An advanced power factor controller measures plant power factor via a single remote CT. Plus, it switches capacitor modules in and out of service to maintain a user selected target power factor.

**Main Features:**

- Modular construction; free standing QED switchboard enclosures (30wx36dx90h) and allow for easy future expansion
- Rugged design — units are constructed with removable steel panels over heavy gauge steel frame
- Standard offering available up to 400 kVAR at 208 Vac, 1000 kVAR at 480 or 600 Vac
- Main lugs or main breaker section at your choice
- Dry capacitor element design eliminates risk of fluid leakage, environmental hazard and drip pans
- Capacitor rated contactors are designed specifically for the switching of capacitive currents and feature a patented capacitor precharge circuit that exceeds air-core reactor transient dampening
- Different power factor controller options provide a choice in functionality and control sophistication
- Backlit display on controller displays actual power factor (PF), alarms, number of steps energized and much more
- Available in NEMA 1 and NEMA 3R enclosures

**Low Voltage Anti-Resonant and Filtering Automatic Capacitor Banks**

Reactive AV6000 anti-resonant and AV7000 harmonic filtering automatic switched capacitor banks are specifically designed for networks containing harmonic energies which would otherwise damage standard fixed or automatic capacitor banks.

**The problem:** Harmonics are caused by non-linear loads such as variable frequency drives, motor soft starters, welders, uninterruptable power supplies, robotics, PLCs and other electronic devices. Harmonics are higher-than-60 Hz current and voltage components in the electrical distribution system. Capacitors are a low impedance path for these higher frequency components and thus will absorb these harmonic energies. Combinations of capacitors and system inductances (motors and transformers) can form series and parallel tuned circuits which can resonate at certain frequencies. The harmonics caused by non-linear loads can excite a standard capacitor bank into resonance. The resonance can magnify currents and voltages, causing system wide damage and equipment failure. This problem is growing in prevalence in today's distribution systems.

AV6000 Capacitor Bank

**The Solution:**

**Anti-Resonant Automatic Capacitor Banks**

The AV6000 anti-resonance capacitor bank's primary function is power factor correction. Iron core reactors are added in series with the capacitor modules. The 3 phase reactors are custom designed and manufactured under tight tolerance specifically for the AV6000. The reactors tune the bank below the first dominant harmonic (usually the 5th, or 300 Hz). Below the tuning point, the system appears capacitive and thus corrects power factor. Above the tuning point, the system appears inductive and thus resonance is minimized. The AV6000 design has the added advantage of removing up to 50% of the 5th harmonic to reduce overall voltage distortion.

**Harmonic Filtering Automatic Capacitor Banks**

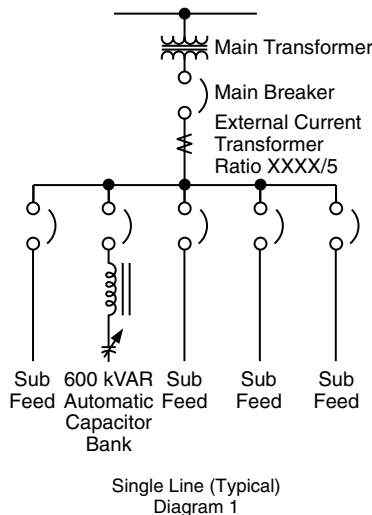

Although the AV7000 looks identical to the AV6000, its primary function is harmonic mitigation, with power factor correction being a secondary benefit. The distinction between an AV6000 and an AV7000 is the tuning point. By definition, if the tuning point of the capacitor/reactor combination is within ±10% of the target harmonic it is intended to absorb, it is referred to as a filter. If the tuning point is outside the ±10% limit, it is referred to as an anti-resonant system. Schneider Electric power quality solution experts should be consulted prior to recommending AV7000 to customers.

**Main Features:**

- Standard offering available up to 480 kVAR at 208 V, 1200 kVAR at 480 or 600 Vac
- Capacitor modules are designed with higher than standard voltage and current ratings to provide long life on systems with high harmonic energies. Reactors are designed to operate at 115 °C rise over a maximum 40 °C ambient temperature.
- In addition to the standard features provided in the AV5000 systems, the reactors in the AV6000 and AV7000 have an embedded thermistor temperature detector. The stage will shut down and annunciate if the reactor is overheated, usually a result of excessive harmonic energies

**Application Assistance:**

Schneider Electric power quality experts can provide engineering assistance for the application of capacitors in harmonic rich environments. Specialists can assess the likelihood of application problems and arrange for more detailed study if required. Solutions can include computer modeling and system simulation. Our application engineers can arrange for systems studies, provide custom engineering proposal, perform installation and commissioning, as required by the application. Please contact Schneider Electric power quality experts or email us at pqc@squared.com.

**CT Selection Table**

The current transformer is located on a phase A bus or cable at the main service entrance as illustrated in Diagram 1.

**CT catalog number:** TRAI••••SC♦ ♦ where •••• is current rate code of bus/cable and ♦ ♦ is window size code. Codes are listed in table 4.42.

e.g. TRAI1000SC07 is a CT for 1000 A bus with 7"x4" window.

AT6000 Transient Free Capacitor Bank

**Low Voltage Transient Free Reactive Compensation Capacitor Banks**

Square D™ ReactiVar Transient Free Reactive Compensation (TFRC) anti-resonant (AT/BT6000) systems and filtering system (AT/BT7000) are ideally suited for use on electrical systems where connected equipment is extremely sensitive to variations in the supply voltage.

**The problem:** Capacitor systems featuring electromechanical contactors could generate voltage transients on the electrical network when they switch capacitor stages on/off, even when current limiting or tuning reactors are employed. Transients can impair the operation of sensitive equipment, including programmable logic controllers, variable speed drives, computers and UPS systems. In sensitive networks such as hospitals, data processing centers, airports and many manufacturing environments, any transient, however slight, may not be acceptable.

**The solution:** TFRC systems feature an advanced controller to precisely activate electronic switching elements to connect capacitor stages and avoid the creation of transients. Transient free switching also reduces wear on capacitors due to switching and will result in longer life for the overall capacitor system. With a response time of less than ten seconds to load changes, TFRC systems can reduce the kVAR or kVA demand quickly.

**Main Features:**

- Standard offering up to 1350 kVAR at 480 Vac
- Transient free switching of capacitor steps
- Electronic switching elements yield an unlimited number of switching operations
- Different power factor controller options provide a choice in functionality and control sophistication
- Backlit display on controller displays actual PF, alarms, number of steps energized and much more
- Heavy duty dry capacitor element design provides no risk of fluid leakage, no environmental pollution and no need for drip pans
- The reactors have an embedded thermistor temperature detector. The stage will shut down and announce if the reactor is overheated which is usually a result of excessive harmonic energies
- Units are constructed with removable heavy duty steel panels over heavy gauge steel frame.
- Available in NEMA 1 and NEMA 3R enclosures.

**Low Voltage Capacitor Bank General Specification:**

Voltage:	208, 240, 480, 600 Vac standard, other voltages available
Ambient temperature:	-5 °C to 40 °C
Average temperature limit:	<=40 °C within 24 hours, <35 °C over 1 year
Elevation:	<=1800 meter (6000 feet)
Humidity:	0-95% non-condensing
Overvoltage limit:	110% maximum (continuously)
Dielectric withstand test level:	2.15 times rated voltage or 1000 V, whichever is higher for 10s
Overcurrent limit:	135% maximum (continuously)
Incoming:	Top (standard), bottom.
Main lug:	Copper mechanical standard, compression optional
Main breaker (BT):	PowerPact™ with Micrologic™ trip unit. LI standard, LSI available
Enclosure rating:	NEMA 1 standard, N3R available
Color:	ANSI 49 standard, ANSI 61, ANSI 70 optional
Standards:	CSA C22.2 No. 190, UL810

Typical low voltage capacitor bank dimension (reference only, subject to change without notice)

MVC systems are suitable for power factor correction of steady and harmonic-free motor loads.

### ReactiVar Medium Voltage Fixed Capacitors

The ReactiVar MVC fixed capacitors are ideally suited for power factor correction in applications where the load does not change or where the capacitor is switched with the load, such as the load side of a motor contactor. ReactiVar capacitor sizes are available up to 300 kVAR as individual units, and up to 900 kVAR in banks.

#### Main Features:

- Standard rating up to 900 kVAR, 4800 V (for specials, consult factory)
- Extra low dielectric loss (<0.15w/kVAR), including discharge resistors
- Internally mounted discharge resistors
- Internally delta connected capacitor elements
- Built to applicable NEMA, IEEE, and IEC standards
- Available in indoor (Type 1/12) and outdoor (Type 3R) enclosures
- Painted ASA 70 gray

#### Application Note:

Capacitors are low impedance path for the harmonic currents produced by variable frequency drives, motor soft starters, welders, computers, PLCs, robotics and other electronic equipment. These harmonic currents can cause the capacitor to overheat, and shorten its life. Furthermore, the resonant circuit formed by shunt capacitors coupled with system inductances (motors and transformers) can amplify harmonic currents and voltages in the electrical network. This amplification can cause nuisance fuse operation and/or damage to electrical equipment including capacitors and other electronic devices. If power factor correction is required in the network where harmonic is present, please contact your nearest Square D/Schneider Electric sales office for assistance.

MV5000 systems are suitable for use where harmonic generating loads are less than 15% of the total connected load.

MV6000 systems are suitable for use where harmonic generating loads are less than 50% of the total connected load.

MV7000 systems are suitable for use where harmonic generating loads exceed 50% of the total connected load.

MVHVC High-Speed compensation systems are designed for reactive power compensation of rapidly fluctuating loads

### Medium Voltage Metal Enclosed Capacitor Systems

The medium voltage capacitor systems are ideally suited for centralized power factor correction and/or harmonic filtering in applications. Various equipment topologies are available, from fixed stage to fully automatic—to cover project specific application, load characteristic and installation needs. ReactiVar brand covers metal enclosed systems built in North America (5/15 kV class). Global =S= Brand can be used for expanded voltage range.

#### Main Features:

- Designed and built per applicable ANSI/NEMA/IEEE and/or IEC standards
- Standard metal enclosures available up to 20 mVAR, up to 34.5 kV, 50/60 Hz
- Steel or Aluminum based enclosure bays
- Externally or internally fused capacitors with excellent life due to high temperature withstand, small temperature rise, chemical stability, overvoltage and overcurrent withstand.
- Current limiting capacitor fuses with blown fuse pop-up indicators
- Inrush current limiting reactors or tuned (anti-resonant or filtered) iron core reactors
- Key interlocking system forces sequential operation of the controls,
- Fully rated three- or four-pole grounding switches
- Schneider Electric NRC12 Power factor controller provides user with friendly interface, superior performance, simplified installation and set-up procedure, and real time monitoring and protection features for the capacitor system.
- Available in Type 1 indoor and 3R outdoor enclosure types

### High Voltage Reactive Power Compensation Systems

The high voltage reactive power compensation systems are ideally suited for installation at utility distribution and transmission grids. Various equipment topologies are available to cover project specific utility application, and installation needs. Typically these compensation systems are open style, rack mounted, installed in utility substation areas.

#### Main Features:

- Custom designed and built per requested applicable standards
- Systems rated up to 230 kV, 50/60 Hz
- Internally fused capacitors with excellent life due to high temperature withstand, small temperature rise, chemical stability, overvoltage and overcurrent withstand.
- Double wye ungrounded configuration with neutral CT protection
- Inrush current limiting or tuned (anti-resonant or filtered) air core, open style reactors

AccuSine (PCS) Active Harmonic Filter (AHF) injects harmonic current to cancel harmonic current in the electrical distribution system. This reduced harmonic level results in improved electrical network reliability and reduced operating cost. AccuSine PCS is simple to size, install, set up and operate. In addition, AccuSine PCS eliminates the complex harmonic compliance limit calculations and removes nuisance harmonics from the electrical network.

**The problem:**

Power electronic devices that have rapid and frequent load variations have become abundant today due to their many process control related and energy saving benefits. However, they also bring a few major drawbacks to electrical distribution systems; harmonics and rapid change of reactive power requirement. Harmonics may disrupt normal operation of other devices and increase operating costs. Symptoms of problematic harmonic levels include overheating of transformers, motors, drives, cables, thermal tripping of protective devices and logic faults of digital devices. In addition, the life span of many devices can be reduced by elevated operating temperature.

**The solution:**

The AccuSine PCS AHF provides the simplest and most effective means to mitigate harmonics, to reduce process related voltage fluctuations. The AccuSine PCS AHF actively injects opposite harmonics current on the source side of the load and it:

- Decreases harmonic related overheating of cables, switchgear and transformers
- Reduces downtime caused by nuisance thermal tripping of protective devices
- Increases electrical network reliability and reduces operating costs
- Corrects to the 50th harmonic, reduce harmonics level to meet IEEE 519, IEC 61000 3-4, and UK G5/4-1 standards.
- Compensates entire network or specific loads depending on installation point

**Standard features**

- Real-time dynamic current injection for harmonic cancellation and VAR compensation (lead or lag power factor)
- Independent phase compensation
- Load balancing capability
- Parallel connection (up to 99 units) allows for easy retrofit and installation of multiple units for large networks
- Response to load fluctuations within 2 cycles
- Full color touch screen HMI (Human Machine Interface)
- NEMA 1, NEMA 12, IP30 AND IP54 enclosure
- Seismic rated per ICC IBC and ASCE 7
- UL, CE, ABS, and CSA certified

**Accusine PCS Sizing**

For proper sizing of AccuSine units, contact the Schneider Electric sales office or e-mail pqc@squared.com. To expedite the product selection process, please have a single line diagram and/or details of the application including sizes of transformers, non-linear and linear loads, and any existing filters and capacitors.

The Hybrid VAR Compensator (HVC) is ideally suited for industrial facilities with power quality or production problems caused by rapidly changing reactive power demands typically associating with highly cyclical loads such as welders, mining conveyors and heavy stamping machines.

**The problem:**

Rapid reactive power changes demand timely reactive power (VAR) compensation. Lack of timely and adequate VAR compensation can lead to voltage fluctuations in the electrical distribution system, impacting equipment operation, as well as product quality.

Traditional capacitor systems have a minimum response time of five to thirty seconds for load fluctuations. As a result of this limitation, uncompensated reactive power demand by cyclical loads can produce voltage instability, cause flicker, increase losses, and result poor power factor which reduces the electric supply capacity. Problems can include:

- Poor weld quality or reduced weld line productivity (due to restrikes or interlock weld controls)
- Failure to start motor loads (due to voltage sag on startup)
- Undervoltage tripping of sensitive loads (Robots, PLCs, VFDs)
- Lighting flicker and/or HID lighting shutdown
- Overloaded distribution equipment (cyclical current pulses may exceed the rated current of the distribution equipment)
- Poor power factor and associated utility demand charges

**The Solution:**

The Hybrid VAR Compensator is ideally suited for ultra fast reactive power compensation in many low and medium voltage distribution networks containing highly transient loads where conventional systems are not suitable.

The HVC employs a fixed or automatic capacitor bank to provide reactive power at all times, while AccuSine PFV adjusts the output to meet system reactive power requirement in timely manner. AccuSine PFV features a 100 microsecond response time to provide dynamic VAR injection to meet reactive power requirement within 1 cycle, reduce voltage sags created by inductive load switching, welding operation, etc.

**Main Features:**

- Real-time reactive power compensation for transient or cyclical loads
- Infinite VAR resolution
- Independently compensates each phase
- Transient free compensation
- Improves voltage stability, reduces flicker
- Constructed with 12 gauge steel frame

HVC systems can alleviate most of the problems created by cyclical loads that require large amount of reactive power for short duration. HVC system can be applied in the low voltage and medium voltage system from 480 V up to 33 kV.

**Unique, cost-effective construction:**

The ReactiVar HVC is a custom engineered product designed for specific reactive power compensation requirements. It consists of both passive and active components. The passive component may consist of capacitors only or include tuned reactors. Depending on the application, the passive portion may include contactor or solid state switching device to permit some adjustment of the passive elements. The active component is provided by Schneider Electric's AccuSine PFV unit. HVC systems also can prevent resonance by including custom designed iron core reactors in series with each three phase capacitor module when required. The series reactor/capacitor combinations prevent resonance by turning the network below the first dominant harmonic (usually the 5th and 300 Hz). In doing so, HVC can also reduce harmonic voltage distortion, which further improves overall network conditions.

The HVC employs a fixed capacitor bank to inject leading reactive current (leading kVAR) into the network at all times, and an AccuSine PFV unit to precisely adjust the total output of the HVC according to the load reactive power demand profile. When load reactive demand is zero, the AccuSine PFV injects lagging reactive current to cancel the leading reactive current of the fixed capacitor bank such that the total output of the HVC is minimized. As the load kVAR demand increases, the AccuSine PVF adjusts its output such that the total output of the HVC precisely matches the load demand. If load demand increases above the fixed capacitor bank capability, then the AccuSine PFV injects leading reactive current. This continues until the full leading kVAR capacity of the AccuSine PFV is met. Thus, the HVC total output provides leading kVAR compensation to match load demand.

To optimize system design, Schneider Electric expert will normally need to take real-time measurements on the network site. Please contact Schneider Electric power quality experts or email us at [pqc@squared.com](mailto:pqc@squared.com).

### Neo™ Keypads

Neo Keypads offer localized finger-tip control of lighting and other electrical devices. With over 1,000 custom color combinations available, these elegant keypads compliment any decor. Requires plaster mud ring or single gang box with minimum internal width of 2.05".

- Button configurations include multi-point switching and dimming, master ON/OFF switching, and scene settings
- Scene control includes up to forty group addresses per keypad. Larger scenes are possible by sharing memory among multiple keypads
- Independent timers available for each button
- Standard built-in infrared receiver permits keypad control at a distance with an optional infrared handheld remote
- Dual-color LED windows on each button can glow in cool blue, orange, or combinations of both, indicating when a controlled device is ON or OFF
- Auto "fallback" can dim button LEDs at a set time after the last key press
- Locator LEDs can illuminate the top and bottom of the button area in cool blue, helping a user find the keypad in dim light or help the installer find the correct keypad when commissioning
- Clean-lined low-profile keypads are wall mounted without external fittings
- Optional button covers have ID windows, enabling quick identification of lighting scenes or controlled devices
- Distinctively designed multi-layer cover plate consists of button covers, an outer surround, and an inner surround
- Color schemes are easily customized and modified to suit personal taste or the décor

### Standard Neo Keypads

Includes keypad, button covers, inner and outer surrounds.

### Saturn™ Keypads

Saturn Keypads incorporate a unique glass cover plate that creates a distinctive appearance. By virtue of the variety of button configurations available, one compact Saturn keypad can take the place of many single operation switches, ON/OFF toggles, dimmers, and timers. Available in two-, four-, or six-button keypads, Saturn's modern style is complemented by orange and blue LEDs that can instantly show the status of controlled devices. Requires plaster mud ring or single gang box with minimum internal width of 2.05".

- Button configurations include multi-point switching and dimming, master ON/OFF switching, and scene settings
- Scene control includes up to forty group addresses per keypad. Larger scenes are possible by sharing memory among multiple keypads
- Independent timers available for each button
- Dual-color LED windows on each button can glow in cool blue, orange, or combinations of both, indicating when a controlled device is ON or OFF
- Auto "fallback" can dim button LEDs at a set time after the last button press
- Locator LED can illuminate the keypad, helping a user find it in dim light
- Clean-lined keypads are wall mounted without external fittings
- Low-profile design extends only 0.5 in. out from the wall
- Optional button covers with labels, enabling quick identification of lighting scenes or controlled devices

### DLT Keypads

Saturn™ Dynamic Labeling Technology™ (DLT) Keypads combine a programmable keypad button, and easily customized labels on a backlit LCD screen that eliminates the need for custom labels. By virtue of the variety of button configurations available, one compact DLT keypad can take the place of many single-operation switches, ON/OFF toggles, dimmers, and timers. The five keypad buttons incorporate blue LEDs which complements the keypad's sleek lines while showing the status of controlled devices.

- Button configurations include multi-point switching and dimming, master ON/OFF switching, and scene settings
- Keypads have five physical buttons—four control buttons, and one scroll/page button—combined with two screens of labels, for a total of eight control buttons and two scroll/page buttons
- Scene control includes up to forty addresses per keypad. Larger scenes are possible by sharing memory among multiple keypads.
- Independent timers available for each button
- Button LEDs can be used as locator lights in the dark
- 64 x 128 pixel LCD screen with a white backlight
- Editable LCD labels, available for each button or control group, can display text, symbols, and graphics.
- Dynamic graphic displays, such as bar graphs, can be enabled or disabled
- Bitmaps can be downloaded for each group address or scene
- Low-profile design, wall mounted without external fittings

### Neo™ Decorator Keypads

Neo Style Decorator Keypads provide the same features of a standard C-Bus keypad in a format designed to conserve horizontal wall space.

- Button configurations include multi-point switching, dimming, and scene control
- LED indicator reflects status of each button
- Built-in infrared receiver to allow operation from C-Bus handheld remote control
- Distinctive Neo styling designed to match standard Neo keypads and touchscreens
- Custom color combinations available on request
- Meets NEMA Standards WD-1, WD-6

SLC5084GAPG(XX)	4 gang wallplate	45.00

■ To specify color, add corresponding alpha codes. Black = BK, White = WE, Cream = CM, Mocha = BR. Example SLC5081GAPG(WE) = Saturn Decorator 1 gang, White

### Touch screens

C-Bus Touch screens are unified wall-mounted panels for controlling lighting systems and accessories with the touch of a finger. They come in both monochromatic (Mark II) and color screen versions. Compact yet powerful, touch screens offer an attractive alternative to multiple single operation switches, ON/OFF toggles, dimmers, and timers which can clutter up even the nicest wall.

### Mark II Black and White and Spectrum Color touch screen

- Control screens support multi-point switching and dimming, master ON/OFF switching, scheduling, and scenes with multiple loads.
- Preset scenes and functions automate the task of adjusting lighting levels to different lamps and fixtures.
- RS-232 port for third party device integration through the built in Logic Engine
- Standard real-time and astronomical clock permits time scheduling of lighting and other tasks
- Variable dimming fade rates can be configured according to load or lighting zone
- Locator option can be configured to help users find the screen in dim light
- Clean-lined low-profile touch screen can be wall-mounted without external fittings
- Infrared receiver for remote control
- Stores up to 250 scenes with 100 group addresses each. Scenes can be triggered directly from the touch screen or any other device on C-Bus

### Mark II Black and White and Spectrum Color touch screen (desktop model)

- Screen swivels and pivots for optimal viewing
- Control screens support multi-point switching and dimming, master ON/OFF switching, scheduling, and scenes with multiple loads.
- Preset scenes and functions automate the task of adjusting lighting levels to different lamps and fixtures.
- Standard real-time and astronomical clock permits time scheduling of lighting and other tasks
- Variable dimming fade rates can be configured according to load or lighting zone
- Locator option can be configured to help users find the screen in dim light
- Infrared receiver for remote control

**Wiser™ Home Controller**

The Wiser Home Controller is the missing piece of the smart home puzzle, enhancing the capabilities and connectivity of the C-Bus network. Its easy-to-use graphical user interface (GUI) provides access to the home C-Bus network and all of your electrical, multimedia, and telecommunication needs. This same GUI can be installed across multiple control devices, such as mobile phones, TVs with Microsoft® Windows® Media® Center, personal computers, and web tablets, in addition to the C-Bus range of touch screens and keypads. No matter where you are, the Wiser Home Controller allows you to monitor and control your home environment locally or remotely over the internet.

**Features**

- Ethernet and Wi-Fi based controller for your C-Bus system
- Built-in Ethernet router and Wi-Fi access point
- Support for lighting, air-conditioning, multi-room audio, alarms, cameras, and other equipment
- Built-in scene, scheduling, and logic programming modules
- Allows remote reprogramming from outside the home/building by installers
- Common, intuitive interface for all devices
- Mobile phone and web-enabled device control

Wiser Home Controller

### C-Bus Multi Room Audio

Extend the capabilities of a C-Bus system by incorporating award winning multi-room audio into your next project. Multi-room audio augments a C-Bus lighting control system, providing high quality sound throughout a home or business.

C-Bus multi-room audio readily integrates with other C-Bus controls, providing a single source for audio and lighting from a single keypad or touch screen. Sound is distributed throughout the home through the Matrix Switcher and routed to local amplifiers.

A typical C-Bus Multi Room Audio system distributes up to four analog audio inputs, five if an Audio Distribution Unit is used, and one optical input. These inputs are distributed up to 8 zones, each consisting of one or more amplifier. Additionally, each amplifier is capable of accepting a local analog audio input, providing up to six stereo audio channels for each amplifier.

### Matrix Switcher

The C-Bus™ Audio Matrix Switcher provides a revolutionary means for distributing audio throughout a home. This Matrix Switcher provides up to eight zones of audio output from four source inputs. The C-Bus Matrix Switcher allows you to send streaming audio programs to the audio zones from a variety of sources, including a local area network (LAN), or a USB memory stick (Model: SLC5608842E). In addition, it will also allow connection of a portable music player directly to the Matrix Switcher's front audio panel. Audio sources can be selected from the front panel or by any C-Bus™ input device such as touch screens or keypads. The Matrix Switcher is ideally suited for multi-room audio and structured wiring systems. Keypads and other C-Bus™ devices connect to the Matrix Switcher via CAT-5 modular jacks. Outputs to remote and desktop amplifiers are made with low voltage wiring. In addition to the six source inputs, two mono broadcast announcement inputs are provided for connection to intercoms or other systems. Broadcast announcement input can be given priority over other source inputs and features fully adjustment volume and over-stepping mute features.

- Suitable for 19" Rack Mount with rack mount ears provided.
- Each Matrix Switcher can distribute digital audio to up to 8 MRA amplifiers. You can install up to 3 Matrix Switchers on a C-Bus network.
- The Matrix Switcher can provide power for the attached amplifiers via the Digital Audio cables. You can connect an external power supply to an amplifier to increase its audio power output.
- The choice of the audio program for an amplifier can be made at the Matrix Switcher or in the audio zone. You can use C-Bus input devices to choose the source and to adjust volume, tone and muting.
- The Dual AM/FM tuners inside the Matrix Switcher can distribute preset station choices to any of the audio zones.
- Distributes streaming audio from several sources using the C-Bus Ripple software application running on a networked PC.
- You can connect up to 4 stereo analogue line-level inputs to the Matrix Switcher. If you need to add another source input, you can install an MRA Distribution Unit and power supply.
- Compatible with C-Bus devices.

Desktop Amplifier

**Remote Amplifiers**

C-Bus Multi Room Amplifiers provide efficient, high fidelity audio to individual rooms. Available in either desktop or remote mount versions, these amplifiers are specifically designed to operate on the C-Bus network as an extension of a lighting control system, without third party gateways or custom integration. This means the ability to control amplifiers with the same keypad or touch screen used to control lighting levels.

When combined with the C-Bus Matrix Switcher, these amplifiers deliver excellent stereo sound. Connections are provided for up to two sets of 8 ohm speakers. Both desktop and remote amplifiers provide a local input connection for attaching to CD or mp3 players, etc. In addition, the desktop amplifier will accept remote commands via its infrared receiver. Infrared remote included.

- 10 Watt digital efficient stereo amplifier, 25 Watts when connected to local power supply (optional)
- Super quiet design
- On board 8 ohm loudspeaker connections
- Local source input — RCA jack
- C-Bus connection (connects with CAT-5 cable)
- Volume control (desktop model)
- On-board IR receiver (desktop model)
- Stereo headphone connection (desktop model)
- Infrared remote included (desktop model only)

Audio Distribution Unit

**Audio Distribution Unit**

The C-Bus Audio Distribution Unit is an optional device that can be used in conjunction with the C-Bus Multi Room Audio System to further enhance C-Bus enabled audio product family.

The C-Bus Audio Distribution Unit distributes a single digitized stereo audio input source to multiple locations via amplifiers wired in a parallel format. Functions such as Volume, Bass, Treble and Balance can be adjusted from a C-Bus input device at any of the audio output locations. The C-Bus Audio Distribution Unit converts a single analog stereo audio input to a digital audio output. That output can then be connected to the Matrix Switcher as an additional input or to the C-Bus Desktop or Remote Amplifier as a stand-alone configuration.

- Distributes a single stereo audio source to C-Bus Audio Amplifiers via a digitized signal over Cat-5 cable
- Does not require any C-Bus programming (hardware only)
- One stereo analog audio source input (2 X RCA)
- One digital audio output
- Output can be looped between C-Bus Audio Amplifiers
- IR emitter port

Indoor Ceiling Mount Speakers

**Audio Speakers**

C-Bus Audio Speakers are available as indoor or outdoor models and are designed to be used with home theater, multi-room, and outdoor audio applications.

The indoor speakers come in wall or ceiling mount versions that are installed with the front of the speaker flush with the mounting surface.

The indoor/outdoor speakers are available in black or white and can be placed on a shelf or hung on a surface by using the included bracket.

- Flush-mount, shelf-mount, and surface-mount models
- Indoor and outdoor models
- High-impact plastic components and powder coated metal grills produce a long-lasting unit suitable for indoor and outdoor use
- 8 ohm impedance
- Available with Kevlar™ (indoor units only) or polypropylene drivers (indoor and outdoor units) for high-quality sound in all applications
- All models are off the floor, saving floor space
- Indoor/Outdoor Speakers have a pre-installed, removable mounting bracket
- Indoor/Outdoor Speakers can be placed on a shelf or hung from a surface by their bracket (included)
- Tracing/painting template included

8 button remote control

Universal remote control

**Hand Held Remote Controls**

C-Bus remote controls are designed for use with C-Bus keypads, multi-sensors, and touch screens. available in both four and eight button versions, these remotes have a range up to 50 feet (line of sight).

The universal remote control unit allows a single remote control unit to replace various other remotes including VCRs, CD players, DVRs, and TVs. Up to sixteen remote control codes are supported.

4 Zone Thermostat

**Single and 4 Zone Network Thermostats**

C-Bus Thermostats are used to regulate the air temperature of zones by controlling heating-ventilation-air conditioning (HVAC) equipment. The air temperature is monitored by the unit's temperature sensor or optionally via an external C-Bus temperature sensor.

C-Bus single and programmable 4 Zone Thermostats may operate as stand alone devices, or be controlled via other C-Bus devices such as wall switches or touch screens.

Programmable 4 Zone Thermostats can schedule up to four set points during a day, and unique schedules can be programmed for each day of the week.

Both models include setback mode, (saves power by using a wider acceptable temperature range within which heating or cooling is not performed) and temperature guard, (ensures the temperature is maintained within a specified temperature range).

- Easy to read, large LCD display
- Control by keypads and other devices on the C-Bus network
- Available in black, white and stainless steel fascias
- Setback mode
- Temperature guard mode
- Internal Timer
- Daily schedule set points (4 Zone model)
- Display temperature in Celsius or Fahrenheit
- RWG interface (relay models only)
- Easily configured by using the Clipsal Toolkit software program

**Table 5.18: Single and 4 Zone Network Thermostats**

Single Zone Thermostat

Light Level Sensor

360° Indoor PIR Sensor

### Light Level Sensor

The C-Bus Light-Level Sensor measures ambient light levels and automatically issues ON, OFF, or ramp commands over a C-Bus network. The light-level sensor can control relays, dimmers, or remotely operated circuit breakers, changing their status according to pre-set ambient lighting targets. The C-Bus light-level sensor has a dynamic range between 5-150 foot candles, and compensates for noise and rapid light intensity fluctuations.

### Outdoor Light Level Sensor

C-Bus Outdoor Light-Level Sensor measures ambient light levels and automatically issues ON/OFF or ramp commands over a C-Bus network to maintain outdoor lighting levels. Primarily designed for outdoor use, this light-level sensor is also suitable for indoor setting in which a water resistant casing is desirable.

The light-level sensor can control up to two C-Bus group addresses: one address controls ON/OFF switching of a lamp circuit according to a pre-determined ambient light level, while the other is used to continuously regulate the light-level output of any number of lamps!

The target light level, the margin, and other sensor options are easily configured by using the C-Bus Toolkit software.

- Outdoor use, wall- and ceiling-mounted low-profile unit
- Can maintain a constant illumination level of 5-150 footcandles
- Adjustable lumin setpoint
- Control of up two C-Bus group addresses
- Sensors receive data and power over a single C-Bus twisted-pair cable, so they do not require power packs or line-voltage connections
- 180° field of view

**Table 5.19: C-Bus Light Level Sensor**

Catalog No.	Catalog Description	\$ Price
SLC5031PE	Light level sensor, 0–150 Foot-candles, Indoor	208.00
SLC5031PEWP	Light Level Sensor, 5–150 Foot-candles, Outdoor	278.00

### Occupancy Sensors

C-Bus occupancy sensors are available for both indoor and outdoor applications. All C-Bus sensors incorporate reliable passive infrared detection (PIR) circuits for occupancy detection along with integral light level sensors to prevent switching of lights if sufficient ambient light is present. Sensors feature programmable adjustments for sensitivity and time delay, walk test LED for commissioning and optical bandpass filtering with dual element detectors to minimize false triggering.

- 90° Indoor sensors are intended for wall or ceiling mounting. These sensors have a continuous detection field of 400 square feet and a 90° field of view.
- 360° Indoor sensors are intended for flush mounting in drop ceilings. They have a minor motion detection field of 800 square feet making them ideal for use in offices, copier rooms, closets, and restrooms where it can be mounted in the center of the detection area.
- 360° Multi-Sensors combine a passive infrared receiver (PIR) for occupancy sensing, a light-level sensor, and an infrared remote receiver into a small, highly versatile unit. The multi-sensor's 2.8 inch face diameter makes it unobtrusive and ideally suited for flush mounting on the ceiling with effective IR coverage up to 800 square feet. The built-in IR receiver accepts commands from an optional handheld remote controller, making the sensor ideal for classrooms and conference room areas.
- Outdoor PIR Motion Sensor combines reliable thermal-radiation-based control of lighting with rugged construction suitable for outdoor requirements. The unit's advanced circuits and flat multi-segmented lens provide coverage of up to 3000 square feet in a 110° field of view.

Four-Channel Auxiliary Input unit

### Auxiliary Input Unit

C-Bus Four-Channel Auxiliary Input Units increase the versatility of the C-Bus network by facilitating remote access with any dry-contact switch mechanism. DIN-rail mounted for quick installation, the auxiliary unit can be configured with standard C-Bus control functions such as remote scene triggering, ON/OFF, toggle, dimmer, or timer.

- Provides four isolated inputs for external voltage-free mechanical switches
- Control options include remote scene triggering, ON/OFF, toggle, dimmer, or timer operations
- LEDs indicate operational status of each channel
- Standard built-in C-Bus network connectors: (2) RJ-45
- Non-volatile memory stores operating status for recovery from a power outage
- DIN style construction 4M wide: 3.4"(L) x 2.8"(W) x 2.6"(H)
- Compatible with all Clipsal devices and the Square D Powerlink™ NF3000G3C controller

General Input unit

### General Input Unit

Four-Channel General Input Units measure TTL digital and real-world analog quantities and generate messages about the measurements to the C-Bus network. By acting as an interface with various external sensors, the general input unit enables integration of the C-Bus network with a variety of system types, such as those for HVAC and for power monitoring. Configuration options include selectable input types, eight adjustable decision thresholds per channel, definable actions, selectable filtering, broadcast rates, and a separate hysteresis value per channel.

- Measures TTL digital quantities including voltage, current, or resistance from external sensors such as light level, pressure, and temperature
- Four channels of input, each with an adjustable hysteresis value, eight decision thresholds, and a software-selectable input value transformation in the form  $y = ax + b$
- Input channels are compatible with a range of third-party sensors
- Control functions include load switching, dimming, trigger applications, enable control applications, and measurement applications
- Includes 120 V/24 Vdc power pack
- Dimensions: 5.67 in. (144mm) wide x 2.60 in. (66mm) deep x 3.35 in. (85mm) tall
- Compatible with all Clipsal devices and the Square D Powerlink NF3000G3C controller

Four-Channel Bus Coupler

### Bus Couplers

Bus Couplers provide an interface between dry-contact mechanical switches and the C-Bus network. Available in two- and four-channel models, the bus coupler is small enough to be used in restricted spaces such as wall boxes with existing switches. Configuration options include standard control functions such as ON/OFF, toggle, dimmers, and timers.

- Provides two or four non-isolated inputs for external voltage-free mechanical switches. Two-channel units feature independent remote LED outputs
- Two-way removable terminal block for the C-Bus connection
- Receives data and power over a network, so it does not require power packs or line voltage connections
- Scene capabilities
- 2.2"(L) x 1.9"(W) x 0.7"(H)
- Compatible with all Clipsal devices and the Square D Powerlink NF3000G3C controller

Table 5.21: Input Units

Catalog No.	Catalog Description	\$ Price
SLCLE5504AUX	4 Channel auxiliary input unit	544.00

SLC5104BCL	4 Channel bus coupler	243.00

### Relays

C-Bus Relay Units are intended for switching resistive, inductive, fluorescent and incandescent low-voltage loads. Relay units are designed to be mounted in suitable DIN style enclosures. Relay units feature:

- Local toggle buttons to allow individual channels to be toggled
- Remote ON and OFF facilities permitting all channels to be turned ON or OFF without C-Bus Network communications
- Two (2) Convenient built-in C-Bus network connectors (RJ-45)
- LED Indicators to show the status of the network and the unit
- Units available both with and without a 200ma power supply on-board.
- Compatible with all Clipsal devices and the Square D Powerlink™ NF3000G3C controller

Changeover Relay

### Changeover Relay

C-Bus 2A Changeover Relays are designed to operate three-speed motors and two-way motor control devices. Some of their most common applications include operating motorized blinds, shutters, curtains and skylights (open/closed) where they provide a much simpler alternative to traditional and obtrusive relay interlocking systems.

- Four (4) isolated independently operating relay channels
- 120 Vac and 277 Vac units
- 2A motor rating
- Dimensions: 5.67 in. (144mm) wide x 2.60 in. (66mm) deep x 3.35 in. (85mm) tall

Table 5.22: Changeover Relays

4-Channel 10 A Relay

4-Channel 20 A Relay

8-Channel Low Voltage Relay

Phase Angle Dimmer with Power Supply

### 10 Amp Relay

C-Bus 10A Relays feature a zero crossing magnetically latching relay designed for switching the harsh electrical loads associated with today's high efficiency lighting systems.

- Four (4) or twelve (12) independently operating voltage free relay contacts
- 120 Vac and 277 Vac units
- 10 A rating
- Dimensions: 5.67 in. (144 mm) wide x 2.60 in. (66 mm) deep x 3.35 in. (85 mm) tall

SLC5504HRVF	4 Channel Relay, 277 V, 10 A with power supply	1043.00
SLC5504HRVFP	4 Channel Relay, 277 V, 10 A without power supply	843.00

### 20 Amp Relay

C-Bus 20 A Relays feature a zero crossing magnetically latching relay designed for switching the harsh electrical loads associated with today's high efficiency lighting systems.

- Four (4) independently operating voltage free relay contacts
- 120 Vac and 277 Vac units
- 20 A rating
- Dimensions: 8.46 in. (215 mm) wide x 2.60 in. (66 mm) deep x 3.35 in. (85 mm) tall

**Table 5.24: 20 Amp Relay**

Catalog No.	Catalog Description	\$ Price

SLC5504HRVF20	4 Channel Relay, 277 V, 20 A with power supply	1320.00
SLC5504HRVFP20	4 Channel Relay, 277 V, 20 A without power supply	1142.00

### 8-Channel Low Voltage Relay

The C-Bus 8-Channel Low Voltage Relay is a C-Bus output device that controls up to eight low voltage relay channels. The unit is powered from C-Bus and requires no other power source. The 8-Channel Low Voltage Relay can be used in many low voltage applications including controlling irrigation solenoids and low voltage damper solenoids for HVAC control. The unit can also be used in integrating 3rd party equipment through pulse signal controls.

- 8 channels of 2 A switched loads @ 30 Vac/dc
- 8 channels are all isolated change over relays
- Control of 3rd party products

**Table 5.25: 8-Channel Low Voltage Relay**

Catalog No.	Catalog Description	\$ Price
SLC5108RELVP	8-Channel Low Voltage Relay	298.00

### Phase Angle Dimmers

C-Bus Phase Angle Dimmers are intended for controlling incandescent and compatible low-voltage and fluorescent lighting. Each of the unit's channels can independently control loads to create dynamic lighting scenes. These dimmer units automatically compensate for voltage and frequency fluctuations and employ advanced phase-control techniques to reduce flicker and increase lamp life.

- Four (4) independent channels supporting up to 4 A continuous load per channel, eight (8) independent channels supporting up to 2 A continuous load per channel
- Units available both with and without a 200 mA power supply on-board.
- 120 Vac
- Dimensions: 8.46 in. (215 mm) wide x 2.60 in. (66 mm) deep x 3.35 in. (85 mm) tall

Professional Dimmer

### Professional Dimmer

C-Bus Professional Dimmers can control incandescent and compatible low-voltage and florescent lighting. These dimmers are ideal for larger heavily loaded circuits. Each channel provides independent dimming and incorporates thermal overload and over-current protection. These dimmer units automatically compensate for voltage and frequency fluctuations and employ advanced phase-control techniques to reduce flicker and increase lamp life.

An optional terminal box is available for conduit connections. Configuration options include network monitoring of the channel load and network voltages, adjustable delays for dimming levels, and master override.

- Specialized dimming modes—soft turn on/off and linear brightness control
- Built-in power supply sources 60 mA to the C-Bus network
- Individual channels can be turned On/Off at the unit or via C-Bus commands
- LEDs indicate the status of the network at the unit and the status of the unit's load and power
- Optional terminal box for connecting conduit
- 120 Vac
- Dimensions: 7.5 in. (190 mm) wide x 3.0 in. (75 mm) deep x 7.7 in. (195 mm) tall

Table 5.26: C-Bus Dimmers

4 Channel  
0–10 V Dimmer Unit

### 0–10 V Dimming Unit

The C-Bus Analog Output Unit provides four channels of analog 0–10 Vdc for controlling electronically dimmable fluorescent lighting ballasts.

- Produces four independently controllable channels of 0–10 Vdc for controlling dimmable fluorescent lighting ballasts, or other 0–10 V controllable loads
- Individual channels can be turned ON/OFF at unit, via C-Bus commands, and through a remote override option
- 120 V or 277 Vac models available
- DIN style construction 4M wide: 3.4"(L) x 2.8"(W) x 2.6"(H)

Table 5.27:

Catalog No.	Catalog Description	\$ Price
SLCLE5504TAMP	4 Channel 0–10 V Output, 120 V	624.00
SLCLE5504HAMP	4 Channel 0–10 V Output, 277 V	624.00

DALI Gateway

### DALI Gateway

The C-Bus Digital Addressable Lighting Interface (DALI) Gateway provides an isolated two-way communications path between a C-Bus network and two DALI networks, making it possible to use C-Bus devices to control DALI ballasts.

- Provides two-way communications between C-Bus and DALI networks, routing selected messages from one to the other
- Unit is transparent and invisible to DALI ballasts
- Receives data and power over the network, so the unit does not require power packs or line-voltage connections
- DIN style construction 4M wide: 3.4"(L) x 2.8"(W) x 2.6"(H)

Table 5.28:

Catalog No.	Catalog Description	\$ Price
SLC5502DAL	2 Channel DALI Gateway	1014.00

### DMX Gateway

The C-Bus DMX Gateway is a DIN rail mounted unit that maps C-Bus Group Addresses and levels to a DMX-512 A interface.

The C-Bus DMX Gateway is a one way device. It permits C-Bus input devices such as keypads, DLTs and PIRs to control lighting devices with DMX interface capabilities. These include many manufacturers of LED fixtures and theatrical lighting equipment.

- Includes DMX interface (bootlace connectors to 5-pin female XLR)
- DMX Master device
- Receives data and power over the C-Bus network, so the unit does not require a line voltage connection
- DIN style construction 4M wide: 3.4" (L) x 2.8" (W) x 2.6" (H)

Table 5.29:

Catalog No.	Catalog Description	\$ Price
SLC5500DMX	C-Bus to DMX Gateway	936.00

Network Bridge

### Network Bridge

The C-Bus Network Bridge provides a communication channel between C-Bus units on separate networks, expanding the total number of units that can be configured, controlled, and monitored.

- Increases transmission distances by acting as a repeater station for data transmission
- Expands the total number of C-Bus devices that can operate on the system by isolating devices to individual networks
- Indicates each network's status level
- Uses built-in connectors to connect to a C-Bus network
- Compatible with Powerlink G3 3000C controller and all C-Bus components, including keypads, sensors, and dimmers
- DIN style construction 4M wide: 3.4"(L) x 2.8"(W) x 2.6"(H)

Power Supply

### Power Supply

The C-Bus Power Supply is specifically designed to operate with the C-Bus network as a power source for passive C-Bus devices. Up to five power supplies can be connected to a single C-Bus network.

- Available in 120 and 277 Vac models
- Regulating power supply compensates for line voltage and frequency variations, so there is constant output
- Sources up to 350 mA to the C-Bus network
- UL listed to operate in parallel with other Clipsal power supplies, up to five on a single C-Bus network
- Incorporates short circuit and reverse polarity protection
- DIN style construction 4M wide: 3.4"(L) x 2.8"(W) x 2.6"(H)

PC Interface

### PC Interface

The C-Bus PC Interface (PCI) expands options for configuring, controlling, and monitoring C-Bus networks by providing an interface between the network and a personal computer (PC). The C-Bus PCI module easily mounts to a DIN rail and connects to the C-Bus network. Power to the unit is provided through the C-Bus network.

#### Serial

- Unit/Comms LED shows the status of the unit's power and of any data transmissions
- Three RS-232 serial connectors for connecting to a PC or to external devices: (1) 9-pin D-type serial connector (female) and (2) 8-pin RJ-45 connectors
- Two C-Bus network connector ports: RJ-45 sockets
- Data cable for connecting PCI and personal computer, including DB9 connectors

#### USB

- Unit/Comms LED shows the status of the unit's power and of any data transmissions
- Two C-Bus network connector ports: RJ-45 sockets
- USB PC connection
- Data cable for connecting PCI and personal computer

### Pascal Automation Controller

C-Bus Pascal Automation Controller (PAC) provides extended conditional and real-time event programming to C-Bus systems. The PAC supports a full range of programming commands including conditional logic, flow control variables and scheduling.

Systems integrators will appreciate the built-in scheduling tools, scene tools, and wizards for creating basic logic programs. Full programming capabilities can be achieved utilizing the free-form script editor based off the pascal programming language.

- Connects directly to C-Bus network
- Powered from the C-Bus network
- USB port for connection to personal computer
- (2) RS232 ports for third party device control
- Real time, astronomical and C-Bus system clock included with 24 hour internal capacitor backup and external 12 Vdc battery terminals

Programming capabilities including: i.e. Conditional logic (if, then, and, or, not, etc.), Flow Control (for, repeat, while), Variables (integer, real, Boolean, character, string), Control and monitoring of group addresses, Control and monitoring of scenes.

Ethernet Network Interface

### Ethernet Network Interface

The C-Bus Ethernet Network Interface unit is a C-Bus system device designed to provide an isolated communications path between an Ethernet 10Base-T Network and a C-Bus Network. This allows high-speed control and monitoring of a C-Bus installation via the TCP/IP protocols used in computer networks and by the Internet. System integrators and installers will also benefit from having remote access to the system. With the C-Bus Ethernet Network Interface unit, access to a single or multiple networks can be as close as the nearest Ethernet connection.

- Remote access to Clipsal systems
- Bridge multiple C-Bus networks together over LAN or WAN
- Fully supports all Clipsal commands
- Small size, mounts in standard DIN enclosure (4M wide)
- Includes 12 Vdc power supply

Telephone Interface Unit

### Telephone Interface Unit

C-Bus Telephone Interface Unit offers a dial-in and dial-out capability for control of a C-Bus system. Remote location override, monitoring, diagnostics and configuration of a C-Bus system is possible with this unit. The C-Bus Telephone Interface Unit is programmed using a connection to a PC running TICA (Telephone Interface Commissioning Application) configuration software. The interface can also act as a C-Bus PC Interface. The Telephone Interface Unit can be installed in a C-Bus 36 or 60M enclosure or as a wall mountable stand-alone item with connection to C-Bus.

- Remote location override
- Voice prompts and confirmation
- Password protected
- 32 supported devices
- Automatic dial out on present conditions
- Local or remote site access to C-Bus system
- Audio Out

**Bar Code Reader**

The C-Bus Bar Code Reader allows installers and integrators to quickly scan C-Bus devices with serial numbers and import them into C-Bus Toolkit software. Using a USB connection to a PC, users can easily identify and track C-Bus Unit locations on a floorplan/network.

**Network Analyzer**

The C-Bus Analyzer is a C-Bus device designed to help an installer quickly analyze, detect, and troubleshoot potential problems on a C-Bus network. The device analyzes the network parameters and prompts the user for appropriate actions via its front LED (Light Emitting Diode) indicators.

8M Enclosure

**8M Enclosure**

The 8M enclosure is specifically designed for distributed applications. Suitable for surface mounting, the 8M enclosure consists of a box with a cover and a DIN rail for mounting one 8M or two 4M C-Bus units. The enclosure also has provisions for mounting neutral and ground bars.

- Surface-mount NEMA 1 enclosure
- Welded sheet steel with knockouts
- Gray baked enamel, electrodeposited over cleaned, phosphatized steel
- Triple-lead cover screws for fast installation of cover
- DIN rail, suitable for mounting one 8M or two 4M C-Bus DIN modules

12M Enclosure

**12M Enclosure**

The 12M enclosure is specifically designed for distributed applications that require physical proximity between DIN units and keypads, sensors or controlled loads. Suitable for surface mounting, the 12M enclosure consists of a box with a cover and a DIN rail for mounting three 4M C-Bus units, one 8M unit plus one 4M unit or one 12M unit. The enclosure also has factory mounted neutral and ground bars.

- Surface-mount NEMA 1 enclosure
- Welded sheet steel with knockouts
- Gray baked enamel, electrodeposited over cleaned, phosphatized steel
- Triple-lead cover screws for fast installation of cover
- DIN rail, suitable for mounting one 12M or three 4M C-Bus DIN modules

24M Enclosure

**24M Enclosure**

The 24M enclosure is specifically designed for distributed applications that require physical proximity between DIN units and keypads, sensors or controlled loads. Suitable for surface mounting, the 24M enclosure consists of a box with a cover and two rows for mounting C-Bus DIN-mounted C-Bus units. Each row can hold one 12M unit, one 8M unit plus one 4M unit, or three 4M units. The enclosure also has provisions for additional neutral and ground bars.

- Surface-mount NEMA 1 enclosure
- Welded sheet steel with knockouts
- Gray baked enamel, electrodeposited over cleaned, phosphatized steel
- Triple-lead cover screws for fast installation of cover
- DIN rail, suitable for mounting Clipsal DIN-mounted C-Bus units. Each row can hold one 12M unit, one 8M unit plus one 4M unit, or three 4M units

36M Enclosure

**36M and 36MS Enclosure**

The 36M and 36MS enclosures provide a multi-purpose means for housing various C-Bus DIN-mounted devices. Suitable for flush or surface mounting, the enclosure consists of a mounting pan assembly, and a cover assembly. The box is to be ordered separately, allowing for its installation with the rough-in of field wiring. Enclosures feature:

- NEMA 1 enclosure suitable for flush or surface mounting
- Welded sheet steel with knockouts
- Gray baked enamel paint, electrodeposited over cleaned, phosphatized steel
- Triple-lead cover screws for fast installation of cover
- 3 DIN mounting rails, each accommodating up to one 12M unit, one 8M unit with one 4M unit, or three 4M units
- Complete with barriers for separation of Class 2 circuits from line voltage (36M only)
- The 36MS offers a reduced footprint than the 36M

## 60M Enclosure

The 60M enclosure provides a means for housing DIN style relays and dimmers. Suitable for flush or surface mounting, the enclosure consists of a mounting pan assembly, and a cover assembly. The box is to be ordered separately, allowing for its installation with the rough-in of field wiring. Enclosures feature:

- NEMA 1 enclosure suitable for flush or surface mounting
- Welded sheet steel with knockouts
- Gray baked enamel paint, electrodeposited over cleaned, phosphatized steel
- Triple-lead cover screws for fast installation of cover
- 5 DIN mounting rails, each accommodating up to one 12M unit, one 8M unit with one 4M unit, or three 4M units
- Complete with barriers for separation of Class 2 circuits from line voltage

Area Lighting Panel

## Area Lighting Panels

C-Bus Area lighting Panels are ideally suited to meet lighting control energy code requirements in classrooms, offices and other small spaces. Area Lighting Panels are designed to be used with C-Bus input units, including: keypads, sensors (occupancy and light level detection) and touch screens. A simple CAT-5 cable is all that is required for connecting of these devices.

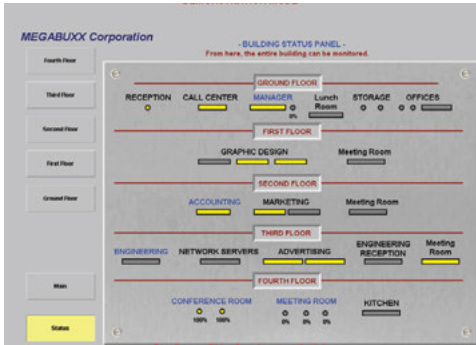

C-Bus Area Lighting Panels provide on/off switching, stepped dimming or continuous dimming. All relays feature rugged 20 A rated contacts for switching electronic ballast loads. Models with continuous dimming capabilities are available with phase angle or 0–10 V control. C-Bus Area Lighting Panels can operate independently or as part of an entire facility wide lighting control system. Enclosures can easily be mounted in electrical closets or in ceiling spaces. They include all necessary connections and are UL® Listed. Area Lighting Panels can also be used in conjunction with Powerlink™ panels.

- Relay models: Four (4) or Eight (8) channel relay outputs, rated 20 A
- Phase Angle Dimmer Model: Four (4) channels of 4 A outputs for incandescent lighting loads.
- 0–10 V outputs available for control of compatible 0–10 V dimmable fluorescent ballasts, or LED drivers
- Integral neutral and ground bar terminal strips
- Meets NEC 300.22 requirements to be installed above ceilings and other spaces that handle environmental air
- Bypass mode to facilitate quick start up
- Meets NEC Article 409
- UL Listed 508 A

### C-Bus Toolkit Software

The C-Bus Toolkit Software includes the C-Bus Installation and programming Software, Project Manager, and C-Bus Calculator. The software works under Windows™ 98, ME, 2000 and XP and supports a unique barcode scanning feature. This allows the installer to scan the C-Bus packaging of each new unit to add the unit to the database. The software prints adhesive labels that can be affixed to building plans. These labels include the Unit Address and the physical location that the unit is to be installed. Labels are duplicated so that one label can be affixed to the unit and one to the electrical plan for the installation. The labels have barcodes on them so that units can be easily re-identified if required.

**NOTE:** C-Bus Toolkit Software is a free download from <http://www.schneider-electric.us/solutions/lighting-and-whole-home-control/>

Schedule Plus Software Screen Captures

### Schedule Plus Software V.4

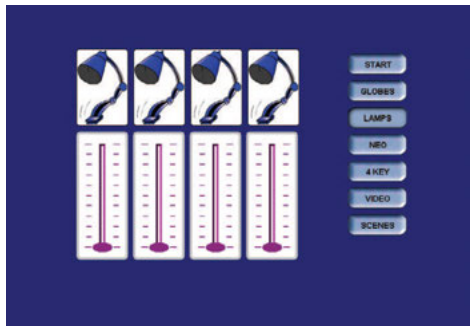

C-Bus Schedule Plus Version 4 includes a number of major features, including enhanced scheduling features, support for monitoring load run times, load power and energy consumed, support for fully customizable multilevel, password protected, access level control, support for sunrise and sunset times, support for daylight saving times, support for 128 bit encrypted secure Internet connectivity allowing control and monitoring via any Web Browser. The software also includes a graphic display as well as a fully featured programmable logic engine. The USB Code Key works under Windows XP Home, XP Professional, Server 2003, Vista Ultimate, Vista Business and Vista Enterprise.

**NOTE:** An evaluation version of Schedule Plus is available for download by going to <http://www.schneider-electric.us/solutions/lighting-and-whole-home-control/> and clicking Software Downloads in the far-left column.

### HomeGate Software V.4

Residential application PC control of a C-Bus Control System. C-Bus HomeGate Version 4 includes a number of major features, including support for 128 bit encrypted secure Internet connectivity allowing control and monitoring via any Web Browser, irrigation system control feature, enhanced scheduling features, support for sunrise and sunset times, support for daylight saving times. The software also includes a fully featured programmable logic engine. The C-Bus USB Key works under Windows XP Home, XP Professional, Server 2003, Vista Ultimate, Vista Business and Vista Enterprise.

**NOTE:** An evaluation version of HomeGate is available for download by going to <http://www.schneider-electric.us/solutions/lighting-and-whole-home-control/> and clicking Software Downloads in the far-left column.

HomeGate Software Screen Captures

### Installer License Key

The C-Bus Software Installer License Key is a valuable tool for installers to create/commission projects using C-Bus Version 4 Schedule Plus & HomeGate software. This code key is time restricted and allows the software to operate in 'normal' mode for anywhere between 48 to 72 hours per use (the software then returns to evaluation/demo mode).

**NOTE:** The installer code key will also be compatible with future software releases.

Wall Switch Occupancy Sensor

**Basic Wall Switch Occupancy Sensors**

Wall Switch Occupancy Sensors are ideally used in commercial buildings to save energy that would otherwise be wasted to light unoccupied rooms or spaces. These Wall Switch Occupancy Sensors employ the latest in passive infrared (PIR) sensing technology to accurately sense when a room or space is occupied, then turn lights on. When the room is unoccupied, the sensor turns lights off after a time delay of up to 30 minutes as determined by the user. Auto-ON and Manual-ON models available with decorator wall plate in White, Ivory or Light Almond. Simply mount the sensor in place of existing single gang switch — no neutral connection required. Special multi-segmented lens creates a coverage pattern that accurately detects major motion in rooms up to 1000 sq. ft.

- Input: 120/277 Vac 60 Hz
- Output: 1000W Max. Load @ 120 V (1000 VA@120 V 1800 VA@277 V)
- 1/4 HP Max. Motor Load
- UL and cUL Listed
- For use with electronic and magnetic ballasts
- CEC Title 24 Certified

**Commercial Grade Wall Switch Occupancy Sensors**

Maximum energy savings in a format that will complement any decor. Low profile sensors are available in white, ivory, gray, light almond and black with color-matched segmented lens.

**Light Level Sensor Mode:** Each sensor includes an adjustable light level sensor to hold off artificial lighting when adequate natural light is present.

**Walk-Through Mode:** To maximize energy savings, the sensor detects when areas are briefly occupied as a result of a person walking through and turns off lighting based on a shorter time delay. Walk-Through Mode is available on single and dual circuit units.

**Lamp Saver Mode:** When the lamp saver feature is enabled, the sensor automatically alternates which load responds to motion. The result is more predictable lamp life and reduced maintenance. (Dual circuit only)

**Adaptive Technology:** Commercial Grade dual technology and ultrasonic wall switch occupancy sensors feature a patented adaptive technology that significantly reduces the learning period typically associated with adaptive sensors. Adaptive Sensors from Schneider Electric reduce the occurrence of nuisance on and nuisance off while at the same time extending lamp life and reducing maintenance.

- Available in white, ivory, gray, light almond and black with matching cover plate (included)
- Color matching multi-segmented lens
- Audible alert
- Selectable auto-on and manual-on modes
- Red LED motion indicator
- For use with electronic and magnetic ballasts
- 1000 VA@120 V, 1800 VA@277 V
- User adjustable light level, time delay, and sensitivity
- 30 second grace period in the manual-on mode

**Residential Wall Switch Vacancy Sensors**

The Residential Vacancy Sensor directly replaces standard light switches in bathrooms, garages, laundry rooms and utility rooms in accordance with Title 24 2005 requirements for residential lighting (Sections 119(d) and 150 (k)). Vacancy Sensors from Schneider Electric operate just like a standard light switch, requiring a button press to turn lights on. Lights may be turned off with a button press or the sensor will turn off lighting automatically when the area is unoccupied.

- No user time delay and sensitivity adjustments necessary
- Available in White, Ivory or Light Almond
- Furnished with cover plate
- Manual On/Manual Off or Automatic Off operation
- No neutral or minimum load required

Commercial Grade Wall Switch

Blank Cover Plate with decorator style opening

Toggle Cover Plate with decorator style opening

- Rated for both 120 V incandescent and fluorescent lighting
- Title 24 2005 Residential Lighting requirements, Sec. 150(k)
- No override on
- Manual-on only (no auto-on mode)
- 30 minute time delay

Dual Technology Wall Mount

Dual Technology Ceiling Mount

Power Pack

**Wall Mount Occupancy Sensors**

Wall Mount Occupancy Sensors from Schneider Electric accurately detect occupancy and automatically switch lighting on and off as needed. These sensors are wall or ceiling mounted for superior motion detection. Sensors employ Passive Infrared (PIR) and Ultrasonic technology. Dual Technology model features combined PIR and Ultrasonic detection for the ultimate performance. The PIR Occupancy Sensor has 3 interchangeable lenses for custom coverage patterns. Wide Angle, Long Range and High Bay. Wall mount sensors also incorporate an integral light level sensor, and features an isolated relay for use with building automation, security and HVAC systems.

- Adjustable Sensitivity
- Adjustable time delay
- UL and cUL Listed
- CEC Title 24 Certified
- FCC Part 15, Class B
- ASHRAE/IES 90.1

**Table 5.35: Wall Mount Occupancy Sensors**

Catalog No.	Catalog Description	\$ Price
SLSWPS1500	PIR occupancy sensor	161.00
SLSWUS1500	Ultrasonic occupancy sensor	191.00
SLSWDS1500	Dual Technology occupancy sensor	221.00

**Ceiling Mount Occupancy Sensors**

Ceiling Mount Occupancy Sensors are ideal for offices, conference rooms, class rooms and other shared areas to automatically turn lights on and off based on occupancy. Sensors employ Passive Infrared (PIR) and Ultrasonic technology. Dual Technology model features combined PIR and Ultrasonic detection for the ultimate performance. Requires power pack. Set of normally closed and normally opened auxiliary contacts for use with building automation and security systems.

- Input: 24 Vdc
- Output: +24 Vdc
- Adjustable Sensitivity
- Low Profile Housing
- Adjustable Light Level Sensor
- UL and cUL Listed
- CEC Title 24 Certified
- FCC Part 15, Class B
- ASHRAE/IES 90.1

**Table 5.36: Ceiling Mount Occupancy Sensors**

Catalog No.	Catalog Description	\$ Price
SLSCPS1000	PIR occupancy sensor	134.00
SLSCUS2000	Ultrasonic occupancy sensor	197.00
SLSCDS2000	Dual Technology occupancy sensor	231.00
SLSCUS800	180 Degree Ultrasonic sensor	129.54
SLSCDS800	180 Degree Dual Technology Sensor (PIR and Ultrasonic Sensors combined)	141.76

**Power Pack**

For use with wall and ceiling mount sensors to supply power to sensor and switch the load when the sensor detects occupancy. May supply power to multiple sensors and auxiliary relays up to 100 mA nominal load.

- Input: 120/277 Vac 50/60 Hz
- Output: 24 Vdc/100 mA Nom.
- Relay rating: 20 A Max. Ballast Load at 120 Vac (20 A Max. at 277 V)
- UL cUL Listed

In Canada:

- Input: 347 Vac60 Hz
- Output: 24 Vdc/150 mA Nominal
- Relay rating: 15 A Max. Ballast Load at 347 Vac (15 A Max. at 5200 watts)
- UL cUL Listed

**Auxiliary Relay**

For use with wall and ceiling mount sensors to turn lights on when an area is occupied or off when it is not. Requires power pack to supply input power to operate relay.

- Input: 24 Vdc/36 mA Nom.
- Relay rating: 20 A Max. Ballast Load at 120 Vac (20 A Max. at 277 V)
- UL cUL Listed

In Canada:

- Input: 24 Vdc/2 mA Nominal
- Relay rating: 15 A Max. Ballast Load at 347 Vac

Indoor Occupancy Sensor

**Fixture Mounted Sensors and Controls**

Schneider Electric extends its occupancy-sensing capability with a range of line voltage sensors based on passive infrared (PIR) technology. These sensors feature rugged housings that resist moisture and dust typical of manufacturing and shipping dock areas. Sensors incorporate universal power supply, relay and PIR element in a single housing ready for direct attachment to popular high-bay and low-bay luminaires.

Sensors are available either as stand alone sensor-per-fixture devices or equipped with connectors for low-cost plastic optical fiber cable. Plastic optical fiber connectivity between sensors allows implementation of control zones within aisles and work areas without back-pulling signaling wire in conduit. Each sensor acts as a network repeater, allowing 200 foot spacing between sensors. Plastic fiber can be cut and terminated without special tools or installer training.

- All sensors feature oversized Fresnel lenses and premium, low-noise pyroelectric elements for reliable PIR sensing at mounting heights up to 45 feet.
- Both area- and aisle-sensing Fresnel lenses ship with each sensor. Color-coded snap-out lenses can be swapped in the field.
- Switch packs open and close based on fiber optic commands from fiber sensors
- Universal power supply design adapts to 120–480 Vac, 50/60 Hz without jumpers or taps.
- Single-pole/close-on-motion relays sized for switching dry contact, magnetic HID or electronic ballast loads.
- Mounts directly to reflector with included pinch bracket or to ballast housing with " NPT threaded pipe nipple.
- Built-in manual override test switch and diagnostic LED to assist in installation. Diagnostic LED can be seen at distance to assist in walk test.
- Fifteen minute power ON warm-up timer assures rated lamp life even if the fiber network is broken.
- User adjustable sensitivity and delay time settings (0–15 minutes)

Fluorescent High Bay Sensor

**Fluorescent High Bay Sensors**

The SLSFPS1347 and SLSFPS1480 Occupancy Sensors are Class 1, fixture mounted, 360° high bay occupancy sensors. They are designed to operate directly with T5 and T8 fluorescent fixtures that use single or multiple electronic ballasts. Motion is detected using passive infrared technology (PIR). The operation voltage range for the SLSFPS1347 Sensor is 120–347 V. The SLSFPS1480 Sensor operates at 480 V.

**Features**

- Includes a user-adjustable time dial to set the length of time the luminaires stay on from 15 seconds to 30 minutes.
- Includes a user-adjustable range dial to customize PIR sensitivity.
- Includes a user-adjustable time dial to set the length of time the luminaires stay on from 15 seconds to 30 minutes.
- Includes a user-adjustable range dial to customize PIR sensitivity.
- 90 degree rotating lens for a variety of aisle-way applications.
- High bay area, low bay area, and high bay aisle lenses provided.
- 18 minutes time-out preset for maximum energy to lamp life savings.

UL 924 Emergency Control Device

**UL 924 Emergency Control Devices**

Schneider Electric UL 924 Emergency Lighting Control Devices provide the ability to use and control standard fixtures for emergency and standard lighting. The use of UL 924 emergency lighting control device, under normal operating power the devices turn on and off emergency lighting along with standard lighting in an area. In the event of normal power loss the UL 924 emergency lighting control devices detect the power loss, and will automatically transfer emergency power to the fixtures. This provides emergency lighting through standard fixtures. Schneider Electric provides a wide selection of UL 924 emergency lighting control devices that work with occupancy and dimming based lighting control.

**Features**

- Saves energy by controlling Emergency Lighting
- Multiple mounting methods
- Convenient test switch
- Works with occupancy or dimmer controls
- Visible Power LED
- Easy to install

Powerlink available in column width design

Up to eight panels can be controlled from a single controller.

Powerlink G3 systems are ideally suited for controlling lighting and other loads in commercial, institutional, and industrial facilities. Such systems are typically used to lower utility cost by switching branch circuits OFF during non-occupied periods when lighting is unnecessary or during peak demand periods when a partial reduction in load can save significant money.

These systems utilize remotely operated circuit breakers to switch branch circuits ON and OFF via a time schedule or by an externally generated signal (typically a low voltage wall switch, photocell, access system, fire alarm or building management system). All Powerlink components mount inside a standard lighting panelboard to provide a compact, space saving installation.

Powerlink G3 systems feature a powerful microprocessor based controller that provides system intelligence for 168 remotely operated branch circuits. Master panelboards contain the control electronics, power supply, and control bus strips for up to 42 branch circuit breakers. Slave panels extend the capability of the system by allowing remotely operated branch circuit breakers to be operated from the master controller via a simple, 4-wire, sub-net connection.

All Powerlink G3 systems have the capability of being networked together and operated from a central workstation or via a remote modem connection. Powerlink software allows users to remotely configure the system, change time schedules, monitor circuit breaker or input status, and override zones and breakers.

**BACnet Capability**

The Building Automation and Control network (BACnet) communication protocol is incorporated into the Powerlink™ G3 controller design. The addition of the BACnet protocol allows Powerlink panels to be easily integrated into a Building Automation System (BAS) employing this open communication standard without the need for communication bridges or gateways.

**Controller Models**

The following Powerlink G3 controller models support 'native' BACnet communications:

- NF2000G3 — Ethernet communications, shared remote inputs, network time synchronization
- NF3000G3 — Email upon alarm, onboard web pages for status/control/configuration
- NF3000G3C — C-Bus communications (ability to interface with a Clipsal™ lighting control network)

**Factory Assembled System**

The following factory engineered pricing procedure may be used to price either 240 V or 480Y/277 V Powerlink G3 systems:

- Select system type and interior size from Table 5.43 on 5-24. All Powerlink G3 panels are furnished with either 1 or 2 control bus strips.
- Select panelboard base price from Table 5.44. All Powerlink G3 panels use NF type panelboard interiors, boxes, and trims and are suitable for either 240 V or 480Y/277 V systems.
- Select branch circuit breaker requirements from Table 5.45. Powerlink G3 panels can accommodate both ECB-G3 remotely operated circuit breakers and EDB, EGB and EJB standard branch circuit breakers.
- Refer to panelboard section for additional panelboard accessories.
- For complete price, order by description.
- Apply appropriate discount schedule.

**240 V Factory Assembled System Example:**

500 level system with 225 A MLO panelboard rated for 208Y/120 V, 3Ø4W, 10kAIR, Type 1, surface mount with ground bar and (12) 20 A 1-pole bolt-on remote operated circuit breakers.

**Device Power Supply**

The Powerlink Device Power Supply is used to distribute power on a C-Bus™ network. Placed at critical points on the network, device power supplies will provide the current necessary for operating a variety of passive C-Bus devices. A Powerlink Device Power Supply consists of an 8M enclosure containing one or two 4M Power Supplies (120 or 277 Vac).

- Surface-mount NEMA 1 enclosure, with cover
- Unit and C-Bus LEDs indicate the status of the line voltage and the network
- Sources up to 700 mA (dual power supplies) to the C-Bus network
- 120 V or 277 Vac models available
- Dimensions: 8.9 in. (226mm) wide x 3.8 in. (97mm) deep x 12.57 (319mm) tall

**Device Router**

The Powerlink Device Router allows the exchange of data between a Powerlink NF3000G3C controller and C-Bus devices. This device router receives data from C-Bus input devices such as keypads and touchscreens and sends data to the Powerlink system and isa versa. The device router consists of a C-Bus 8M enclosure containing a C-Bus PC Interface and a C-Bus Power Supply (120 Vac or 277 Vac). Communication between the device router and the NF3000G3C controller is made with the included 50-foot serial cable.

- Surface-mount NEMA 1 enclosure, with cover
- Unit, Unit/Comms, and C-Bus LEDs indicate the status of data transmission and power to the unit and the network
- System network clock for synchronizing communications data
- Network power source, supplying up to 350 mA
- 120 Vac or 277 Vac models available
- Dimensions: 8.9 in. (226mm) wide x 3.8 in. (97mm) deep x 12.57 in. (319mm) tall

- ◊ 800 A main lug panelboards require an 8.75" deep, 26" wide box.

To obtain pricing for the following Special Features please refer to the Supplemental Digest.

- PowerLogic™ metering
- Customer equipment space
- Increased box depth
- Box extensions top, bottom and side
- Drip hoods
- Non-standard paint
- NEMA 1 gasketed
- NEMA 4 Stainless steel enclosure
- NEMA 4X Fiberglass enclosure (NQOD and NF)
- Stainless steel trim front (NQOD, NF and I-LINE)
- Padlockable hasp
- Special locks (Corbin, Yale, Best)
- Equal height boxes
- Common trip to cover two equal height boxes
- Panelboard skirtheads conduits feeding a panelboard
- Panelboard wireway for terminating conduit in wireway endwall
- Panelboard interiors and special fronts to fit existing boxes

Powerlink Energy Management (EM) Lighting Control System

The Powerlink Energy Management (EM) Lighting Control System incorporates the same features found in the Powerlink G3 3000 level system, in addition to integral branch circuit and optional main metering for energy monitoring and verification of the lighting system. Integral metering is accomplished using the PowerLogic™ Branch Circuit Power Meter (BCPM), which is a highly accurate, full-featured multi-branch circuit power meter that provides unrivalled low-current monitoring.

The Powerlink G3 system reduces electrical energy consumption associated with lighting and other loads by automatically switching loads off during non-occupied periods. The Powerlink G3 system is often ideal for reducing peak demand by switching unnecessary lights off in response to an automated response signal or when high time-of-day energy tariffs occur.

**Features**

- Integral individual and optional mains metering to provide utmost flexibility in assuring a sustainable metering and verification program
- Monitors current, voltage, energy consumption, demand, and power factor for complete energy profiling
- Accumulated metering information transmitted via Modbus communications interface
- Data updates occurring within seconds to provide timely preventative maintenance information
- Optional EGX web interface for storing and reporting data via standard web browser (suggested for applications without Energy Management System [EMS] software)
- Alarm indication when parameters approach user-configured thresholds
- 16 hard-wired inputs available for connection to devices with physical dry-contacts
- 64 communication inputs available for network connection
- 16 independent time schedules, each can be configured into 24 distinct periods
- 7-day repeating clock with changeable automatic daylight savings time
- Automatic sunrise/sunset tracking with offsets
- 32 special event periods
- 32 remote sources for sharing input status, time schedules, or zone status between controllers
- Full custom logic capabilities, including full Boolean functions and synchronization services
- RS232 and RS485
- Serial communications using Modbus ASCII/RTU, BACnet MS/TP and DMX512 protocols (metering Modbus only)
- Ethernet 10BaseT communications using Modbus TCP and BACnet/IP protocols

Power	4% of reading from 0.25 A to 2 A; 3% of reading 2 A to 100 A▲ (models BCPMA and BCPM only)
Network Communications	
Serial	Modbus™ RTU
Ethernet	TCP/IP

▲ Recommended for application where EMS software monitoring is not provided.

Relay Panels Family

Schneider Electric LPS Lighting Control Relay Panels offer a practical design for meeting energy codes requirements in smaller commercial spaces. Panels are available pre-assembled with 8, 16, or 32 relays. They consist of relays, time scheduler, panel controller, power supply, and NEMA 1 cabinet and cover.

Schneider Electric LPS Lighting Control Relay Panels offer a practical design for meeting energy codes requirements in smaller commercial spaces. Panels are available pre-assembled with 8, 16, or 32 relays. They consist of relays, time scheduler, panel controller, power supply, and NEMA 1 cabinet and cover.

### LPS-Standalone Relay Panel

LPS reduces energy use by automatically shutting off lights in response to a scheduled time event from its built-in time controller or in response to an external control device, such as a keypad switch, occupancy sensor, or photocell. These panels are ideal for use in smaller commercial applications, such as small strip retail and office spaces, where a centralized building management system is not practical.

#### Features

- Stand-alone lighting control system meets ASHRAE90.1 and CA Title 24
- Individual heavy duty, mechanically latching, 20A relays
- Built-in time controller supports 8 independent zones
- Time retained during power outages for up to 30 days; nonvolatile program memory
- Two universal switch inputs
- Individual relay overrides can directly control each relay
- Easy to program interface
- 2-wire relay used for monitoring and control
- Manual operation lever with ON/OFF indicator built-in for easy maintenance
- Screw terminals on load and control sides
- UL 916 listed
- Full 365-day, 7-day repeating clock with event priorities
- Multi-group relay assignment
- Integral power supply (120 / 277 / 347 Vac)
- Standard sizes: (LPS) 8, 16, 32; (LPB/LPL) 8, 16, 32, 48, or 64

### LPB Additional Features

- Application controller with the BACnet protocol
- Heavy duty plug-in relays and electronic cards
- Movable protection plate between high and low voltage sections

### LPL Additional Features

- Application controller with the LonWorks protocol

#### Available options include:

- Multi-voltage separator (120/277/347 VAC)

**Software provides a graphic interface that is simple and intuitive, providing the following:**

- System configuration, programming, and operation: Scheduler and Data logger

### LPB-Bacnet Protocol

The Schneider Electric LPB Lighting Control Relay Panel with Native BACnet Protocol offers cost effective and code compliant lighting control. Panels are pre-packaged for ease of ordering and installation. Standard configurations are available with 8, 16, 32, 48, or 64 relays.

Relays come in a heavy duty, high intensity discharge (HID) version that carries up to 20A full load and are rated for over 120,000 mechanical operations. Heavy duty relays are recommended for high inrush loads or where higher short circuit current ratings are required.

LPBs are designed to operate on a BACnet network where control intelligence is provided through a BACnet building automation system. These panels are ideal for smaller commercial or retail spaces where a low cost way to achieve automatic shut-off is required. These simple to install and commission panels include full feature schedule control. Switch overrides and photocells are easily added for complete control.

### LPL-LonWorks Protocol

The Schneider Electric LPL Lighting Control Relay Panel with LonWorks® Protocol offers cost effective and code compliant lighting control. The LPL is pre-packaged for ease of ordering and installation. Standard configurations are available with 8, 16, 32, or 64 relays.

Whether from a stand-alone system, a soft-wired networked panels system, or a fully programmable network system, the LPL offers engineers and facilities managers all the flexibility they need to meet their lighting control requirements. LPL software scheduling and event programming capabilities easily support all common sequences encountered in lighting control.

The LPL was developed using open LonWorks technology from the Echelon® Corporation. By adopting LonTalk® communication protocols and incorporating Neuron® microprocessors, the LPL panel complies with LonMark(tm) Interoperability Guidelines and is ready to interoperate in highly functional, flexible, and open building systems.

The Schneider Electric Lighting Control Relay Switches provide manual ON/OFF operation of lighting in zones. The switches are equipped with a switch based device using reversible polarity pulse technology. The switches are fully compatible with Lighting Control Relay Panels by Schneider Electric.

www.schneider-electric.us

**Key Switch (SERPKWS)**

- Wall mountable to any standard wall box
- Key operated (ON—turn right; OFF—turn left)
- Operates up to 4 relays per switch
- 6 switches per relay
- 3 Amp, 24 Vdc, Reversible polarity Impulse

**Rocker Switch (SERPRWS)**

- Wall mountable to any standard wall box (1-gang requires mounting bracket (SERPWSMB))
- LED ON/OFF indication
- Operates up to 8 relays per switch
- 6 LED switches per relay
- Optional filler plate (SERPWSFP)
- 3 Amp, 24 Vdc, Reversible polarity Impulse

**Push Button Switch (SERPWS) (Individual switch)**

- Wall mountable to any standard wall box (1-gang requires mounting bracket SERPWSMB; 3-gang comes ready to mount)
- Switch input from common terminal
- LED ON/OFF indication
- Clear plastic labeling cap
- Operates up to 4 relays per switch
- 6 LED switches per relay
- Optional filler plate (SERPWSFP) may be required
- 1.5 Amp, 24 Vdc, Reversible polarity Impulse

**Push Button Switch (SERPWS) (Assembled switch)**

- Factory assembled
- Includes mounting bracket, switch(es), cover plate
- LED ON/OFF indication
- Clear plastic labeling cap
- Operates up to 4 relays per switch
- 6 LED switches per relay

**NOTE:** Refer to 1290HO1101 Relay Switches handout for cover plate dimension

Cassia System Components

The Cassia energy management system (EMS) from Schneider Electric is a revolutionary wireless in-room solution that can have a dramatic impact on all key aspects contributing to your bottom line, from delighting your guests and reducing your carbon footprint, to enjoying a rapid return on investment and helping to maximize energy savings.

**Thermostat**

The Cassia thermostat controls heating and cooling equipment in guest rooms. Each thermostat uses two independent ZigBee radios for the local Room Area Network (RAN) within the room and the Hotel Area Network (HAN).

**Motion Sensor (PIR)**

The Cassia wireless motion sensor uses a Passive Infrared (PIR) sensor to detect heat patterns in the room. Motion will be signaled to the thermostat if the heat pattern changes.

**Door Sensor**

The Cassia wireless door sensor consists of a base and magnet. It sends a signal to the RAN indicating when the door is opened or closed.

**Lighting Control**

The Cassia Lighting Control System, including switches (1000 W), dimmers (800 W), and plug modules (Leading Edge Dimmer and Relay types), uses ZigBee wireless technology that provides dimming and/or on/off functions.

Wall switches and dimmers are available in black, white, cream or light almond, with one and three button options.

**Plug Modules**

Leading Edge Dimmer and Relay Plug Modules are designed to work as part of a Cassia EMS network installation and can be controlled by other devices on a Cassia EMS network. The modules may be placed into any standard 120 V wall outlet.

Plug modules are available in white.

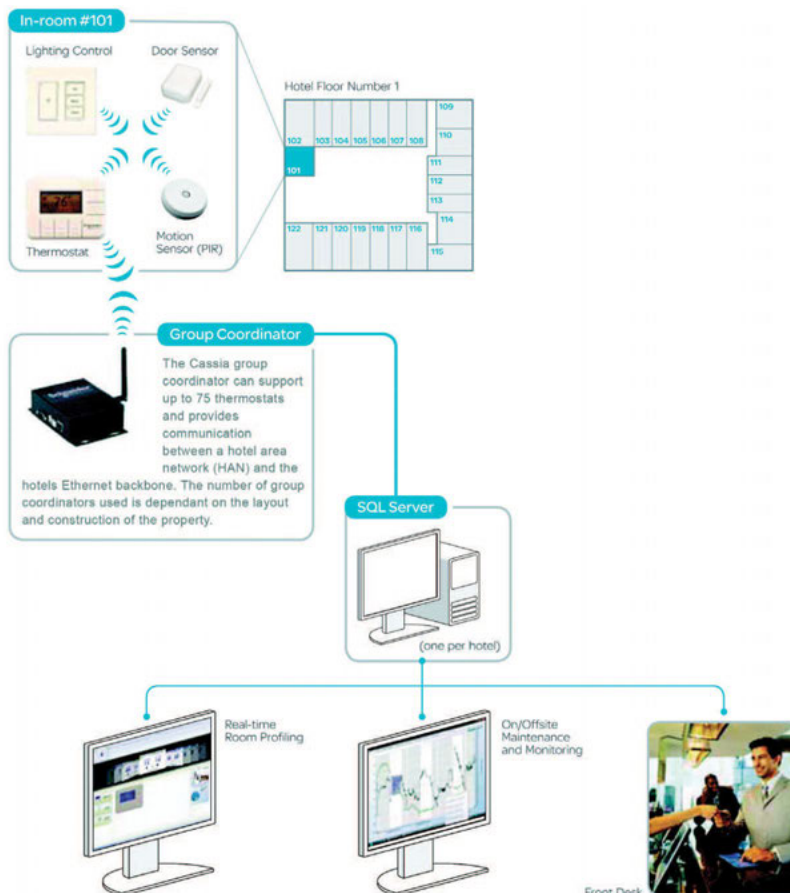

**Group Coordinator (GC)**

The Cassia EMS Group Coordinator is a Zigbee® wireless gateway that can support up to 75 thermostats and provides communication between a Room Area Network (RAN) Hotel Area Network (HAN) as well as a Property Management System (PMS).

**Server**

The EMS Server receives temperature, door events, motion events, and other data from the rooms. Data flows across the Ethernet network between the Thermostats, Group Coordinators and the EMS server.

**Contact your Schneider Electric representative for more information about the Cassia Energy Management System.**

**Externally Mounted Surge Protective Devices**

SurgeLogic™ offers a full range of externally mounted SPDs. These units are designed to provide surge suppression from service entrance panels to point-of-use equipment.

US and Canadian UL® Listed to UL 1449 3rd Edition and UL 1283 5th Edition. Complies with requirements of NEC® Article 285 and CSA 22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

- 10 year product warranty
- 10 modes of protection
- 200 kA SCCR
- EMI/RFI filtering
- Audible alarm with enable/disable switch, dry contacts, and surge counter standard
- Indicator LEDs; normal (green) and fault condition (red) for each phase
- UL 1449 Type 2 (or Type 1 with optional suffix in catalog number)

**External SPD Options:**

- **Sine Wave Tracking Module.** Sine Wave Tracking (SWT) circuitry provides enhanced EMI/RFI filtering of -54 dB at 100 kHz and establishes the power surge clamping window relative to the sine wave voltage to increase performance at distribution and branch panel applications.
- **Type 1.** UL 1449 Type 1 SPDs can be located at any point in the electrical system, on the line or load side of the equipment overcurrent device.
- **Integral Switch.** The integral switch provides a mechanical means to electrically isolate the entire surge suppressor before opening the enclosure door to facilitate servicing of the unit's components.
- **Remote Monitor.** This option displays the alarm status of the surge protective device up to 1000 feet from the unit.
- **Flush Mount Kits.** Flush mounting kits can be used on 120–240 kA EMA and EBA series devices. Devices with integral switch require a 20 inch flush mounting collar.

**External Modular Assembly (EMA) SPDs**

EMA SPD products feature a design based on individual phase modules for a flexible, cost effective way to achieve superior surge suppression at every level of the electrical distribution system. Modularity results in lower life cycle costs and fast, easy service or replacement.

**Internally Mounted Surge Protective Devices**

Internally mounted surge protective devices are installed integrally to systems for service entrance and branch panel surge suppression. Internally mounted SPDs installed next to supply busses provide maximum performance inside Square D™ systems. Built-in performance is the best way to ensure cost effective power quality (especially important for critical power facilities).

US and Canadian UL® Recognized as a Type 2 (or 1 with optional suffix in catalog number) SPD Component Assembly to UL 1449 3rd Edition and UL 1283 5th Edition. Complies with requirements of NEC® Article 285 and CSA C22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

**Internally Mounted—New Construction**

Factory installed integral/internal Surgelocic™ SPD products make adding surge suppression to new construction projects easy. Refer to the sections listed below to identify the correct product for your application or contact Surgelocic™ TAG at 1-800-577-7353 for assistance.

Panelboards  
Refer to Section 9

Switchboards and Switchgear  
Refer to Section 11

Motor Control Centers  
Refer to Section 17

Integrated Power and Control Centers  
Refer to Section 10

Busway—Refer to Section 12

**Internally Mounted—Retrofit**

To ensure high-performance surge suppression at critical power locations, a variety of Surgelocic™ products have been designed specifically for retrofitting into commonly used Square D™ systems. The QMB fusible switch, 6 in. MCC bucket, I-Line and Busway plug-on units come with the SPD factory-installed. Retrofitting SPD units into I-Line, QMB, MCC, and Busway applications is simple.

- Audible alarm with enable/disable switch, dry contacts, and surge counter standard.
- 200 kA SCCR
- Indicator LEDs
- EMI/RFI filtering

▲ Requires 13.5-inch mounting height. ★ PE4 Discount Schedule. □ 208Y/120 series also applies to the following voltage 220Y/127.  
 ■ Requires 9-inch mounting height. ▼ PE7 Discount Schedule. ◇ 480Y/277 series applies to the following voltages 380Y/220, 400Y/230, and 415Y/240.  
 ♦ Requires 6-inch mounting height. △ Can be used on 4-wire or 3-wire grounded neutral system.

( ) For a Type 1 SPD, add a "1" suffix to the catalog number. *New!*

OEM Kit

**OEM/Assembler Kits**

Surgelogic™ OEM/assembler kits allow manufacturers to add industry-leading surge suppression directly to customized equipment. Manufacturers benefit from shorter wire lengths that optimize the clamping voltage of the SPD. Products come with a backplane-mounted SPD, mounting hardware and diagnostic display with 36-inch cables. Audible alarm, silence switch, remote monitoring contacts, and surge counter are standard. Available as UL 1449 Type 2 (or 1 with optional suffix in catalog number).

US and Canadian UL® Recognized to UL 1449 3rd Edition and UL 1283 5th Edition. Complies with requirements of NEC® Article 285 and CSA 22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

- ◆ 208Y/120 series also applies to the following voltage 220Y/127.
- ★ 480Y/277 series applies to the following voltages 380Y/220, 400Y/230, and 415Y/240.

**Nipple-Mounted Surge Protective Devices**

SDSA3650

SDSA3650D

**SDSA3650 Surge Protective Devices**

SDSA3650 SPDs are designed and listed for indoor or outdoor installation and surge suppression for three-phase grounded electrical services up to 600 Vac, including delta services (SDSA3650D). The SDSA3650 series is used extensively in service entrance panels to provide an efficient and economical means of surge suppression.

US and Canadian UL® Listed as a Type 1 SPD to UL 1449 3rd Edition. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate.

- LEDs indicate operational status
- Short circuit current rating 200 kA
- Suitable for indoor and outdoor applications (NEMA Type 4X rated)
- Convenient back-nipple mounting

**Table 6.10: SDSA3650 Surge Protective Devices**

Description	Peak Surge Current Rating per Phase (kA)	Cat. No.	\$ Price

- ▼ Do not use on ungrounded systems. Systems must be solidly grounded.
- ▲ See Table 6.13 for QOSAMK mounting kit for installation in QO™ load centers.

HWA Series

**HWA Surge Protective Devices**

SurgeLogic™ HWA surge protective devices are compact, nipple-mounted parallel-connected surge suppressors that come in a variety of voltage configurations, including Delta. A surge suppression path is provided for each mode, and the product is rated NEMA Type 4X. Internal diagnostics continuously monitor the device status.

US and Canadian UL® Listed as a Type 2 SPD to UL 1449 3rd Edition and UL 1283 5th Edition. Complies with requirements of NEC® Article 285 and CSA C22.2 No. 8-M1986 as appropriate. Complies with UL 96A 12th Edition Master Label requirements for Lightning Protection Systems.

- LEDs indicate operational status
- Short circuit current rating 200 kA
- Suitable for indoor and outdoor applications (NEMA Type 4X rated)
- Convenient side-nipple mounting
- Compact design provides easy mounting inside or outside the equipment cabinets
- -54 dB EMI/RFI filtering
- Sine wave tracking
- Audible alarm indicates loss of suppression (does not contain alarm enable/disable switch)
- Dry contacts
- Optional flush-mount kit TVSHWAFMK

**SDSA1175 Surge Protective Devices**

SDSA1175 SPDs are designed and listed for indoor or outdoor installation and surge suppression for single-phase three-wire 120/240 Vac or two-wire 120 Vac 60 Hz electrical services. This product is ideal for panel builders as well as manufacturers and integrators of instrumentation cabinets for industrial, commercial, and residential applications for single-phase power systems. Two SDSA1175 surge protection devices can be installed to provide suppression for 208Y/120 Vac three-phase four-wire services.

US and Canadian UL® Listed as Type 1 SPD to UL 1449 3rd Edition. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate.

- LED indicates operational status
- Short circuit current rating 25 kA
- Suitable for indoor and outdoor applications (NEMA Type 4X rated)
- Convenient back-nipple mounting

Mounting bracket for QO™ and Homeline™ load centers and other enclosures	QOSAMK	11.40
Flush-mount kit for XR SPDs	TVSXRFBK	58.00
Flush-mount kit for HWA SPDs	TVSHWAFMK	180.00

QOSAMK

XR Series

### XR Surge Protective Devices

The XR SPD provides high-quality surge suppression in a compact and versatile package. This product is ideal for panel builders as well as manufacturers and integrators of instrumentation cabinets for industrial, commercial, and residential applications for single-phase power systems.

US and Canadian UL® Listed as Type 1 SPD to UL 1449 3rd Edition. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate.

- LEDs indicate operational status
- Short circuit current rating 25 kA
- Convenient side nipple mounting
- Suitable for indoor and outdoor applications (NEMA Type 4X rated)
- Optional flush mount kit TVSXRFMK

**Table 6.14: XR Nipple-Mounted Surge Protective Devices**

System Voltage	Peak Surge Current Rating per Phase (kA)	Cat. No.	\$ Price
120/240 V, 1-phase, 3-wire + ground	50	TVS120XR50S	315.00
	80	TVS120XR80S	515.00

### Residential Surge Protective Devices

6 SURGE PROTECTIVE DEVICES

SDSB1175C

SDSB1175R

### Whole House Surge Protective Devices

Whole House devices are designed to deliver surge suppression that addresses the entire home. AC modules are connected to the circuit breaker load center and provide suppression for all equipment connected to the power system. Whole House systems incorporate AC modules as well as modules for other metallic lines coming into the home including telephone/DSL and coaxial video/data.

US and Canadian UL® Listed as Type 2 SPD to UL 1449 3rd Edition. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate. Telephone and coaxial video modules US and Canadian UL® Recognized to UL 497A 4th Edition and UL 497B 4th Edition.

- 120/240 Vac, 80 kA/phase AC surge suppression
- LED status indicators for AC surge suppression
- Telephone surge suppression module supports four lines with tool-less Insulation Displacement Connectors (IDC)
- Coaxial surge suppression module supports one line of video/data

**Table 6.15: Whole House Surge Protective Devices**

Description	Included Modules	Cat. No.	\$ Price
Whole House NEMA 1 Basic	AC	SDSB1175CB	439.00
Whole House NEMA 1	AC, Telephone, Coax (1)	SDSB1175C	630.00
Whole House NEMA 3R Basic	AC	SDSB1175RB	546.00
Whole House NEMA 3R	AC, Telephone, Coax (1)	SDSB1175R	737.00
Home Electronics Protective Device	AC	HEPD80	185.00

### Whole House Accessories

Add additional surge suppression or replace existing modules in Whole House products.

**Coaxial and telephone modules:** US and Canadian UL® Recognized to UL 497A 4th Edition and UL 497B 4th Edition.

**AC Module:** US and Canadian UL® Listed as Type 1 SPD to UL 1449 3rd Edition. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate.

**Table 6.16: Accessories**

Description	Cat. No.	\$ Price
4-Line telephone surge suppressor with tool-less IDC terminations	SDSA4P	101.00
Coaxial video surge suppressor	SDSA2V	90.00

### QO™, NQ, and Homeline™ Load Center Surge Protective Devices

Square D™ load center surge protective devices are easy to install plug-in units that install as quickly as a standard circuit breaker. The surge suppressors use two pole spaces in a QO™ or Homeline™ load center, or NQ panelboard.

US and Canadian UL® Listed as Type 2 SPD to UL 1449 3rd Edition. Complies with requirements of NEC® Article 285, CSA 233.1-87, and CSA C22.2 No. 8-M1986 as appropriate.

- QO2175SB for QO™ load centers, combination devices, and NQ panelboards
- HOM2175SB for Homeline™ load centers and combination devices
- Plug-on design requires two pole spaces
- LED indicates operational status
- 22.5 kA per phase

Note: All circuit breakers on this chart are UL Listed and CSA Certified unless otherwise noted.

- ▲ Ungrounded UPS systems only. See page 7-35.
- Dual UL and IEC ratings and CE markings on circuit breakers. For additional IEC ratings, see the Supplemental Digest, Section 10.
- ♦ Factory-installed option only.
- ★ Requires circuit breaker with WB suffix.
- ▼ Requires factory-installed "G" Shunt trip. Available only for 3P.
- △ 65/50 kA Icu/Ics for 450 A–600 A ratings

QO™ miniature circuit breakers are plug-on products for use in QO load centers, NQOD panelboards, NQOD OEM interiors or Speed-D™ switchboard distribution panels. Bolt-on QOB circuit breakers are for use in NQOD panelboards or interiors. ▲ The QO exclusive Qwik-Open™ mechanism, with a trip reaction within 1/60th of a second, is standard on all 1P 15 A and 20 A QO circuit breakers.

**QOT Tandem**

Circuit limiting QOT tandem circuit breakers have a mounting cam as shown. Installation into a QO load center can only be made in those positions having a mounting pan rail slot. Meets Paragraph 408.15 of the NEC®. UL Listed as Class CTL

MINIATURE AND MOLDED CASE CIRCUIT BREAKERS

- ▲ See Digest Section 1 for load centers, and Section 9 for panelboards and interiors.
- 10–30 A circuit breakers are suitable for use with 60°C or 75°C conductors. 35–125 A circuit breakers are suitable for use with 75°C conductors.
- ♦ UL Listed 5 k AIR on corner grounded Delta systems.
- ★ UL Listed as HACR type for use with air conditioning, heating and refrigeration equipment having motor group combinations and marked for use with HACR type circuit breakers.
- ▼ UL Listed as SWD (switching duty) rated. Suitable for switching 120 Vac fluorescent lighting loads.
- △ Requires four spaces (1 AWG–300 kcmil Al/Cu.) Suitable for switching 120 Vac fluorescent lighting loads.
- UL Listed for use ahead of QO, QO-GFI, QO-EPD, QO-AFI, QOT, QOCAFI, and QO-PL 10 k AIR circuit breakers to permit their application at 22 kA fault level.
- ◇ 100 A maximum branch mounted opposite.
- ☆ Order only. Contact your local Field Office.
- ▼ Includes two circuit breakers (one QO2030 and one QO3020) and handle tie QOTHT.
- Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.

Two-wire QO-SWN

Three-wire QO-SWN

**QO-GFI**

Qwik-Gard™ circuit breakers provide overload and short circuit protection, combined with Class A ground fault protection. Class A denotes a ground fault circuit interrupter that will trip when a fault current to ground is 6 mA or more, for people protection. Do not connect to more than 250 feet of load conductor for the total one-way run to prevent nuisance tripping.

**Non-automatic (Standard) Miniature Switches**

Miniature non-automatic switches have the same physical packaging as miniature circuit breakers, but open only when the handle is switched to the OFF position.

Non-automatic switches provide no overcurrent protection or short circuit protection. They must not be used on systems that have an available fault current greater than the values listed in the table.

Non-automatic switches are UL Listed per UL 1087 and are CSA certified.

**Table 7.13: QO Non-Automatic Miniature Switches, 240 Vac 10 kA**

Mechanical Interlock Attachment	For interlocking the handles of two 2P or one 2P and one 1P QO and Q1 circuit breakers mounted side-by-side so that only one circuit breaker can be ON at a time (Not QOU)	QO2DTI	24.90	DE2E
With Retaining Kit:	QO2DTI mechanical interlock attachment with retaining kits for securing two adjacent back-fed circuit breakers in dual power supply applications. Can be used with (2) 2Ps or (1) 2P and (1) 1P QO circuit breakers in QO816L100 load centers.	QO2DTIM	63.00	DE2E

▲ Not suitable for use in 3Ø panels. Use only in 1Ø panel rated 150 A or greater.

**Factory-Installed Accessories for Use with QO and QOB Miniature Circuit Breakers**

Factory-installed electrical accessories take up an additional pole space on QO™, QO-GFI, QO-EPD, QO-SWN and QOU circuit breakers. All AC electrical accessories shown below are rated for 50/60 Hz. Accessories are not available for QOB-VH (2P 150 A and 3P 110–150 A) circuit breakers or QO, QOU molded case switches. QO circuit breakers will accept only one accessory per circuit breaker. Undervoltage trip is not available on miniature circuit breakers. Factory-installed accessories are not available for QO-AFI, QO-CAFI or QO-PCAFI Arc Fault Circuit Breakers or on QO2150, QO2175, or QO2200 circuit breakers.

Low Ampere QOU

**Low Ampere QOU Miniature Circuit Breakers**

QOU unit mount miniature circuit breakers (cable-in/cable-out) are ideal for OEM applications. They have the Square D™ circuit breaker's unique Visi-Trip™ feature and can be DIN rail-mounted or surface- or flush-mounted using mounting feet.

**General Specifications Common to All Low Ampere QOU Circuit Breakers**

- For convenient flush mount, surface mount or DIN mount (symmetrical rail 35 x 7.5 DIN/EN 50 022)
- Single handle with internal common trip
- Terminal lug wire size (1) 14–2 AWG Cu or Al
- Reversible line and load lugs
- Field-installable quick connectors
- UL Listed 48 Vdc (5 k AIR)
- UL Listed as HACR Type: 10–70 A
- High magnetic trip circuit breakers (QOU-HM) are recommended for applications where high initial inrush may occur and for individual dimmer applications.
- For DIN mounting rails, see IEC Starters and Relays, Section 18.

High Ampere QOU

**High Ampere QOU Circuit Breakers**

**General Specifications Common to All High Ampere QOU Circuit Breakers**

- Flush mount, surface mount, and DIN rail mount.
- Internal common trip.
- Non-reversible line and load lugs.
- Terminal lug wire size (1) 12–2/0 AWG Cu or Al.
- UL Listed 60 Vdc per pole (5 k AIR). (Note: except switches)
- UL Listed as HACR type, 80–125 A.
- Non-automatic switches have the same physical packaging as miniature circuit breakers, but provide no overcurrent or short circuit protection. They are UL Listed per UL1087 and are CSA certified.

**For QOUQ Low Ampere Circuit Breakers with Four-Point Quick-Connect Terminals**

QOUQ low ampere circuit breakers with four-point quick-connect terminals are provided with permanent factory-installed terminals which are affixed to the Load or OFF end of the circuit breaker. This special terminal will accommodate up to four 1/4-inch insulated female quick connect wire terminations. Total ampacity of these connections must not exceed the rating of the circuit breaker.

**Table 7.26: QOUQ Four-Point Quick-Connect Terminals**

	Poles	Order Qty.	Cat. No.	Unit \$ Price Adder
Four-Point Quick-Connect Terminals	1	1	Change QOU to QOUQ	8.90
	2	1		17.70
	3	1		26.40

**Multi 9 C60 UL 489 Listed 240 V Miniature Circuit Breakers**

- UL 489 Listed and CSA 22.2 No. 5.1 for branch circuit protection
- Eliminates concerns and uncertainty of using a UL 1077 device where a UL 489 device is required
- Replaces fuses in low-ampere range; 17 ratings up to 35 A

- 10 k AIR (1P @ 120 Vac; 2P and 3P @ 240 Vac)
- 60 Vdc for 1P and 125 Vdc for 2P (on C-curve circuit breakers only, see table below)
- Increased installation flexibility with standard box lugs or optional ring terminals
- Allows easy front-mounting and rear wiring when using ring terminals
- A wide range of electrical and mechanical accessories
- Suitable for reverse feeding
- Trip-free mechanism
- Positive indication of contact disconnect

Trip Curve	Use	Magnetic Release
C	For typical loads	7–10 x ampere rating (7–14 for DC)
D	For high inrush	10–14 x ampere rating

7 MINIATURE AND MOLDED CASE CIRCUIT BREAKERS

**Multi 9 C60 UL 489 Listed 480V Miniature Circuit Breakers**

- UL 489 Listed, CSA C22.2 No. 5.1; Also IEC 60947-2; CE marked
- 480Y/277 Vac @ 10 kA (2P and 3P), 277 Vac @ 10 kA (1P)
- 0.5 A through 20 A
- 1P, 2P, 3P, 18 mm wide per pole

Trip Curve	Use	Magnetic Release
C	For typical loads	7–10 x ampere rating (7–14 for DC)
D	For high inrush	10–14 x ampere rating

- UL 486B Listed single-barrel lug: (2) 18–10 AWG (1-25 mm<sup>2</sup>) cables, Cu only
- Optional ring tongue terminals
- A wide range of electrical and mechanical accessories
- Suitable for reverse feeding
- Trip-free mechanism
- Positive indication of contact disconnect

2P C60H-DC

**Multi 9 C60H-DC UL 1077 Recognized Supplementary Protectors (250 and 500 Vdc)**

The C60H-DC supplementary protectors are used in direct current circuits (industrial control and automation, transport, renewable energy, etc.). They provide overcurrent protection within appliances or electrical equipment.

- Range from 0.5–40 A
- 5 k AIR at 250 Vdc (1-pole) and 5 k AIR at 500 Vdc (2-pole, wired in series)
- Trip-free mechanism
- Positive indication of contact disconnect
- C-Curve: 7 to 14 times ampere rating
- UL 1077, IEC 60947-2, EN 60947-2, GB 14048.2, CCC and CE mark

**Multi 9 UL1053 Listed GFP Ground Fault Protectors**

- Provides ground fault protection for electrical circuits.
- Available in 2P (2-wire) and 4P (3- or 4-wire) versions
- Provides no thermal or magnetic protection. The circuit must be protected by an upstream device.
- Contains Si Technology to increase immunity to noise and to minimize the potential for nuisance tripping in noisy electrical environments.
- Tripped condition due to a ground fault is displayed on the front face by a red mechanical indicator.
- DIN rail mounting for easy installation.

7 MINIATURE AND MOLDED CASE CIRCUIT BREAKERS

## Multi 9™ Miniature Circuit Breakers

## UL 1077 C60 Supplementary Protectors

Class 860 / Refer to Catalog 0860CT0201

Intended for use within equipment where branch circuit protection is already provided or not needed

- Range from 0.5 to 63 A
- 10 k AIR @ 120/240 Vac; 5 k AIR at 480Y/277; 10 k AIR @ 60 Vdc (1P) and 125 Vdc (2P)
- Suitable for reverse feeding
- DIN mounting for easy installation
- Suitable for reverse feeding

- A wide range of electrical and mechanical accessories
- Trip-free mechanism
- Positive indication of contact disconnect

Trip Curve	Use	Magnetic Release
B	For sensitive equipment	3.2–4.8 x ampere rating
C	For typical loads	7–10 x ampere rating (7–14 for DC)
D	For high inrush	10–14 x ampere rating

Comb Bus Bar

**The PowerPact Advantage**

- **Proven Performance:** Industry-leading circuit breaker innovation and protection for heavy-duty commercial and industrial applications.
- **Smart:** Integrated metering options provide a cost-effective solution to reduce energy consumption, optimize energy costs, and improve energy availability for your facilities.
- **Flexible:** Full range of thermal-magnetic and electronic trip molded case circuit breakers from 15 A to 3000 A, delivering the ratings, configurations, and operators for your unique applications.
- **Simple:** Common catalog numbers, standardized ratings, and a full range of field-installable accessories make product selection, installation and maintenance easier than ever.
- **Common Design Features:** Mounting holes, door trim, and handle accessories

**Table 7.35: PowerPact Interrupting Ratings**

Voltage	Interrupting Rating						
	B	D	G	J	K	L	R
240 Vac	10 kA	25 kA	65 kA	100 kA	65 kA	125 kA	200 kA
480 Vac		18 kA	35 kA	65 kA	65 kA ▲	100 kA	200 kA
600 Vac		14 kA	18 kA	25 kA	65 kA ▲	50 kA ■	100 kA

▲ P-frame K interrupting is 50 kA at 480 and 600 Vac.  
■ P-frame L interrupting is 25 kA at 600 Vac.

**Table 7.36: Common Catalog Numbering System**

◆ For amperage of M-, P- or R-frame circuit breakers, add a zero to the three amperage digits; for example, 120 = 1200 A.

- ▲ See Supplemental Digest pages 3-2 and 3-3 for circuit breakers with field interchangeable trip units.
- To complete catalog number, replace the blank with the appropriate rating (D, G, J, L).
- ◆ For 100% rated circuit breakers add a "C" in the 9th character place (for example, HDL26015C or JDL26150C). 100% rated H- and J-frame circuit breakers have copper lugs and can only be used with copper wire.
- ★ Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.

- ▲ Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.
- See Supplemental Digest page 3-2 for circuit breakers with field-interchangeable trip units
- ◆ For 100% rated circuit breakers, add a "C" in the 9th character place (for example, HGL36150CU31X, JGL36250CU43X)
- ★ 100% rated H- and J-frame circuit breakers have copper lugs and can only be used with copper wire.
- ▲ AL150HD wire range is 14–3/0 AWG Al or Cu.
- ▼ AL250JD wire range is 3/0 AWG–350 kcmil Al or Cu. For smaller wire range (4–4/0 AWG Al or Cu), replace the lug's wire binding screws with the larger binding screws provided.
- △ 3P circuit breakers with this trip unit can be used for 2P applications.
- For applications requiring communications see page 7-49.

- ▲ Replacement lugs and electrical accessories are not available for PowerPact Q-frame circuit breakers.
- 250 A requires the use of copper cables only.

**Table 7.45: Q-Frame Termination Options**

Termination Letter	
A = I-Line (See Section 9)	For factory-installed termination, place termination letter in the third block of the circuit breaker catalog number. <b>Q<sub>1</sub>G<sub>1</sub>L<sub>1</sub>3<sub>2</sub>2<sub>0</sub>0<sub>0</sub></b> L-Termination Letter
E = Bolt-on I-Line (See Section 9)	
F = No lugs	
L = Lugs both ends	
M = Lugs ON end, studs on OFF end	
P = Lugs OFF end, studs on ON end	

- ▼ Add TS suffix for studs on both ends without nuts and washers. See Catalog 0734CT0201 for additional information.

- Δ See Supplemental Digest page 3-4 for circuit breakers with field-interchangeable trip units
- For 100% rated circuit breakers (250 A and 400 A only), add a "C" in the 9th character place (for example, LGL36400CU31X)
- ◇ Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.
- ★ 3P circuit breakers with this trip unit can be used for 2P applications.
- ▽ AL400L61K3 terminal wire ranges are (1) 2 AWG–600 kcmil Cu or (1) 2 AWG–500 kcmil Al.
- ◇ AL600LS52K3 terminal wire range is (2) 2/0 AWG–500 kcmil Al/Cu.
- \* For applications requiring communications see page 7-49.

L-Frame Circuit Breaker

**Table 7.48: Termination Options**

Termination Letter	Termination Option
A	I-Line (See Section 9)
F	No lugs
L	Lugs both ends
M	Lugs ON end, terminal nut kit OFF end
P	Lugs OFF end, terminal nut kit ON end
N◇	Plug In
D◇	Drawout
S◇	Rear Connected

For factory-installed termination, place termination letter in the third block of the circuit breaker catalog number.

**LGL36600U44X**  
L Termination Letter

- ◇ For N and D pricing, add termination pricing on page 7-45 to price. For S pricing, add termination pricing on page 7-41 to price.

- ▲ For 2P and 4P information see Catalog 0612CT0101.
- To complete the catalog number, replace the ( ) with the appropriate interrupting rating (G, J, K or L).
- ◆ For 100% rated circuit breakers add a "C" in the 9<sup>th</sup> character place. For example, the catalog number for a 100% trip unit with LI trip functions at 250A would be PGL36025C U31A.
- ★ For all L interrupting rating, change the 5<sup>th</sup> character (voltage rating) from a 6 (600V) to a 4 (480V); for example, PLL34025U31A. The 480V AIR is standard 100 kA.

**Table 7.54: P-Frame Termination Options**

Termination Letter	Description
F	No Lugs (Includes terminal nut kit on both ends)
L	Lugs both ends
M	Lugs ON end, terminal nut kit OFF end
P	Lugs OFF end, terminal nut kit ON end
D	Drawout▲
A	I-Line (See Section 9)

For factory-installed termination, place termination letter in the third block of the circuit breaker catalog number.

**PGL36040U41A**  
Termination Letter

▲ For D pricing add termination pricing on page 7-45.

Note: R-frame circuit breakers can be bus- or cable-connected. For cable connections, optional terminal pad kit RLTB or equivalent bus structure is required. Each RLTB kit contains terminal pads for one end of the circuit breaker only and has provisions for mounting a maximum of 8 lugs per phase (9 lugs for 3000 A). RLTB kits are included with 2500 A 100% rated circuit breakers. The RL3TB kits are included with the 3000 A, 80% and 100% rated circuit breakers. For other circuit breakers, order terminal pad kit (RLTB) and optional lugs separately. See pages 7-42-7-44.

- ▲ For 2P and 4P information see Catalog 0612CT0101.
- To complete the catalog number, replace the blank ( ) with the appropriate interrupting rating (G, J, K or L).
- ◆ Listed catalog numbers are for 80% rated circuit breakers. For 100% rated circuit breakers add a "C" in the 9<sup>th</sup> character place. For example, the catalog number for a 100% standard trip unit with LI trip functions at 2500A would be RGF36250CU31A.
- ★ See page 7-27 for interrupting ratings table.

PowerPact H- and J-frame electronic Motor Circuit Protectors (MCP) are magnetic-only instantaneous-trip circuit breakers. They are designed to offer short circuit protection and are National Electrical Code (NEC) compliant when installed as part of a combination controller having motor overload protection. MCP circuit breakers accept the same accessories and terminals as the equivalent thermal-magnetic circuit breakers.

Determine the hp rating from the nameplate of the motor. Select a MCP with an ampere rating recommended for the hp and voltage involved. When using the automatic settings the MCP microprocessor automatically adjusts the trip settings for both current and time to align with the start-up characteristic for the motor type, whether it is a standard or energy-efficient motor. This includes a dampening means to accommodate a transient motor in-rush current without nuisance tripping of the circuit breaker.

**Table 7.57: H- and J-Frame Electronic Motor Circuit Protectors (MCP)**

Frame	Sensor Rating	Full Load Amperes Range	Adjustable Instantaneous Trip Range	Suffix	Interrupting Rating			
					J (See SCCR Table Below)		L (See SCCR Table Below)	
					Cat. No.	\$ Price	Cat. No.	\$ Price
H-Frame	30 A	1.5–25 A	9–325 A	M71	HJL36030M71	1089.00	HLL36030M71	1223.00
	50 A	14–42 A	84–546 A	M72	HJL36050M72	1385.00	HLL36050M72	1553.00
	100 A	30–80 A	180–1040 A	M73	HJL36100M73	1646.00	HLL36100M73	1827.00

J-Frame	250 A	114–217 A	684–2500 A	M75	JJL36250M75	2393.00	JLL36250M75	2673.00

**Table 7.58: Maximum Rating or Setting of Motor Protective Devices▲**

Type of Motor	Percentage of Full-load Current		
	Setting	Not to Exceed■	
A, B, C, D	Standard	800%	1300%
B, E	Energy Efficient	1100%	1700%

- ▲ Based on 2005 NEC Table 430.52.
- See NEC Exception No. 1 to Table 430.52. The NEC 1300% maximum setting may be inadequate for instantaneous trip circuit breakers to withstand current surges typical of the magnetization current of autotransformer type reduced voltage starters, or open transition wye-delta starters during transfer from “start” to “run,” constant hp multi-speed motors, and motors labeled “high efficiency.”

**Table 7.59: MCP Selection by HP Ratings♦ of Induction-type Squirrel-Cage and Wound-rotor Motors★**

	30 60 Hz Voltages▼				Full-Load Amperes	Suffix
	200 Vac	230 Vac	460 Vac	575 Vac		
5–5	5–7.5	.75–15	1–20	1.5–25	M71	
5–10	5–15	10–30	15–40	14–42	M72	
10–25	15–30	25–60	30–75	30–80	M73	
20–40	25–50	50–100	60–125	58–130	M74	
40–60	50–75	100–150	125–200	114–217	M75	

- ♦ Based on 2005 NEC Table 430.250.
- ★ Per NEC 430.3, part-winding motors should select two circuit breakers, each at not more than one-half the allowable trip setting for the horsepower rating. The two circuit breakers should operate simultaneously as a disconnecting means per NEC 430.103.
- ▼ Listed voltages are rated motor voltages. Corresponding system voltages are 200 Vac, 220–240 Vac, 440–480 Vac and 550–600 Vac. Select wire and circuit breakers based on horsepower rather than nameplate full-load current per NEC 430.6 (A) for general motor applications.

**Short Circuit Current Rating (SCCR)**

Tested to meet NEC and UL508A requirements for short circuit current ratings as part of an approved combination controller.

**Table 7.60: Short Circuit Current Ratings (SCCR)**

Contactor/Starter	Interrupting Rating					
	J			L		
	200–240 Vac	480 Vac	600 Vac	200–240 Vac	480 Vac	600 Vac

Shaded area is not covered by J-frame electronic motor circuit protector.

**Motor Circuit Protectors**

Mag-Gard™ Motor Circuit Protectors (MCP) are instantaneous-trip magnetic-only circuit breakers. They have a single adjustment which simultaneously sets the magnetic trip level of each individual pole. Mag-Gard™ circuit breakers comply with NEC requirements for providing motor circuit protection when installed as part of a UL Listed combination controller having motor overload protection. Interrupting ratings are established for these UL Recognized Components only when they are used in combination with motor starters with properly sized overload relays and contactors.

All Mag-Gard circuit breakers will accept the same lugs and accessories as equivalent circuit breakers. Mag-Gard circuit breakers are available with I-Line construction. ☆ High-interruption (H) construction Mag-Gard circuit breakers (LHL) are also available.

Motor Circuit Protector

Motor Protector Circuit Breaker

**Table 7.62: Magnetic Only 3 Pole, 600 Vac, 50/60 Hz☆—Three Device Solutions□**

Ampere Rating	Trip Unit	Adjustable $\Delta$ Trip Range (A)	250 Vdc Multiplier	Cat. No.	\$ Price

△ UL magnetic trip tolerances are -20%/+30% from the nominal values shown.  
□ Three-device solutions are the traditional solutions: motor circuit protector plus motor starter plus overload relay.  
◇ 250 Vdc ratings are available. No UL component recognition  
☆ These electronic magnetic only motor circuit protectors are available with I-Line constructions. Consult the factory.

**Motor Protector Circuit Breakers**

Motor protection circuit breakers provide built-in thermal and magnetic protection. They are used in two-device motor feeder solutions to provide protection against short-circuits, overloads, and phase unbalance.

To select combination starters and motor controllers using MCP's meeting NEC Article 430, refer to pages 16-35—16-37.

7 MINIATURE AND MOLDED CASE CIRCUIT BREAKERS

Adjustable instantaneous-trip circuit breakers are intended for use in combination with motor starters with overload relays for the protection of motor circuits from short circuits. Other specific applications include rectifiers and resistance welders. These circuit breakers contain a magnetic trip element in each pole with the trip point adjustable from the front. Interrupting ratings are determined by testing the instantaneous-trip circuit breakers in combination with a contactor and overload relay.

Select instantaneous-trip circuit breakers as follows:

This selection table is suitable for motors, other than NEMA Design E, with locked-rotor indicating code letters per NEC® Table 430.7 (b) as follows:

**Table 7.65: Locked-Rotor Indicating Codes**

Horsepower	Motor Code letter
1/2 or less	A-L
3/4 to 1-1/2	A-K
2 to 3	A-J
5 to 25	A-H
30 to 125	A-G
150 or more	A-F

- For other motors order a special thermal-magnetic circuit breaker with magnetic trip settings for the specific motor—specify motor horsepower, voltage, frequency, full-load current and code letter or locked rotor current.
- Determine motor hp rating from the motor nameplate.
- Refer to the tables and select an instantaneous-trip circuit breaker with an ampere rating recommended for the hp and voltage involved.
- Select an adjustable trip setting of at least 800%, not to exceed 1300%, of the motor full-load amperes (FLA) for other than Design E motors. For Design E motors, select an adjustable trip setting of at least 1100% not to exceed 1700% of FLA.
- The NEC 1300% maximum setting may be inadequate for instantaneous-trip circuit breakers to withstand current surges typical of the magnetization current of autotransformer type reduced voltage starters, or open transition wye-delta starters during transfer from “start” to “run,” constant hp multi-speed motors, and motors labeled “high efficiency.” Select thermal-magnetic circuit breakers from page 7-33 for those applications.
- Part-winding motors, per NEC 430.3, should have two circuit breakers selected from the above at not more than one half the allowable trip setting for the horsepower rating. The two circuit breakers should operate simultaneously as a disconnecting means per NEC 430.103.
- Based on NEC 430.52 and NEC Table 430.150. See page 7-31 for available Adjustable Instantaneous-Trip Circuit Breakers.

			312	LAL3640036M	600%	1300%	

- ▲ Motor full-load currents are taken from NEC Table 430.150. Select wire and circuit breakers on basis of horsepower rather than nameplate full-load current per NEC 430.6 (A) for general motor applications. Do not use these values to select overload relay thermal units. See Digest pages 14-129–14-152 for selection of thermal units when actual full load current is not known. The voltages listed are rated motor voltages. Corresponding nominal system voltages are 200–208, 220–240, 440–480 and 550–600 V.
- To complete catalog number, replace the blank with the appropriate rating (G, J, or L). M38X is for standard trip units. For advanced trip units (LCD display, metering and communication, replace with M58X).
- ♦ Only MIN and MAX settings are shown, intermediate settings are available on all circuit breakers.
- ★ See NEC 430.52(A) for circuit breaker settings above 800%.
- ▼ If due to motor starting characteristics, trip settings at the 1300% maximum permitted level are needed, the next size Mag-Gard circuit breaker should be chosen.

▲ 8 XHHW requires 3/4 in. conduit for 3W.

■ 200 V motors are commonly used on 208 V services.

◆ Ordinary service for normal starting duty only, acceleration time of 10 sec. or less.

★ Heavy service is jogging or plugging duty or cycling load with over 25 starts per hour or over 5 starts per minute. Energy efficient motors are polyphase motors defined in NEMA Standard MG1 and exhibit high starting current.

▽ NEC 430.22 for Single Motor, Smaller conductors may be permitted for light duty-cycle service per 430.22 (B) Exception No. 1. DC motors operating from rectified 1Ø power supply will require larger conductors per 430.22 (A) Exception No. 1. For motor-generator arc welders, see 630.11.

Δ Motor full load currents thru 200 hp are taken from NEC Tables 430.147, 148 and 150. Above 200 hp from UL 98. Select wire size, circuit breakers, or fuses on basis of hp rather than nameplate full load current per NEC 430.6. Do not use these values to select overload relay thermal units. See Digest pages 16-129—16-152 for selection of thermal units when actual full load current is not known. Voltages listed are rated motor voltages. Corresponding nominal system voltages are 110–120 V, 200–208 V, 220–240 V, 440–480 V and 550–600 V.

□ Switch size only is shown in table. Selected fuses should not exceed maximum percent of full-load current as given in NEC Table 430.52. Above 50 hp dc switches are not hp rated by UL as Motor Circuit Switches, but as General Use Switches only and are not necessarily capable of interrupting the max. operating overload current of a motor. See NEC 100 for definition of General Use Switch. When protecting a 3Ø, Design E energy efficient motor, the switch is required by NEC 430.109 to have a hp rating of not less than 1.4 times that of a motor rated 3–100 hp, or not less than 1.3 times that of a motor rated over 100 hp. Switches shown in this table do not necessarily comply with that requirement.

◊ Thermal-magnetic circuit breaker ampere ratings recommended are approximate for average conditions, based on trip characteristics of Square D circuit breakers and NEC Table 430.52. Under some conditions, the next size larger switch or circuit breaker rating may be necessary to accommodate the motor starting current and is permitted by NEC 430.52(C)(1) Exception 2. High starting currents are anticipated with Design E and other energy efficient motors. For explanation of Code letter markings, see NEC 430.7(B). For Busway Plug-in units, see page 9-7.

★ Thermal-magnetic breaker ampere ratings recommended are approximate for average conditions and based on trip characteristics of Square D circuit breakers and NEC Tables 430.7(B) and 430.52.

▽ Type LC, LI, LX, LXI, and LE circuit breakers are NOT recommended for use on single motor branch circuits.

**Contact your local Field Office for circuit breaker selection on constant horsepower multi-speed motors.**

7 MINIATURE AND MOLDED CASE CIRCUIT BREAKERS

Automatic molded case switches open instantaneously at a factory preset magnetic trip point, calibrated to protect only the molded case switch itself, when it is subjected to high fault currents. The trip point is nonadjustable and provides no overload or low level fault protection.

Molded case switches open when the handle is switched to the OFF position or in response to an auxiliary tripping device such as a shunt trip.

All molded case switches will accept the same lugs and accessories as equivalent thermal-magnetic circuit breakers, with the exception of Q-frame switches which do not have electrical accessories available.

Automatic molded case switches are UL Listed per UL 489 and are CSA Certified.

The UL Listed thermal-magnetic molded case circuit breakers shown below are specifically designed for use on ungrounded dc systems having a maximum short-circuit voltage of 500 Vdc or a maximum floating (unloaded) voltage of 600 Vdc. The circuit breakers are suitable for use only with UPS (uninterruptable power supplies) and ungrounded systems.

This two-level voltage rating allows these circuit breakers to be applied to battery sources having a short-circuit availability of 20,000 amperes for LH, and MH circuit breakers and 25,000 amperes for PAF circuit breakers at 500 Vdc.

LH and MH circuit breakers are provided with an adjustable magnetic trip that is readily accessible by means of a single adjustment on the face of the circuit breaker. PAF circuit breakers have a fixed magnetic trip range.

These circuit breakers are UL Listed for the interrupting ratings shown only if applied with three poles connected in series (series connection is external to circuit breaker). See diagram below.

**NOTE:** Due to external series connection, I-Line™ circuit breakers are not available for this application.

Source = 600 Vdc max. (floating)  
500 Vdc max. (loaded)

208 Y/120 V 3 Phase Panel

Designed for selectively coordinated systems, mission critical circuit breakers maximize continuity of the electrical service by allowing the branch circuit breaker to clear the fault.

Mission critical circuit breakers are engineered with technology that optimizes current, time and energy selectivity so the fault is cleared by the circuit breaker immediately upstream of the occurrence. This technology (see figure below) allows the remaining areas of the electrical system to continue operation without disruption. In addition to unique design attributes, Square D mission critical circuit breakers have also undergone rigorous testing procedures to certify the coordination with downstream circuit breakers—combining innovative engineering with validated test results.

Apply Square D mission critical circuit breakers in emergency power distribution systems, data centers, hospitals or anywhere continuity of service is desired.

The PowerPact™ J- and L-Frame Mission Critical circuit breakers deliver high levels of selective coordination in a flexible design that can be easily configured for a variety of applications. Tested to be selectively coordinated with the QO™ family of miniature circuit breakers and the ED, EG, and EJ circuit breakers, this solution provides peace of mind when power availability is critical.

An electronic trip unit provides adjustable long-time settings in four sensor sizes, allowing coverage from 70 A through 600 A on a 120–240, 208Y/120, 240, 480Y/277, and 480 V systems.

**LA Mission Critical Circuit Breakers**

The LA High Magnetic Withstand MC Circuit Breakers are designed to trip at a higher magnetic trip level (18–20 times handle rating) than typical molded case circuit breakers (MCCBs) (which trip at 5–10 times the handle rating).

The high magnetic withstand value of these LA circuit breakers allow the downstream branch circuit breaker to clear the fault.

**Table 7.80: L-Frame—400 A, Thermal-Magnetic, High Magnetic Withstand Circuit Breakers For Mission Critical Loads**

**PowerPact™ Circuit Breakers with Micrologic™ Electronic Trip Units**

The advantages of being able to adjust the trip curve of a circuit breaker equipped with an electronic trip system are obvious. There are other advantages, such as being able to adjust or turn off the instantaneous trip function on some circuit breakers and models of trip units.

■ Does not fit onto ON end of unit-mount P-frame circuit breakers.

◆ For unit-mount circuit breaker only.

★ All unit-mount R-frame circuit breakers require terminal pads for mounting lugs of any type. See page 7-44.

▼ For lug with a tapped hole for control wire, add a "T" before the "K" in the catalog number (for example, AL800P6TK).

△ This lug can only be used on low amp PJ frame breakers where the Instantaneous setting must not be turned OFF. The cables must be laced with rope per lug instructions.

□ Not available with tapped hole for control wire.

M- and P-Frame Lugs (800 A and below)

P-Frame Lugs (Above 800 A)

PowerPact™ H-, J-, and L-Frame Micrologic™ Trip Units

Micrologic Standard Trip Unit

Micrologic Ammeter and Energy Trip Unit

PowerPact™ H-, J-, and L-frame molded case circuit breakers may be specified with any of the following Micrologic Electronic Trip Units.

**Micrologic Standard 3.2/3.3 Trip Units**

- True RMS sensing
- LI, LSI trip configurations
- Field-interchangeable trip units
- LED long-time pickup and trip indication
- Test kits available
- Thermal imaging

**Micrologic Ammeter 5.2A/5.3A/6.2A/6.3A Trip Units**

Includes all features listed for Micrologic standard trip unit, as well as:

- Advanced user interface
- Neutral protection
- Incremental fine tuning of settings
- Up to 12 alarms
- Digital ammeter—phase and neutral (4-pole only)
- Phase loading bar graph
- Maintenance indicators including contact wear, number of operations, operating hours, and load profiles
- Cause of trip information for troubleshooting assistance
- LCD Display
- Zone-selective interlocking (ZSI) (short-time & ground-fault)
- Optional Modbus™ communications—PowerLogic™ compatible

**Micrologic Energy 5.2E/5.3E/6.2E/6.3E Trip Units**

Includes all features listed for Micrologic ammeter trip unit, as well as:

- Ground-fault trip with programmable ground fault alarm (available on 6.2E/6.3E only)
- Power and energy measurement
- Power quality measurements
- Current demand and power demand measurements

**PowerPact P- and R-Frame Micrologic Trip Units**

PowerPact™ P- and R-frame molded case circuit breakers may be specified with any of the following Micrologic Electronic Trip Units.

**Micrologic (Standard) 3.0 and 5.0 Trip Units**

- True RMS sensing
- LI, LSI trip configurations
- Field-interchangeable long-time rating plugs
- LED long-time pickup indication
- Test kits available
- Thermal imaging

**Micrologic (Ammeter) 3.0A, 5.0A and 6.0A Trip Units**

Includes all features listed for Micrologic standard trip unit, as well as:

- LSIG trip configurations
- Digital ammeter—phase and neutral (4-pole only)
- Phase loading bar graph
- LED trip indication
- Zone-selective interlocking (ZSI) (short-time & ground-fault)
- Optional Modbus™ communications—PowerLogic™ compatible

**Micrologic (Power) 5.0P and 6.0P Trip Units**

Power measurement and advanced protection features includes all features listed for Micrologic ammeter trip unit, as well as:

- LSI trip configuration with programmable ground fault alarm
- LSIG (Ground-fault trip) with programmable ground fault alarm
- Incremental “fine tuning” of L, S, I, and G pickup and delay settings
- LCD dot matrix display and LED trip indication
- Advanced user interface
- Advanced protection IDMTL—selectable long-time delay bands
- Neutral protection
- Power measurement
- Contact wear indication
- Modbus communications—PowerLogic compatible
- Local and remote settings

**Micrologic (Harmonic) 5.0H and 6.0H Trip Units**

Power quality measurement and advanced protection features. Includes all features listed for the Micrologic power trip unit, as well as:

- Enhanced power measurements functions
- Power quality measurements

**Adjustable Rating Plugs for PowerPact™ P-Frame and R-Frame and Masterpact™ NT and NW Circuit Breakers—Selection**

To provide maximum design flexibility, system protection, and field upgradeability, each Micrologic™ trip unit is equipped with an interchangeable long-time rating plug. Each trip unit requires an adjustable rating plug to determine the long-time pickup range of the circuit breaker. These plugs are factory installed on new trip units, or can be ordered separately for field-installable upgrades.

Adjustable rating plugs are offered in eight different ranges of long-time pickup adjustments. The following chart show the ranges of adjustments. Each adjustment times the sensor rating (I<sub>r</sub> X I<sub>n</sub>) of the circuit breaker sets the long-time pickup value of the circuit breaker.

**Table 7.109: Long-time Pickup Settings**

Rating Plug	Long-time Pickup Settings								
A	.40	.45	.50	.60	.63	.70	.80	.90	1.0

6.0H	LSIG		S174A★★	16374.00

- ♦ The standard rating plug supplied with a trip unit will be the “A” rating plug. To specify an alternative adjustable rating plug, please add the letter designation to the end of the catalog number. Please refer to page 7-48 for a complete listing of adjustable settings available with each plug. (Example: S143B would specify a “B” rating plug instead of the standard “A” plug.) Use suffix “N” if no rating plug is required, deduct \$200.00 from the complete trip unit kit price.
- ★ When replacing a standard trip unit with Type A (Ammeter), P (Power metering) or H (Harmonic analysis) trip unit, order the 12-pin connector kit S33101 for the Masterpact NW and NT and the PowerPact P-frame drawout circuit breakers or kit S33100 for PowerPact P-frame and R-frame unit-mount and I-Line circuit breakers. See page 7-48.
- ▼ Requires Circuit Breaker Communications Module.
- △ The LSI with 3.2S/3.3S trip units have fixed short time and long time delays.
- Requires neutral current transformer on the three-phase four-wire loads
- ◇ ZSI for H/J frames in only IN. for L-frame ZSI is In and OUT.
- ☆ Indication available using the communication system only.
- ▽ % of hours in 4 current ranges: 0–49%, 50–79%, 80–89%, and >90% In.

Full Function Test Kit

Trip Unit Seal

Sensor Plug

Adjustable rating plug "A" is installed as standard on all Micrologic trip unit orders. However, an alternative selection may be specified from the "Assembled" table below, and factory installed with your trip unit order at no additional charge. To order, please attach the appropriate catalog suffix to the end of the trip unit Cat. No. (after specifying trip unit options). Adjustable rating plugs may also be purchased as field-installable components from the table below.

**Table 7.113: Rating Plugs**

- YH4 = ZSI, ENCT and all installed accessories
- ♦ Price adder is for each accessory ordered.
- ★ I-Line wire harness is included for communication network accessories. Optional wire harness for unit mount requires YH1 suffix.

Masterpact NT

Masterpact NW

The Masterpact universal power circuit breaker offers a family of circuit protection products meeting the most common world standards, ANSI, UL and IEC. The basic design platform for each is common. The final result is UL, ANSI and IEC circuit breakers with the same basic external dimensions, features and accessories.

**Full-Featured Performance**

- Complete product offering up to 200 k AIR without fuses
- Circuit breakers tested to show arc flash hazard risk category as referenced by NFPA70E
- 800 A to 6000 A frames, fixed and draw-out
- Rated for AC voltage systems through 600 V (635 V ANSI)
- Short-time withstand ratings up to 100 kA
- Cradle position indicator: connected, test and disconnected
- Simple, visual contact wear indicators
- Full complement of field-installable accessories common to all standards
- Four interchangeable Micrologic trip units to choose from
- Available PowerLogic™ based power metering and monitoring capabilities
- Available protective relay functions as defined by ANSI C37.2 and C37.90

The following charts show the Masterpact NW and NT ratings for ANSI and UL 489. See Pricing Guide 0613PL0001 and Catalog 0613CT0001.

**GC-200 Ground-Fault Relay System**

The GC-200 Ground-fault relay system protects a grounded distribution system from low-level arcing ground faults. The system includes the GC-200 relay, a sensor (current transformer), and optional GC DSP display and is used with a bolted pressure switch or circuit breaker to open a circuit upon detection of a ground fault. (Replaces GC-100 relay.)

**GC-200 Relay Features**

- Five models with sensitivities suitable for main, feeder, or branch circuits
- Ten adjustable pickup settings for each model
- Small, non-metallic enclosure mounts on DIN rail
- 10 A and 5 A output contacts for trip and alarm
- Zone-selective interlocking (ZSI) to optimize coordinated systems
- I<sup>2</sup>t inverse time characteristics

**GCDSP Display (Optional)**

- Real-time display of ground-fault values
- Also recalls ground-fault at last trip or at maximum since reset
- Allows remote testing or resetting of the relay
- LCD back-lit display
- Surface mounts over panel meter cutout
- Fine adjust pickup settings (D and E versions only)

**Sensors**

- Zero sequence sensing current transformers for all phases and neutral
- Several sizes of toroids and rectangular CTs
- Many are split-core or open frame for ease of installation

**Vigirex™ Ground-Fault Relay System**

The Vigirex ground-fault relays, with associated sensors (current transformers), measure the residual current in an electrical installation to detect levels which may be damaging. When used for protection, they cause an associated circuit breaker or switch to interrupt the supply of power to the protected system. They may also be used for monitoring only, with output to an alarm. The product line includes fixed sensitivities from 30 mA to 1 A and adjustable sensitivities up to 30 A.

The Vigirex relays may be easily mounted on DIN rail or may be panel mounted in a meter cutout. Sensors for conductors range from a little more than an inch diameter toroids, to large rectangular sensors measuring 6 x 18 inches. The compact size of the relay and its sensor make it ideal for protection of OEM equipment as well as branch circuits.

**Micrologic™ Add-on Ground-Fault Module (GFM)**

The Micrologic Ground-Fault Module (GFM) is a UL Listed/CSA Certified circuit breaker accessory which protects equipment from damage caused by ground faults. It is an add-on module which, when connected to a PowerPact H- or J-frame thermal-magnetic circuit breaker only, provides ground-fault sensing and ground-fault relay functions.

HD/JD ground-fault modules feature:

- Adjustable ground-fault pickup levels
- Adjustable ground-fault time delays
- Integral ground fault push-to-test feature
- Ground-fault indicator (mechanical for local, contacts for remote)
- All GFMs are supplied for I-Line™ mounting as standard, easily convertible to unit mount by removing the I-Line bracket
- Fault-powered (through the sensing current transformer) for electronics, shunt trip, and integral test feature. Meets NEC 230.95(C)
- A 12 Vdc shunt trip module (Catalog No. S29382) is required in the circuit breaker. This may be field installed or factory installed when the circuit breaker is ordered with an -SN suffix.
- UL 1053 — Ground-fault Sensing and Relaying Equipment

The GFM system requires the following:

- H-frame (15–150 A) or J-frame (150–250 A) molded case circuit breaker
- Shunt trip is required for the function of the GFM (may be factory-installed or field-installed)
- Bus bar connection (terminal nut inserts) for OFF end of circuit breaker
- Optional neutral current transformer, catalog number GFM25CT (must be ordered for 4-wire applications)

**NOTE:** Ground-fault modules cannot be used for alarming only.

**Table 7.128: Module/Enclosure Selection Chart▲**

Companion Circuit Breaker Prefix	Cat. No.■	I-Line Switchboard	Ground-fault Pickup Adjustment Range	GFM \$ Price
HD, HG, HJ, HL	GFM150HD	LA	20–100 A	4250.00
JD, JG, JJ, JL	GFM250JD	LA	40–200 A	4250.00
<b>Accessories</b>				
H & J	GFM25CT	Optional Neutral Current Transformer (required for 4-wire loads)		375.00

- ▲ At 250 A, the GFM250JD can be used with 80% rated circuit breakers only.
- See Supplemental Digest page 3-37 for additional GFMs.

**Earth Leakage Module (ELM) for PowerPact H- and J-Frame MCCBs**

The Earth Leakage Module (ELM) is an add-on module which, when connected to a PowerPact H- or J-frame MCCB, provides low-level ground-fault sensing and ground-fault relay functions.

Because these ELMs are highly sensitive (30 mA to 3 A), they provide much greater protection than GFMs (20 Amps to 200 Amps sensitivity). The ELMs provide greater protection of control circuits and other sensitive equipment. The associated circuit breaker must have a 48 Vdc shunt trip, which may be field-installed (kit S29392) or factory-installed (suffix -SP) in the H- or J-Frame circuit breaker.

Add-on Earth Leakage Module (ELM) Features:

- Adjustable ground-fault pickup levels as low as 30 mA
- Adjustable ground-fault time delays from instantaneous to 500 msec (Time delay can be applied to the 30 mA setting)
- Integral ground fault push-to-test feature
- Ground-fault indicator (LED for local status; contacts for remote indication)
- All ELMs are supplied for I-Line™ mounting and are easily convertible to unit-mount by removing the I-Line brackets
- Three poles; 240 to 600 Vac maximum: 3-wire applications only (no neutral)
- Line-power obtained through internal bus to provide power for electronics, shunt trip, and integral test feature.
- A shunt trip is required in the circuit breaker; it may be field-installed or factory-installed in the PowerPact H and J circuit breakers.
- UL 1053 – Ground-fault Sensing and Relaying Equipment

**Table 7.129: ELM Selection Chart◆**

Companion Circuit Breaker★	Enclosure Space Required I-Line Switchboard	Pick-Up Adjustment Range	Catalog Number	\$ Price
Prefix	Size			
HD, HG, HJ, HL	15–150 A	LA	ELM150HD	4500.00
JD, JG, JJ, JL	150–250 A	LA	ELM250JD	4650.00

- ◆ At 250 A, the ELM250JD can be used with 80% rated circuit breakers only.
- ★ For Factory Installation of ELM Module: For termination designation (3rd letter of catalog number) use ONLY "M". Add factory installed 48 Vdc shunt trip (suffix SP) to breaker plus suffix VL or VM. SP – \$717. adder. Use VL for H frame – \$4736. adder. Use VM for J frame – \$4886. adder. Plus the List Price of the H or J breaker.

I-Line™ J-Frame with ELM installed

▲ All weights are for 3P circuit breakers unless otherwise noted.

- Circuit breaker enclosures are UL Listed, CSA Certified and are suitable for use as service equipment except as footnoted.
- The short circuit rating of an enclosed circuit breaker is equal to the rating of the circuit breaker installed, except as footnoted.
- Circuit breakers are ordered and shipped separately for field installation.
- For enclosure accessories and dimensions refer to page 7-58.
- See Supplemental Digest page 3-35 for NEMA 7 and 9 enclosures for FAL circuit breakers.

- ▲ Enclosures with NRB or RB suffix have provisions for 3/4 in. through 2-1/2 in. bolt-on hubs in top endwall. Enclosures with R suffix have blank endwalls and require field cut opening. For details and hub catalog numbers see page 3-9.
- Not CSA Certified.
- ◆ Accepts standard rated 80% breakers. Not rated at 100%.
- ★ Maximum short circuit rating is 25 kAIR at 600 Vac, 65 kAIR at 480 Vac, 125 kAIR at 240 Vac.
- ▼ Earth Leakage Module and Ground Fault Module are not compatible with these enclosures.
- △ Maximum short circuit rating is 25 kAIR, 240 Vac.
- Order service ground kit PKOGTA2 if required.
- ◇ Maximum short circuit rating is 18 kAIR, 480 Vac and 240 Vac.
- ☆ Copper wire only.
- ▼ When using a CT in the M800S and R enclosure the unit will no longer accommodate a 200% neutral solution.
- ▼ CE certified per IEC60439-1, IP20D, PE type TN-C or TN-S
- Accepts MGL or MJL standard rated (80%) breakers. Accepts PGL, PJL or PLL circuit breakers rated 80% (1200 A maximum) or 100% rated breakers, (800A maximum).
- ◆ CE certified per IEC60439-1, IP24D, PE type TN-C or TN-S
- Suitable for rainproof NEMA 3R application by removing drain screw from bottom endwall.
- CE certified per IEC60439-1, IP56, PE type TN-C or TN-S
- LEL 100% rated circuit breaker except for 600 A sensor.
- ◆ Short circuit rating is 100 k AIR at 480 Vac maximum.
- ‡ NEMA 7—Indoor Hazardous Locations—Division 1 and 2, Class I, Groups C and D; Class II, Groups E, F, and G; Class III.
- † 80% rated circuit breakers only; SCCR 65 kA @ 240 Vac, 25 kA @ 480 Vac, 18 kA @ 600 Vac.
- Not UL Listed due to wire bending space.
- u NEMA 9—Indoor Hazardous Locations—Division 1 and 2, Class II, Groups E, F, and G; Class III.
- v Has a tapped 2-1/2 in. conduit opening on top and bottom end wall
- w Short circuit current rating is 30 k AIR at 480 Vac.
- x Product also accepts PowerPact L Frame Motor Protector Circuit Breakers with suffix M38X.
- y Viewing Window factory installed.
- z Product accepts PowerPact L-Frame Automatic Molded Case Switches.

**316 Grade Stainless Steel Circuit Breaker Enclosures—NEMA 3, 3R, 4X, 5 and 12**

Type 316 stainless steel circuit breaker enclosures offer superior corrosion resistance to a wider range of chemicals than Type 304 stainless steel enclosures. Type 316 better resists chloride and is often used in marine, waste treatment and transportation applications. Use watertight hubs from Section 3 page 10 of Digest 176. For other accessories reference Table 7.142 and Table 7.143. For dimensional information, reference Table 7.144.

- ▲ Catalog number in table is enclosure only. For complete installation, the following must be ordered separately: WB Circuit Breakers (qty. 2, Supplemental Digest page 3-27); Walking Beam Assembly (Supplemental Digest page 3-27); Mounting Pan (Supplemental Digest) page 3-27, Neutral (page 7-56) and Service Ground Kit (page 7-58).
- Enclosure has blank top endwall.
- ◆ For applications above 200 A requiring a neutral, use copper wire only.

**Enclosed Motor-Operated Molded Case Circuit Breakers**

For information on Enclosed Motor-Operated Molded Case Circuit Breakers see the Supplemental Digest page 3-35.

**Enclosed Molded Case Switches**

For ordering information on molded case switches see page 7-34. For ordering information on enclosed molded case switches, see Supplemental Digest 175 Section 3-36.

**Enclosed Walking Beam Mechanical Interlock**

**NOTE:** Contact local Field Office for catalog number prior to quoting or placing an order.

Industrial molded case circuit breakers with walking beam mechanical interlocks are available in NEMA 1 and 3R construction as completely enclosed device. Walking beam mechanical interlock is available manually operated or electrically operated using (2) 120 Vac motor operators. Not UL Listed.

Enclosed walking beam mechanically interlocked circuit breaker.

- Specify circuit breaker catalog numbers
- Specify manually or electrically operated (electrically operated factory installed only)
- Specify enclosure type (NEMA 1 or 3R)
- Specify if neutrals are required. (Same price)

The UL listed thermal-magnetic molded case circuit breakers and switches shown below are specifically designed for use in PV applications, rated at 50°C, offering grounded or ungrounded configurations.

The products are fully tested and calibrated under the PV UL489B standard.

The products come ready to install, including specially designed serial connectors for optimal thermal response, and adapted terminal covers for optimal isolation. Circuit Breakers come 100% rated for ease of use and selection.

These two new frames are fully compatible with the current line of PowerPact accessories, from aux contacts and shunt trips to motor operators and rotary handles.

## QO™ and QOU Miniature Circuit Breakers

### QO-K

Key operated QO circuit breakers are available in single-pole construction and can be mounted in any single-pole space which will accept a standard QO. These circuit breakers can be turned ON or OFF or to RESET with a special key (catalog number QOK10) included with the circuit breaker. These circuit breakers are UL Listed and available as shown in the table.

## QO™ Miniature Circuit Breakers

Class 685, 690, 730, 912, 950 / Refer to Catalog 0730CT9801

▲ Complete switch includes handle operator, shaft, door interlock plate, and line terminal shroud.

**Non-Metallic Enclosed Switches**

The Vario Motor Disconnect Switch is also offered as an enclosed switch. The 3-pole version makes the Vario switch ideal for manual motor control applications. They are compact, easy to wire and connect, and come undrilled to allow cable entry positions.

**NOTE:** VCGUN enclosures are UL approved.

The V1 and V2 come in metallic enclosures (NEMA Type 1, 4, 4X, and 12). The NEMA Type 1 comes with conduit knockouts top and bottom. To factory install a VZ7 auxiliary contact in these metallic enclosures, add Form X11 to the end of the catalog number (for example, 9421V1G30X11). To factory install a VZ20 auxiliary contact in these enclosures, add Form X20 to the end of the catalog number (for example, 9421V1W30X20). Price adder: \$42.00

**Vario Manual Motor Control Switches**

Vario switches meet UL508 requirements as open manual motor controllers. They are also marked "Suitable as Motor Disconnect" allowing installation on the load side of the motor branch circuit short-circuit and ground-fault protection. If motor branch circuit short-circuit and ground-fault protection is needed, use a GS1 or 9422 fusible switch or circuit breaker meeting NEC 430.52 requirements.

Main Pole Module

The MD motor disconnect switch is listed UL508 Suitable for Motor Control (UL File E164864) and conforms to IEC standard 60947-3. It is in a compact NEMA Type 4X enclosure suitable for use in NEMA Type 1, 3, 3R, 4, 4X, and 12 applications. The MD's key benefits are an extremely small footprint, a more economically efficient NEMA Type 4X solution and a handle interlock preventing cover removal when the switch is in the ON position.

**Table 8.26: MD Motor Disconnect Switch—Non-Metallic NEMA Type 1, 3, 3R, 4, 4X, and 12 Enclosure ▲ ■ ◆**

Amperes	Cat. No.	Maximum Horsepower Ratings			\$ Price	Height (in.)	Width (in.)	Depth (in.)
		Three Phase Vac						
		220–240	440–480	600				
30	MD3304X	7.5	20	25	121.00	6.38	3.9	4.37
60	MD3604X	20	40	40	161.00	8.27	4.94	4.37

- ▲ See Table 8.20 for accessories.
- Complies with OSHA lockout/tagout requirements—accepts up to three 8 mm padlocks.
- ◆ Suitable for NEMA Type 1, 3R, 4, 4X, and 12 enclosure applications.

The 9422 disconnect switches are the ideal selections for the PV string combiner box's internal disconnect switch and control panel applications. These switches are designed for variable depth, flange mounting, traditional side mounting and bracket mounting applications providing complete flexibility in the PV string combiner box designs. The switches are compatible with 9422A handle operators and 9423 door mechanisms and are UL98 recognized (E52369 Vol. 1, Sec. 18) and CSA certified. See pages 8-16, 8-17, and 8-18 for dimensional information.

- ▲ 9422 R2 will extend maximum mounting depth 7 inches, see page 8-17 for information.
- Switches are fixed-depth or adjustable depending on handle selection.
- ◆ For ordering use the suffix 9422, e.g., order TCN30 using catalog number 9422TCN30.
- ★ Accommodates Class J fuses only.
- ▼ Variable in increments of 0.63 inches.

- △ Commercially available enclosures may not accept 9422TG1 and 2 operating mechanisms. Contact enclosure manufacturer for availability of enclosures for use with these switches.
- Right hand flange mounting only and requires a special enclosure.
- ◇ Variable depth only — no cable operator.
- ☆ See Table 8.46 for ordering information for the cable operator.

The 9422 Bracket Mount Disconnect Switch is designed for combiner boxes and control panel applications. The Bracket Mount Disconnect Switch is shipped with the switch and external handle assembled to a bracket, ready for quick installation. A protective trim plate is provided to prevent any mounting screws from being accessible from the front. The trim plate also provides an attractive installation feature. The switches are fully compatible with the 9423 closing mechanisms.

**Table 8.41: 9422 Bracket Mounted Disconnect Switches**

- ▲ Space saving design—Type J fuses mounted on the non-fused bracket.
- For ordering use the suffix 9422, e.g., order BTCN30 using catalog number 9422BTCN30.

**Handle Information**

**Table 8.42: 9422 Disconnect Switch and Circuit Breaker Handle Mechanisms**

The Handle Mechanism kit contains all parts needed to mount the handle to the flange of the enclosure. Two flange mounting methods are offered. For right or left hand flange mounting use Types A1–A4 and Types A9–A10 kits. For right-hand mounting only, use Type A5–A8 handles. The type AP1 and AP2 handles are used exclusively on the PowerPact™ M and P operating mechanisms, 9422 RM1 and 9422 CMP. The dimensions are identical to 9422 A1.

Handle Depth (in.)	NEMA Type 1, 3, 3R, 4, 12 Enclosures		NEMA Type 4, 4X Stainless Steel Enclosures	
	Cat. No. ◆	\$ Price	Cat. No. ◆	\$ Price

12▼△	A7	300.00	A8	372.00

- ▲ Use with 30–200 A 9422 switches and all circuit breaker mechanisms.
- Use with Type D2 remote or dual adapter kit listed on page 8-24.
- ◆ For ordering use the suffix 9422, e.g., order A2 using catalog number 9422A2.
- ★ Use only with 9422 RM1, 9422 CMP and PowerPact M and P operating mechanisms.
- ▼ Use only with 400 A 9422TG1 and 9422TG2 disconnect switch.
- △ Adjustable depth.

9422 A1, A2, A3, A4, A9, and A10 Handles

Rod used only on the variable-depth mechanism.

9422 TCN30

Bracket Mounted Disconnect Switch

Type A1

Accessories

Class R Fuse Kits

When installed, this kit rejects all fuses except Class R. The kits are available for field installation. With rejection kit and Class R fuses installed, the switch is UL component recognized for use on systems with fault current up to 200,000 RMS symmetrical amperes.

Table 8.43: Class R Fuse Kits

- 2 N.C. or N.O. or 1 N.C. or 1 N.O. Contact depending on wiring.
- ♦ For ordering use the suffix 9999, e.g., order TC10 using catalog number 9999TC10.

Internal Barrier Kits

Provides an additional barrier that helps prevent accidental contact with live parts. Field-installed transparent barriers do not restrict visual inspection of the switch. Barriers provide IEC529 IP2X "finger safe" protection when door of enclosed disconnect switch is open. A convenient door allows use of test probes without accessing fuses and replacement of fuses without removing barrier. Barrier must be used with the skirt kit to enclose a panel mounted 9422 disconnect.

Table 8.45: Internal Barrier Kits

Type A7 or A8 adjustable depth handle mechanism	D =	15.87 403 to 19 483
	In steps of	0.63 16

Note: Copper lugs are standard on all Type TG disconnect switches.

\* D = Mounting depth measured from the switch mounting surface to the surface of flange.

Dim. =  $\frac{\text{in.}}{\text{mm}}$

9421 Type L Circuit Breaker Mechanism

**Type L Circuit Breaker Mechanisms**

Type L door-mounted, variable depth operating mechanisms feature heavy duty, all metal construction with trip indication. All mechanisms can be padlocked in the "OFF" position when the enclosure door is open. Further, the handle assemblies can be locked "OFF" with up to three padlocks, which also locks the enclosure when the door is closed. (The 3" handle accepts one padlock.) Complete kits are rated for NEMA Type 1, 3R, and 12 enclosures. They include a handle assembly, operating mechanism, and shaft assembly.

### Dual Cable Operating Mechanisms for Square D™ Circuit Breakers

Dual Cable Operating Mechanisms are designed for use with Square D brand PowerPac™ D, H, J, and L circuit breakers through 600 A frame sizes. The cable mechanisms allow for a single handle operator, Class 9422Ax, to operate both circuit breakers. The cable mechanism is designed especially for tall, deep enclosures where placement flexibility is required. There are numerous cable arrangements to choose from to accommodate many applications.

#### Features

- Separate cables for each circuit breaker
- Rugged metal flange handle operator
- Maximized flexibility of circuit breaker placement for existing and new applications
- Control panel can be fed from two separate supply voltages (if required)
- Dual mechanism allows both separate supply voltages to be controlled by a single handle to improve security features

Table 8.60: Dual Cable Operating Mechanisms Selection

9422APx

Handle Mechanisms

#### Handle Mechanisms

These handle mechanism kits are used with the circuit breaker variable depth and cable operating mechanisms. The kits contain all parts necessary for mounting the handle to the flange of the enclosure. Types A1/AP1 to A4 are suitable for right or left-hand flange mounting.

Table 8.61: Handle Mechanisms

Type of Handle	NEMA Type Enclosure	Type	\$ Price
6 in.	1, 3, 3R, 4 (sheet steel), 12	A1	143.00
	4, 4X (stainless)▲	A2	257.00
6 in. ■	1, 3, 3R, 4 (sheet steel), 12	AP1	188.00
	4, 4X (stainless)▲	AP2	338.00
4 in.	1, 3, 3R, 4 (sheet steel), 12	A3	143.00
	4, 4X (stainless)▲	A4	257.00

▲ All external metal parts are either stainless steel or a chrome-plated non-ferrous die casting.

■ Must be used with 9422 RM1, 9422CMP, and 9422CSJD (dual cable mechanism) only.

NOTE: See page 8-14 for dimensional information.

#### Flange-Mounted, Variable-Depth Operating Mechanisms

Designed for installation in custom built control enclosures where main or branch circuit protective devices are required. All circuit breaker operating mechanisms are suitable for either right- or left-hand flange mounting, convertible on the job. Selection of a 9422Ax handle is required to complete the operating mechanism.

Table 8.62: Variable-Depth Operating Mechanisms for Use with Schneider Electric™ (formerly Merlin Gerin™) Circuit Breakers

Breaker

Remote operation shown  
(handle mechanism not  
included in kit)

### Remote or Dual Adapter Kit

For the remote or dual operation of 30, 60, 100, and 200 A disconnect switches.

**Remote Operation**—permits mounting the Class 9422 Type A9 or A10 handle mechanism at a lower level than the disconnect device it controls. This arrangement is often required where the disconnect device is mounted too high for personnel to easily reach a conventional operator.

**Dual Operation**—permits controlling two disconnect devices, one in line with and one remote from a single Class 9422 Type A9 or A10 handle mechanism.

**NOTE:** A Class 9422 Type A9 or A10 handle (page 8-15) and the preferred mounting method **must** be used.

**Table 8.65: Other Accessories**

Accessory	Description	Class	Type	\$ Price
Alternate Mounting Kit	Permits mounting Class 9422 Type A1 or A2 handle mechanisms in enclosures with flange thickness of 16 gauge to 0.5 in.	9422	AM2	14.30
Channel/Flange Support Kit	Auxiliary kit recommended for use with 30 and 60 A disconnect switches and PowerPact™, NSF, and NSJ circuit breaker mechanisms when these devices are to be mounted on the center channel of a multi-door enclosure or when extra rigidity for the flange is required. Supplied as standard with 100 and 200 A disconnect switches.	9422	C1	42.80
Auxiliary Lock Plate	Auxiliary kit recommended for use with the Class 9422 Type A-1 flange handle to facilitate padlocking the handle in the "OFF" position. Primarily used when the handle is mounted on the center channel of a multi-door enclosure. Also in any case where the enclosure doors interfere with the normal padlock slot in the flange handle. Meets both the Automotive and NFPA 79 specifications.	9422	L1	36.00
Special Lugs for Disconnect Switches	Copper Lugs only—Specify Form Y157	—	—	No Charge
	Tin Plated Aluminum Lugs for 400 A Type TG Switch—Specify Form Y1572 (000–750 kcmil Cu/Al wire)	—	—	No Charge
Operating Rods	Anderson Type VCEL Compression Lugs—Specify Form Y1574 <b>Exceptions:</b> None of the 30 A or 60 A disconnect switches are available with compression lugs.	—	—	No Charge
	Standard operating rod for use with Class 9422 variable depth mechanisms. Included as standard in each kit.	9422	R1	28.70
	Extra long operating rod for use with Class 9422 variable depth mechanisms. Can be used as a substitute for the standard rod included in each kit to increase the maximum mounting depth 7 in. (Two are required for Types ARR, RR, ART, RT, ATE, TE, ATF, TF).	9422	R2	50.00

Alternate Mounting Kit

Channel/Flange  
Support Kit

Auxiliary Lock Plate

9422 TCN30

Class 9423 door closing mechanisms cover a range of enclosures with door openings up to a maximum of 91 in. high. The door closing mechanisms are designed to be used on control enclosures and interlocked with a Class 9422 disconnect device, although they all can be used independently. Three different systems are available, and their use is as recommended below. A complete system is available for interlocking all the doors of a multi-door enclosure with the master door when using the 6 in. or 8 in. vault handle mechanism.

Note that the "Master Door" is defined to be the door of a single or multi-door enclosure which is interlocked directly with the disconnect device. The master door can be hinged on either the right or left hand side. It can be located in any position on a multi-door enclosure. An "Auxiliary Door" is defined to be any remaining doors of a multi-door enclosure which are interlocked with the master door by means of the overhead interlocking system as illustrated on pages 8-26 and 8-27.

**Selection Procedure**

**Step 1.**

Determine enclosure construction (number of doors, door height, hinge location, etc.).

**Step 2.**

Determine Class 9422 disconnect device to be used—either a disconnect switch or a circuit breaker mechanism.

**Step 3.**

Determine the location of the disconnect device and handle mechanism (right- or left-hand flange or center channel).

**Step 4.**

Select the door closing mechanism required.

**Step 5.**

Select the auxiliary door closing mechanisms and multi-door interlocking hardware, if required. (A complete system for interlocking all auxiliary doors of a multi-door enclosure with center channel is available for the medium and large enclosures.)

**Table 8.66: Door Closing Mechanism**

60 in. Maximum Door Opening (Recommended)	46–60 in. Door Opening (Recommended)	61–91 in. Door Opening (Recommended)
 <ul style="list-style-type: none"> <li>• 2 Point Locking is Standard</li> <li>• A Third Roller Latch Kit is Available for 3 Point Locking</li> <li>• For 3/4 in. Door Depths</li> </ul>	 <ul style="list-style-type: none"> <li>• For use on Single or Multi-Door Enclosures</li> <li>• For use with Doors Hinged on Right or Left Side</li> <li>• Referred to as the 6 in. Door Depths</li> </ul>	 <ul style="list-style-type: none"> <li>• For use on Single or Multi-Door Enclosures</li> <li>• For use with Doors Hinged on Right or Left Side</li> <li>• Referred to as the 8 in. Vault Handle Mechanism</li> <li>• For 1-1/8 in. Door Depths</li> </ul>

Type M4

Latch bar not included, but most prepunched enclosures that accept Square D® operating mechanisms supply a predrilled latch bar.

The door closing mechanisms listed below are for use on small to medium size single door control enclosures. They are designed to be used in conjunction with Class 9422 flange-mounted disconnect switches and circuit breaker operating mechanisms; however, they can be used independently as well. When used on properly designed and gasketed NEMA Type 12 enclosures, they meet NFPA 79 standards.

Third roller latch kit for 3 point locking; for use where 3 point locking is desired or where the door opening is 39 in. or more.	NEMA Type 4 and 12 Sheet Steel	Class 9423 Types M4, M9, M4L, M9L	—	—	3/4	M3	50.00
			NEMA Type 4 and 12 Stainless Steel	Class 9423 Types M24, M24L	—	—	3/4

▲ Suitable for door depths of 1-1/8 in., 1-1/4 in., 1-3/8 in. and 1-1/2 in.

Circuit Breaker Operating Mechanism

**Vault Type for Single and Multi-Door Enclosures**

Table 8.68 shows the requirements for the door closing mechanism, the locking bar kit, and the mechanical interlock kit, if used.

**Table 8.68: Single or Multi-Door Enclosures—NEMA Type 12 with 40 in. to 60 in. Door Opening**

Single-Door Enclosure		Multi-Door Enclosure	
Without Interlocking	With Interlocking	Without Interlocking	With Interlocking
1—M6 door closing mechanism 1—Type M660 locking bar kit	1—M6 door closing mechanism 1—Type M660 locking bar kit 1—Type M5 (use with 9422A handles)	For each door: 1—M6 door closing mechanism 1—Type M660 locking bar kit	For Master door: 1—M6 door closing mechanism 1—Type M660 locking bar kit 1—Type M5 (for use with 9422A handles)  For each Auxiliary door: 1—M6 door closing mechanism 1—Type M660 locking bar kit Necessary quantities of Types M2 and M7 for each door (see below)

**View from Inside the Enclosure**

- Note: A - Interlocking lever extension of the flange-mounted handle mechanism.
- Note: B - Actual enclosure opening—not door height.
- Note: C - Screwdriver interlock assembly can be ordered separately. Class 9423 Type CEQ2493. \$45.00

**NOTE:** All mechanisms listed on this page are suitable for either left or right hand mounting.

**Table 8.69: Door Interlocks**

Type M6 Door Closing Mechanism	\$ Price
The Class 9423 Type M6 door closing mechanism is designed to close and seal 0.75 in. deep doors of single or multi-door NEMA Type 12 enclosures. The Type M6 can be used on doors hinged on either the left or right hand side. Recommended door openings are from 40–60 in. Vault type handle length is 6 in.	257.00
<b>Type M660 Locking Bar Kits</b>	
The lock bar kit for the Type M6 door closing mechanism contains two lock bars and is available from stock. The bars can be cut to fit door openings through 60 in. One lock bar kit is required for each Type M6 ordered.	86.00
<b>Type M5</b>	
The Class 9423 Type M5 mechanical interlock kit is designed to interlock a Class 9422 handle mechanism with the Type M6 door closing mechanism. This kit prevents the opening of the master door (or single door) with the disconnect handle in the "ON" position, making it mandatory to use a screwdriver to gain entry to the enclosure at any time, regardless of the disconnect handle position.	215.00

**Table 8.70: Required Accessories for Auxiliary Doors**

Type M2	\$ Price
One Type M2 kit is required for each auxiliary door. This kit is required to interlock any auxiliary door(s) with the master door.	257.00
<b>Type M7</b>	
The first auxiliary door requires 2 Type M7 kits. Additional auxiliary doors require only 1 Type M7 kit. The 0.25 in. diameter rod used to interconnect the M7 kits is furnished by the user. If the distance between any two Type M7 kits exceeds 36 in., an additional Type M7 kit should be installed to prevent the rod from buckling.	71.00

**Vault Type for Single and Multi-Door Enclosures**

Table 8.71 shows the requirements for the door closing mechanism, the locking bar kit, and the mechanical interlock kit, if used.

**Table 8.71: Single Or Multi-Door Enclosures—NEMA Type 12 with 61 in. to 91 in. Door Openings**

Single-Door Enclosure		Multi-Door Enclosure		
Without Interlocking	With Interlocking	Without Interlocking	With Interlocking	
1—M8 door closing mechanism 1—Type M891 locking bar kit	1—M8 door closing mechanism 1—Type M891 locking bar kit 1—Type M1 (for use with 9422A handles)	For each door: 1—M8 door closing mechanism 1—Type M891 locking bar kit	For Master door: 1—M8 door closing mechanism 1—Type M891 locking bar kit 1—Type M1 (for use with 9422A handles)	For each Auxiliary door: 1—M8 door closing mechanism 1—Type M891 locking bar kit Necessary quantities of Types M2 and M7 for each door (see below)

**NOTE:** All mechanisms listed on this page are suitable for either left or right hand mounting.

**Table 8.72: Door Interlocks**

Type	\$ Price
<b>Type M8 Door Closing Mechanism</b> The Class 9423 Type M8 door closing mechanism is designed to close and seal 1.125 in. deep doors of single or multi-door NEMA Type 12 enclosures. The Type M8 can be used on doors hinged on either the left or right hand side. Recommended door openings are from 61–91 in. Vault type handle length is 8 in.	<b>500.00</b>
<b>Type M891 Locking Bar Kits</b> The lock bar kit for the Type M8 door closing mechanism contains two lock bars and is available from stock. The bars can be cut to fit door openings through 91 in.. One lock bar kit is required for each Type M8 ordered.	<b>86.00</b>
<b>Type M1</b> The Class 9423 Type M1 mechanical interlock kit is designed to interlock a Class 9422 handle mechanism with the Type M8 door closing mechanism. This kit prevents the opening of the master door (or single door) with the disconnect handle in the "ON" position, making it mandatory to use a screwdriver to gain entry to the enclosure at any time, regardless of the disconnect handle position.	<b>428.00</b>

**Table 8.73: Required Accessories for Auxiliary Doors**

Type	\$ Price
<b>Type M2</b> One Type M2 kit is required for each auxiliary door. This kit is required to interlock any auxiliary door(s) with the master door.	<b>257.00</b>
<b>Type M7</b> The first auxiliary door requires 2 Type M7 kits. Additional auxiliary doors require only 1 Type M7 kit. The 0.25 in. diameter rod used to interconnect the M7 kits is furnished by the user. If the distance between any two Type M7 kits exceeds 36 in., an additional Type M7 kit should be installed to prevent the rod from buckling.	<b>71.00</b>

**Enclosure Construction and General Location Information For Types M5 and M6**

Drilling and location information below is complete for a single door enclosure with door hinged on left side, incorporating a Type M6, M5, and Class 9422 handle mechanism. Transpose all horizontal dimensions for doors hinged on right side.

**Dimension A**

- Note: Single door enclosures: A minimum = 1 in.
- Note: Multi-Door enclosures without overhead interlocking system: A minimum = 1 in.
- Note: Multi-Door enclosures with overhead interlocking system: A minimum = 4½ in.
- Note: Overhead interlocking system consists of the required number of Class 9423 Type M2 and M7 kits for interlocking the auxiliary doors with the master door. See page 8-26.

**Table 8.74: Dimension B (Minimums)**

Type	Disconnect Device	If A = 1 Minimum B =	If A = 4½ Minimum B =	C

▲ Short circuit tests are conducted at 100-105% of the maximum rated voltage of the panelboard.

■ Obsolete. Contact your local Schneider Electric representative or distributor for the replacement circuit breaker.

**NOTE:** LD, LG, LH, and LL breakers are only available in 3 pole configurations.

▲ Series rating valid for 2-pole or 3-pole circuit breakers.

Note:

- The fuse used in this UL test is an envelope (umbrella) fuse. This fuse is designed as a "worst case" fuse. Thus, no matter what manufacturer's fuse is used, the Square D™ brand circuit breaker is protected.
- The line side fused switch may be in a separate enclosure or in the same enclosure as the loadside circuit breaker. A line side fused switch may be a submain, integral main, or remote main. A load side circuit breaker may be a branch, submain, or an integral main used on the load side of a remote main. This series combination short circuit current rating shall not exceed that of the line side fused switch. The charts apply to Square D™ brand load side circuit breakers only. However, the line side fuse ratings are independent of the fuse manufacturer.
- Not applicable to Corner Grounded Systems.
- Limiters used in Square D™ brand DSL and DSL II fused power circuit breakers are not class L fuses and do not have series ratings.

**NQ and NF Merchandised Pricing Procedure**

- List circuit breakers required, either plug-on or bolt-on. See the appropriate Digest pages for catalog numbers.
- Determine equivalent number of pole spaces required.
- Select proper main lug interior (from page 9-6) or main lug interior and main circuit breaker adapter kit (from page 9-7) based on equivalent number of poles and ampere rating. Interiors include solid neutral and are field convertible to top-feed.
- Select enclosure from appropriate page.  
Type 1—Select box and front catalog number corresponding to interior catalog number.  
Type 3R, 5, 12—Select enclosure. Interior trim kit for Type 3R, 5, 12 is included with the enclosure.
- For complete price, add the component prices. Include panelboard accessories.
- Apply appropriate discount schedule.

**NQ and NF Factory Assembled Pricing Procedure**

- Select **Base Price** for main lugs or main circuit breaker from the **Base Price Table**. Include equipment ground bar when required.
- List **Branch Circuit Breakers** (either plug-on or bolt-on) and determine total spaces required. Select price from the **Branch Circuit Breakers Table**. Include space-only charge for future requirements.
- If total spaces required exceeds the maximum listed, price as two or more panelboards and add price for sub-feed or feed-through lugs so installer can cable between sections.
- Add price for special features from appropriate page. Contact your local Schneider Electric representative or distributor for additional special features.
- For complete price, add all prices. Order by description.

**NOTE:** Additional special price adders can be found in the Supplemental and Obsolescence Digest, Section 4.

- Apply appropriate discount schedule.

**NQ Merchandised Pricing Example**

▲ "C" suffix indicates copper bussing.  
 ■ Embossed mounting holes add a 0.25-inch standoff to back of MH box.  
 ♦ Add "F" for flush mount, "S" for surface mount.  
 ★ Use only if the Local Jurisdiction where this panelboard interior is being applied has adopted the 2008 NEC, which allows single panelboard interiors greater than 42 circuits.  
 ▼ When NEMA 3R, 5, or 12 enclosures are selected, an NQ12RDE kit should also be selected. See Table 9.19.  
 Δ Enclosure includes trim kit.  
 □ For the NQ14-inch-wide panelboard offer, See Digest page 9-8.

- ★ Use only if the Local Jurisdiction where this panelboard interior is being applied has adopted the 2008 NEC, which allows single panelboard interiors greater than 42 circuits.
- ▼ Enclosure includes trim kit.
- △ Select the appropriate main circuit breaker from the tables starting on Digest page 7-22 and add the circuit breaker price to the total price of the panelboard.
- Circuit breaker interrupt ratings, See the tables starting on Digest page 7-22.
- ◇ For the NQ14-inch-wide panelboard offer, See Digest page 9-8.
- ☆ QOB2150VH takes four pole spaces; all other QOB two pole circuit breakers take two pole spaces.
- ▽ QOB3110VH to QOB3150VH take six pole spaces; all other QOB three pole circuit breakers take three pole spaces.
- ⊙ Pole spaces shown are available for branch circuits, with spaces deducted for the back fed main breaker.
- \* For single phase applications, order a 3-pole breaker. Example: HDL36100.
- ◇ For 400A applications, order short handle circuit breaker (LAL36400MB).

New!

**NQ 14-inch-wide—240 Vac, 48 Vdc**

14-inch-wide NQ panelboards are now available for those customers whose equipment space is limited. Developed with customer input, Square D™ brand NQ panelboards are built to last, featuring innovations for ease of installation and durability.

**Features**

- 240 Vac, 48 Vdc maximum
- 225 A maximum main circuit breaker or main lugs
- 60 A maximum branch circuit breakers
- Visi-Trip™ indication on branch circuit breakers
- 10,000–65,000 A Short Circuit Current Rating (SCCR)
- Interiors supplied with tin plated copper bus as standard
- Interiors accept bolt-on and plug-on branch circuit breakers
- Three-phase, four-wire, and single-phase, three-wire interiors available
- Panelboards available with Mono-Flat™ front
- Suitable for use as service entrance equipment
- Branch circuit filler plates provide fast and easy installation
- Both fully and series-rated systems are available

- ▲ Total Price includes: interior, front, main circuit breaker adapter kit, and enclosure.
- Order branch circuit breakers separately.
- ♦ "C" suffix indicates copper bussing.
- ★ Embossed mounting holes add a 0.25-inch standoff to back of MH box.
- ▼ Add "F" for flush mount, "S" for surface mount.
- Δ Enclosure includes trim kit.
- Use only if the Local Jurisdiction where this panelboard interior is being applied has adopted the 2008 NEC, which allows single panelboard interiors greater than 42 circuits.
- ◇ Back-fed EDB 125 A 3 pole main circuit breaker must be ordered separately and field installed. Maximum breaker rating opposite is 20A.
- ☆ Select the appropriate main circuit breaker from pages starting on 7-21 and add the circuit breaker Price to the total Price of the panelboard.

Note: All EDB, EGB, and EJB circuit breakers are UL Listed as HACR Type. For 50 °C calibration, use a CA suffix. NF branch circuit breakers are fungus proof as standard.

- ▲ UL Listed as SWD (Switching duty rated).
- UL Listed as HID (High Intensity Discharge rated).
- ◆ UL Listed for use on 240 V Corner-grounded Delta Systems (Grounded B Phase). See data bulletin 2700DB0202.
- ★ All EPDs occupy two spaces, with or without Alarm Switch option. For alarm switch, add 158 list Price and the suffix BA.

**Table 9.57: Factory installed Electrical Accessories**

Auxiliary Switch (1A/1B)	Alarm Switch (NO)	Coil Burden Max. (VA)	Minimum Recommended Supply Transformer (VA)
Monitors circuit breaker contact status and provides a remote signal indicating the circuit breaker contacts are OPEN or CLOSED. <b>Application</b> Max Load = 10 A @ 120 Vac 50/60 Hz Terminals for #14 AWG Cu wire	Used with control circuits and is actuated only when the circuit breaker has tripped. <b>Application</b> Max Load = 7 A @ 120 Vac 50/60 Hz Terminals for #14 AWG Cu wire.	288	50
		Shunt Trip—Trips the circuit breaker from a remote location by means of a coil energized from a separate circuit. A 120 V shunt trip will operate at 55% or more of rated voltage. <b>Application</b> For use with momentary or maintained push button. 120 Vac 50/60 Hz Terminals for #14 AWG Cu wire.

## I-Line Merchandised Pricing Procedure

1. Select the appropriate branch circuit breakers and accessories based on the required ampacity and AIR ratings from Digest pages 9-24 through 9-30.
2. Determine the total mounting inches required by the branch circuit breakers. Pay close attention to the interior types and any branch mounting restrictions by referring to panel layouts on Digest pages 9-21 and 9-22. For example, larger frame circuit breakers may mount in only one side of the panel due to physical sizes. Therefore, for larger size branches, you may only be able to consider one half of the total mounting inches available.
3. Select proper main lug interior or main circuit breaker interior from Digest page 9-21 or 9-22 based on the mains ampacity and branch requirements from step 2.
4. Select blanks from the Accessories table on Digest page 9-23 as required to cover unused mounting space.
5. Select appropriate box and front from Digest page 9-21 or 9-22 to accommodate panel interior selected in step 3.
6. Apply appropriate discount schedule.

**Table 9.94: I-Line Merchandised Pricing Example**

600 Vac, 3Ø3W, 400 A, MLO, 14k AIR, Type 1 enclosure, 4 piece surface trim without door.

Description	Catalog No.	Digest Page No.	\$ Price

one 1.5 in. Blank	HNM1BL	9-23	44.
<b>Total Price</b>			<b>12231.</b>

## I-Line Factory Assembled Pricing Procedure

1. Select price for main lugs or main circuit breaker from Base Price tables on Digest page 9-31. Include solid neutral and ground bar when required.
2. List branch circuit breakers and determine total mounting inches required. Include space only charge and mounting inches as required. Price branches from Digest page 9-32.
3. If total space required exceeds the maximum listed, price as two or more panels and add price for sub-feed lugs, so installer can cable between sections.
4. Add price for special features from Digest page 9-34.
5. For complete price, total all prices. Order panel by description.
6. Apply appropriate discount schedule.

**Table 9.95: I-Line Factory Assembled Pricing Example**

600 Vac, 3Ø3W, 400 A, MLO, 14k AIR, Type 1 enclosure, 4 piece surface trim without door.

<b>Total Price</b>		<b>33417.</b>

## QMB Factory Assembled

### QMB Panelboards—Method of Pricing

1. Make a sketch with main lugs or main switch at the top or bottom.
2. List required branch devices (switches and circuit breaker units). Include ampere rating, number of poles, and unit mounting height from the appropriate table on Digest pages 9-35 and 9-36.
3. 30–60 twin units are the same price as 600 V 60–60 twin units.
4. 30–100 and 60–100 twin units are the same price as 600 V 100–100 twin units.
5. List solid neutral from Digest page 9-36 if required. No unit mounting height is required.
6. List mains ampere rating, voltage, number of poles, and unit mounting space from the appropriate table on 9-36.
7. If total unit mounting height of branch devices exceeds maximum mounting space of the mains, price as two or more panelboards, adding sub-feed lugs or feed-thru lugs from the appropriate table on Digest page 9-36.
8. Insert at the right of each item the price from the appropriate table, including any accessories. The sum will be the complete panelboard price including the cabinet.
9. Specify H, R, or J fuse clips.

- ▲ Add "F" for flush mount, "S" for surface mount.
- ◆ Add-on door kit available from Peru. Example: For HCM48TS surface trim kit, order HCM48DS door kit.
- ◆ For Type 1 applications, order interior, front, and box. For Type 3R/5/12 applications, order interior and box only. The front is included with the box.
- ◆ Remove drain screws for Type 3R rating.
- ▼ Bottom feed standard.
- ▲ Hinged trim with door.
- For main lugs panel, order sub-feed lug kit and back-feed as main lugs.
- ◆ For main circuit breaker panel, order plug-on I-Line type PG, PJ, PL, MG, or MJ circuit breakers from 9-28 through 9-30 and backfeed as the main breaker (order solid neutral from 9-22).
- ★ Suitable for use as service equipment if equipped with an integral main circuit breaker or when not more than six main disconnecting means are provided and the panelboard is not used as a lighting and appliance branch circuit panelboard.
- ▼ PG, PJ, PL circuit breakers are available with both thermal-magnetic equivalent and Micrologic trip. The Micrologic circuit breakers are available 80% and 100% rated. "C" suffix denotes a 100% rating.
- ◆ Circuit breaker interrupt ratings, starting on Digest page 7-2.
- ◆ I-Line Surgeologic SPD not available.
- ◆ DB9 box is 9.5 inches deep.

**TYPE HCP**

800 A max. branch circuit breaker  
FA A, FH, FI, FY, QB, QD, QG, QJ, HD, HG, HJ, HL, JD, JG, JJ, JL, KI, LA, LD, LG, LJ, LL, LH, LC, LI, LX, LXI, LE, MG, MJ, PG, PJ, PL, PGC, PJC, PLC■

Box Size:  
42 in. Wide, 9.5 in. Deep

- ▲ FA and JDA circuit breakers with field installable ground fault kits may be mounted in type HCP, HCP-SU, and HCR-U panelboards as shown, and require L-frame mounting space.
- PG, PJ, and PL circuit breakers are available with both thermal-magnetic equivalent and Micrologic trip. The Micrologic circuit breakers are available 80% and 100% rated. "C" suffix denotes a 100% rating.

■ Replacement lugs are not available on QB, QD, QG, or QJ circuit breakers. Lugs for QB, QD, QG, or QJ circuit breakers accept one #4 AWG–300 kcmil. No accessories are available for PowerPact Q Frame breakers.  
♦ 2-pole QB, QD, QG, and QJ circuit breakers are completed by adding the required phasing numbers as indicated in the parentheses. See Digest page 9-24.  
★ 3-pole QB, QD, QG, and QJ circuit breakers for ABC phasing are complete without additional phasing number. For CBA phasing, complete the catalog number by inserting the number "6" in the parentheses.

- ▲ Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.
- See Supplemental Digest pages 3-2 and 3-3 for circuit breakers with field-interchangeable trip units
- ♦ To complete catalog number, replace the blank with the appropriate rating (D, G, J, L).
- ★ For applications requiring communications, see Digest page 7-49.
- ▼ AL150HD wire range is 14-3/0 AWG Al or Cu.
- Δ AL250JD wire range is 3/0 AWG-350 kcmil Al or Cu. For smaller wire range (4-4/0 AWG Al or Cu), replace the lug's wire binding screws with the larger binding screws provided.
- 3P circuit breakers with this trip unit can be used for 2P applications.

LA Mission Critical Circuit Breakers

The LA High Magnetic Withstand MC Circuit Breakers are designed to trip at a higher magnetic trip level (18–20 times handle rating) than typical molded case circuit breakers (MCCBs) (which trip at 5–10 times the handle rating). The high magnetic withstand value of these LA circuit breakers allow the downstream branch circuit breaker to clear the fault.

- ▲ See Supplemental Digest page 3-4 for circuit breakers with field-interchangeable trip units.
- For 100% rated circuit breakers (250 A and 400 A only), add a "C" in the 9th character place (for example, LRA36400CU31X).
- ◆ Circuit breakers with J, L, and R interrupting ratings are UL certified as current limiting.
- ★ 3P circuit breakers with this trip unit can be used for 2P applications.
- ▼ AL400L61K3 terminal wire ranges are (1) 2 AWG–600 kcmil Cu or (1) 2 AWG–500 kcmil Al.
- △ AL600LF52K3 terminal wire range is (2) 3/0–500 kcmil.
- For applications requiring communications, see Digest page 7-43.

**Interrupt Ratings (kA)**

	G	J	L	◆
240 V	65	100	125	
480 V	35	65	100	
600 V ☆	18	25	25	

- ◆ L interrupting rating is not available in M-frame.
- ☆ 600 V interrupt ratings not available for D-frame.

- ▼ The ET 1.0 trip unit cannot be field replaced, nor does it allow adjustment of the long-time trip point setting. It is considered an electronic equivalent of a thermal-magnet circuit breaker.
- ◆ UL magnetic trip setting tolerances are ±10% from the nominal values shown.
- \* Fill in parentheses with the following phase connection options: (2) for AC and (5) for CA.

▲ To complete the catalog number, replace the blank ( ) with the appropriate interrupt rating (G, J, K, or L).  
 ■ For 100% rated circuit breakers add a "C" in the 9th character place. For example, the catalog number for a 100% standard-type trip unit with LI trip functions at 250 A would be PGA36025CU31A.  
 ◆ The L interrupt rating is supplied in 480 V only. Change the 5th character (voltage rating) from a 6 (600 V) to a 4 (480 V); for example, PLA34025U31A.  
 ★ See Table 9.136 on Digest page 9-29 for interrupt ratings.

- When required, add the \$ Price of a solid neutral from Table 9.140.
- ♦ Standard construction back-fed main.
- ★ PG, PJ, PL circuit breakers are available with both thermal-magnetic equivalent and Micrologic trip. The Micrologic circuit breakers are available 80% and 100% rated. The "C" suffix denotes a 100% rating.
- ▼ For 1200 A frame thermal magnetic circuit breaker with 600 kcmil lugs, select an R-frame Thermal Magnetic circuit breaker in the Product Selector.

★ When greater than 125 A lugs are required on the split section of the bus, contact your local Schneider Electric representative or distributor for the box height.

**Table 9.182: I-Line™ Panelboard Split Bus Bars**

Ampacity MLO	\$ Price		Additional Mounting Height Required On Split Bus Section ▼
	2-pole	3-pole	Split Bus
225 A	560.	662.	7.5 in.
400 A	662.	858.	9 in.
600 A	786.	858.	12 in.
800 A	1094.	1238.	12 in.
1200 A	1320.	1442.	18 in.

Note: For applications with main circuit breaker panelboards, contact your local Schneider Electric representative or distributor.

▼ For I-Line panelboards, dimension includes height of "SL" sub-feed lug kit from Digest, plus 3 in. from available branch mounting space.

**Main Circuit Breaker Without Overload Trip (Automatic Molded Case Switch)**

- (Not UL Listed)
- \$ Price as standard main circuit breaker, no \$ Price Adder.

**Shunt Trip Circuit Breakers**

- See Digest page 7-35 for pricing.

Note: For molded case switch and automatic molded case switch short circuit current ratings, See Digest page 7-33.

**Special Features**

For information on the following special features, please see the Supplemental and Obsolescence Digest.

- Powerlogic™ metering ◦
- Customer equipment space (NQ and NF) ◦
- Increased box depth ◦
- Increased gutters—top, bottom, and sides ◦
- Non-standard paint ◦
- Welded base channel ◦
- Type 1 gasketed ◦
- Type 2 drip hood ◦
- Type 3R/4/4X/5/12 stainless steel enclosure ◦
- Type 4X fiberglass enclosure ◦
- Stainless steel trim front ◦
- Padlockable hasp ◦
- Special locks (Corbin, Yale, Best) ◦
- Equal height boxes ◦
- Common trim to cover two equal height boxes ◦
- Panelboard skirt—hides conduits feeding a panelboard ◦
- Panelboard wireway—for terminating conduit in wireway endwall ◦
- Keyed mechanical interlocking of two or more circuit breakers (I-Line and QMB) ◦
- Motor operators (I-Line only)
- Panelboard interiors and special fronts to fit existing boxes
- A standard panelboard box has one blank endwall and one with knockouts. Blank endwalls or knockouts in both endwalls are also available ◦

◦ Supported by the Panelboard Product Selector.

- ▲ For shown circuit breakers rated less than this maximum voltage, the indicated short circuit current rating also applies, but at the voltage rating of the circuit breaker
- Short circuit tests are conducted at 100-105% of the maximum rated voltage of the panelboard.
- ◆ Suffixes HID, and SWD may also be applied to the applicable branch circuit breakers shown above. Suffix SWN may not be applied in combination with LC main breakers.
- ★ Where QO (B) circuit breakers are shown above, QO (B) H, QO (B) VH, and QO (B) QOH (B) circuit breakers may also be used.
- ▼ Where QO (B) GFI circuit breakers are shown above, QO (B) EPD and/or QO (B) EPE circuit breakers may also be used. QO-EPE only comes in 3 pole construction.
- △ Where QO (B) AFI circuit breakers are shown above, QO (B) CAFI circuit breakers may also be used.
- To achieve selective coordination, the rating of the DJ main circuit breaker must be at least two times greater than the ampere rating of any branch circuit breaker.
- ◇ For complete series ratings for Delta Systems please reference NQ/NQM Panelboards Information Manual 80043-712-06.

- ▲ For shown circuit breakers rated less than this maximum voltage, the indicated short circuit current rating also applies, but at the voltage rating of the circuit breaker.
- Short circuit tests are conducted at 100–105% of the maximum rated voltage of the panelboard.
- ◆ Suffixes HID, SWD, and SWN may also be applied to the applicable branch circuit breakers shown above. Suffix SWN may not be applied in combination with LC main breakers.
- ★ Where QO (B) circuit breakers are shown above, QO (B) H, QO (B) VH, and QO (B) H (B) circuit breakers may also be used.
- ▼ Where QO (B) GFI circuit breakers are shown above, QO (B) EPD circuit breakers may also be used.
- △ To achieve selective coordination, the rating of the DJ main circuit breaker must be at least two times greater than the ampere rating of any branch circuit breaker.

Table 9.197: NQ SurgeLogic SurgeLoc Plug-on SPD▲■

## Integrated Power and Control Solutions Equipment Overview

For over 30 years, the Schneider Electric Integrated Power and Control Solutions (IPaCS™) business has been providing integrated equipment solutions for retail construction, commercial, and industrial projects. The Square D™ brand IPaCS family of integrated equipment combines electrical distribution, building controls, and automation into a single, factory-assembled and pre-wired enclosure/lineup. Our innovative, cost-effective, integrated solutions save valuable floor space, shorten construction cycle times, and reduce installation and material handling costs.

### Modular Panelboard System—Pre-Engineered Solution

The Modular Panelboard System (MPS) is tailored to customer specifications and may include panels, transformers, and lighting control equipment. Special Powerlink™ lighting control and column-width panel interiors are available. Additional options include power and control cable wiring, contactors, terminal blocks, surge protective devices (SPDs), equipment spaces, and power metering/monitoring solutions. Seismically qualified MPS sections are also available.

Tailored to customer specifications, MPS sections are:

- 86 in. (2184 mm) high,
- 9.5 in. (241 mm) deep, and
- vary in width depending on customer specifications

### Integrated Power Center—Custom-Designed Solution

For more complex applications, the Integrated Power Center (IPC) allows for the integration of a variety of components, including electrical distribution equipment, HVAC controls, lighting controls, power quality and power conditioning products, SPDs, building management systems and power metering/monitoring solutions. As with all IPaCS integrated solutions, the IPC is designed to meet applicable codes and standards and is available as seismically qualified. Factory-assembled, pre-wired (based on shipping splits), and tested in a controlled environment, IPC sections are:

- 84 in. (2134 mm) high,
- 10.5 in. (267 mm) deep, and
- vary in width depending on customer specifications

### Standby Power Connection Solutions—UL Listed

The new family of Standby Power Connection Solutions are designed, tested, manufactured and listed to the UL standards providing you with a reliable solution to quickly and safely connect to a portable generator for standby power. The SPQ cam-lock (SPQCL) tap box design incorporates cam-lock receptacles for generator connection and the capabilities to be wired back to the standby power disconnect in the electrical distribution equipment. The SPQ lug-lug (SPQTB) tap box provides the capabilities to connect to a portable generator and the generator breaker cables using mechanical lugs in lieu of the cam-lock connectors.

The SPQ Cam-Lock Box is:

- 36 in. (915 mm) high
- 30 in. (762 mm) wide
- 16 in. (407 mm) deep

The SPQ Lug-Lug Box is:

- 36 in. (915 mm) high
- 30 in. (762 mm) wide
- 13 in. (330 mm) deep

### Submetering Integrated Power Center

The Submetering Integrated Power Center (IPC) is an ideal solution for multi-tenant or departmental metering applications within office towers, condominiums, apartment buildings, shopping centers, and other multi-user environments. The Submetering IPC combines the panel with breakers, the PowerLogic E4800 multi-circuit energy meter and the associated CTs in a factory-assembled and pre-wired solution saving significant space and on-site installation time. Submetering IPC sections are:

- 10.5 in. (267 mm) deep, and
- vary in width and height depending on the application

### Integrated Power Center 2

The newest addition to the family of Integrated solutions, the Integrated Power Center 2 (IPC2™) provides maximum flexibility to meet customers' specifications. Features include those found in the IPC and are provided in a free-standing enclosure that can be front and rear aligned when transformers are included. The IPC2 family is available as seismically-qualified. Enclosure options include NEMA 1, NEMA 1 with driphood and NEMA 3R. IPC2 sections are:

- 91.5 in. (2324 mm) high, and
- vary in width and depth depending on customer specifications

**NOTE:** Additional depths are available. Contact the Schneider Electric Integrated Power and Control Solutions business (1-800-868-9662) for more information.)

### Integrated Power Center 2 Transformer Combo

Ideally suited for projects having both 480Y/277V and 208Y/120V requirements. Available as a stand-alone solution or can be incorporated into an MPS, IPC or IPC2 lineup. The standard 42" wide x 24" deep footprint will decrease space requirements by 40% or more. A typical IPC2 Transformer Combo includes two panels in the upper cells and a transformer in the bottom cell. Other upper cell options include contactors, individually mounted circuit breakers, ATS's, equipment spaces and power metering/monitoring solutions. The IPC2 Transformer Combo is available as seismically qualified. Enclosure options include NEMA 1, NEMA 1 with driphood and NEMA 3R. IPC2 Transformer Combo sections are:

- 91.5 in. (2324 mm) high, and
- vary in width and depth depending on the transformer kVA

Additional savings are realized on installation, material costs and material handling, as shown in the table below.

**Table 10.1: IPC2 Transformer Combo—Estimated Savings ▲**

	Stick-Built	Transformer Combo	Savings Realized
<b>Estimated Installation Hours</b>	26–32	3–6	23–26
<b>Materials</b>	Associated pipe, wire and fittings	—	Associated pipe, wire and fittings
<b>No. of Pieces Handled</b>	20–30	1	19–29

▲ Based on an NF 480 V panel, 75 kVA transformer, NQ 240 V panel installation.

The IPC2 Transformer Combo has been recognized by the electrical industry by winning the following awards:

- 2006 INNOVATION Award given by the *Electrical Contracting Products* magazine
- 2006 Product of the Year Gold Medal Award given by the *Consulting/Specifying Engineer* magazine

## Modular Panelboard System

**Modular Panelboard System**

The pre-engineered Modular Panelboard System (MPS) bundles electrical distribution equipment into a single factory-assembled and wired integrated system. This approach replaces the traditional method of independently mounting each panelboard and lighting control system. MPS allows for the integration of a variety of components including:

- Panelboards: I-Line, NF, NQ, and Column-width
- Surge Suppression: SPD integral to panel and/or separately mounted
- Lighting Controls: Powerlink™ or lighting contactors
- Monitoring/Metering: Powerlogic™ power meters, circuit monitors, branch circuit monitoring, and system display meters

Equipment spaces including factory-installed lighting contactors are available in three configurations:

1. Unwired: Mounted in cell only
2. Line side wired: Line side of each pole is wired to a branch circuit breaker
3. Fully wired: Line side of each pole is wired to a branch circuit breaker, load side of each pole is wired to a terminal block

Built on a panelboard platform, Modular Panelboard System sections are NEMA 1-rated and meet the requirements of UL 67. Individual MPS configurations include panel sections in full-height, stacked or side-by-side arrangements. Individual sections measure:

- 86 in. (2184 mm) high
- 10–44 in. (254–1118 mm) wide
- 9.5 in. (241 mm) deep

**MPS Interior**

Typical applications for MPS equipment include:

- Restaurants / Food service
- Office buildings / Public buildings
- Warehouses
- Schools / Universities

## Integrated Power Center

The custom-designed Integrated Power Center (IPC) combines electrical distribution equipment and building management controls into a single factory-assembled and wired integrated system. IPC has much greater design flexibility for producing a fully customized solution integrating a variety of distribution and control components, including:

- Panelboards: I-Line, NF, NQ, and Column-width
- Surge Suppression: SPD integral to panel and/or separately mounted
- Lighting Controls: Powerlink™ or lighting contactors
- Monitoring/Metering: Powerlogic™ power meters, circuit monitors, branch circuit monitoring, and system display meters
- Power quality and power conditioning
- Building automation
- HVAC controls

Equipment spaces including factory-installed lighting contactors are available in three configurations:

1. Unwired: Mounted in cell only
2. Line side wired: Line side of each pole is wired to a branch circuit breaker
3. Fully wired: Line side of each pole is wired to a branch circuit breaker, load side of each pole is wired to a terminal block

Integrated Power Centers are NEMA 1 rated and meet the requirements of UL 891. As with all integrated solutions, IPCs are shipped to the site fully assembled, completely pre-tested and ready-to-install. Individual IPC configurations include panel sections in full height, stacked, or side-by-side arrangements. IPC sections measure:

- 84 in. (2134 mm) High
- 10.25 (260 mm) Deep
- Widths vary, depending upon customer specifications

Typical applications for IPC equipment include:

- Retail stores / Grocery stores
- Office buildings / Public buildings
- Shopping malls / Strip malls
- Schools/Universities
- Restaurants / Food service
- Hotels/Motels
- Warehouses
- Equipment rooms

**Integrated Power Center**

**IPC Interior**

## MPS and IPC Layout, Lead Time, and Pricing

Contact your local Schneider Electric representative or distributor.

## MPS and IPC Shipping

MPS and IPC lineups are shipped factory-assembled and pre-wired. Customers may specify single- or multiple-section shipping splits (some limitations apply). In addition, lineups may be ordered with or without factory-installed power cables.

*New!*

**Standby Power Connection Solutions**

The Standby Power Quick-Connect (SPQ) Tap Box provides a reliable solution to quickly and safely connect to a portable standby power generator. Two versions of the SPQ Tap Box have been designed and tested to the required UL standard and offer a wider range of solutions for our customers. All SPQ Tap Boxes are NEMA 3R-rated.

SPQ Cam-Lock Tap Box

SPQ Lug-Lug Tap Box

**SPQ Cam-Lock Tap Box**

- UL listed - UL 1008 SB
  - NEMA Type 3R enclosure (can be used for NEMA Type 1 installations)
  - Lockable door for safety and control access
  - Mechanical lugs to standby power disconnect
  - Color-coded cam-lock connectors for generator connection
  - Hinged bottom access door for cam-lock connection
  - Barriers over mechanical lugs for safety
  - Application:
    - 400 A and 600 A available
    - 240 V and 480 V versions available
    - Three-phase + neutral + ground
- **SPQCL204RS** – 400 A, 208Y/120 V 3-phase, 4-wire + ground wire
  - **SPQCL404RS** – 400 A, 480Y/277 V 3-phase, 4-wire + ground wire
  - **SPQCL206RS** – 600 A, 208Y/120 V 3-phase, 4-wire + ground wire
  - **SPQCL406RS** – 600 A, 480Y/277 V 3-phase, 4-wire + ground wire

**SPQ Lug-Lug Tap Box**

- UL listed—UL 1773 (cUL listed also)
  - NEMA Type 3R enclosure (can be used for NEMA Type 1 installations)
  - Lockable door for safety and control access
  - Mechanical lugs to standby power disconnect
  - Generator connection lugs rated for Type W cable
  - Application:
    - 400 A and 800 A available
    - 600 V maximum
    - Three-phase + neutral + ground
- **SPQTB604RS** – 400 A, 600 V max. 3-phase, 4-wire + ground wire
  - **SPQTB608RS** – 800 A, 600 V max. 3-phase, 4-wire + ground wire

*New!*

**Submetering Integrated Power Center**

The Submetering Integrated Power Center (IPC) is an ideal solution for multi-tenant or departmental metering applications. It combines the ability to meter multiple feeder breakers inside a pre-wired enclosure. The Submetering IPC offers significant space and labor savings by replacing individually enclosed, mounted, and wired panels and metering components and providing an integrated solution in one enclosure/lineup including:

- Panelboards
- PowerLogic™ E4800 Multi-Circuit Energy Meters and associated CTs
- Surge Suppression
- Factory-installed wiring between components

Submetering IPC width and height dimensions vary depending on the application. All sections are 10.5 in. (266.7 mm) deep.

Typical applications for Submetering IPC equipment include:

- Office towers
- Condominiums
- Apartment buildings
- Shopping centers
- Other multi-user environments
- Configurations with 2-PowerLogic E4800 meters plus Ethernet switch when required based on the number of metered points

Submetering Integrated Power Center

**Integrated Power Center 2**

The Integrated Power Center 2 (IPC2™) provides maximum design flexibility. In addition to the features found in the Integrated Power Center (IPC), IPC2 lineups are free-standing enclosures that can be front and rear-aligned. IPC2 has the ability to incorporate:

- Panelboards: I-Line, NF, and NQ
- Transformers: 300 Kva (max), EE
  - K-rated and HMT also available; may limit max kVA size of transformer
- Individually mounted circuit breakers
- Surge Suppression: SPD integral to panel and/or separately mounted
- Automatic Transfer Switch: Open type 400 A 3-pole maximum including a variety of options
- Lighting Controls: Powerlink™ or lighting contactors
- PowerLogic™ Monitoring / Metering: power meters, circuit monitors, branch circuit monitoring, and system display meters
- Building Management Systems

As a stand-alone solution, the IPC2 family provides the flexibility to enter and/or exit the section from either the top or bottom. IPC2 is offered in a variety of widths and depths:

- 24–48 in. (610–1219 mm) Wide
- 24–36 in. (610–915 mm) Deep

Typical applications for IPC2 equipment include:

- Schools/Universities
- Office buildings
- Data centers
- Industrial facilities
- Casinos
- Hotels
- Any project with panels and transformers

**IPC2 Layout, Lead Time, and Pricing**

Contact your local Schneider Electric representative or distributor.

**IPC2 Shipping**

IPC2 lineups are shipped fully assembled and ready-to-install. Customers may specify single- or multiple-section shipping splits (some limitations apply). In addition, lineups may be ordered with or without factory-installed power cables.

Integrated Power Center 2

10 INTEGRATED POWER AND CONTROL SOLUTIONS (IPACS)

**IPC2 Transformer Combo**

**Integrated Power Center 2 Transformer Combo**

For projects having both 480Y/277 V and 208Y/120 V requirements, the Integrated Power Center 2 (IPC2) Transformer Combo is the perfect solution. One of the most popular members of the IPC2 product family, the IPC2 Transformer Combo has been recognized by the industry multiple times for its innovative design.

As a stand-alone solution, the IPC2 Transformer Combo is appropriate when panelboards and transformers are installed in close proximity to each other. It provides the flexibility to enter and/or exit the section from either the top or the bottom. Catalog numbers have been created for some of the more typical configurations (see Table 10.2).

All IPC2 sections can be close-coupled to QED switchboard, MPS, and IPC products. Enclosure options for IPC2 include NEMA 1, NEMA 1 with driphood, and NEMA 3R-rated, and all meet the requirements of UL 891. These sections are also seismically qualified to meet IBC and ASCE7 requirements.

**Transparent Ready™ Equipment**

Switchboards and switchgear with Powerlogic™ circuit monitors and Web-enabled ethernet communication devices are part of the Transparent Ready power equipment family from Schneider Electric.

When specified as Transparent Ready, the power equipment is provided with a factory- configured “plug and play” communications system that allows the authorized user access to equipment status and monitoring information using only a standard Web browser. Ask your local Schneider Electric representative for details about Transparent Ready power distribution equipment.

## Power-Style QED-2 Switchboards (UL Listed)

QED-2 Switchboard

For solutions that bring people, products, and information together, Square D™ brand Power-Style QED-2 low voltage switchboards from Schneider Electric are built to last and feature design innovations that make these products easier to install and maintain. Supported by one of the largest distributor, sales, and service organizations in the industry, QED-2 switchboards are readily available to meet the needs of contractors, consultants, and end-users.

### Q = Quality—Built to Last

As one of the most trusted names in electrical distribution, Square D™ brand QED-2 switchboards are designed with the highest standards of quality. From sturdy frames, securely fastened thread-forming screws, and standard bolted, base channels, users will see the difference during installation, operation, maintenance, and expansion projects.

### E = Efficient and Innovative Designs

In 2010, Schneider Electric launched QED-2, Series 2 switchboard designs. Series 2 designs represent the next generation of our QED-2 switchboard offering, with new features based on extensive customer feedback. From improved branch neutral and ground bar access, to enhanced instrument compartments, Series 2 designs provide easier access for performing equipment installation and maintenance procedures.

QED-2 switchboards feature Schneider Electric's unique I-Line™ plug-on connections in group-mounted construction. With the I-Line design, a screwdriver is the only tool required to firmly ratchet the line end of a molded-case circuit breaker directly onto the I-Line bus assembly. This plug-on design allows quick installation and mounting flexibility of circuit breakers up to 1200 A.

### D = Delivery—Ready When You Are

To meet tight project schedules and budgets, our Square D™ brand QED-2 switchboard offering brings together standard designs for the most frequently requested ratings and options, providing immediate pricing for quick shipments from 11 to 30 business days.

## Features

- QED-2 Switchboards are designed, listed, and built to UL 891
- Switchboard ratings through 6000 A, 200 kA; higher amperages available
- Front accessible load connections
- Front and rear alignment standard
- Cable, busway, transformer, or remote QED switchboard incoming fed
- Hot or cold sequence utility metering
- Thermal-magnetic, PowerPact™ electronic, or Masterpact™ NW stored energy fixed or drawout circuit breakers used as mains and feeders
- Group-mounted circuit breaker and fusible switch mains and feeders
- Fixed-mounted fusible switch mains and feeders
- Powerlogic customer metering, including option for custom communications capability and interwiring
- Networked communications capabilities provide direct access to energy management at main and feeder level
- Internally-mounted Surgeloc™ surge protective devices
- Quick Connect Generator option available
- Main devices in six sub-division or single main configurations
- Main and branch devices in single section configuration
- Multiple individual devices in single section configurations
- Custom engineering, including main-tie-mains, multiple sets of thru-bus, reduced heights, and engineered houses

**Power-Style QED-6 Switchboards (UL Listed)**

**Masterpact™ NW and NT, and PowerPact™ H, J, and D Circuit Breakers**

The QED-6 switchboard is designed to provide excellent distribution, protection, and power quality management in commercial electrical equipment. The circuit protection components of the switchboard are the Masterpact NW circuit breakers in 800–6000 A frame sizes, Masterpact NT circuit breakers in 800–1200 A frame sizes, and PowerPact H, J, and D circuit breakers in 15–600 A frame sizes. These circuit breakers deliver maximum system uptime, system selectivity, ease of maintenance, and reliable circuit protection.

QED-6 switchboard features include: Masterpact NW UL 489 Listed circuit breakers for main and feeder devices, Masterpact NT UL 489 Listed circuit breakers for feeder devices, PowerPact H, J, and D UL 489 Listed circuit breakers for feeder devices, and a wide range of designs and options. Highly flexible drawout/plug-in circuit breakers can meet a wide variety of power distribution requirements. Choices include plug-in or drawout construction in PowerPact H, J, and D circuit breakers, and optional prepared drawout or plug-in spaces that are equipped with all specified control functions. This capability allows quick additions for load upgrades.

- QED-6 switchboards are designed, listed, and built to UL 891; Masterpact and PowerPact circuit breakers are designed, listed, and built to UL 489
- Circuit breakers are individually mounted, rear connected; Masterpact NW and NT circuit breakers are drawout; PowerPact H, J, and D breakers are plug-in as standard, drawout as an option
- Family of field installable and upgradeable Micrologic™ trip units with optional Powerlogic™ data communications features
- Switchboard ratings up to 150 kA short-circuit current rating for services 1600–6000 A at 480 V and 100 kA at 600 V
- Up to (12) 250 A PowerPact H and J circuit breakers in a single 30-inch wide section
- Up to (8) 600 A frame PowerPact D or (8) 1200 A frame Masterpact NT circuit breakers in a single 30-inch wide section
- Flexible branch circuit breaker locations: Masterpact NW and NT and PowerPact H, J, and D circuit breakers can be mixed in a single 30-inch wide section (15–2000 A)
- Compartmentalization: separate compartments for circuit breakers, bussing, and load cabling
- Available in 54-, 60-, 72-, and 80-inch deep construction
- Available in NEMA 3R outdoor walk-in enclosures
- Masterpact and PowerPact circuit breakers are field maintainable

QED-6 switchboards are reliable power protection equipment when working with telecommunication facilities, e-business servers, or mainframes that perform critical business transactions. These types of facilities cannot afford downtime.

QED-6 rear-connected switchboards are designed as standalone switchboards or as an integral part of the low voltage equipment lineup in a user's power unit substation.

**Specify QED-6 Switchboards**

When drawout construction is required for quick circuit breaker changeout; system requirements call for circuit breakers to close within five cycles; stored energy circuit breakers are required; front access to control wires is desired; ease of installation, maintenance, and upgrade of circuit breaker compartmentalization is required; system integrity and segregation of circuit breaker compartments from bus and cable compartments is required; equipment isolation is required.

**Benefits/Values of Circuit Breaker Performance**

Masterpact NW and NT circuit breakers are designed to provide maximum protection and reliable operation with a long service life. They exceed all UL 489 endurance testing requirements and are certified to a minimum of 10,000 operations through the 3000 A frame.

QED-6 Switchboard (Class 2746)

**System Coordination**

Short-time ratings are high, giving users excellent system coordination and selectivity with downstream breakers.

**High Short-Circuit Current Ratings (SCCR)**

Up to 200 k AIR at 240 V, 150 k AIR at 480 V, and 100 k AIR at 600 V, which allows customers to design systems with high fault current and paralleling schemes.

**Arc Flash Limiting (LF) Feeder Breakers**

High speed operation of Masterpact NW and NT circuit breakers (150 k AIR at 480 V) helps reduce arc flash incident energy (cal/cm<sup>2</sup>) on downstream equipment.

**Ease of Installation and Maintenance**

Thru-the-door construction, an easy to operate drawout mechanism, and front access to all control wiring make this equipment easy to install, maintain, and upgrade. Load connections in the cable compartment are easily accessible in the rear of the switchboard. Remote racking of the Masterpact NW circuit breaker is also available with the optional remote racking tool, which, if required, is field installable.

**Ability to Upgrade**

UL Listed, field-installable accessories include: motor operators, shunt trips, under voltage devices, trip units, and communication modules for trip units. Manually operated circuit breakers are field convertible to electrical operation.

**Open Communication System**

The Micrologic trip units in Masterpact NW and NT circuit breakers use the Modbus™ protocol. This is a widely accepted protocol, which allows QED-6 to be integrated into new or many existing communication systems.

**Adaptable**

Drawout and bolt-in circuit breakers, front access control wiring, and expandable lineups are quickly adaptable to changing load and control requirements.

**Expandable**

Masterpact NW and NT circuit breakers have many control termination points, giving the equipment extensive flexibility and expandability for sophisticated control schemes.

**Power-Style Commercial Multi-Metering Switchboards (UL Listed)**

- Designed, built, and listed to UL 891
- Lever bypass and EUSERC non-lever bypass
- Hot or cold sequence metering—EUSERC, NEMA, LOCAL
- Front and rear alignment standard
- Switchboard ratings through 4000 A, 100 kA
- Meter sections in either three- or six-socket section configuration
- Tenant mains either circuit breaker or fusible
- 60–200 A without lever bypass with self-contained meter sockets, 5- or 7-jaw, ring type and test block where required
- 60–200 A lever bypass with self-contained meter sockets, 7-jaw, ringless
- Factory-installed devices with completely wired from meter socket to disconnect
- Provisions for adding future tenants available, as well as future sections
- Sections in either NEMA 1 or NEMA 3R construction
- For use on 120/240 V, 120/208 V, and 277/480 V systems
- Integrated, front-accessible wireway for top exiting load cables
- Customer access area for top exiting load cables

Classes 2755, 2756

**Table 11.1: Circuit Breaker Selection**

Rating (A) (Frame)	Circuit Breakers
150–250	PowerPact H, J
400–600	PowerPact D
800–1200	Masterpact NT
800–6000	Masterpact NW

**Speed-D SB/SF Switchboards (UL Listed)**

- UL Listed
- Hot sequence utility compartment per EUSERC requirements
- Two types:
  - Utility–Service disconnect–distribution
  - Utility–Up to six service disconnects
- Single service disconnect, either circuit breaker or fusible rated 400, 600, or 800 A with either type of distribution interiors, NQ up to 240 Vac, I-Line™ through 480 Vac
- Six service disconnects, group-mounted fusible, QMB/QMJ, 30–400 A; utility compartment—400, 600, and 800 A
- Meter doors can be 15 inches high with one meter socket and test block, or 30 inches high with two meter sockets and test block
- Meter sockets can be 6-, 8-, 13-, or 15-jaw meter sockets with test block, based on application
- Accessories include:
  - Underground pull sections with and without lug landing
  - Loadside wireway
  - Bus links for donut-type current transformers
  - Double padlock hasp attachments
  - Plug-on distribution panel
  - Subfeed circuit breakers
- Full height add-on I-Line distribution section
- Stand-alone I-Line distribution section

EUSERC UCT,  
Single Main Circuit Breaker with  
I-Line Distribution Panel

EUSERC UCT,  
Fusible Multiple Mains

**Application**

Suitable for use as service entrance equipment on ac systems. Sections contain metering compartment, barriers, main disconnects, distribution panel, neutral bus, and grounding provisions.

**Metering**

C/T compartment with two 15-inch blank meter doors. (Order doors with meter socket from Table 11.6 on page 11-5.) Incoming cable lugs are for top feed with one twin conductor 2 AWG–600 kcmil lug per phase and neutral, suitable for aluminum or copper cables. Optional single conductor lug is available. Refer to Table 11.7 on page 11-5.

**Mains**

Main circuit breaker types are either LH or MJ. Main fusible device is supplied with Class T fuses. Multiple main devices use plug-on fusible switches.

**Branches**

NQ distribution bus is rated 400 A and provides mounting space for QO™/QOB Type (150 A maximum) circuit breakers. Panel provides space for mounting 42 single pole circuit breakers. One or two individually mounted 225 A maximum circuit breakers can be added with bus connectors. (Order subfeed circuit breakers from Table 11.8 on page 11-5.)

I-Line™ distribution bus is rated 400, 600, or 800 A and will accept 27 inches of I-Line circuit breakers on the left side with a maximum frame size of “J”. The right side will accept either a QO plug-on distribution panel (240 V only) or LA or LH I-Line circuit breaker.

**Enclosure**

Totally enclosed front accessible with ANSI 49 gray baked enamel finish. Dimensions are 90 in. (H) x 36 in. (W) x 14 in. (D) for indoor and 90 in. (H) x 36 in. (W) x 24.5 in. (D) for outdoor enclosures.

### Power-Zone™ 4 Low Voltage Switchgear with Masterpact™ Circuit Breakers

Power-Zone 4 Low Voltage Switchgear (Class 6037)

Square D™ brand Power-Zone™ 4 low voltage, metal-enclosed, drawout switchgear is designed to provide superior electrical distribution, protection, and power quality management. The prime components of the switchgear are the Masterpact™ NW and NT ANSI rated circuit breaker. Power-Zone 4 switchgear is designed to maximize the functionality of the Masterpact circuit breakers, which, in turn, deliver maximum uptime, system selectivity, ease of maintenance, and reliable circuit protection. All of these features are packed into the smallest footprint available for low voltage drawout switchgear.

- Power-Zone 4 is designed and built to ANSI® C37.20.1 and is Listed to UL 1558
- Masterpact NW and NT drawout low voltage power circuit breakers are designed and built to ANSI C37.13 and C37.16. Listed to UL 1066
- Short-circuit current rating up to 200 kA at 240 V and 480 V without fuses
- High short-time withstand ratings up to 100 kA for 1 second, minimum
- Arc flash limiting (L1F) Masterpact NW feeder breakers available in 800, 1600, and 2000 A ratings
- Family of field installable and upgradeable Micrologic™ trip units with optional Powerlogic™ data communications features
- Power-Zone 4 switchgear can offer optional data communications capability
- Smallest equipment footprint available in this product class
- Front access to all control and communications wire connections
- Bolted copper bus provided as standard (up to 6000 A maximum)
- Large rear cable compartment pull area allowing maximum room for power cables
- Horizontal bus provision for future equipment expansion
- System designed for maximum uptime with low maintenance
- Modular circuit breaker designed for easy addition of control accessories
- Available in NEMA 3R outdoor walk-in enclosures

Masterpact NW circuit breakers are available in various levels of interrupting ratings from 42–200 kA at 480 V and 130 kA at 600 V.

The Masterpact NT circuit breaker is available in an 800 A frame size and 42 kA at 480 V interrupting rating. Up to 8 Masterpact NT circuit breakers can be mounted in a 30-inch wide section. (Not available for 600 V.)

Circuit breakers of like frame sizes and interrupting ratings are interchangeable.

### Micrologic™ Trip Units

A modern family of field-installable trip units is available with Masterpact NW and NT circuit breakers. The circuit breaker overcurrent protection consists of a microprocessor-based tripping device that requires no external power source. The complete tripping system has three main components: the air-core sensors, the trip device (with rating plug), and the trip actuator. The microprocessor-based trip unit uses true RMS current level sensing.

The Metering and Communications system is used in conjunction with Micrologic Type A, Type P, and Type H trip units (see Digest pages 7-47 and 7-48) for the Masterpact NW and NT circuit breakers. Modbus™ industry standard data communications allow this system to replace discrete meters, multiple transducers, analog wires, and analog-to-digital conversion equipment. Extensive information can be transmitted over a single communications cable to a Powerlogic system display, a personal computer, programmable logic controller, or other host system.

Basic circuit information, such as amperes, can be monitored using Micrologic Type A trip unit. Circuit breaker remote operation is available using the Micrologic Type P and Type H trip units with Powerlogic functionality. In addition to its metering capabilities, the Micrologic trip unit system is available with optional status inputs and relay outputs for monitoring discrete contacts and remote control of devices by way of the data communications channel.

Micrologic trip unit metering functions include:

- Amperes and volts
- Frequency
- Power
- Power demand
- Energy
- Energy demand
- Power factor
- Power quality measurements
- Communications
- Waveform capture
- Data logging
- Programmable contacts
- Current unbalance
- Over/under voltage
- Over/under frequency
- Voltage unbalance
- Phase sequence
- Reverse power
- Long time imaging
- Contact wear indicator
- Masterpact circuit breaker maintenance information

MiniBreak™ Switch Enclosure with Door (Class 6042)

MiniBreak Switch Interior Showing Fuses (Class 6042)

Listed Metal-enclosed Interrupter Switchgear

**MiniBreak™ Compact Height Switches—  
5.5 kV, 200 A**

The Square D™ brand MiniBreak compact height switch enclosure is only 66-inches high and contains a single 3-pole load interrupter switch, rated 5.5 kV and 200 A. Enclosures are free-standing and suitable for both indoor (NEMA 1) and outdoor (NEMA 3R) applications. These switches are available unfused or with provisions for Square D™ brand current-limiting fuses rated from 10E A to 200E A. Factory-installed accessories include an auxiliary switch, strip heaters, and provisions for a “lock open” only key interlock. The door is mechanically interlocked with the switch operating handle. Set screw cable lugs for #14 solid—2/0 stranded aluminum or copper cable are provided for two line and one load connections. **Fuses are not furnished with this equipment. For fuse information and pricing, see Table 11.12. The Fused switches and many of the fuses listed in Table 11.12 are available from stock.**

**Table 11.10: Ratings**

### HVL/cc Metal-Enclosed Load Interrupter Switchgear—Full Range

Square D™ brand HVL/cc metal-enclosed load interrupter switchgear provides switching, metering, and interrupting capabilities for medium voltage electrical power distribution systems and is designed and tested per applicable ANSI/IEEE and NEMA standards.

Made up of modular units, the HVL/cc is easy to expand. Two main bus positions allow future extensions and connections to existing equipment.

HVL/cc switchgear is available in either single or multiple bay units. The design is compact, with front accessibility.

The HVL/cc switch can be equipped with either an over-toggle mechanism (OTM), which is standard, or an optional stored energy mechanism (SEM). An option with both mechanisms is the Fuselogic™ system. The Fuselogic system offers fuse tripping (with SEM) to provide protection against single phasing loads when a fuse has blown. It also has a mechanical interlock to prevent inadvertent switching until fuses have been installed or blown fuses have been replaced.

The HVL/cc enclosure is designed for front access only and can be positioned against walls, in small rooms or in pre-fabricated buildings. The small footprint can result in considerable cost savings from the reduction of building or room sizes.

#### Switch Standard Features

- Switch Positions: Closed, open, and internally grounded (optional) (connects switch contacts to ground)
- Enclosure: Epoxy
- Medium: Sulphur hexafluoride
- Maintenance: Maintenance free sealed for life
- Pressure:
  - 5.8 PSI (≤17.5 kV)
  - 22 PSI (25.8–38 kV)
- View ports to show switch blade position

#### Options

- Internal ground switch: Has full fault making capability
- Fuselogic™ system
- Infrared viewing windows
- Class I, Division 2
- Fast auto transfers
- Duplex configurations
- Protective relaying
- Powerlogic™ metering
- 20-inch or 29.5-inch wide enclosures

### Fuselogic™

Fuselogic is a protection system that provides the ultimate in medium voltage fuse protection. This patented system utilizes Square D™ brand current-limiting fuses with mechanical sensors that function without any auxiliary power requirements. Several combinations of Fuselogic functions can be combined to provide simple blown fuse indication contacts with mechanical lockout to anti-single phasing protection. Anti-single phasing requires the optional stored energy mechanism (SEM). Fuselogic is available on both HVL/cc and HVL switches.

#### Switchgear Standard Features

- Compartments: Switch, bus, fuse/cable, mechanism, and optional low voltage/control
- 11 gauge steel enclosure
- Epoxy insulators
- Fuse/cable access panel interlocked with switch
- Front access only
- Animated mechanism mimic bus
- Padlocking open or closed provision
- Top or bottom cable entry
- UL/CUL Listed
- Live line indicators on all incoming switch bays and outgoing feeder circuits
- Cable lugs included for one cable per phase
- Tin plated copper bus for lineups

**Table 11.15: Surge Arresters**

5 kV Indoor N1  
Top Cable In/Bottom Cable  
Out Switch in Position A

**HVL/cc Switchgear—Quick Ship Program—  
5–15 kV, 600 A**

The HVL/cc quick ship program provides basic fused and unfused load interrupter switch configurations for standalone or transformer primary applications. The Quick Ship program offers faster delivery, but with fewer options.

Three-pole, 600 A individual HVL/cc switches are available in free-standing indoor (NEMA 1) enclosures. These switches are available unfused or with provisions for Square D™ brand current-limiting DIN/E fuses. Factory optional accessories include auxiliary bays, main bus, auxiliary switches, extra cable terminating lugs, and distribution class surge arresters. The fuse access panel is mechanically interlocked with the switch mechanism. Key interlocks are not an available option with Digest-listed HVL/cc switches. (1) Set screw type lugs for (2) #2–350 kcmil copper or aluminum cables are provided for line and load connections. **Fuses are not furnished with this equipment. For fuse information and pricing refer to page 11-10.**

**Provisions for Future Expansion**

All “single” HVL/cc switches have provisions for future expansion on either side.

Order main bus kits for copper 600 A bus. Include sketch for factory-assembled parts or lineups.

**600 A Single Switch Unfused**

Manual over-toggle mechanism, no grounding switch  
Includes (1) set screw for (2) #2–350 kcmil Cu or Al conductors per phase

Application A = Top entry (incoming—cable or main bus), bottom exit (load—cable or main bus)

Application B = Bottom entry (incoming—cable or main bus), top exit (load—cable or main bus)

**NOTE:** Switches with transformer connections are painted ANSI 49. Standalone switches are painted ANSI 61. Transformer connections in HVL/cc switches are based on standard Square D™ brand transformer connections. If these switches are used to connect to other manufacturers' transformers, then connections must match standard Square D™ brand transformer connections. (Cable connections are furnished with the transformer.)

**General Purpose E-Rated Current-Limiting Fuses: Type DIN/E for HVL/cc Switches**

Integrated rating for 600 A HVL/cc switches with Square D™ brand DIN/E fuses listed below is 65 kA rms symmetrical amperes. (50 kA rms for 630 A fuse.)

Current-limiting fuses increase the integrated short-circuit current rating because of their energy-limiting capabilities. To increase the short-circuit current rating of the entire lineup of switchgear, current-limiting fuses must be used in the entrance sections.

**Ordering Information**

- Select switch catalog number based on fused or unfused and cable entry locations (top or bottom) from Table 11.16 or Table 11.17 on page 9.
- Select incoming line auxiliary bay from Table 11.18 or Table 11.19 on page 9, if required.
- Select main bus from Table 11.20 on page 9, if required.
- Select catalog numbers for factory modifications from Table 11.22 on page 9, if required.
- If fused, select DIN/E fuses from Table 11.25.

**Pricing Example**

Order indoor 600 A, 5 kV, HVL/cc switch with bottom incoming and bottom outgoing cables (1) #2 AWG per phase, (1) set 200E fuses, and (1) set 6 kV surge arresters.

**HVL Metal-Enclosed Load Interrupter Switchgear—Full Range**

HVL™ 5–38 kV Load Interrupter is the most popular ANSI-rated switchgear in its class in America. Among medium voltage interrupter switchgear, both the switch and the enclosure stand as industry benchmarks in the areas of design, manufacturing, and performance. Load interrupter switchgear must perform a number of critical functions in a unit substation - protecting equipment and disconnecting faulted lines and transformers. Designed and tested to the latest applicable standards, HVL has been engineered to provide superior protection for your distribution system.

HVL switchgear is available for various applications and configurations, including:

- Individual service entrance bays
- Multiple-bay lineups incorporating HVL load interrupters and optional Visi/Vac™ circuit interrupters
- Substation primaries

Square D™ brand metal-enclosed switchgear has become an industry standard for its better system performance, lower maintenance cost, easier system expansion, and reduced system expense.

A full range of ratings and options are available but not listed in this publication. Contact your nearest Schneider Electric sales office or your local Schneider Electric distributor.

**Standard Features**

- 11 gauge steel enclosure
- Direct drive mechanism
- Permanently attached operating handle
- Visible isolation viewing window
- Mechanical interlocked fuse access door
- Provision for padlock and key interlock
- Highly flexible design
- ANSI 61 paint

**Options**

- Outdoor construction
- Square D™ brand DIN-style current-limiting fuses
- Boric acid fuses
- Silver or tin plated copper bus
- 600, 1200, or 2000 A main bus
- Heat shrink insulated bus
- Motor operator
- Shunt trip
- Fuselogic™ tripping system
- Automatic load transfer schemes
- Roof bushings
- Key interlocks
- Surge arresters
- Utility metering bays
- Line selector switch
- Duplex switch
- Transformer connections
- Infrared windows for thermal scanning of connections

**Fuselogic™**

Fuselogic is a protection system that provides the ultimate in medium voltage fuse protection. This patented system utilizes the Square D™ brand current-limiting fuses with mechanical sensors that function without any auxiliary power requirements. Several combinations of Fuselogic functions can be combined to provide simple blown fuse indication contacts with mechanical lockout to anti-single phasing protection. Anti-single phasing protection requires the optional stored energy mechanism (SEM). Fuselogic is available on both HVL/cc™ and HVL switches.

**HVL Switchgear—Quick Ship Program—5 kV–15 kV, 600 A Features**

The HVL quick ship program provides basic fused and unfused load interrupter switch configurations for stand-alone or transformer primary applications. The Quick Ship program offers faster delivery, but with fewer options.

Three-pole, 600 A individual HVL switches are available in free-standing indoor (NEMA 1) or outdoor (NEMA 3R) enclosures. The switches used in these enclosures are UL Recognized and are listed under Category WIQG2 in File E140591(M). These switches are available unfused or with provisions for 3-inch diameter Square D™ brand current-limiting fuses or for boric acid fuses. Factory optional accessories include auxiliary switches, extra cable terminating lugs and distribution class surge arresters. The door is mechanically interlocked with the switch operating handle and provisions for key interlocks are standard. Set screw type lugs for one #2 solid—600 kcmil copper or aluminum cables are provided for line and load connections. Other standard features include a bolted enclosure with a viewing window, ground pad, and space heater (NEMA 3R only). Control power for heater must be from external source. **Fuses are not furnished with this equipment. For fuse information and pricing, refer to page 11-14. Switches are listed on pages 11-11 and 11-12, and many of the fuses listed on page 11-14 are available from stock.**

**Provisions for Future Expansion**

All "single" Digest switches have provisions for future expansion on either side. Order kits HVMB for top crossover copper 600 A bus and HVLC for line connections to the top bus. (Refer to the Factory Modifications table on page 11-13.) Include sketch for factory-assembled parts or lineups.

**HVL Switches for Power-Dry II™, Power-Cast II™, and Uni-Cast II™ Transformer Connections**

HVL switches can be configured for close coupling cable connections to listed dry type transformers for primary main switches of unit substations. These are listed in the tables below with current-limiting or boric acid fuses. Both single and duplex switch mains are included in this selection. Transformers are listed on page 14-20 and may not be suitable for close coupling. For transformer availability and specific configurations, contact your local Schneider Electric sales office. All connections in this digest are based on standard Square D™ brand transformer connections. If these switches are used to connect to other manufacturers' transformers, then connections must coordinate with standard Square D™ brand transformer connections. (Cable connections are furnished with the transformer.)

■ Includes fuse holder only. See table on page 11-14 for fuse refills.

**NOTE:** Switches with transformer connections are painted ANSI 49. Standalone switches are painted ANSI 61.

**Fuse Selection**

The rule of thumb method for selecting fuses for transformer protection is 1.33 times the self-cooled full load current of the transformer or the next higher fuse rating. Selection of the fuse is the customer's responsibility and should be based on transformer and system characteristics.

- **Maximum Fuse Size:**  
Maximum fuse size should be determined by comparing the fuse total clearing curve to the transformer damage curve. Contact Schneider Electric for transformer overload and short-circuit withstand capability.
- **Minimum Fuse Size:**  
Minimum fuse size shall carry the transformer magnetizing inrush current of 12 times full load amperes for 0.1 second.

**Table 11.38: Factory Modifications**

▲ Load side connected

**Standard Features**

- Switches for transformer primaries are cable connected only.
- Key interlocks must be ordered and coordinated by customer.
- Standard color is ANSI 61 for standalone units; ANSI 49 for switches connecting to transformers.
- If switches are purchased to coordinate with Square D™ brand transformers, composite drawings and shipment coordination will not be available.
- Switches are not designed for any special dimensions for retrofit purposes. For dimensions other than shown, contact your nearest Schneider Electric sales office or your local Schneider Electric distributor.

**Ordering Information**

1. Select switch catalog number based on fused or unfused and enclosure type.
2. Select catalog numbers for factory modifications from the table above.
3. If fused, select fuse from table on page 11-14.
4. Price switch and fuses separately. Switches are furnished with provisions only for current-limiting fuse or boric acid fuse.

**Pricing Example**

Price one (1) indoor (NEMA 1), 15 kV, 600 A switch with 80E SM-5S boric acid fuses and 10 kV distribution class surge arresters for a 7.62/13.2 kV grounded wye system.

Order:	Catalog No.	\$ Price

- S&C Boric Acid Fuses  
Type SM-5S fuses are manufactured by the S&C Electric Company. SM-5S has a 25.0 kA symmetrical short-circuit rating from 2.4 kV to 17.0 kV. For 16.5 kV ratings, only S&C boric acid fuses can be used.
- ◇ Cutler-Hammer - Westinghouse Fuses  
Type RBA-400 fuses are manufactured by Cutler-Hammer - EATON Corporation. RBA-400 has a 37.5 kA symmetrical ampere short-circuit rating from 2.4 kV to 4.8 kV and 29.4 kA symmetrical from 12 kV to 13.8 kV.
- ★ Caution—These fuses will not work for the MiniBreak. See page 11-7 for the appropriate MiniBreak fuses.
- ▼ Contact your Schneider Electric representative for current stock quantities.
- ◐ Price includes one set of three fuses, packed in a single box.

Typical IDO Configuration

**Recommended Configurations**

**D + O**  
Transformer protection + Outgoing line

**(I + D + O)**  
Incoming line + Transformer protection + Outgoing line

**(I + I + D + O)**  
Two Incoming lines + Transformer protection + Outgoing line

**New!** **DVCAS Switchgear for Wind Farm Applications**

DVCAS medium voltage (MV) switchgear from Schneider Electric is designed to meet the electrical switching, protection, and connection needs of wind farm applications up to 38 kV. Three different modules are available:

- Transformer protection module D
- Outgoing line module O
- Incoming line module I

For standard wind power applications, a maximum of four modules can be connected in various configurations to provide the most commonly used wind power functions.

DVCAS switchgear is designed, manufactured, and tested in accordance with the following standards:

- C37.20.3
- C37.54
- CAN/CSA C22.2 No.31-M89

**Transformer Protection Module D**

DVCAS switchgear module D provides transformer protection. Construction features include:

- Metal base frame
- Operating mechanism and relay compartment
  - disconnecting operating mechanism
  - operating mechanism of the circuit breaker
  - protection relay VIP
  - zero sequence current transformer CSH 30
- MV cable compartment
  - bushings for cable connection
  - Three CRc current sensors per phase
- Stainless steel, gas-tight tank
  - busbar system
  - three position disconnector
  - circuit breaker

**Outgoing Line Module O**

DVCAS switchgear module O functions as an outgoing line to a downstream wind generator. There are two medium voltage cables per phase. Construction features include:

- Metal base frame
- Voltage presence indicator
- MV cable compartment
  - bushings for cable connection
  - clamps for MV cable connection

**Incoming Line Module I**

DVCAS switchgear module I is a three-position switch-disconnector. It is recommended for the incoming line function from an upstream wind generator for the following reasons:

- Reduces downtime caused by faults
- Helps with fault detection
- Reduces interruptions due to maintenance work
- Improves energization works

Module I is always connected to module D on the right with single-phase, coupling bushings. Construction features include:

- Metal base frame
- Operating mechanism compartment
  - operating mechanism of the switch-disconnector
  - motor for the operating mechanism (optional)
- MV cable compartment
  - bushings for cable connection
- Stainless steel, gas-tight tank
  - busbar system
  - three position disconnector

**Table 11.41: Ratings**

Type	Rating	Type	Rating

## Masterclad™ Medium Voltage Metalclad Switchgear (UL Listed)

### The Reliability of a Quality Design

The quality of Square D™ brand Masterclad medium voltage metalclad switchgear stems from a design and manufacturing process that focuses on long-term switchgear performance with the highest degree of reliability.

Based on specific customer application needs, Schneider Electric engineers and technicians select the appropriate standard sections and bus configurations, with the ability to customize where needed. After the specified circuit breakers, instrument and control power transformers, relays, meters and other components are selected and approved. All are factory-assembled, wired, and tested as a complete assembly.

Listed Metalclad  
Switchgear

Table 11.42: Ratings

Nominal voltage (kV)	4.16		7.2		13.8				24.9	
Maximum voltage (kV)	4.76		8.25		15.0				27.0	
BIL (kV)	60		95		95				125

Close and latch rating (kA) (peak)	104	130	164	130	65	104	130	164	68	108

### Type VR Vacuum Circuit Breaker

The VR breaker is a horizontal drawout type designed to provide long life, reduced maintenance, and ease of handling. The Type RI advanced design motor-charged stored energy mechanism is a model of reliability with simplicity-with an operating life exceeding ANSI requirements. The VR circuit breaker is UL labeled and includes a permanently mounted manual charging handle.

### Switchgear Construction

- Floor mounted breaker racking mechanism
- Standard epoxy supports or optional porcelain supports
- Aluminum or copper main bus
- Indoor NEMA 1
- Outdoor NEMA 3R
- Walk-in
- Non walk-in

### Active, Arc-Resistant Arc Terminator™ Arc Extinguishing System

Active system detects and controls the effects of internal arcing faults. It complies with ANSI C37.20.7 requirements for arc-resistant switchgear for Type 1, Type 2B, and Type 2C enclosures.

#### Benefits

- Prevents pressure buildup
- Reduces release of toxic materials
- Eliminates need for reinforced switchgear
- Eliminates special requirements for buildings or plenums
- Minimizes equipment damage
- Reduces operating downtime

### Passive, Arc-Resistant Masterclad™ Medium Voltage Switchgear

This switchgear and all its components meet the IEEE C37.20.7 arc-resistant test guideline for Type 2B enclosures as well as all other applicable ANSI, UL, and CSA standards for metalclad switchgear.

#### Benefits

- 50 kA arc containment for 0.5 seconds
- Voltage ratings from 2.4 kV to 15 kV up to 3,000 A
- Type 2B construction, one- and two-high structures
- Custom exhaust plenum available

**Power-Zone Model III Package Unit Substations**

**General**

Power-Zone Model III package unit substations combine a primary switch, dry-type transformer, and I-Line™ distribution section into a single, compact unit. All components are engineered, manufactured, and tested by Schneider Electric. The substation is available with a UL listing.

The Model III is only 49 inches deep and 90 inches high, which allows the entire substation to pass through standard size doorways and narrow hallways.

The Model III is front accessible; the transformer taps are accessible from the side. For proper ventilation, a minimum distance of 12 inches should be maintained on the transformer side of the equipment.

Model III package unit substations are ideal for renovations and high rise applications requiring increased customer electrical demand as well as new construction requiring multiple zones and a small footprint.

**75–1000 kVA at 480 V; 75–500 kVA at 240 V**

Available with primary voltages of 2400–13800 V. Forced air cooling (AA/FA) provides an additional 33%. Features 220 °C insulation and 150 °C, 115 °C, or 80 °C temperature rise. Largest 80 °C or 115 °C rise unit available is 750 kVA.

The secondary circuit breaker distribution section may be equipped with an individually mounted secondary main breaker or an I-Line distribution panelboard. Branch circuit breakers from 15 A FY to PowerPact RLC 1200 A may be installed. PowerPact™ molded case circuit breakers M, P, and R frame are available with electronic trip units.

Additional options include CM 3000 and CM 4000 series circuit monitors, PM-800 series power meters, surge arresters, and I-Line plug-on unit with a SurgeLogic™ Surge Protective Device (SPD).

**Incoming Line Section**

Most Model IIIs are supplied with a Square D™ brand fused HVL/cc 600 A load interrupter switch. The HVL/cc offers the smallest footprint in the industry and is an exclusive sealed interruption type compartmentalized switch. Where switching and overcurrent protection are provided elsewhere, a full-height air-filled terminal chamber can be provided in place of the switch.

**Table 11.43: Primary Switch Ratings, Type HVL/cc**

Nominal Voltage	4.16	13.8
BIL	60	95
Continuous amperes	600	600
Interrupting amperes	600	600
Fault close (kA asymmetrical)	40	40
Momentary current (kA asymmetrical 10 cycles)	40	40
Duty-cycle-fault-close (number of operations)	4	4
Grounding switch fault close (kA asymmetrical)	40	40
Short-time rating (kA asymmetrical 2 seconds)	25	25
Dielectric withstand (kV 1 minute)	19	36
Electrical endurance (close-open)	100	100
Mechanical endurance (close-open)	1000	1000

Model III Package Unit Substation with HVL/cc Load Interrupter Switch (on left)

**Transformer Section**

Special barrel wound dry-type transformers employing resin encapsulated VPI (Vacuum Pressure Impregnation) techniques are used to achieve the low-loss, compact design necessary for the space-saving package substation concept. Class H, 220 °C insulation is used throughout. Temperature rise is 150 °C as standard, although 80 °C or 115 °C low temperature premium transformers are available through 750 kVA. Aluminum windings are standard with copper as an option. Four full capacity 2-1/2 percent taps are provided—two above nominal voltage and two below.

Fan cooling is optional. When selected, it increases the capacity rating of the transformer an additional 33 percent. The Model 98 digital controller is employed. This system provides precision control through the use of three high accuracy thermocouple type sensors—one in each phase of the windings.

The controller has a membrane front panel for displaying the temperature of all three phases with individual readings. The hottest phase is automatically displayed. The Model 98 digital controller features simple three-button operation with fan, alarm and trip function settings and is Powerlogic™ compatible.

**Table 11.44: Transformer Basic Insulation Levels**

KV Class	Primary Voltages	BIL	600 Hz Test
1.2	< 600 V Secondary	10	4 kV
2.5	2400	20	10 kV
5.0	4160, 4800	30	12 kV
7.2	6900, 7200	30	12 kV
8.7	8320	45	19 kV
15.0	12, 12.47, 13.2, 13.8	60	31 kV

**Distribution Section**

**I-Line™ Mounted Molded Case Circuit Breakers**

Molded case circuit breakers are group mounted in an I-Line panelboard section offering the inherent ease of installation for which the plug-on I-Line circuit breaker has become known. All circuit breakers are quick-make, quick-break, thermal magnetic, permanent trip type and are factory-calibrated and sealed for accurate overcurrent response and maximum short-circuit strength. PowerPact™ P and R circuit breakers are available with solid-state Micrologic™ trip units. Current limiting high interrupting capacity FI, KI, and LI circuit breakers are also available. Circuit breakers may be safely back-fed for use as main circuit breakers. All circuit breakers are UL listed and carry integrated equipment rating when used exclusively with other Square D™ brand circuit breakers in intended assemblies.

I-Line panel is available in 1200 A. Maximum mounting space is 108 inches. Tin-plated copper bus is standard.

**Motorpact™ Medium Voltage Motor Controllers (UL Listed)**

Square D™ brand Motorpact medium voltage motor controllers from Schneider Electric are designed and manufactured to tackle the toughest power and process control challenges. Our motor controllers feature industry-first innovations that provide unmatched performance, high reliability, low maintenance and exclusive technologies. Motorpact medium voltage motor controllers are designed to provide the most efficient means to control and protect a wide range of applications and may be configured for motor starting, transformer feeders, capacitor feeders, or future spaces. The design has fewer losses inside the controller, providing more efficient use of power for the connected load.

Motorpact controllers are designed to meet or exceed the standards for NEMA ICS3 Part 2, UL Standard 347, and IEC 60470. UL and cULus labels are standard.

Starting application for squirrel cage induction motors:

- Full voltage non-reversing
- Full voltage reversing
- 2-speed, 2-winding, 2-speed, 1-winding
- Reduced voltage non-reversing
  - Auto transformers
  - Solid state soft start
  - Sequential soft start (S3) multi-motor starting

Enclosures are available in NEMA Type 1, 1A, and 3R and feature the smallest footprint in the industry at 14.75 inches wide. Enclosures that are 20 inches and 29.5 inches wide are also available for FVNR.

Optional arc resistant enclosures are available that meet IEEE C37.20.7.

Units are designed as one-high construction for ease of use with a optimum height for the operator controls and isolation switch disconnect handle.

Full front and or front and rear accessibility are provided. A full height cable pulling area is standard.

Controller voltage ratings range from 2.3–7.2 kV vacuum contactors feature a drawout design and have ratings of 200, 400, 450, and 720 A.

Options include live line indicators, blown fuse tripping, solid state protective relays, power factor correction capacitors, surge arresters, surge capacitors and a cable grounding switch.

**Vacuum Substation Circuit Breakers—Types FVR, EOX, VOX (Not UL Listed)**

Type FVR

By combining the latest developments in circuit breaker technology with world-renowned quality, vacuum substation circuit breakers from Schneider Electric are the most advanced medium voltage circuit breakers available. Type FVR Powersub™ circuit breakers include arc-resistant construction and are built to comply with ANSI standards. Type EOX substation circuit breakers are available with a magnetic or spring actuator. Type VOX includes a vacuum circuit breaker housed in a tank filled with SF6 (sulfur hexafluoride) for added environmental benefits and reduced space requirements.

**Table 11.46: Vacuum Substation Circuit Breaker Ratings**

Type	Voltage (kV)	Amperage (A)	BIL	Short-time Rating kA (3 seconds)
EOX ▲	15	1200, 2000	110	12–31.5 ■
FVR		600–4000	110	12–40
EOX ◆	27	1200, 2000	125 (150)	25–31.5
FVR		1200, 2000	125 (150)	12–25 @ 125; 31.5 @ 150
VOX	38	1200, 2000	150 (200)	12–40
FVR		1200, 2000	150	12–31.5
		1200	200	12–25

- ▲ Spring- and magnetic-actuated.
- 31.5 for spring-actuated; maximum magnetic-actuated = 25.
- ◆ Spring- actuated.

New! Type EOX

New! Type VOX

The arc-resistant design of Type FVR circuit breakers takes safety to the next level. In the event of an arc, the arc-resistant construction provides increased safety for personnel working in proximity of the breaker by venting resultant arc by-products and ionized gases upward and away from exterior panels that otherwise may not remain intact and in place. Type FVR circuit breakers also provide superior protection as a result of their high speed operation. You can expect long life from the product as the vacuum interrupter contacts are protected from corroding elements and contamination.

Type EOX magnetic circuit breakers contain a magnetic actuator, electronic controller, and capacitors to store energy for circuit breaker operation. Our innovative design uses only one coil for opening and closing the circuit breaker. There are no critical friction parts, which increases the reliability and life of the mechanism. The tripping energy required is also lower than that of other products available on the market. In emergency situations, the circuit breaker can be easily tripped mechanically.

Type VOX circuit breaker vacuum interrupters are housed in a fully welded, sealed-for-life, stainless steel tank, providing a controlled gas insulated environment totally immune to external ambient conditions. A spring-charged mechanism provides manual or motorized circuit breaker operation.

**New!** Automatic Circuit Recloser

**Overview**

The Automatic Circuit Recloser combines state-of-the-art vacuum arc interruption with integrated voltage and current measurement. These features are encased in a fully welded and sealed, 316 grade, stainless steel tank. Three types of reclosers are available: N-series (three-phase), U-series (three-phase), and W-series (single phase).

**Applications**

- Feeder automatic circuit recloser
- Substation automatic circuit recloser
- Loop automation
- Automatic change-over
- Smart grid

**New!** Load Break Switch/Sectionalizer

**Overview**

The RL-series Load Break Switch/Sectionalizer is a switch used in conjunction with an upstream recloser or circuit breaker. It counts the interruptions created by a recloser during a fault sequence. On a preset count, the sectionalizer trips during the dead time of the upstream recloser and isolates the faulty network section.

**Applications**

- Manual load-break switch
- Motorized load-break switch
- Fully automated sectionalizer
- Normally-open tie point

**Table 11.47: Ratings**

Attribute	Automatic Circuit Recloser			Load Break Switch/Sectionalizer
	N-series	U-series	W-series	RL-series
Phases	3			3
Nominal Voltage (kV)	15, 27, 38	15, 27	15, 24	15, 27, 38
Continuous amperes (A)	800	630	400	630
Short-time rating (kA)	12.5/16	12.5	6	12.5/16
Insulation	Gas	Epoxy	Epoxy	Gas
Interruption	Vacuum			Gas
Operations (elec/mech)	10000/10000			600/5000

**New!** ADVC Controller

**Overview**

The ADVC controller offers advanced protection, measurement, diagnostic, and communication features in a reliable package. Designed around the user, the controller offers flexibility and choice. Users have a choice of two cubicle sizes (ULTRA and COMPACT) and two operator interfaces (flexVUE and setVUE).

All the protection, monitoring, communication, diagnostic, and automation features are included as standard in all models:

- ULTRA—large 316SS controller cubicle with two accessory mounting areas
- COMPACT—smaller 304SS controller cubicle with one accessory mounting area
- flexVUE—interface with 20 configurable status lamps and 12 quick action keys
- setVUE—large 4 x 40 LCD with familiar menu-driven operation

**Applications**

The ADVC controller interfaces with the following:

- N-series recloser
- U-series recloser
- W-series recloser
- RL-series load break switch/sectionalizer

### Distinct service advantages make your Busway installation “hassle-free”

- **Missing Link** program guarantees shipment in a maximum of 5 working days of a small quantity of indoor feeder straight lengths and fittings. Orders for outdoor busway or for international destinations may require 2 extra days for processing.
- **Measurement Services** are offered for your critical and complex projects. Schneider Electric will assist with field measurement and assume responsibility for the layout and exact fit of all components. Contact your local Schneider Electric sales office for exact details.
- **Emergency Service**; we are on call 24 hours a day, 7 days a week, 365 days a year. For emergencies, call 1-888-SquareD (1-888-778-2733).
- **Quick Ship** program provides product availability for time sensitive orders. The program is available through the product selectors and offers a limited selection of I-Line busway footage and fittings. Contact your local Schneider Electric sales office for exact details.

**Powerbus Busway**

**Construction**

Powerbus busway construction consists of a light-weight electrical grade all-aluminum housing with up to five (5) silver-plated copper conductor bars for maximum electrical efficiency. The total product offer includes straight sections, fittings, accessories, and plug-in units for a total installation. This busway is available in 400 A, 225 A and 100 A ratings. A 50% integral ground is standard.

**Straight Sections**

Straight sections of busway are available in 10 ft. and 4 ft. lengths in a painted black finish. The Enhanced busway offer includes 10 plug-in openings on each side of a 10 ft. section and 3 plug-in openings on each side of a 4 ft. section.

**Metering and Communications Options**

Powerbus busway tap boxes and plug-in units are available with optional metering and communication capabilities, which include an integrated display and the ability to remotely monitor the busway.

NOTE: Single phase systems are also available. Contact your local Schneider Electric representative.

- ▲ Feeder style also available in lengths from 16 to 119 inches.
- Plug-in style also available in 4, 6, and 8 foot lengths.
- ♦ Add "(H)" or "(V)" to catalog number based on horizontal or vertical mounting arrangement.
- ★ Cannot be used for 800 A copper busway.

**Pricing Instructions For “Factory Assembled” Busway Systems (or Components)**

**Standard Straight Lengths**

The basic component of a busway system is a straight section with a “joint pak” factory-affixed to one end. Plug-in busway is available in standard lengths of 4, 6, 8, and 10 feet. Feeder busway is available in lengths from 16” to 120” in increments of 1”.

**Riser Busway**

We also offer a “Riser” Plug-In busway with openings on one side only for riser installations. This busway offers the same short circuit ratings as our standard plug-in busway.

**Indoor Drip Resistant and IP54 Splash Resistant Busway**

These water resistant features are available as an option for indoor plug-in and feeder busway. Price the drip resistant busway using the appropriate per foot price. Price the IP54 splash resistant busway using the outdoor per foot price.

**Outdoor Construction (Feeder Busway Only)**

Besides the additional charge for outdoor busway, you must also add a charge for a weather seal if the busway passes through a building wall or roof from an interior to an exterior space (found under Miscellaneous Additions and Accessories on page 12-8). Please indicate the thickness of the wall, roof or floor when entering order. Add the “labor only” price for fittings and special features per general pricing instruction.

**High Short Circuit Bracing**

I-Line busway is available with either standard short circuit bracing or high short circuit bracing. Table 12.19 on 12-8 lists maximum short circuit ratings for each busway type and rating.

**General Pricing Instructions**

- Prepare a layout sketch of the busway run showing:
  - All dimensions in feet and inches
  - All wall and floor locations and thicknesses
  - All fittings (use top of page 12-7 as a checklist)
- Add all dimensions together. Round up to the next foot.
- Multiply this total by the appropriate price per foot according to the tables above.
- To this, add the “labor only” charges for all fittings from page 12-7.
- Add hangers per page 12-8 (quantities explained below)
- Add for any other unit price items such as end closures, wall flanges, or special lug requirements from page 12-8.

**Hangers**

Hangers for the I-Line II busway should be priced from the table on page 12-8. Indoor horizontal busway requires one hanger for every 10 feet of busway. Vertical indoor busway requires one hanger for every 16 feet. Outdoor feeder busway requires one hanger for every 5 feet in either vertical or horizontal mounting.

**Elbows**

The elbow “labor only” charge applies to all types of 90° elbows within a particular rating of busway. The charge does not include any busway footage (i.e. a charge for the appropriate amount of busway footage would have to be added to the “labor only” charge to obtain a “complete device” charge). If elbow is other than 90°, double the labor only charge.

**Tee**

The labor charge for tees shown in applies to all factory assembled types of 90° tee fittings within a given rating. Dimensions and catalog number suffix of flatwise tee fittings will be found in the Class 5600 Manual. Refer to factory for edgewise tee dimensions. Crosses are also available.

**Indoor Tap Boxes**

Feeder cable tap boxes are used at the end (-ETMB) or center (-CTB) of a busway run and incorporate a short section of busway into their construction. See Catalog Class 5600 for the length of the tap box then add the "labor only" charges shown above to complete the price.

Plug-in cable tap boxes are plugged into the side of the busway (at any opening except the very last opening of a run). The price shown in the table on page 12-5 is the complete device price. No "labor only" charge is required.

Lugs other than standard mechanical lugs may be selected from the table on page 12-8.

**Service Heads**

Service heads are of outdoor construction and include Square D™ brand standard lugs. Price footage to end of busway run including dimension of service head. Add service head labor charge.

**Unfused Reducer**

Unfused reducers are used to reduce from a higher amperage busway to a lower amperage. Price each rating of busway to the centerline of reducer and include the "labor only" price of the higher rating.

**NOTE:** The National Electric Code does not allow the use of unfused reducers in vertical riser installations. Refer to the NEC for restrictions in industrial installations.

**Fused or Circuit Breaker Cubicle**

These are used as in-line overcurrent protection devices. They can be used in conjunction with an unfused reducer to offer a device which reduces a run of busway in ampacity and offers overcurrent protection.

**I-Line to I-Line II Adapter**

This adapter is used to join I-Line II busway (800 A–5000 A) to existing installations of original I-Line busway. If connecting to an existing "slot end" of original I-Line, use a "bolt end" adapter (-12B), and vice versa. Price as four feet of busway for 800 through 5000 A busway.

**Expansion Fittings**

Expansion fitting labor only charge does not include busway footage. The expansion fitting is built into a 3 ft. – 4 in. straight length for 800 A–5000 A and a 5 feet – 0 inch straight length for 225 A–600 A. Limit of expansion or contraction is ±1-1/2 inches. Not available in outdoor construction.

**Bussed Transformer Connection**

A bussed transformer connection is used when the busway physically attaches (other than cable) to a three phase transformer. Price busway footage to the edge of transformer L.V. or H.V. terminal. To this, add labor only charge for a "bussed transformer connection." For power company vault termination charges, consult the factory.

**Transformer Taps**

Transformer taps are used to make cable connection to transformers. Calculate footage price to end of busway. Use standard dimensions. Price of taps includes lugs; if lugs other than standard Square D brand lugs are required, add charges from page 12-8. Note that taps need **NOT** be located directly above transformers for cable connections.

**Finger Protection to IP2X**

This feature provides improved protection from accidental contact with live parts during insertion and removal of plug-in units. This feature meets the IP2X rating as defined by IEC529 standard. (Pricing on page 12-8.)

**Connection to Competitive Busway**

Consult your nearest Schneider Electric sales office.

Miscellaneous Additions and Accessories

Table 12.18: Additions and Accessories

Description	\$ Price																
<b>Integral Weather Seal Vapor Barrier</b> (Required when busway passes through an exterior wall or roof)	764.00

**Class J Fuses** – Provisions for installing Class J fuses are included in 30 through 600 A fusible devices. Conversion to Class J fuse spacing requires relocating the load side fuse base assembly from standard Class H fuse location to an alternate position in the enclosure.

- ▲ For use on vertical riser applications only.
- For vertical riser applications order auxiliary mounting kit—Catalog Number PBQ4060RMK. (Price \$300.)
- ◆ This device uses bolt-on connection. It may be used only on plug-in busway with same number of poles. Add suffix (H) for horizontal applications and suffix (V) for vertical applications. Not for use on 800 A copper busway.

Note: For IP54 splash resistant construction, add "M54" suffix. IP54 price adder is 15%.

**Table 12.21: Class R Fuse Kits★**

- ▲ The standard rating plug supplied with a trip unit will be the "A" rating plug. To specify an alternative rating plug, replace the "A" at the end of the catalog number with the applicable suffix letter. See the chart on page 7-45 for rating plug catalog suffix letters.
- All these devices use bolt-on connection. It may be used only on busway with same number of poles. Not for use on 800 A copper busway. To complete the catalog number, replace the blank with an "H" for horizontal applications and "V" for vertical applications.
- ◆ Listed catalog numbers are for 80% rated circuit breakers. For 100% rated circuit breakers, replace the blank with an "HC" for horizontal applications and "VC" for vertical applications. For example, the catalog number for a 100% standard trip unit with standard LI trip functions at 800 A 3Ø3W for a horizontal application would be PTPG36080GHC U31A.

**Notes:**

- For IP54 splash resistant construction, add a "M54" suffix. IP54 price adder is 15%.
- The 250 A is available as a special device. Contact your local Schneider Electric field office for ordering information.

▲ The standard rating plug supplied with a trip unit will be the "A" rating plug. To specify an alternative rating plug, replace the "A" at the end of the catalog number with the applicable suffix letter. See the chart on page 7-45 for rating plug catalog suffix letters.  
 ■ All these devices use bolt-on connection. It may be used only on busway with same number of poles. Not for use on 800 A copper busway. To complete the catalog number, replace the blank with an "H" for horizontal applications and "V" for vertical applications.  
 ◆ Listed catalog numbers are for 80% rated circuit breakers. For 100% rated circuit breakers, replace the blank with an "HC" for horizontal applications and "VC" for vertical applications. For example, the catalog number for a 100% standard trip unit with standard LI trip functions at 800 A 3Ø3W for a horizontal application would be PTRG36080GHCU31A.

- Notes:
- For IP54 splash resistant construction, add a "M54" suffix. IP54 price adder is 15%.
  - The 600 A is available as a special device. Contact your local Schneider Electric field office for ordering information.

- Non-segregated phase bus
- 600 V through 15 kV (1200 A–4000 A) <sup>1</sup>
- Aluminum, steel or stainless steel housing
- Aluminum or copper bus bars
- Insulated with fluidized bed epoxy (5 kV–15 kV)
- Complete line of fittings provides for any configuration
- Indoor trapeze and outdoor column supports
- For use in utilities, industrial and commercial facilities

Power-Zone bus is custom designed, manufactured and tested per ANSI C37.23 standards to meet customer specifications. The 600 V product is also UL Listed. It is a completely coordinated package of equipment with all the auxiliary material and supports for connecting transformers, switchgear, MCCs, and motors, in all types of utility, industrial, and commercial facilities.

**General Pricing Instruction** – Prepare a layout sketch (if applicable) of the run(s) showing all dimensions in feet and inches, all wall and floor locations and thicknesses and all fittings such as elbows, tees, flanged ends, cable tap boxes, expansion fittings, transformer connections, etc. Add all dimensions together using the center line of the bus and adjust the total to the higher whole foot. Multiply this total by the per foot price as determined by the type (indoor or weatherproof) (aluminum or copper) and the number of poles and any optional accessories (aluminum or steel enclosures, fiberglass or porcelain conductor supports, etc.). To this add the charges for each of the elbows, tees, flanged ends, cable tap boxes, expansion fittings, transformer connections, etc. The sum of these items plus the sum of any optional accessory is the price of the entire bus run. NOTE: Because the bus run is custom designed and built there are no “Complete Device” prices.

**Bus Footage** – The per foot price of the bus may be a combination of several prices depending on the job specifications and requirements. Some of these options are special momentary rating, special housing material and/or finish, special conductor supports, heaters and thermostats, and ground bus. The prices for these options are shown on page 12-16. They should be added to the per foot prices shown on page 12-16.

**Weatherproof Bus** – Priced the same as indoor. In addition, all weatherproof runs must be equipped with strip heaters to eliminate condensation and, if applicable, a thermostat. A heater should be priced for every seven (7) foot of bus and no more than 20 heaters can be controlled by one thermostat. Also, each bus run should have its own thermostat. The heaters are rated 240 V, 500 watts and operate at 120 V, 125 watts.

**Flanged Ends** – A flanged end is used to terminate the bus into switchgear, motor control centers, switchboards, or any rigid bus-to-bus connection. It consists of a gasketed equipment flange, up to 1'-0" of 3Ø3W conductor (3Ø4W as applicable), necessary insulation tapes, and required bolting hardware. If additional conductor length is required, add to the footage price on a per foot basis.

**Cable Tap Box** – A cable tap box includes a gasketed and accessible termination box, lugs, necessary insulation tape (between bus and lugs only), and required bolting hardware. Lug sizes and quantity should be specified by purchaser.

**Transformer/Generator Connection** – This type of termination should be priced whenever the bus is connecting to a transformer, generator, motor, switch or any connection where the bus bars are connecting to porcelain mounted equipment terminals. It will include the same components as a flanged end plus one set of flexible braid type connectors and a terminal box (if required).

**Bushing Box (Weatherhead)** – A bushing box is used on service entrance run where the cable connection to the bus must be made via porcelain bushings. It is comprised of the same components as a transformer connection plus 3 through stud type apparatus bushings, bushing stud connectors (lug pads) and a strip heater.

**Ground Bus** – The bus housing is designed and constructed to provide an electrically continuous ground path. The side rails of the bus housings are capable of carrying the full rated phase current continuously and, under short circuit conditions, are capable of carrying up to 60 kA RMS asymmetrical fault current for 3 seconds. Consequently, a separate ground bus is not necessary unless specified.

**Wall Entrance Seal** – A wall entrance seal consists of a wall throat, wall flange (one side of wall only), and a barrier which prevents air or vapor from passing from one room to another or from outdoors to indoors. It also carries a 1/2 hour fire rating. Consult factory for higher fire ratings. If additional wall flanges are required, they should be added at the prices given on page 12-18.

**Equipment Entrance Seal** – An equipment entrance seal should be priced whenever a barrier is required to prevent the passing of flame and/or gasses between the bus housing and the terminating equipment.

**Expansion Fittings** – An expansion fitting is used to counteract the strain placed on the bus due to the expansion and contraction of the building or the bus itself. One should be priced whenever the bus run crosses a building expansion joint and whenever a straight run of bus exceeds 60 feet.

**Flexible Housing (Misalignment) Collar** – Required at terminations or wall penetrations when vibrations due to seismic forces may cause damage to the bus. It may also be used to adjust for the “settling” of terminating equipment after installation.

<sup>1</sup> For additional ratings, contact the factory.

**Supporting Steel (Hangers)** – Supports are not included in the “per foot” price of the bus and should be added on the basis of one for every 10 ft. for indoor and one for every 12 ft. for outdoor. Indoor supports are a trapeze type hanger while outdoor supports are a single or double column type support. Consult factory for other type supports.

**Hazardous or Seismic Locations** – Consult factory for bus runs which are to be installed in a location which is classified as hazardous or in a seismic location.

**Standard Construction** – The prices on this page are based on standard Power-Zone construction. Page 12-18 should be used to add any options or accessories. Standard construction is as follows:

- Conductor (plating): Copper (silver) or Aluminum (tin)
- Conductor Insulation (5 kV and 15 kV only): epoxy
- Conductor Supports: Glass reinforced polyester blocks
- Housing Material: Extruded Aluminum (1/8-inch Nominal)
- Housing Construction: Totally Enclosed Non-ventilated
- Joint Insulation: EPR and PVC tape
- BIL Rating: 25 kV (600 V), 60 kV (5 kV) and 95 kV (15 kV)
- Momentary (Short Circuit) Rating: 75 kA (600 V) and 60 kA (5 kV, 15 kV)
- Ground Conductor: Housing (100% rated)

▲ Hangers, supports and heater prices not included. See page 12-17 for pricing.  
■ Add 30% for 3Ø4W (half-neutral); add 45% for 3Ø4W (full-neutral).

**Space Heaters/Thermostats**

Space heaters must be priced for all weatherproof applications. One heater should be priced for every 7 feet of outdoor bus. If a thermostat is specified to control the heaters, at least one should be priced for each bus run. No more than 20 heaters can be controlled by each thermostat.

**Table 12.41: Thermostats/Space Heaters**

Description	\$ Price Each
Thermostat	800.00
120 V, 125 W space heater (240 V, 500 W rated)	680.00

**Hangers/Supports**

Hangers and supports are not included in prices on page 12-16. Price one indoor hanger for every 10 feet (maximum) of indoor bus and one outdoor support for every 12 feet (maximum) of outdoor bus (if required).

**Table 12.42: Hangers/Supports**

Support Description	Maximum Height	\$ Price Each
Indoor Trapeze Hanger	—	820.00
Outdoor, Single Column Support	6 feet	5709.00
	8 feet	6524.00
	10 feet	7340.00
	12 feet	8155.00
Outdoor, Double Column Support	14 feet	14995.00
	16 feet	16495.00
	18 feet	17994.00
	20 feet	19494.00
	22 feet	20993.00

Note: See Digest Section 9 for ED circuit breaker information. Catalog numbers shown have the breaker in the top slot in the front cover and the drop cord in the left position in the base of the unit. Other combinations are available. The Power Meter display will be located below the breaker specs.

For remote monitoring capabilities, an EGX gateway is required. The EGX is located in the tap box with metering or in a separate EGX plug-in unit listed below. The units with metering can be daisy-chained together back to the EGX gateway. A maximum of 30 units should be daisy-chained together to one EGX.

- ▲ Factory assembled units are available using combinations of 1P/2P/3P circuit breakers with other NEMA and IEC type receptacles. Maximum of three drop cords with three breaker spaces available. Consult your local Schneider Electric representative.

Square-Duct wireway is Underwriters Laboratories listed as steel enclosed wireway and auxiliary gutter. CSA listing is also available.

**Sizes**

2-1/2", 4", and 6" sizes are manufactured from 16 gauge steel. Straight lengths are available with or without knockouts. Knockouts are of various sizes in sides and bottom of wireway. 8", 10", and 12" sizes are made of 14 gauge steel and are furnished without knockouts.

- ▲ Add connectors for all lengths and fittings, except closing plates, reducers, and adapters.
- These closing plates also available with knockout. Add "KO" to cat #; price is the same.
- ♦ Adapters to competitors' wireways also available. Contact your nearest Schneider Electric sales office for price and availability.
- ★ Painted 12" x 12" wireway is not furnished with hinge-cover (screw-cover only).

**NOTE:** For wireway fill information, see NEC 376.

**Oiltight—NEMA Type 12**

**Type LJB** Oiltight lay-in wireway is fully gasketed and used to protect runs of electrical wiring from oil, water, coolants, dirt, or dust as well as physical damage. This wireway is manufactured to exceed oiltight and NFPA standards for industrial control equipment.

Lengths and fittings are made of 14 gauge steel with 10 gauge end flanges. Straight lengths and fittings have hinged covers with oil resistant gasket all around and are held closed with pull-down latches. All lengths and fittings are without knockouts. Type LJB lay-in Wireway is finished with ANSI-49 gray polyester powder finish over a corrosion resistant phosphate preparation. All Type LJB oiltight wireway is UL listed as steel enclosed wireway and auxiliary gutter. Conforms to NEMA Type 12.

- Connector kit furnished with each length and fitting.

**Raintight Wireway—NEMA Type 3R**

**Outdoor raintight** wireway is used to protect electrical wiring against rain, sleet, and physical damage. Unique drip shield cover protects wiring from weather and maintains the "lay-in" feature for ease of wiring installation. Lengths and fittings are constructed of 16 gauge galvanized steel with ANSI-49 gray polyester powder finish over a corrosion resistant phosphate preparation. Underwriters Laboratories Listed as steel enclosed wireway and auxiliary gutter (*horizontal mounting only*). Conforms to NEMA Type 3R.

**Table 13.3: Raintight Wireway**

- ▲ Add connectors for all lengths and fittings.

**Raintight Trough—NEMA Type 3R**

Raintight trough is designed for ganging meter devices, panelboards, switches, and circuit breaker enclosures. Each length is a completely enclosed section with a removable cover that has provisions for sealing.

**Design:** 4" and 6" wireway is constructed of 16 gauge galvanized steel. 8", 10", and 12" wireway is constructed of 14 gauge galvanized steel. All raintight troughs conform to NEMA Type 3R.

**Finish:** ANSI-49 gray polyester powder finish over a corrosion resistant phosphate preparation. All raintight troughs are Underwriters Laboratories listed as steel enclosed wireway and auxiliary gutter (*horizontal mounting only*).

**Table 13.4: Raintight Trough**

**Class 5250—Wall Duct**

UL Listed, File E65247, for Enclosure of Wiring to X-Ray Machines. Also available in aluminum for MRI application.

Wall duct is used as the continuation for standard trench duct in the floor. Wall duct can be routed up the wall and across the ceiling or under the finished floor (in ceiling space below) to provide a continuous lay-in raceway system from control consoles and floor equipment to overhead apparatus. Devices are furnished complete with covers and are available for either flush or surface mounted installations.

**General Notes:**

1. Standard construction is 14 gauge steel with gray electrodeposition paint. Alternate construction is painted aluminum.
2. Covers and coupling devices are furnished with each device.
3. Wire retainers are furnished with each device.
4. Straight lengths are field cut to length.
5. Partitions and tunnels are to be field modified and installed where required.
6. Hangers or other mounting devices to be furnished by others.

**Trench Duct**

- STANDARD LENGTH of trench duct is 10 ft. Gasketed cover plates are ordered and shipped separately.
- FEATURES of trench duct:
  - Trench duct width is cover plate width.
  - Tub width is trench duct width less 1.8".
  - Overall width (bottom flange to flange) is 3" wider than trench duct width.
  - Standard depth is adjustable from 2-3/8" to 3-3/8". Also available as standard is depth adjustable from 3" to 4". To order, change "2" to "3". Ex. RSV063100120. Applies to trench duct, elbows, crosses, tees, and reducers. Same price as standard device. Other depths available.
  - Tees, crosses, horizontal elbows, and reducers are shipped complete with cover plates assembled.
  - Grey vinyl tile trim is furnished as standard. Aluminum is available when requested.
  - All compartments over 17" wide must be supported with dividers or posts.
- PRICES for additions and special features:
  - For each foot of adjustable partition, add **\$64.00** per foot of partition.
  - For each 1" of depth beyond range of 3" to 4", add **\$32.00** per foot of trench duct.
  - For double tile trim on two sides of cover plate, ONLY add **\$120.00** per foot of trench duct.
  - For double tile trim on all four sides of cover plate, add **\$400.00** per foot of trench duct.
  - For support post, add **\$64.00** per foot of trench duct for each row of posts required.

**Table 13.8: Assembled Trench Duct**

All part numbers listed below are for 2 3/8"-3 3/8" deep, one compartment trench with vinyl tile trims.

Public Law 109-58 of the Energy Policy Act of 2005 requires the manufacturing of energy efficient transformers after January 1, 2007 for all low-voltage distribution transformers.

According to Department of Energy Federal Registry Final Rule 10 CFR Part 429, 430, and 431, *Low-Voltage Dry-Type Distribution Transformers*, the efficiency of a low-voltage, dry-type, distribution transformer manufactured on or after January 1, 2007, shall be no less than that required for its kVA rating in the table below.

**Table 14.1: Required Efficiency Ratings of Low-Voltage Distribution Transformers**

Single-Phase		Three-Phase	
kVA	Efficiency (%) ▲	kVA	Efficiency (%) ▲
15	97.7	15	97
25	98	30	97.5
37.5	98.2	45	97.7
50	98.3	75	98
75	98.5	112.5	98.2
100	98.6	150	98.3
167	98.7	225	98.5
250	98.8	300	98.6
333	98.9	500	98.7
		750	98.8
		1000	98.9

▲ Efficiencies are determined at the following reference conditions:  
(1) for no-load losses, at the temperature of 20 °C;  
(2) for load-losses, at the temperature of 75 °C and 35 percent of nameplate load.

(Source: Table 4-2 of National Electrical Manufacturers Association (NEMA) Standard TP-1-2002, *Guide for Determining Energy Efficiency for Distribution Transformers*.)

The following family of products meets these requirements.

**General Purpose, Three-Phase (15–2000 kVA) and Single-Phase (15–333 kVA)**

General Purpose transformers provide the most economical solution.

- Aluminum or copper windings
- Isolation transformer
- 150 °C rise design on 220 °C insulation systems.

**Watchdog, Three-Phase (15–1500 kVA) and Single-Phase (15–333 kVA)**

Watchdog transformers, by design, reduce energy consumption at loads greater than 50% loading, giving fewer BTUs/hour at those loading levels. The life expectancy is greater than that of 150 °C rise General Purpose units.

- Aluminum or copper windings
- Isolation transformer
- Two temperature rise options:
  - 115 °C rise on 220 °C insulation systems (15% continuous emergency overload capacity)
  - 80 °C rise on 220 °C insulation systems (30% continuous emergency overload capacity)

**K-Rated, Three-Phase (15–1000 kVA)**

K-rated transformers mitigate Triplen harmonics via a Delta-Wye configuration.

- Aluminum or copper windings
- Isolation transformer with electrostatic shield
- K-4 and K-13 levels

**Harmonic Mitigating, Three-Phase (15–1000 kVA)**

Harmonic Mitigating transformers mitigate Triplen harmonics via electromagnetic phase relations. They remove 5th and 7th harmonics when using dual devices with a 0° and a +30° phase shift. They further reduce 11th and 13th harmonics when a +15° or -15° shift is added to the dual devices. Available with:

- Aluminum or copper windings
- Isolation transformer

The following products are **not** included in the definition of Low Voltage, Dry-Type Distribution Transformers and are not required to comply with the efficiency table.

**Sealed, General Purpose, Three-Phase (3–30 kVA) and Single-Phase (.050–25 kVA)**

Core and coils encapsulated in a sand and resin mixture allows for a more compact design.

- Copper windings
- Isolation transformer

**Non-Ventilated, Three-Phase (15–500 kVA) and Single-Phase (15–250 kVA)**

Non-Ventilated transformers are designed to operate in harsh environmental conditions: dust, airborne contaminants, metal particles, or where weather conditions make ventilated openings impractical.

**Drive Isolation Transformers**

Square D™ brand drive isolation transformers from Schneider Electric meet the special requirements for both adjustable frequency drives and dc motor drive power isolation. They cover the allowance for high surges, harmonics, and offset currents.

Drive isolation transformers are not shielded isolation transformers, but act to lessen transient generation into the supply power and act as a buffer for SCR current surges.

Available Voltages:

- Primary: 230 Delta, 460 Delta, 575 Delta
- Secondary: 230Y/133, 460Y/265, 575Y/332

Available kVA:

- 7.5, 11, 15, 20, 27, 34, 40, 51, 63, 75, 93, 118, 145, 175, 220, 275, 330, 440, 550 kVA

For part numbers, see Section 6 of the Supplemental Digest or see the Schneider Electric Product Configurator.

**Motor Starting Auto Transformers**

Auto transformers' design matches starter requirements.

- Open core and coil available
- Two-winding and three-winding
- Available in the following voltages:
  - 208, 240, 480, or 600 V
- Available in the following horsepower:
  - 10, 20, 30, 50, 75, 100, 125, 150, 200, 250, 300, 400 hp

For part numbers, see Section 6 of the Supplemental Digest or see the Schneider Electric Product Configurator.

**IP00 Core and Coil Transformers**

All Type 2 distribution devices are available as IP00 Core and Coil. These units are compliant with the 2005 Energy Act, as well as the excluded items.

For part numbers, see Section 6 of the Supplemental Digest or see the Schneider Electric Product Configurator.

New!

**NEMA Premium**

NEMA Premium is the only third-party standard that defines a complete range of efficiency levels that exceeds 2005 Energy Act requirements.

As a partner in the NEMA Premium Transformer Program, Schneider Electric has determined that this product meets the NEMA Premium efficiency specifications for premium energy efficiency.

**NOTE:** NEMA Premium is a trademark of the National Electrical Manufacturers Association.

**Table 14.2: Efficiency Ratings of NEMA Premium Transformers**

Single phase		Three phase	
kVA	Efficiency (%)	kVA	Efficiency (%)
15	98.39	15	97.90
25	98.60	30	98.25
37.5	98.74	45	98.39
50	98.81	75	98.60
75	98.95	112.5	98.74
100	99.02	150	98.81
167	99.09	225	98.95
250	99.16	300	99.02
333	99.23	500	99.09
		750	99.16
		1000	99.23

**Schneider Electric Premium 30 Transformers Family**

- K-rated, Three-Phase (15–1000 kVA). Available with:
  - Copper windings
  - K-9 and K-13 levels
- Harmonic Mitigating, Three-Phase (15–1000 kVA)
- Watchdog, Three-Phase (15–1000 kVA) and Single-Phase (15–333 kVA)

**Features of Distribution and NEMA Premium Transformers**

- Provide an adequate wire bending radius for multiple cable options, per NEC 312.6(A) (called out in NEC 450.12 *Terminal Wire Space*)
- 200% cable landing on all XO or H0 terminals
- Required ventilation clearance marked on all units in accordance with NEC Section 450.9.
  - All ventilated transformers from Schneider Electric require only a three-inch clearance—50% smaller than the industry average
- Terminals are sized for overcurrent and wire size, not for nameplate current rating
  - Primary terminals are sized to accept lugs up to 250% of nameplate current rating
  - Secondary terminals are sized to accept lugs up to 125% of nameplate current rating

Square D™ brand transformers from Schneider Electric feature the largest terminals in the industry.

**Sound Levels**

Square D™ brand transformers meet the NEMA standards for sound level shown in Table 14.3.

**Table 14.3: NEMA Standards for Sound Levels**

kVA Rating	Sound Level
0–9	40 dB
10–50	45 dB
51–150	50 dB
151–300	55 dB
301–500	60 dB
501–700	62 dB
701–1000	64 dB

For an additional charge, any Square D™ brand transformer can be built with a sound level that is 3 or 6 dB below the NEMA standard.

For part numbers, see Section 6 of the Supplemental Digest or see the Schneider Electric Product Configurator.

<b>480 V Primary with 120 Center Tap, Aluminum Windings</b>						
240 Delta with 120 center taps have historically been limited to 5% capacity on the center tap. The units from Schneider Electric offer greater limits on 120 V center tap. Limits are determined by the total transformer loading and the following formula used to size new 120 V center tap units: (240 V balanced loads) + 2.5 x (120 V loads) = kVA required

**EE Three- and Single-Phase Watchdog Low Temperature Rise Transformers**

Designed to maximize energy efficiency, supplies highest efficient levels for 24 hour loading greater than 50%. Extra long life expectancy using 220 °C insulation system designed for full load operation at a maximum temperature rise of 115 °C or 80 °C instead of 150 °C. Continuous emergency overload capability of 15% on 115 °C rise and 30% on 80 °C rise.

- ▲ Not for construction. Contact your local Schneider Electric representative for certified prints.
- For enclosure styles, see Table 14.19 on page 14-10.
- ◆ When 240 V tap is used, there will be 3-5% taps: 1 above and 2 below.

**NOTE:** FCBN = full capacity below normal  
Lugs are furnished by customer  
Refer to www.squared.com/eexfmr for additional information.

TRANSFORMERS 14

**EE NL and NLP Series Transformers**

- Three-phase dry type transformers, 480 Delta to 208Y/120
- Aluminum or copper windings
- Electrostatic shield
- Class 220 insulation
- Double size neutral terminal for additional customer neutral cables
- Additional coil capacity to compensate for higher non-linear load loss
- cULus Listed

### Sealed Single-Phase Export Model Transformers

These general purpose transformers accommodate voltage systems worldwide. Export model transformers 10 kVA and smaller, certified by TUV (File no. E9571881.01) to meet EN61558-1, are CE marked in addition to being cULus Listed. For CE marked transformers in other ratings, contact your local Schneider Electric representative for CE marked transformers up to 300 kVA, single and three phase. See page 14-11 for optional Fingersafe™ terminal block cover kit.

Table 14.14: Sealed Export Model Transformers

kVA	Catalog No.	\$ Price	Deg. C Temp. Rise	Weight (lbs) ▲	Enclosure ▲ ■

### Sealed Single-Phase Buck and Boost Transformers—cULus Listed

When buck and boost transformers are interconnected as an autotransformer, they can supply small changes in voltage. Wiring diagrams and sizing are available from catalog 7414CT0201 or www.buckboostcalculator.com.

Units can also be used as isolation transformers for 120 x 240 to 12/24 or 16/32 by connecting using the directions located on the transformer's name plate.

NOTE: When used to supply a 3-phase, 4-wire load, the source must be 3-phase, 4-wire.

Table 14.15: Sealed Buck and Boost Transformers

kVA	120 x 240 V Primary 60 Hz			240 x 480 V Primary 60 Hz		Degree C Temp. Rise	Weight (lbs) ▲	Enclosure ▲ ■

▲ Not for construction. Contact your local Schneider Electric representative for certified prints.

■ For enclosure styles, see Table 14.19 on page 14-10.

◆ Dimensions: 14.50 (H) x 8.60 (W) x 6.50 (D).

★ May be used for 240 x 480 to 120/240 at 60 Hz only.

NOTE: Refer to www.us.squared.com/buckboost for additional information.

**Stainless Steel Enclosed**

The transformers listed below have an epoxy-resin encapsulated core and coil assembly inside a non-ventilated, #316 stainless steel enclosure that meets NEMA Type 3R or Type 4X requirements. All units are painted ANSI 49 gray to give an extra layer of protection and improve the cosmetic appearance of the device.

**Table 14.16: Stainless Steel Enclosed Transformers**

**Non-Ventilated**

Non-ventilated enclosures meet the IP55 protection code (dust and jetting water protection) per the IEC 60529 standard. This makes the product ideal for environments where large quantities of dust, airborne contaminants, spraying water, or any other environmental conditions (for example, drifting snow) that a ventilated Type 3R enclosed device would be impractical.

**Table 14.17: Non-Ventilated Transformers**

- ▲ Not for construction. Contact your local Schneider Electric representative for certified prints.
- For enclosure styles, see Table 14.19 on page 14-10.
- ♦ When 240 V tap is used, there will be 3-5% taps: 1 above and 2 below.

**NOTE:** FCBN = full capacity below normal  
Lugs are furnished by customer

**Transformer Enclosures**

Designed to allow energy efficient products to be installed in environments requiring more protection. These are Type 3R enclosures constructed of #304 stainless steel for corrosive protection.

Transformer enclosures are shipped separately from transformers so they can be pre-installed on the job site. Three standard enclosures are available for installation of enclosure types D, H, or F.

- ▲ These dimensions are not for construction. Contact your local Schneider Electric representative for certified prints.
- Transformer is NEMA Type 3R Standard. Weathershield not required for outdoor use.
- ◆ Wall mounting brackets are a standard part of transformer enclosure. Accessory not required.
- ★ Special outdoor construction required for NEMA Type 3R applications. Contact your local Schneider Electric representative for details.
- ▼ Indoor/outdoor enclosure standard. Weathershield not required.
- △ Transformer is NEMA Type 4X Standard. Weathershield not required.

**NOTE:** Wall mounting brackets are used with units weighing no more than 700 lbs.  
Ceiling mounting brackets are used with units weighing no more than 1200 lbs.  
Weathershields are available for units 600 Volts and below. For 2.4, 5, and 15 kV units suitable for outdoor use, contact the factory.

- Wall mounting brackets may be prohibited in some California areas requiring 12-inch spacing from wall. Wall mounting brackets can only be used with units weighing no more than 700 lbs.
- ♦ Base channels are supplied for ceiling mounting; trapeze hangers must be furnished by customer. Ceiling mounting brackets can only be used with units weighing no more than 1200 lbs.

**New!** All ventilated units are now available with factory-installed, thermo-viewing windows. The windows allow completion of yearly maintenance requirements without removing the front cover and accessing the transformers.

Available on all enclosures 17D through 35D. For more information, refer to Data Bulletin 7400DB1101 or contact your local Schneider Electric representative or distributor.

### Sealed, Mini Power-Zone™ Unit Substation

The Square D™ brand Mini Power-Zone™ unit substation from Schneider Electric provides the answer to requirements for a portable, compact power supply for small loads. This complete package yields considerable savings in installation time and costs. Its NEMA Type 3R enclosure is suitable for both indoor and outdoor use. The transformer is 115 °C rise and epoxy-resin encapsulated. The panel section uses Square D™ brand QO™ style circuit breakers.

**NOTE:** Mini Power-Zone unit substations are UL 1062 File E92978 Listed.

Mini Power-Zone unit substations include factory-installed primary main and secondary main circuit breakers. Circuit breaker ratings are selected to meet National Electrical Code requirements and coordinate with transformer magnetizing inrush current. Order feeder circuit breakers (QO™ plug-on type) from your local Schneider Electric distributor. Use Qwik-Gard™ breakers for required ground fault protection. Tandem breakers are not permitted.

If bolt-on circuit breakers are required instead of plug-on, change the Mini Power-Zone part number from MPZ to MPZB. The MPZB product line leverages the NQ interior for application requirements.

The Mini Power-Zone unit substation uses a separate transformer and panel section. This allows the panel section to be removed and wired first if desired. Also the transformer can be replaced without disturbing the panel section and associated wiring. The new transformer simply slides into the top of the panel section and primary and secondary leads are reconnected to the main circuit breakers.

▲ Dimensions: DO NOT use for construction. Contact your local Schneider Electric representative for certified prints.

NOTE: FCBN = full capacity below normal

Type T transformers are designed with low impedance windings for excellent voltage regulation and can accommodate the high inrush current associated with contactors, starters, solenoids, and relays. Type T transformers are manufactured using the most advanced insulating materials and are the best choice if size and cost are of concern.

Type TF transformers include factory-installed primary and secondary fuse blocks. Type TF transformers consist of two primary fuse blocks and one secondary fuse block. The primary includes rejection-style clips to increase the AIC ratings for the fuses. Since the fuse blocks are mounted on the top of the transformer, Type TF transformers are interchangeable with Type T transformers except for their increased height.

**Accessories**

The Type T control transformers offer multiple field installable accessories:

**Table 14.32: Fingersafe™ Covers (Not Supplied with Unit)**

Type	Type Accessory Key ▲			Description	\$ Price Each	Order Qty.	Order \$ Price
	I	II	III, IV				
FSC1	T25-T200	T25-T150	—	2 covers per kit	21.00	10	210.00
FSC2	T250-T5000	T250-T5000	—	2 covers per kit	30.00	10	300.00
FSC23	—	—	T25-T5000	2 covers per kit	30.00	10	300.00

▲ Kits must be ordered separately. Also supplied in bulk packages of 100 individual covers. Add "B" to Type number (available only on FSC1B and FSC2B).

**Table 14.33: Separate NEMA Type 1 Enclosures for Transformers**

Class 9991 Type	For Use With
UE7	EO1, EO17, T50
LG1	EO2, EO3, EO4, EO15, EO16, EO18, EO19, T75, T100, T150, T200, T250, T300, T350, T500
SDG4	EO51, EO61, T750, T1000, EO71

NOTE: User must drill mounting holes. See pages 16-106 and 16-107 for dimensions.

FB2B	250-2000	200-2000	25-2000	Two pole fuse block for primary fusing, accommodates 1-1/2 x 13/32 inch midget fuse (2 rejection)	75.00	1	75.00

**Table 14.38: Field-Installable Secondary Fuse Clips**

Type	Type Accessory Key ◆			Description	\$ Price Each	Order Qty.	Order \$ Price
	I	II	III, IV				
SF25A	25-200	25-150	—	Secondary fuse block accommodates 1-1/4 x 1/4 inch fuse	21.00	10	210.00
SF25B	250-2000	200-2000	25-2000	Secondary fuse block accommodates 1-1/4 x 1/4 inch fuse	21.00	10	210.00
SF41A ■	25-200	25-150	—	Secondary fuse clip accommodates 1-1/2 x 13/32 inch midget fuse	18.00	10	180.00
SF41B ■	250-2000	200-2000	25-2000	Secondary fuse clip accommodates 1-1/2 x 13/32 inch midget fuse	18.00	10	180.00
FB1A	25-200	25-150	—	One pole fuse block for secondary fusing, accommodates 1-1/2 x 13/32 inch midget fuse (1 non-rejection)	53.00	1	53.00
FB1B	250-2000	200-2000	25-2000	One pole fuse block for secondary fusing, accommodates 1-1/2 x 13/32 inch midget fuse (1 non-rejection)	53.00	1	53.00

- SF41 can be installed on the following voltage codes: D1, D5, D24, D3, D4, D51, D2, D23, D14, D25, D20, D95, D19, D22, D36.
- ◆ I = voltage codes D1, D2, D3, D4, D5, D12, D13, D14, D15, D23, D24, D25, D31, D32, D33, D36, D5  
II = voltage codes D18, D20  
III, IV = voltage codes D19, D50

**Selection Guide**

- Determine the inrush and sealed VA of each coil in the control circuit and the VA of all other components.
- Total the **sealed** VA of all operating coils and the VA of all other loads. (This determines the minimum VA size required for the circuit.)
- Total the **inrush** VA of all coils that are starting at the same time and all loads and coils that are running.
- Locate a value in the VA column of Table 14.39 that is **equal to** or **greater than** the value calculated in step 2.
- In the VA row selected in step 4, find the inrush value under the appropriate voltage regulation column of Table 14.39. If this value is **greater than** the calculated value from step 3, this is the correct transformer VA rating.

If the inrush value on the selected VA row is **not greater than** the calculated value from step 3, use the next higher transformer VA rating, that is, the rating on the next row.

If your supply voltage is stable and fluctuates less than 5%, Schneider Electric recommends you use the 90% secondary voltage column. If your supply voltage is not stable and fluctuates more than 10% we recommend you use the 95% secondary voltage column. We recommend that you never use the 85% secondary voltage column since magnetic devices lose life expectancy if they are continuously started at 85% of rated voltage.

**Table 14.39: Regulation Chart for Type T**

VA	Inrush VA @ 20% power factor			Inrush VA @ 40% power factor		
	95% Secondary Voltage	90% Secondary Voltage	85% Secondary Voltage	95% Secondary Voltage	90% Secondary Voltage	85% Secondary Voltage

**Transformer Disconnects for NEMA Type 1 and Type 12 Enclosures**

Square D™ brand transformer disconnects mount inside or outside a control system enclosure. The transformer disconnect being connected directly to the 480 V system controls power for auxiliary, single-phase loads when the main three-phase disconnect is either ON or OFF. The transformer disconnect is normally wired to the line side of the control panel's main disconnect.

This convenient source of 120 V power can be used for auxiliary or isolated loads, such as panel lighting, portable power tools, and programmable controller equipment.

Units consist of copper-wound transformers, a disconnect switch, and primary and secondary fuse blocks. All blocks are installed in NEMA Type 1 or Type 12 enclosures.

Transformer disconnects are UL Listed. Use Square D™ brand Type TF industrial control transformers and Square D™ brand disconnect switches.

Multiple enclosure options and accessories are available. See catalog 9070CT0301 or contact your local Schneider Electric representative or distributor.

Transformer disconnects are available in NEMA Type 1 Standard, NEMA Type 12 Standard, and NEMA Type 1 Mini.

- Standard NEMA Type 1
- Mini NEMA Type 1
- Compact NEMA Type 1
- NEMA Type 12

**Voltage Transformers**

Schneider Electric offers three models of voltage transformers, each suited for a particular application:

- Model 450R
  - Applications requiring accurate voltage measurement within the 0.3% accuracy class
  - Switchboards with 1% instrumentation
- Model 460R
  - Applications with less critical accuracy and low burden requirements
  - Transducers and other panelboard monitoring
- Model E470
  - Extremely accurate voltage measurement
  - Low burden applications, such as PLC modules and similar, high-impedance electronic devices

**Table 14.41: Voltage Transformers**

Application	Model Number	Accuracy/Burden and Thermal Rating	Primary Voltages (120 V Secondary)
Large Burden	450R	0.3 W, X, M, Y; 500 VA Thermal	120–600 V
Small Burden	460R	0.6 W, 1.2X; 150 VA Thermal	120–600 V
Small Burden	470R	0.3W, 1.2X; 150 VA Thermal	120–600 V

**Current Transformers**

Current transformers are low cost, compact units that offer good electrical performance in a general purpose transformer.

- They are very easy to mount on the conductors.
- All current transformers feature permanent polarity marks molded into the case.

The following types of current transformers are available:

- General purpose
- Toroidal (single ratio)
- Rectangle window (single ratio)
- Split core
- Bushing (single ratio) (multi-ratio)

For part numbers, see Section 6 of the Supplemental Digest or see the Schneider Electric Product Configurator.

Contact your local Schneider Electric representative for other available features.

**Special Notes**

1. Distribution class lightning arresters are recommended as good practice, but are not included in the above prices. Arrester addition may affect dimensions. Contact your local Schneider Electric representative.
2. For 15 kV transformers requiring bottom entrance or exit, a separate compartment is required for adequate termination space and clearance. Transformers 1500 kVA and above with top entrance or exit may require a separate compartment to provide adequate wiring space. Contact your local Schneider Electric representative for special requirements.
3. If the transformer requires a 94-inch high enclosure for a switchgear line-up, or if a special enclosure is required, contact your local Schneider Electric representative.
4. For 95 kV BIL, consult your local Schneider Electric representative. (May affect dimensions.)

**Ordering Information**

To complete the three- or single-phase catalog numbers on this page:

1. In Table 14.44 or Table 14.46, find your required voltage rating.
2. Note the voltage code for that rating.
3. In Table 14.43 or Table 14.45, find the transformer with the required voltage rating.
4. Replace the ( ) in the catalog number of that transformer with the voltage code noted in step 2.

**Example 1:** 1000 kVA, 3Ø, 60 Hz, 150 °C temp. rise, 60 kV BIL, NEMA sound level, ventilated indoor enclosure, 13.2 kV delta 480Y/277, 2-2.5% full capacity taps. 2AN and 2BN = catalog no. EE1000T51H.

**Example 2:** 750 kVA 3Ø, 60 Hz, 80 °C temp. rise, 60 kV BIL, NEMA sound level, ventilated indoor enclosure, 4160 V Delta, 480Y/277, 2-2.5% full capacity taps. 2AN and 2BN = catalog no. EE750T19HB. Add 20% to listed price.

**Example 3:** 167 kVA, 2400/4160Y-120/240, 1Ø, 60 Hz = catalog no. EE167S13H. The unit would be supplied with 2–2.5% above and 2–2.5% full capacity below normal taps on the primary.

All Square D™ brand Isolated Power Panels meet or exceed UL® 1022 and 1047 and are cUL Listed.

All products listed in this section are available through standard ordering procedures from authorized Schneider Electric distributors. For more information, contact your nearest Schneider Electric sales office or distributor. Call 1-888-778-2733 or visit [www.schneider-electric.us](http://www.schneider-electric.us).

### Life Safety from Schneider Electric Medical Products

Schneider Electric has been deeply involved in isolated power systems since 1944. The current Iso-Gard™ brand of isolated power panels has evolved over the years and will continue to do so. With the ever-changing needs of the health care industry, Schneider Electric is the leader in innovation and design.

Recent updates to some of our current panels include the ability to use bolt-on or plug-on circuit breakers in all panels. With the growing need for X-ray and laser use, the controlled power panel solves many difficult situations where both of these technologies are required, but at different ampere ratings.

Mixing and matching components is easier today than ever before, with panels that can serve up to 16 circuits. The Iso-Gard Series 6 line isolation monitor (LIM) has communication capabilities and the ability to monitor the transformer temperature and current flow.

Schneider Electric can work with facility managers, design engineers, contractors, or anyone else trying to design an isolated power system. We can provide custom configurations to fit your needs. Simply configure the panel desired by starting with the basic operating room (OR) panel and adding the intensive care unit (ICU)/critical care unit (CCU) or controlled power panel options you need.

- Panels are field expandable to 16 circuits for all panels by adding Square D™ brand QO™ or QOB circuit breakers from Schneider Electric.
- Panels come with a main circuit breaker.
- Panels are 5 mA and field adjustable to 2mA.
- Six-inch deep panels are not available for all kVA ratings.

Orders can be automatically configured on the Schneider Electric brand ordering system available from your nearest Schneider Electric distributor.

To request drawings and/or product design and availability information, send an e-mail to: [medical\\_products@us.schneider-electric.com](mailto:medical_products@us.schneider-electric.com)

### Operating Room Panels

First introduced in the 1960s, but newly redesigned in 2011, this standard unit is most often used to supply 120 V service to the receptacles in an operating room. However, its use is not restricted to that application; it can also be used in critical care areas. This panel incorporates the following Schneider Electric components:

- Primary circuit breaker
- Isolation transformer
  - low-leakage
  - electrostatically shielded
  - 180 °C insulation system
  - 115 °C temperature rise
  - 30 dB sound level
- Reference ground bus bar
- Iso-Gard LIM
- NQ panelboard interior

Operating room panels are non-ventilated and are supplied with a #304 stainless steel trim with a brushed finish. Under continuous full load and normal hospital ambient conditions, the surface temperature of the front trim panel will be no greater than 50 °C. The panels are UL Listed under Section 1047, *Isolated Power Systems Equipment*

**Table 15.1: Operating Room Panel Ordering Information**

Catalog No.	kVA Rating	Backbox Depth (in inches)	Width/Height (in inches)
SIP	3 and 5	6	24 W x 43 H
	7.5 and 10	8	

### ICU/CCU Panels

Redesigned in 2011, these panels incorporate the same components and features as the operating room panels, but have the added feature of eight power receptacles and six approved grounding jacks connected to a ground bus for attaching fixed equipment and building structural grounds.

The power receptacles are “hospital only,” locking-type receptacles. Duplex or single receptacles are available on request. Although the panel is designed to serve the needs of a coronary care or intensive care bed, it has been widely applied to provide power within special procedure rooms, cardiovascular laboratories, and general operating rooms.

**Table 15.2: ICU/CCUPanel Ordering Information**

Catalog No.	kVA Rating	Backbox Depth (in inches)	Width/Height (in inches)
SIP	3, 5, 7.5 and 10	8	24 W x 45 H

### Controlled Panels

Controlled isolated power panels from Schneider Electric are designed to provide power for portable equipment outlets. In the past, most equipment operated on 60 A circuits. Today, these loads vary from 20 to 60 A and multiple pieces of equipment are being used. By applying the proper kVA loading, a panel can now provide power to multiple rooms and maintain safe operating conditions. All these panels are available in both one-phase and three-phase configurations with 5 to 25 kVA ratings.

The type of controls applied depends on the need. Schneider Electric has a variety of control schemes from push buttons to switches located in the operating room. The NEC requires that an audible and visual indication of alarm be available wherever isolated power is used. We use a receptacle module with a remote alarm indicator built into it for this purpose. A receptacle module without a remote alarm indicator is also available. The control of these circuits is important not only for the safety of turning them on and off, but they also turn the remote alarm indicators on and off at the same time. This reduces any confusion caused by an alarm going off in the operating room from circuits that don't need to be energized.

The basic control scheme is the mechanical interlock panel. The panel will serve various locations within the hospital. Interlocking circuitry allows predetermined locations to be used at any given time. Consequently, the line isolation monitor (LIM) monitors only the wiring and its inherent leakage to that receptacle. Remote indicator alarm stations must be located at the receptacle location. A push button station located in the panel controls the interlocking system. If the panel location is inaccessible or inconvenient for operating personnel, the push button station is available in a separate module that can be installed at the nurses' station or any other convenient location. This can be an inconvenience since this type of control system requires someone to select which room will be turned on. It also poses a potential problem in that someone could easily push a button to turn the power on in another room, thus turning off the power in a room that may actually be using a piece of equipment.

**Table 15.3: Controlled Panel Ordering Information**

Catalog No.	kVA Rating	Backbox Depth (in inches)	Width/Height (in inches)
SIP	15	12	30 W x 51 H
	25	14	

### Receptacle Modules for Controlled Panels

X-ray/laser power receptacle modules from Schneider Electric provide a convenient source of power for portable X-ray and laser equipment. The receptacle provided in each module is matched to the NEMA plug configuration of the equipment with which it will be used, and is mounted behind the door on the stainless steel face plate. The door features a concealed hinge and a touch latch.

### Duplex Panels

The Duplex Isolation Power Panel is a single enclosure containing two complete hospital isolation systems. A divider in the unit's backbox separates the systems from top-to-bottom and front-to-back.

Each system has its own set of equipment, all of which is manufactured by Schneider Electric:

- Primary circuit breaker
- Isolation transformer
- Reference ground bus bar
- Iso-Gard™ line isolation monitor (LIM)
- NQ panelboard interior

**Table 15.4: Duplex Isolation Panel Ordering Information**

Catalog No.	kVA Rating ▲	Backbox Depth (in inches)	Width/Height (in inches)
SIX	3-10	8	34 W x 71 H

▲ Panels are available in any combination of two kVA ratings.

### Dual Output Voltage Panels

The dual output voltage, hospital isolated power panel is a single, ungrounded panel that can supply two different output voltages simultaneously. Similar to a standard distribution panel or load center, it can supply both 120/208 V or 120/240 V of ungrounded, isolated, single-phase power using only one isolation transformer. Other hospital isolation panels can supply only one output voltage.

Typically, the 208 or 240 V circuits of the dual output voltage panel supply power to operating room equipment such as mobile X-ray machines or surgical lasers. At the same time, the panel's 120 V circuits can supply power to convenience receptacles, surgical lights, X-ray film illuminators, sterilizers, and other 120 V appliances commonly found in operating rooms. This panel is ideally suited as a power supply for power/ground modules and X-ray indicator/receptacle modules.

**Table 15.5: Dual Output Panel Ordering Information**

Catalog No.	Output Voltage Rating (in Vac)	Backbox Depth (in inches)	Width/Height (in inches)
SIDV	120/208	14	34 W x 51 H
	120/240		

**New!** Iso-Gard™ Series 6 Line Isolation Monitor—UL Recognized

The Square D brand, Iso-Gard Series 6, microprocessor-controlled, line isolation monitor (LIM) is included as standard equipment in all Schneider Electric hospital isolation panels. This LIM is also available as a replacement unit for older LIMs, is a direct replacement for all previous Schneider Electric LIMs, and is electrically compatible with all hospital isolated power systems.

- Automatic and manual self-test and self-calibration that reduces the frequency of required periodic testing
- Digital and analog display
- Unique audible alarm that will not be confused with other equipment
- UL component recognized and CSA classified
- Microprocessor-controlled circuitry for highest accuracy and stability

**Table 15.6: Iso-Gard LIM Ordering Information and Specifications**

Catalog No.	Operating Voltage	Hazard Current Alarm Level	Mode	Monitor Hazard Current
IG6	85–265 Vac, 50 or 60 Hz	2 or 5 mA (selectable)	Single-phase	25 µA or less

**Remote Alarm Indicators**

The National Electrical Code® (NEC®) **requires** audible and visual alarm indication where isolation power is used (NEC 517-160). Schneider Electric offers the IG2000P and RA1 remote alarm indicators for this purpose.

**New!** IG2000P

RA1

**New!** **Nurses' Station Indicators/Alarm Annunciators**

Nurses' station indicators are available by combining the standard IG2000P remote onto a ganged plate or by using the new IGR or IGRD indicators/alarm annunciators. The IGR unit can support up to 199 panels on a single, twisted-pair connector. The IGRD unit has a larger capacity.

**New!** **Iso-Gard™ IGT Dual Clock/Timer**

The IGT unit displays both time of day and elapsed time information. The top, four-digit display shows the current time. It can operate in both 12- and 24-hour time modes. The bottom, four-digit display is an elapsed time counter controlled by the Count/Reset and Hold/Resume buttons.

- Bright-red LED display for enhanced readability under the intense lighting conditions found in hospital operating rooms
- 12/24 hour selectable mode
- Power outage backup for at least 24 hours without batteries
- Designed for flush wall mounting

A multi-display unit is available by combining the IGT unit into a four display unit and utilizing an IGT 1550 four-point remote control.

**New!** **Iso-Gard™ IGT1550 Remote Control**

The IGT1550 remote control provides the ability to control a clock/elapsed timer, such as the IGT, from a more convenient location.

### Power/Ground Modules

When both ground jacks and power receptacles are required, these UL Listed modules offer convenience and save labor in field wiring. The units include four power receptacles, four twist-to-lock ground jacks, and a ground bus with a generous number of lugs for external ground connections.

The main ground connection in the module accommodates up to a #1/0 cable. The units are completely factory wired; only field power connections and ground connections are necessary. They are furnished with Type 304, brushed stainless steel face plates.

4 Red Duplex Receptacles  
and 4 Ground Jacks

4 Locking Receptacles  
and 4 Ground Jacks

### Hospital Ground Cords and Jacks

Schneider Electric provides hospital-grade devices for the supply and grounding of portable equipment.

- Hospital ground cords
  - Highly flexible wire with a heavy duty lug or clip end
  - Ground cord with lug end is UL Listed (UL 467)
  - Various lengths available
- Hospital ground jacks

♦ Dimensions include factory wired power connections.  
★ Selector Switch is on left, extends 1-5/8" from mounting surface.

Types M and T integral horsepower manual starters provide convenient “On-Off” operation of small single phase, polyphase or DC motors. Typical applications include small machine tools, pumps, fans and conveyors.

- Push button (M) or toggle (T) operators
- Reliable overload protection
- Pilot light and auxiliary contact available

**Table 16.17: Integral Horsepower Manual Starters**

Note that the prices shown do not include thermal units. Standard trip thermal units are **\$21.50** each; see page 16-116 for selection information.

**Thermal Units**

Starters will not operate without properly installed thermal units and device reset. Thermal unit must be installed so that markings face the front of starter.

**Application Data**

**Size**—Available in NEMA Sizes M-0, M-1, and M-1P.

**Poles**—Two poles single phase; three poles polyphase; 2 poles DC.

**Voltage**—600 volts AC max.; 250 volts DC max.

**Overload Relays**—Melting alloy thermal overload relays have provisions for one Type B thermal unit for single phase starters and three Type B thermal units for three phase starters. **All thermal units must be installed and the device reset before the starter contacts will operate.** After overload relays have tripped, allow one or two minutes for the alloy to solidify before resetting.

**Operator**—Available with a push button or toggle operator in open and NEMA 1 versions. NEMA 4/4X (stainless) and 12 versions utilize a direct acting push button only. NEMA 4/4X (polyester) and 7/9 versions utilize an external toggle to actuate a push button device inside.

**Maintenance of Equipment**

For proper performance, all equipment should be periodically inspected and maintained. Replacement contacts and interlocks are available in kit form to facilitate servicing and stocking. In addition, the service bulletin contains an exploded view of the device with components clearly marked for easy identification by description and part number.

**Mechanism Lock Off**—Both open devices and starters in NEMA 1 surface and flush mounting, and NEMA 4, 4X, 7 & 9 and 12 enclosures can be locked in the OFF or STOP position. The NEMA 1 surface mounting, 4, 4X, 7 & 9 and 12 enclosures can also be locked closed to prevent unauthorized entry.

**Table 16.21: Terminal information and Replacement Contact Kits**

NEMA Size	Power Terminals		Auxiliary Interlock Terminals		Number of Poles	Service Bulletin	Replacement Contact Kit	
	Type of Lug	Wire Size (Solid or Stranded Copper Wire) Min.-Max.	Type of Lug	Wire Size (Solid or Stranded Copper Wire) Min.-Max.			Class	Type

M-1P	Box Lug	#14-#6	Pressure Wire	#16-#12	2	312AS	9998	ML2

**Accessories and Modification Kits**

**One auxiliary contact**, either N.O. or N.C. can easily be added internally to any open or enclosed Type M or T manual starter. It occupies the space provided in either the upper right hand or left hand corners of the device. These contacts are for AC loads only. For electrical ratings, refer to page 16-110, Class 9999 Types SX11 or SX12.

A unique red **pilot light** assembly that clips into place is available **factory installed** on NEMA 1, 4, 4X, 12 and flush enclosures or as a **field modification kit** on the NEMA 1 surface or flush mounting enclosures. See page 16-11. The color cap assembly snaps into a knockout in the enclosure cover on the NEMA 1 enclosures. Pilot light kits are available for use on Various voltages (110-600 volts). Pilot light assemblies are not available for NEMA 7 & 9 enclosures.

NEMA style TeSys U motor starter is integrated, simple to choose and to install, consisting of a control unit snapped in a powerbase. NEMA style TeSys U can be configured to fit specific applications as well. The NEMA style TeSys U uses the same optional accessories: reverser, current limiter, predictive maintenance options and communication options as the IEC TeSys U.

To get detailed information about TeSys U, visit our website at www.schneider-electric.us.com.

**Table 16.33: How to Order**

To Order Specify:	Catalog Number			
• Class Number	Class	Type	Voltage Code	Form(s)
• Type Number				
• Voltage Code				
• Form(s) see pages 16-100-16-104	8539	SCG44	V06	AH20P1X11

Note: Description: NEMA Size 1, (10 Hp) Electronic Motor Circuit Protector (MCP) Combo Starter in a NEMA Type 1 enclosure with a 480V coil, start/stop pushbutton (A), class 20 SSOLR (H20), red pilot light (P1), 1 N.O. and 1 N.C. auxiliary contact (X11)

**IMPORTANT - This information is intended for general interpretation of catalog numbers. Do not use to create catalog numbers for this product line.**

Note: The terms Type and Form do not appear in the catalog number.

Devices are wired from factory according to customer preference as follows:

- Common control
- Separate control (Form S)
- Control power transformer (CPT)

Type SCO2  
Size 1, 3-Pole Contactor

Class 8502 Type S magnetic contactors are used to switch heating loads, capacitors, transformers, and electric motors where overload protection is provided separately. Class 8502 contactors are available in NEMA sizes 00 through 7. Type S contactors are designed for operation at 600 Vac, 50 to 60 Hz.

**Table 16.34: 3-Pole Polyphase—600 Vac Maximum—50–60 Hz**

- ▲ Size 6 and 7 are rated NEMA 4 only, painted sheet steel.
- Coil voltage code must be specified to order this product. Refer to standard voltage codes shown below.

**Table 16.35: Coil Voltage Codes**

Voltage		Code	\$ Price Adder
60 Hz	50 Hz		
24♦	—	V01	No Charge
120★	110	V02	No Charge
208	—	V08	No Charge
240	220	V03	No Charge
277	—	V04	No Charge
480	440	V06	No Charge
600	550	V07	No Charge
Specify	Specify	V99	35.60

♦ 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (i.e., order as 8502SBO2V01S).

★ 120 Volt Polyphase contactors are wired for separate control Form S must be specified (i.e., order as 8502SCO2V02S).

Note: For voltage codes used with control transformers, see page 16-101. Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is supplied at no charge.

- ▲ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information.
- Limited to one Pilot Light and a Selector Switch or Start-Stop Push Button.
- ◆ Coil voltage code must be specified to order this product. Refer to voltage codes shown on page 16-14.
- ★ NEMA 7 and 9 bolted cast aluminum are not UL listed.

**Auxiliary Units**

Auxiliary contacts and power poles can be added by the factory or in the field on all Type S starters and contactors. The table below shows the maximum number of auxiliary units (**in addition to the holding circuit contact**) that can be added to a given size starter or contactor. In addition, it is possible to add a second internal contact on NEMA Size 0, 1, and 2 contactors and starters.

**Table 16.37:**

NEMA Size	Type	No. of Poles of Basic Contactor	Maximum Number of External Auxiliary Units (In addition to holding circuit contact)
00	SA	2–3	4 single circuit auxiliary contacts (N.O. or N.C.) if second internal auxiliary contact is not used.
0, 1 and 2	SB SC SD	1, 2 or 3	4 single circuit auxiliary contacts (N.O. or N.C.)
		4 or 5	2 single circuit auxiliary contacts (N.O. or N.C.) plus 1 power pole adder (1 or 2 poles, N.O. or N.C.)
3, 4 and 5	SE SF SG	2–5 (Size 3 and 4)	3 single circuit auxiliary contacts (N.O. or N.C.)
		2–3 (Size 5)	2 single circuit auxiliary contacts (N.O. or N.C.) plus 1 NEMA Size 0-1 or Size 2 power pole adder (1 or 2 poles, N.O. or N.C.)
6 and 7	SH SJ	2–3	3 single circuit auxiliary contacts (N.O. or N.C.)
			2 single circuit auxiliary contacts (N.O. or N.C.) plus 1 NEMA Size 0–1 or Size 2 power pole adder (1 or 2 poles, N.O. or N.C.)

- ▲ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information.
- Limited to 1 pilot light and a selector switch or Start-Stop push button.
- ♦ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes shown on page 16-14.
- ★ NEMA 7 and 9 bolted cast aluminum are not UL listed.

Coil Voltage Codes and page number reference for additional information are shown on page 16-14.  
For How to Order Information, see page 16-13.

Type SCO3  
Size 1, 3-Pole Starter

### General Information

Type S magnetic starters are used for full-voltage starting and stopping of AC squirrel cage motors. Motor overload protection is provided via melting alloy type thermal overload relays. Type S starters are available in NEMA Sizes 00 through 7, and are designed for operation at 600 Vac, 50 to 60 Hz.

### Solid State Overload Relay Protection (Motor Logic™)

These ambient insensitive overload relays are available on Sizes 00 through 6 and standard on size 7. They provide phase loss, phase unbalance protection. To order, add Form **H30** (for selectable trip class 10 or 20 protection). For more information about Motor Logic, see pages 16-83 and 16-102.

### *New!* Adapted Bimetal (NEMA Sizes 00–1)

The Adapted Bimetal motor starter consists of a specially designed adapter that attaches with bus bars to the NEMA Type S contactor and holds the LRD or LR3D (IEC Style) bimetal overload relay. This starter configuration can be ordered by adding Form E (adapter only) to the standard catalog number. Once the FLA of the motor has been determined, the LRD or LR3D bimetal overload can be purchased separately and installed in the field at a later date. For more information see Table 16.269.

### *New!* TeSys T Motor Management System (NEMA Sizes 1–6)

TeSys T is a flexible system that integrates seamlessly into your automation system through five major communication protocols. TeSys T can predict what will happen in the process, as it accurately monitors current, voltage, and power over a wide range. For additional information about TeSys T Motor Management System, see pages 16-84 to 16-88 and page 16-103.

### 3-Pole Polyphase—600 Vac Maximum—50–60 Hz

Note that prices shown do not include thermal units. Devices require 3 thermal units (Sizes 00–6). Standard trip thermal units are **\$21.50** each. See page 16-116 for selection information.

### Types SB–SD With Auxiliary Load Terminals

It is sometimes desirable to use capacitors in motor branch circuits to improve power factor. The Size 0–2 Type SB–SD starters listed below include three auxiliary terminals to allow easy connection of power factor correction capacitors. When capacitors are connected using these terminals, no adjustment to the selection of thermal units is necessary. The auxiliary terminals accept #12–16 solid or stranded wire. NEMA Size 3 & 4 starters have provisions for auxiliary connections. User must supply lugs as necessary.

The Type S starters with auxiliary load terminals may also be used to control two motors simultaneously from a single starter. However, this application is tightly restricted by Section 430-53 of the National Electrical Code. Refer to the NEC for restrictions regarding overload protection, size of controller and motor branch circuit protection.

**Table 16.48: 3-Pole Polyphase—600 Vac Maximum—50–60 Hz**

Note that prices shown do not include thermal units. Devices require 3 thermal units. Standard trip thermal units are \$21.50 each. See page 16-116 for selection information.

Tables and footnotes are taken from NEMA Standards.

The ratings for capacitor switching above assume the following maximum available fault currents:

- NEMA Size 00–3: 5,000 A RMS Sym.
- NEMA Size 4–5: 10,000 A RMS Sym.
- NEMA Size 6: 18,000 A RMS Sym.
- NEMA Size 7: 30,000 A RMS Sym.

Note: If available fault current is greater than these values, connect sufficient impedance in series as noted in the previous paragraph.

- Δ For NEMA Size 6 & 7, the operation rate is as follows: Continuous operation rate is 3 operations per minute maximum; Jogging or Plugging Duty operation rate is 15 operations per minute for a maximum of three minutes.

The motor ratings in Table 16.51 are NEMA standard ratings and apply only when the code letter of the motor is the same as or occurs earlier in the alphabet than is shown in the Table 16.52. Motors having code letters occurring later in the alphabet may require a larger controller. Consult Schneider Electric CCC at (1-888-778-2733).

Class 8502 Type WH

**General Information**

Class 8502 Type W non-reversing vacuum contactors used to switch capacitors, transformers and electric motors where overload protection is separately provided. Type W vacuum contactors are designed for operation at 600 Volts, 50/60 Hz. (See page 16-50 for Class 8702 Reversing Vacuum Contactors.)

**General Information**

The Class 8502 Type V vacuum contactor is a three-pole, 1500 V rated device which meets UL508 (1.5 kV) and CSA. Vacuum technology offers long life and low maintenance in a compact, lightweight design. The contactor is suitable for contaminated atmospheres because the main contacts are sealed in vacuum bottles. Also, since gravity is not used to assist contactor operation, the Class 8502 contactor may be mounted in any plane without special modifications. Type V vacuum contactors are designed for the control of inductive or non-inductive loads at voltages between 200 and 1500 Vac.

**General Information**

Class 8536 Type W non-reversing vacuum starters are used to switch electric motors where overload protection is not separately provided.

Type W vacuum starters are designed for operation at 600 Volts, 50/60 Hz. Starters are available exclusively with Motor Logic™ Feature Base Solid State Overload Relays.

**General Information**

Class 8538 and 8539 Type S combination starters combine the requirements of motor overload and short circuit protection into one package. These starters are manufactured in accordance with NEMA standards and are UL Listed (although some Form numbers may not be listed—contact Schneider Electric Customer Care Center for information). Class 8538 and 8539 combination starters are designed to operate at 600 Vac maximum, 50 to 60 Hz—and are supplied with melting alloy overload relays as standard.

**3-Pole Polyphase—600 Vac Maximum—50–60 Hz**

Note that prices shown do not include thermal units. Devices require 3 thermal units. Standard trip thermal units are \$21.50 each. See page 16-116 for selection information. For class J fuse clip, use Form Y1072 (no charge).

▲ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes shown on page 16-32.  
 ■ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information.  
 ♦ NEMA Size 6 starters are NEMA 4 painted sheet steel enclosures.

Note: Some control transformers may require the use of oversized enclosures. Refer to control transformer selection table on page 16-41.

- ▲ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information.
- NEMA Size 6 starters are NEMA 4 painted sheet steel enclosure.
- ♦ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes shown below.
- ★ Single phase units require one thermal unit and are not available with Form Hxx—Solid State Overload Relays.
- ▼ Not included in Laser™ Delivery program.

Note: Some control transformers may require the use of oversized enclosures. Refer to control transformer selection table on page 16-41.

**Table 16.81: Coil Voltage Codes**

Voltage		Code	\$ Price Adder
60 Hz	50 Hz		
24□△	—	V01	No Charge
120□	110	V02	No Charge
208	—	V08	No Charge
240	220	V03	No Charge
277	—	V04	No Charge
480	440	V06	No Charge
600	550	V07	No Charge
Specify	Specify	V99	35.60

△ 24 V coils are not available on Sizes 4-7. On Sizes 00-3, where 24 V coils are available, Form S (separate control) must be specified (i.e., order as 8538SBG11V01S).

□ These voltage codes must include Form S (supplied at no charge). When specifying Form S, please supply motor voltage when ordering (i.e., order as 8538SCG11V02S).

Note: For voltage codes used with control transformers, see page 16-101. Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is supplied at no charge.

For How to Order Information, see page 16-13.

**3-Pole Polyphase – 600 Vac Maximum – 50-60 Hz**

Note that prices shown do not include thermal units. Devices require 3 thermal units. Standard trip thermal units are \$21.50 each. See page 16-116 for selection information.

- ▲ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information.
- For NEMA Size 3–5 starters in oversized NEMA 1, 4 or 12 enclosures, contact factory for pricing and TAG number.
- ♦ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes shown below.

Note: Some control transformers may require the use of oversized enclosures. Refer to control transformer selection table on page 16-41.

**Table 16.93: Coil Voltage Codes**

Voltage		Code	\$ Price Adder
60 Hz	50 Hz		
24 ▼★	—	V01	No Charge
120 ▼	110	V02	No Charge
208	—	V08	No Charge
240	220	V03	No Charge
277	—	V04	No Charge
480	440	V06	No Charge
600	550	V07	No Charge
Specify	Specify	V99	35.60

- ★ 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (i.e., order as 8539SBG41S8V01S).
- ▼ These voltage codes must include **Form S** (supplied at no charge). When specifying **Form S**, please supply motor voltage when ordering (i.e., order as 8539SCG41S8V02S).
- ▲ Not included in Laser™ Delivery program.

Note: For voltage codes used with control transformers, see page 16-101.  
Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is supplied at no charge.

- ▲ NEMA Size 6 and 7 starters are NEMA 4 painted sheet steel enclosures.
  - ◆ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information.
  - ◆ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed on page 16-38.
  - ★ Single phase units require one thermal unit and are not available with Form Hxx—Solid State Overload Relays.
  - ▼ Not included in Laser™ Delivery program.
- Note: Some control transformers may require the use of oversized enclosures. Refer to control transformer selection table on page 16-41.

For How to Order Information, see page 16-13.

Refer to page 16-31 for details.

Application Data

Table 16.98: Class 8539—UL Listed Short Circuit Ratings

Motor Circuit Protector Type			
NEMA Size	Enclosure	AIC at 480 Vac (RMS)	AIC at 600 Vac (RMS)
0, 1	Standard▲	100,000	35,000
2 thru 5	Standard▲	100,000	50,000
6	Standard▲	65,000	18,000
7	Standard▲	65,000	30,000

▲ Standard enclosure includes: NEMAs 1, 4 & 4X stainless and 12/3R.

Table 16.99: Electronic Motor Circuit Protector (MCP) Selection by HP Ratings of Induction-type Squirrel-Cage Motors

3Ø 60 Hz Voltages				Full-Load (A)	Suffix
200 Vac	230 Vac	460 Vac	575 Vac		
.5–5	.5–7.5	.75–15	1–20	1.5–25	M71
5–10	5–15	10–30	15–40	14–42	M72
10–25	15–30	25–60	30–75	30–80	M73
20–40	25–50	50–100	60–125	58–130	M74
40–60	50–75	100–150	125–200	114–217	M75

Note: The MCP adjustable trip range is determined by the suffix of the circuit breaker catalog number. Table 16.99 indicates the trip range which corresponds to a given suffix number. The MCP Motor Circuit Protector should be adjusted to a level just above Locked-Rotor Current of the motor. This setting will provide optimum overcurrent protection for the motor. For more information on MCP instantaneous trip circuit breakers, refer to the MCP circuit breaker section of this Catalog.

Table 16.100: UL Listed Short Circuit Ratings

Thermal Magnetic Circuit Breaker Type			
NEMA Size	Enclosure	AIC at 480 Vac (RMS)	AIC at 600 Vac (RMS)
0, 1	Standard■	100,000	35,000
2 thru 5	Standard■	100,000	50,000
6	Standard■	65,000	18,000
7	Standard■	65,000	30,000

■ Standard enclosure includes: NEMAs 1, 4 & 4X stainless and 12/3R.

Table 16.101: Class 8538—UL Listed Short Circuit Ratings

NEMA Size	NEMA Fuse Class	Enclosure	Available Amperes RMS Symmetrical
0–3	Class H or K	Standard♦	5,000
0–3	Class R/J	Standard♦	100,000
0–2	Class H or K	Oversize	5,000
0–2	Class R/J	Standard	100,000
4–5	Class H or K	Standard♦	10,000
4–5	Class R/J	Standard♦	100,000
6	Class H or K	Standard♦	18,000
6	Class R/J	Standard♦	100,000

♦ Standard enclosure includes non-oversize NEMAs 1, 4 & 4X Stainless, and 12.

Table 16.102: Table 2: Motor Code Letter Table

Horsepower	Motor Code Letters
1/2 or less	A-L
3/4–1-1/2	A-K
2–3	A-J
5–25	A-H
30–125	A-G
150 or more	A-F

Note: The combination starter selection tables on pages 16-36–16-37 are suitable for motors with Locked-Rotor Current letters per NEC Table 430-7(b) as listed in Table 16.102. For other motors a special thermal magnetic circuit breaker with adjustable magnetic trip settings for the specific motor is required. When ordering for these special applications, specify the motor horsepower, voltage, frequency, full load current and code letter (or locked rotor current) to assure proper protection.

★ Order Class 9999 Type SCU6 parts kit to convert power terminals to accept sizes 2/0–300 MCM wire.  
▼ Terminal block range limited to #16–#14.

**Accessories**

**Interlocks and Control Transformers**

A one or two pole electrical interlock can be added to the disconnect switch or circuit breaker. Thus, if a separate control circuit is used, the magnetic starter can be de-energized when the disconnect is switched to the OFF position. See Table 16.104 for proper interlock selection. For electrical ratings of disconnect and circuit breaker interlocks, see Table 16.105 below.

An electrical interlock may also be factory installed in either a disconnect switch or circuit breaker combination starter. Specify **Form Y74** for single pole, or **Form Y75** for two pole interlocks. For pricing see factory modifications (Forms).

Note: 9070TF transformers are now standard in Series K combination starters.

- Requires oversized enclosure. (Size 2 reversing enclosure.)
- ◆ Available in standard enclosure with Mag-Gard™ circuit breaker and non-fusible disconnect switch. Requires oversized enclosure with thermal-magnetic circuit breakers and fusible disconnect switches. (Size 2 reversing enclosure.)
- ★ Complete the contactor or starter Class and Type with Voltage Code, see page 16-101.

**Internal Auxiliary Switch**—Circuit breakers can be supplied with a factory installed auxiliary switch for remote indication of an open and/or tripped or a closed breaker. One (specify **Form Y741**) or two (specify **Form Y751**) auxiliary switches can be supplied. The switches are supplied with normally open and normally closed circuits with a common connection. Contacts must be used on the same polarity and are rated 15 A at 240 Vac. The auxiliary switches are located internally and are furnished with 19-20 inch long leads.

**Alarm Switch**—The alarm switch only operates when the breaker is tripped. It is used to actuate bell alarms and warning lights. The alarm switch is factory installed only (specify **Form Y742**) and consists of a single pole single throw switch which is normally open except when the breaker is tripped. The contacts are rated 4 A at 240 Vac. This switch is located in the breaker and is supplied with 19-20 inch long leads.

**Transformer Selection**—Space and drilling are provided in all disconnect switch and circuit breaker combination starters in NEMA 1, 4 & 4X stainless and polyester, 12 and 7 & 9 bolted enclosures for the field addition (or factory installation) of a Class 9070 control circuit transformer and Class 9999 Type SFR4 fuse holder. This kit can be either panel mounted or side mounted on the Type S starter. For standard control transformer selection in combination starters, see Table 16.106. Consult field office for transformer additions to NEMA 7 & 9 SPIN TOP™ enclosures. For secondary fuse holder order 9080PF1.

**Fuse Block Mounting Brackets**—The standard capacity transformer, Class 9070 Type T100, for the Size 0 and 1 starters mounts to the right of the magnetic starter.

**Standards**—Most combination starters and forms are UL Listed in file E152395, Category NKJH, and CSA File CR 584.

NEMA 00, 0, 1 Reversing Contactor

Class 8702 Type S reversing magnetic contactors are used for starting, stopping, and reversing AC motors where overload protection is separately provided. Class 8702 reversing contactors consist of two Class 8502 contactors mechanically and electrically interlocked. Open type devices, Sizes 0–5, are available in either horizontal or vertical arrangements. Sizes 00, 6, and 7 are available as horizontal only. Enclosed devices, Size 00–7, use horizontally arranged components. Type S reversing contactors are designed for operation at 600 Vac, 50–60 Hz.

- ▲ NEMA 4 and 4X stainless steel enclosures (sizes 0–5) have a brushed finish. Sizes 6 and 7 are painted sheet steel and are rated NEMA 4 only.
- Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed in selection table below.
- ♦ NEMA 7 and 9 bolted are not UL listed.
- ★ NEMA 12 enclosure may be field modified for outdoor non-corrosive and non-service-entrance-rated application; see page 16-95 for more information.

Table 16.116: Coil Voltage Codes

Voltage		Code	\$ Price Adder
60 Hz	50 Hz		
24▼△	—	V01	No Charge
120△	110	V02	No Charge
208	—	V08	No Charge
240	220	V03	No Charge
277	—	V04	No Charge
480	440	V06	No Charge
600	550	V07	No Charge
Specify	Specify	V99	35.60

- ▼ 24 V coils are not available on Sizes 4-7. On Sizes 00-3, where 24 V coils are available, **Form S** (separate control) must be specified (i.e., order as 8702SAO4V01S).
- △ These voltage codes must include **Form S** (supplied at no charge) (i.e., order as 8702SAO4V02S).
- Note: For voltage codes used with control transformers, see page 16-101.  
Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is supplied at no charge.

- ▲ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes listed in selection table on page 16-44.
- NEMA 7 and 9 bolted are not UL listed.
- ◆ NEMA 12 enclosure may be field modified for outdoor non-corrosive and non-service-entrance-rated application; see page 16-95 for more information.

**Table 16.118: Auxiliary Units—Class 8702, 8736 and 8810**

The table below shows the maximum number of auxiliary units (in addition to the holding circuit and interlocking contacts) that can be added to either the forward or reverse contactor or starter.

NEMA Size (Type)	No. of Poles of Basic Contactor	Maximum number of auxiliary units on each contactor, forward or reverse. (In addition to internal holding circuit and interlocking contacts.)
00 (SA)	2 or 3	2 single circuit auxiliary contacts (N.O. or N.C.)
0, 1 and 2 (SB, SC and SD)	2 or 3	4 single circuit auxiliary contacts (N.O. or N.C.)★
	4	2 single circuit auxiliary contacts (N.O. or N.C.)
3, 4, 5, 6, and 7 (SE, SF, SG, SH, and SJ)	Any	2 single circuit auxiliary contacts (N.O. or N.C.)

★ When adding 4 external auxiliary contacts to one Size 0 or 1 contactor, remove one of the return springs.

NEMA Sizes 00, 0, 1  
Reversing Starter  
(Horizontal Type)

Class 8736 Type S reversing magnetic starters are used for full-voltage starting, stopping, and reversing AC squirrel cage motors. Class 8736 starters consist of one Class 8502 contactor and one Class 8536 starter mechanically and electrically interlocked. Open type devices, Sizes 0–5, are available in either horizontal or vertical arrangements. Sizes 00, 6, and 7 are available as horizontal only. Enclosed devices use horizontally arranged components. Type S starters are designed for operation at 600 Vac, 50–60 Hz.

**Overload Relays**

Class 8736 Type S Size 00–6 reversing starters are provided with melting alloy thermal overload relay as standard. Interchangeable thermal units are available in standard trip Sizes 00–6, as are bimetallic overload relays. Ambient compensated and non-compensated versions are supplied with manual or automatic reset, trip current adjustment, and an alarm contact on Sizes 0–2.

Quick trip is available on Sizes 00–4, and slow trip on Sizes 00–3.

Single phase starters use one thermal unit; three phase starters use three thermal units. See page 16-116 for selection information.

**Adapted Bimetal (NEMA Sizes 00–1)**

The Adapted Bimetal motor starter consists of a specially designed adapter that attaches with bus bars to the NEMA Type S contactor and holds the LRD or LR3D (IEC Style) bimetal overload relay. This starter configuration can be ordered by adding Form E (adapter only) to the standard catalog number. Once the FLA of the motor has been determined, the LRD or LR3D bimetal overload can be purchased separately and installed in the field at a later date. For more information see Table 16.269.

**Solid State Overload Relay Protection (Motor Logic™)**

These ambient insensitive overload relays are available on three phase sizes 00 through 6 and standard on size 7. They provide phase loss, phase unbalance protection. To order, add Form H30 (for selectable trip class 10 or 20 protection). For more information about Motor Logic overload relays, see pages 16-83 and 16-102.

**TeSys T Motor Management System (NEMA Sizes 1–6)**

TeSys T is a flexible system that integrates seamlessly into your automation system through five major communication protocols. TeSys T can predict what will happen in the process, as it accurately monitors current, voltage, and power over a wide range. For additional information about TeSys T Motor Management System, see pages 16-84 to 16-88 and page 16-103.

▲ NEMA 4 and 4X stainless steel enclosures (sizes 0–5) have a brushed finish. Sizes 6 and 7 are painted sheet steel and are rated NEMA 4 only.  
■ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes shown on page 16-47.  
♦ NEMA 7 and 9 bolted are not UL listed.  
★ NEMA 12 enclosure may be field modified for outdoor non-corrosive and non-service-entrance-rated application; see page 16-95 for more information.

For How to Order Information, see page 16-13.

**Table 16.120: 600 Vac Maximum—50–60 Hz**

Note that prices shown do not include thermal units. Standard trip thermal units are \$21.50 each. See page 16-116 for selection information.

**Table 16.121: Coil Voltage Codes**

Voltage		Code	\$ Price Adder
60 Hz	50 Hz		
24▼★	—	V01	No Charge
120▼	110	V02	No Charge
208	—	V08	No Charge
240	220	V03	No Charge
277	—	V04	No Charge
480	440	V06	No Charge
600	550	V07	No Charge
Specify	Specify	V99	35.60

- ★ 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (i.e., order as 8736SCO1U01S).
  - ▼ These voltage codes must include **Form S** (supplied at no charge) (i.e., order as 8736SBO7V02S).
- Note: For voltage codes used with control transformers, see page 16-101.  
Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is supplied at no charge.

- Standard enclosure has space for a fused control transformer, **Form F4T**, on Sizes 0-2, except for Size 0 & 1 4-Pole devices.
- ◇ 3-Pole only.

Class 8702 Type W Reversing Vacuum Contactors are used to switch capacitors, transformers and electric motors where overload protection is separately provided. Type W reversing vacuum contactors are designed for operation at 600 Volts, 50/60 Hz.

**Auxiliary Contacts**—An auxiliary contact block, Class 9999 Type WX11, with one normally open contact and one normally closed contact, is used with Size 4, 5 and 6 vacuum contactors. Additional auxiliary contact units may be added to the Size 4 and 5 reversing contactors in the field. A maximum of 2 units may be added to the Size 4; a maximum of 1 unit may be added to the Size 5.

**Termination Means**—The Size 4 reversing vacuum contactor is supplied with line and load side lugs. The Size 5 and 6 reversing vacuum contactors are supplied without line and load side lugs.

Class 8738 and 8739 Type S reversing combination starters combine the requirements of motor overload and short circuit protection into one convenient package. Type S reversing combination starters are manufactured in accordance with NEMA standards, and are UL Listed (although some Form numbers may not be listed—contact your nearest Square D/Schneider Electric sales office for further information). Class 8738 and 8739 reversing combination starters are designed to operate at 600 Vac, 50–60 Hz—and are supplied with melting alloy overload relays as standard. For Class J fuses, use form Y1072 (No Charge).

**Class 8738 Fusible Disconnect Switch Type**

Note that the prices shown do not include thermal units. Devices require 3 thermal units. Standard trip thermal units are **\$21.50** each. See page 16-116 for selection information.

▲ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information. For class J fuse clip, use Form Y1072 (no charge).  
■ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes shown below.

**Table 16.133: Coil Voltage Codes**

Voltage		Code	\$ Price Adder
60 Hz	50 Hz		
24♦	—	V01	No Charge
120★	110	V02	No Charge
208	—	V08	No Charge
240	220	V03	No Charge
277	—	V04	No Charge
480	440	V06	No Charge
600	550	V07	No Charge
Specify	Specify	V99	35.60

♦ 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, Form S (separate control) must be specified (i.e., order as 8738SBG12V01S).  
★ These voltage codes must include Form S (supplied at no charge) (i.e., order as 8738SC13V02S).  
Note: For voltage codes used with control transformers, see page 16-101.  
Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is supplied at no charge.

- ▲ NEMA Size 6 starters are NEMA 4 painted sheet steel enclosures.
- NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service-entrance-rated applications; see page 16-95 for more information.
- ♦ Coil voltage code must be specified to order this product. Refer to standard coil voltage codes shown below.

**Table 16.141: Coil Voltage Codes**

Voltage		Code	\$ Price Adder
60 Hz	50 Hz		
24▼★	—	V01	No Charge
120▼	110	V02	No Charge
208	—	V08	No Charge
240	220	V03	No Charge
277	—	V04	No Charge
480	440	V06	No Charge
600	550	V07	No Charge
Specify	Specify	V99	35.60

- ★ 24 V coils are not available on Sizes 4–7. On Sizes 00–3, where 24 V coils are available, **Form S** (separate control) must be specified (i.e., order as 8739SBG1V01S).
- ▼ These voltage codes must include **Form S** (supplied at no charge) (i.e., order as 8739SCG5V02S).

Note: For voltage codes used with control transformers, see page 16-101.  
Form S (separate control) is used when a separate source of power is available for the control (coil) voltage. Form S is supplied at no charge.

Dimensions .....page 16-57  
 Factory Modifications (Forms) .....page 16-100  
 Replacement Parts (Class 9998) .....page 16-105  
 Type S Accessories (Class 9999) .....page 16-108

For How to Order Information, see page 16-13.

3-Pole Polyphase—600 Vac Maximum—50–60 Hz

Note that the prices shown do not include thermal units. Devices require 3 thermal units. Standard trip thermal units are \$21.50 each. See page 16-116 for selection information.

Information on Hubs

Hubs are supplied with each NEMA 4X combination starter as shown in the table below.

Note that hubs are only installed in stainless steel enclosures; they are supplied but not installed in polyester enclosures.

Table 16.151:

NEMA Size	Quantity	Hub Size
0 & 1	1	0.75"
	2	1.00"
2	1	0.75"
	2	1.50"
3 & 4	1	0.75"
	2	2.50"

- ▲ Price does not include holding circuit contact.
  - Separate enclosures are available for these devices. It may be possible to improve delivery by ordering an open type contactor and separate Class 9991 enclosure.
  - ♦ Coil voltage code must be specified to order this product. Refer to standard voltage codes listed below. All lighting contactors are provided with separate control as standard.
  - ★ Factory conversion of N.O. contacts to N.C., order by catalog number and add \$42.80 to price (i.e. For 6 N.O. and 2 N.C. poles on an 8 pole contactor, order as 8903LG62V02). Versions are available from the factory with up to 12 N.C. poles electrically held or 2, 4, 6 and 12 N.C. poles mechanically held. For field conversion, there is a maximum of eight N.C. poles for Type L and a maximum of six N.C. poles for Type LX contactors.
- NOTE:** For contactors with more than 8 poles, the catalog number configuration will be the number of normally open contacts followed by a 0 and then the number of normally closed contacts (i.e. for 4 NO and 6 NC on a 10 pole contactor order 8903LG406V02).
- ▼ Cannot support control transformer forms.
  - Δ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service entrance rated applications. See page 16-95 for more information.
  - When ordering Form C, Form R6 must be included.

**Table 16.153: Power Poles for Type L or LX -**

The kits below are used to add 30 Ampere power poles to existing Type L contactors when additional circuits are required. Type L lighting contactors are supplied with mounting brackets, so that adder poles may be mounted from the front by a single captive screw. Adder poles are supplied standard with N.O. contacts which are convertible to N.C.

Power Pole Adder Kit ♦		Can Only Be Added to Contactor Type★
Class 8903 Type	\$ Price	
<b>Single Pole</b>		
L1L	86.00	LO60
L1R	86.00	LXO60
<b>Double Pole</b>		
L3L	171.00	LO80
L3R	171.00	LXO80
		LO1000
		LXO1000

- ♦ 8903LO (electrically held) devices can accommodate 10 or 12 N.C. contacts use only 120 V 60Hz coils.
- ★ LO60 & LXO60—add 1-pole kits only, 1 on each side, for converting to 8-pole. To maintain proper operation, it cannot be converted to greater than 8-pole contactor. LO80 & LXO80—use single-pole kits, 1 on each side, for converting to 10-pole and use two-pole kits, 1 on each side, for converting to 12-pole. LO1000 & LXO1000—remove existing single pole kit and install two-pole kits, 1 on each side, for converting to 12-pole.

## Features

- Electrically and mechanically held
- 30–800 A lighting ratings
- 2- through 5-pole versions (5-poles through 200 A)
- UL Listed short-circuit rating up to 100,000 Amperes
- Factory wired controls and clearly marked termination points
- Quick ship on most items in 5–7 days

- ▲ NEMA 4 & 4X enclosures are brush finished stainless steel for contactors sized 30 A through 300 A. Sizes 400–800 A are painted sheet steel.
- Price does not include holding circuit contact.
- ◆ All lighting contactors are provided with separate control as standard, except electrically held 400, 600 and 800 A devices. Electrically held 400, 600 and 800 A devices are provided with common control.
- ★ Voltage code must be specified to order this product. Refer to standard voltage codes above left.
- ▼ Separate enclosures are available for these devices. It may be possible to improve delivery by ordering an open type contactor and separate Class 9991 enclosure from pages 16-93 and 16-94.
- △ Cannot support control transformer forms.
- Form F4T is provided as standard; include line voltage when ordering. Control voltage is 120–60.
- For 400, 600 and 800 ampere devices—must specify line voltage, not coil voltage.
- ◊ NEMA 12 enclosures may be field modified for outdoor non-corrosive and non-service entrance rated applications. See page 16-95 for more information.

## Poles for Type S Only

A single-pole or double-pole kit can be added to any 2- or 3-pole 30 or 60 A Type S lighting contactor to make a 4- or 5-pole device. Factory assembled 4- and 5-pole contactors utilize the basic 3-pole device with a single or double-pole kit installed. Only one power pole can be added per contactor. Sufficient room is provided in all enclosure styles for the addition of a power pole kit.

For How to Order Information, see page 16-13.

**Table 16.158:**

Ampere Rating	Description	Class 9999 Type	\$ Price
30	One N.O.	SB6	158.00
	One N.C.	SB7	158.00
	One N.O. and One N.C.	SB8	365.00
	Two N.O.	SB9	365.00
	Two N.C.	SB10	365.00
60	One N.O.	SB21▽	306.00
	One N.C.	SB22▽	306.00
	One N.O. and One N.C.	SB23▽	656.00
	Two N.O.	SB24▽	656.00
	Two N.C.	SB25▽	656.00

▽ When power pole is added to 60 Ampere contactor, a 4-pole coil is also required. Order from Coil Table page 16-105. 60 A power poles are suitable for use with copper or aluminum wire.

Specify	Specify	V99	<b>35.60</b>

★ 24 volt coils are not available for 200–800 A devices. Contact your nearest Square D/Schneider Electric sales office for additional information.

**Features**

The features include: disconnect switch and circuit breaker versions; rugged flange-mounted handle; easy installation; occupation of less space; increased operator protection; room to spare for modifications; Class R fuse clips standard; electrically and mechanically held; 30–600 Amperes.

It is desirable to install the branch-circuit protective device and lighting contactor, combining switching and over-current protection, in one enclosure. Combination lighting contactors are well suited for industrial, highway and area lighting applications, or where a lighting circuit may have to be disconnected for periodic maintenance. They may also be used for resistance heating loads.

Δ 24 volt coils are not available for 200 A or larger devices. Contact Schneider Electric CCC for additional information.

For How to Order Information, see page 16-13.

NIGHT-MASTER Outdoor Combination Lighting Contactors offer disconnecting means, overcurrent protection and a lighting contactor in one NEMA 3R Rainproof enclosure. These combination units satisfy requirements of the National Electrical Code and UL 508 for service entrance equipment.

Long Version

Short Version

**Features:**

- Solid neutral standard
- Grounding lug standard
- Padlocking provisions
- Short and long versions available
- Electrically held Type S lighting contactor
- Eliminates the need for separate mounted safety switches
- Additional panel space eliminates the need for external mounting of time clocks

- ♦ Coil voltage codes must be specified to order this product. Refer to standard voltage codes listed below.

UL Approved for Service Entrance

**NIGHT-MASTER Combination Lighting Contactors**

The Class 8903 NIGHT-MASTER Outdoor Combination Lighting Contactor is the only product on the market that is UL Listed for Service Entrance. This allows the contactor to be pole mounted when used to control lighting in remote locations such as parks, monuments, group sports facilities, and streets and highways.

Factory modifications such as photocells, time switches, key operated selector switches, and the combination of photocells and time switches (photocell on, time switch off) allow the NIGHT-MASTER to be located in applications where manual operation of lights is not practical.

NIGHT-MASTER comes in long and short versions in sizes 30 through 200 Amperes. Most common modifications can be provided from the factory, or added in the field to the pre-drilled and pre-tapped panels.

- ▲ NIGHT-MASTER maximum 200 A, minimum 30 A.
- Transformer Voltage Codes.
- ◆ Mechanically held only. Electrically held device has a control circuit requiring a 120 V secondary, therefore, a transformer is supplied. The transformer comes wired to L1 and L2 unless Form S is called for. It is supplied with two primary and one secondary fuse.
- ★ Photocell mounted on a NEMA 1 enclosure is designed for indoor areas which rely on natural light. Addition of the photocell does not make the enclosure suitable for outdoor (NEMA Type 3R) installations.
- ▼ Available for 24 V, 120 V, 240 V, 277 V and 480 V applications only.
- Δ For electrically held enclosed devices, the first pilot is wired in parallel with the coil. Operating interlocks are required for all additional pilot lights. Mechanically held devices require operating interlocks for all pilot lights.
- DO NOT use Form X for any interlock which is wired in series with pilot light, but DO specify how pilot light and interlock are to be wired into the circuit.
- ◇ Electrically held 20 A multiple contactors cannot add interlocks. Additional poles can be used for the same function, however. Mechanically held (Type LX) provide one double throw auxiliary (or status) contact as standard.
- ☆ Single primary voltage must be specified using the codes shown below:
- ▽ Form R6 must be used with Form C on mechanically held devices.

Voltage 60 Hz	Code
120-24	V89
208-120	V84
240-24	V82
240-120	V80
277-120	V85
480-24	V83
480-120	V81
480-240	V87
600-120	V86

**Order Example**

You have previously selected a Class 8903SMG2V02.

V02 means that you need a coil voltage of 120-60/110-50 wired for separate control. You would like to add form FF4T with the transformer voltages being 480 volt primary, 120 volt secondary.  
The new and complete Class, Type, Voltage Code and Form number:

Class 8903      Type SMG2      Voltage Code V81      Form ① FF4T

① Form numbers should always be shown in alphabetical order.

- ▲ No field installed kit available.
- Mechanically held contactors need two distinct signals to operate. An N.O. contact block must be added to the Class 9999 Type SA3 push button kit.
- ◆ Selection for 2- or 3-Pole only; for 4- or 5-Pole use Class 9999SP15R \$215.
- ★ The coil voltage must be the same as the pilot light rating. Kit contains one (1) Class 9001, Type KP1R6 120 V/60 Hz red pilot light control unit. For other voltages, refer to the Class 9001, Type KP Control Section.
- ▼ Requires holding circuit interlock for Type S or additional power pole on Type L devices.
- Δ Form R6 available for 24 V, 120 V, 240 V and 277 V only.
- Insert CA2SK11( ) voltage code from page 23-21.

▲ Dimensions are the same for Form F4T (standard control transformer), Form F4T11 (100 VA extra capacity) and Form F4T12 (200 VA extra capacity).

Dual Dimensions: **INCHES**  
Millimeters

- Compact Design
- Industry Standard Mounting
- Double Break Contacts
- Low Coil VA
- Straight-Through Wiring
- Low Cost

Definite purpose contactors are ideal for heating, air conditioning, refrigeration, data processing, and food service equipment. New compact 1 and 2-Pole contactors are available along with standard size 2, 3, and 4-Pole devices.

They feature quick connect terminals and binder head screws for easy wiring. Box lugs are standard on 40 A contactors and larger. An exclusive DIN track mounting option may reduce installation costs. Coils can be changed on the Type DPA contactors (50 to 90 A) quickly without a tool. Auxiliary contact modules snap on either side of the Type DPA contactors.

Class 8911 definite purpose starters are inexpensive starters for applications with relatively low duty cycles. Typical applications include air compressors, agricultural equipment, pumps, and HVAC equipment. Definite purpose starters offer:

- Low cost
- Small size
- Melting alloy overload block
- Trip-free reset mechanism
- Open type or enclosed
- 500,000 mechanical operations

• Class Number	Class	Type	Coil Voltage Code	Form(s)
• Type Number				
• Voltage Code				
• Form(s)	8911	DPSG33	V02	

**NOTE:** Motor Logic™SSOLR are designed to protect 50/60 hertz three-phase AC motors from overload and phase loss conditions. Open Delta systems or grounded B-phase systems are difficult to balance and could cause the Motor Logic SSOLR to trip. For applications of this nature, it is recommended that bi-metallic overload relays (Form B12) be used.

Class 8940 Type NS, SS, and XS panels in NEMA 3R enclosures are specifically designed for pumping applications. Extra space is provided for field installation of auxiliary equipment.

- Type S Contactor provided as standard
- Approved for submersible pump applications
- Motor Logic™ Class 10/20 (Selectable) SSOLR through 200 hp–480 V, 100 hp–240 V, Type SS only (Includes rubber boot.)
- All prices include a START push button and a HAND-OFF-AUTO selector switch
- Adjustable trip current
- Phase failure sensitive through 200 hp–480 V, 100 hp–240 V, Type SS only
- Ambient temperature compensated overload
- All devices are UL Listed, and marked “SUITABLE FOR USE AS SERVICE EQUIPMENT”

**NOTE:** Class 10 Motor Logic SSOLR does not protect for phase imbalance.

For How to Order Information, see page 16-13.

Class 8940 "S2" Pumping Plant Panels in NEMA 3R enclosures are specifically designed for oil field applications. All panels are supplied with an Electronic Motor Circuit Protector (MCP) or a visible blade, fused, disconnect switch. This line of pumping plant panels features:

- Rugged spring latches for easy access without a tool
- Side mounted control units for convenient operation
- Door retainer available for windy areas
- Price includes Hand-Off-Auto selector switch
- UL Listed for use as service equipment for motors
- Extra panel space for additional electrical controls
- All devices are UL Listed, and marked "SUITABLE ONLY FOR USE AS SERVICE EQUIPMENT"

Thermal units must be ordered separately at \$21.50 each. See page 16-116 for selection information.

**NOTE:** Overload relays are ambient temperature compensated.

Figure 1

Figure 2

Dual Dimensions: **INCHES**  
**Millimeters**

Duplex Motor Controllers are used to control two motors, and consist of two starters in a common enclosure. Two separate disconnect switches or circuit breakers with operators are included with all combination devices. Unless **Form Y68** is specified, an alternation circuit (a Class 8501 Type XO40 relay) is included, which alternately operates first one motor and then the other on each successive closing of a pilot device. Both motors will be energized should a second pilot device close. All devices incorporate a terminal block to simplify wiring of pilot devices A and B. Typical applications include pump motors where a second pump is required for peak demand periods yet alternation is desirable to equalize pump wear.

**Table 16.207: 3-Pole Polyphase—600 Vac Maximum (50–60 Hz)  
Non-Combination Type—Without Disconnect—With Electric Alternation**

Note that the prices shown do not include thermal units. Devices require 6 thermal units. Standard trip thermal units are **\$21.50** each. See page 16-116 for selection information.

## Definite Purpose Contactors

## Reversing Hoist, Type DPR

Class 8965 / Refer to Catalog 8910CT9301

8965DPR33V02  
Hoist Contactor  
600 Vac, 25 A  
DPR, Angled

Class 8965 Type DPR reversing/hoist contactors are designed for the control of motors in hoists, overhead doors, small elevators, commercial laundry equipment, and other related products which use reversing motors. They are rated to perform in the short periods of jogging experienced in hoist service.

The coils are designed to operate on line voltages of 85% to 110% of rated voltage, and are for applications at

50 or 60 Hz only. Coils are easily replaced with external base removed.

Auxiliary contacts may be easily field-added to any Class 8965 reversing contactor. Type DPR contactors accept one auxiliary contact module with up to two isolated circuits per side (two modules per device). When auxiliary contacts are ordered separately, two modules are normally used for each device; one for forward, one for reverse.

**Table 16.219: Reversing/Hoist Contactors—600 Vac Maximum**

No. of Poles	Horsepower Ratings ▲				Open Type		Replacement Coil

Substitute 1-N.O. isolated alarm contact and 1-N.C. contact per relay. (Type S starters only)▼	Y342▼	179.00
Substitute 2-N.C. contacts for standard N.C. contact per relay. (Type S starters only)	Y344▼	179.00
Modify Type SDO12 relays to accept Type FB quick trip or SB slow trip thermal units, and Type F and Type SDO15 relays to accept Type FB quick trip thermal units. (Rejects Type CC standard trip units)	Y81★	No Charge

- ★ This form cannot be field modified.
- ▼ Field modification possible. Order 9999S04 (for Form Y342) or 9999S05 (for Form Y344).

**Motor Logic**

**Solid State Overload relays** feature: 3 to 1 adjustment for trip current; phase loss and unbalance protection; direct replacement for Type S melting alloy. They are ambient insensitive and self-powered. Switch selectable trip class; Class II ground fault detection; and direct replacement for Type S melting alloy. Electrical remote reset is also available.

**NOTE:** Motor Logic SSOLR are designed to protect 50/60 hertz three-phase AC motors from overload, phase unbalance and phase loss conditions. Open Delta systems or grounded B-phase systems are difficult to balance and could cause the Motor Logic SSOLR to trip. For applications of this nature, it is recommended that bi-metallic overload relays (Form B12) be used.

**Table 16.226: Class 10/20 (Selectable): For Separate Mounting Solid State Overload Relay 600 Vac Maximum**

- ◊ Size 00B, 00C, 0, and 1 are supplied without lugs. Lower amperage loads can be protected by looping of power wires.
- ★ Size 5, 6 and 7 Replacement Overloads are only for existing NEMA S starters with Motor Logic overload relay. External CTs and additional components are not included.
- ▽ Size 5 is a complete drop-in replacement for Square D NEMA S melting alloy, bimetallic, and Y500 overload relays **only**.
- ◊ NEMA Size 00B and 00C are not actual NEMA sizes. These designations are used to differentiate the lower FLA of these devices from the NEMA Size 00 Motor Logic Solid State Overload Relay.

TeSys T is a motor management system that provides full motor monitoring, control, and protection when used with short circuit protection and a contactor. TeSys T manages most critical processes while reducing downtime and increasing productivity.

TeSys T is a flexible system that integrates seamlessly into your automation system through five major communication protocols. TeSys T predicts what will happen in the process, as it accurately monitors current, voltage, and power over a wide range.

TeSys T is a green motor management system with unique power monitoring capabilities for better energy management.

TeSys T carries all appropriate and necessary third party certifications.

To get detailed information about TeSys T, visit our website at [www.schneider-electric.us.com](http://www.schneider-electric.us.com).

**TeSys T detailed functionalities and possible configuration:**

**Communication:**

TeSys T is a flexible motor management system that supports five major communication protocols: Modbus, CANopen, DeviceNet, Profibus, and Ethernet Modbus TCP.

These communication protocols allow the TeSys T controller to integrate seamlessly into your automation systems.

Ethernet Modbus TCP provides Faulty Device Replacement to reduce maintenance time to a minimum.

**Protection functions:**

- thermal overload
- phase imbalance and phase failure
- thermal motor protection via PTC probes
- phase reversal
- ground fault detection
- long starting times and motor stalling
- automatic load shedding and restarting
- load fluctuations (current, voltage, power)
- variations of Cos φ (power factor)

**Metering functions:**

- Measurements (rms values):
  - current on the 3 phases
  - voltage on the 3 phases (shedding)
  - motor temperature
  - ground fault sensing
- Values calculated:
  - average current
  - frequency
  - Power factor, power, power consumption

**Motor control functions:**

A motor managed by a TeSys T controller can be controlled:

- locally, using the logic inputs present on the product, or via the human machine interface (HMI)
- remotely, via the network

**Motor control modes:**

10 predefined motor control modes are incorporated in the controller. Each listed mode is available as 2 or 3 wire control.

- overload mode: monitoring of motors whose control is not managed by the controller
- independent mode: starting of full voltage non-reversing motors
- reverser mode: starting of full voltage reversing motors
- 2-step mode: 2-step starting of motors (star-delta, by autotransformer and by resistor)
- 2-speed mode: 2-speed starting of motors (Dahlander, pole changer)

A custom mode is available to allow the user to create a specific motor control mode that is not predefined in the controller.

Custom Logic has the basic functions of a small programmable logic controller (PLC). Programming can be done in Structured Text mode or in Block Diagrams through PowerSuite V2.6 software. To ensure consistency, the same software used to commission the TeSys T controller is used for Custom Logic programming.

**Statistical and diagnostic functions:**

- history of the last five detected faults
- motor statistics
- controller operations
- warning of pending faults

**Standards and Certifications**

Product Type	LTMR Controllers	LTMEV40 Expansion Modules
Conforming to standards	IEC/EN 60947-4-1, UL 508, UL E164353 NKCR, CSA 22-2 n°14, CSA LR43364 Class 3211 03, IACS E10	
Product certifications	UL, CSA, BV, LROS, DNV, GL, RINA, ABS, RMRos, NOM, CCC, C-TICK, ATEX, GOST, KERI	

**Possible Configurations:**

TeSys T controller is a flexible motor management system using PowerSuite V2.6 commissioning tool. PowerSuite is the configuration software for the TeSys T controllers. See page 16-86 for details.

**LTMR Controller:**

The controller is the central component in the motor management system. It manages the basic functions such as:

- measurement of 3-phase current via integral current transformers from 0.4 to 100 A (up to 1000 A by external current transformers)
- measurement of ground current internally or external ground sensors
- measurement of motor temperature
- inputs and outputs for the various motor control modes, detected fault management, and other functions

LTMR27EBD

**Characteristics**

As standard, the controller manages the following:

**Control Modes**

- overload mode
- independent mode
- reverser mode
- 2-speed mode
- 2-step mode
- Custom mode

**Inputs/Outputs**

- 6 discrete logic inputs
- 3 relay logic outputs (1 N.O. contact each)
- 1 relay output for detected fault signalling (1 N.O. + 1 N.C.) overload relay

**Measurements**

- connection for a thermistor probe
- connections for a ground sensor

	100–240 Vac	5–100	LTMR100PFM	850.00

**LTME Expansion Module:**

The expansion module adds the following functionalities to the TeSys T controller:

- voltage measurement between phases up to 690 V nominal
- 4 additional inputs

LTMEV40FM

**Inputs**

- 4 discrete logic inputs (isolated)
- 2 types of power for the inputs: 24 Vdc and 100 to 240 Vac
  - A 24 Vdc LTMR controller can be assembled with a 240 Vac expansion module and vice versa

The LTMEV must be connected to the LTMR controller by a connecting cable.

**Table 16.229: Expansion Module**

Input Control Voltage	Number of Inputs	Supply to the Electronics	Catalog Number	\$ Price
24 Vdc	4	via the LTMR controller	LTMEV40BD	300.00
100–240 Vac	4		LTMEV40FM	300.00

**HMI — Human Machine Interface:**

Depending on the application, two types of HMI can be used with the motor management system.

- The LTMCU operator control unit:
  - Control/monitoring of a 1 to 1 LTMR controller
- A Magelis XBTN410 terminal
  - Control/monitoring of 1 to 8 LTMR controllers

**LTMCU Compact Display:**

- Configure the parameters
- Display information
- Monitor the alarms and detected faults
- Local control of the motor via the local control interface (keys can be customized)
- Three different languages can be loaded into the LTMCU controller at the same time: English, French, Spanish are the defaults.

LTMCU  
(Holder Only)

LTMCU

A language download utility (LangTool), together with all the other languages, are available on the website www.schneider-electric.com.

This tool allows the languages present in the LTMCU control until to be adapted.

The LTMCU HMI control unit has an additional front panel RJ45 port, protected by a flexible cover.

**Magelis Display:**

Two applications have been predefined for the TeSys T controller. Depending on the application loaded, the HMI terminal makes it possible to:

- Configure and monitor a motor starter (LTM\_1T1\_V1.dop)
- Monitor and modify certain parameters up to 8 motor starters (LTM\_1T8\_X\_V1.dop)

Vijeo Designer programming software is needed for loading applications into the XBT HMI terminal.

Configuration with PowerSuite

The TeSys T configurator is incorporated in the PowerSuite software application, versions 2.6 and higher.

PowerSuite software allows configuration, commissioning and maintenance of motor starters protected by a TeSys T controller.

A library containing predefined motor control mode functions is available in order to:

- allow standardization
- avoid errors
- reduce motor starter setup times

By using logic functions, a custom mode makes it possible to:

- easily adapt these predefined motor control mode functions to the specific needs of your applications
- create new functions

The functions thus defined can be saved and used to build your function library for future applications.

To create special functions, a logic editor is incorporated in the configurator and allows a choice of 2 programming languages:

- function block
- structured text

- B2 indicates polyphase non-ambient temperature compensated bimetallic overload relay.
- ◆ Y59 indicates single phase ambient temperature compensated bimetallic overload relay.
- ★ B2Y500 indicates bimetallic overload relay with current transformer sensing. BY500 indicates ambient temperature compensated bimetallic overload relay with current transformer sensing. This part number does not include the current transformer assembly.
- ▼ Non-compensated Size 3 & 4 OLRs are no longer available. Select an ambient compensated OLR from appropriate table above.

**Adapted Bimetal Overload Relay Mounting Bracket Adapter (NEMA Sizes 00–1)**

The adapted bimetallic Type S starter incorporates a mounting bracket for use with a self-contained adjustable bimetal overload relay. A separate mount version of the bracket is also available for use with contactors that do not offer the same terminal configuration as the Type S or for applications with height restraints that demand mounting next to the contactor rather than directly below as is typical for most starter configurations.

The bimetallic thermal overload relays feature Class 10 or Class 20 protection with automatic and hand reset and a trip-free mechanism. These overloads are ambient temperature compensated and are available with or without phase imbalance protection. The component is available as a replacement on a starter or as a separately mounted overload relay adapter. The overload relay (LRD or LR3D) can be purchased separately and installed in the field at a later date. For more information see Table 16.269.

### External Reset Mechanisms Class 9066

Type RB1

Type W1

Type RA2 Series B

Type SC1

**Type RA** kits provide a convenient external means for resetting overload relays mounted in control enclosures of almost any depth. Designed for use on NEMA 1, 4 or 12 enclosures, they can be used with any Square D open type magnetic starter or Class 9065 overload relay. All kits are individually packaged for easy stocking and include complete installation instructions.

Only a single mounting hole is required in the enclosure door. Each kit contains one or more threaded reset rods, grooved at intervals of 3/4" so they can be cut to the approximate length required without thread damage. Final adjustment is easily made after installation by rotating a plunger and tightening the lock nut. Mechanisms with more than one reset rod include a steel cross bar with mounting holes located at 1/2" intervals, providing a choice of rod locations to suit any application. All steel parts are electrically isolated from the enclosure and the operator.

**Type RB** kits make it possible to field install external reset mechanisms to Type S combination starters in NEMA 12 enclosures. They may also be used to replace external reset mechanisms on Type S combination starters in NEMA 1, 4 and 12 enclosures.

Table 16.244:

Where Used	Type of Enclosure	Reset Mechanism Kit		
		Description	Type	\$ Price
OEM Kit for commercial enclosures	NEMA 1, 12	With 1 Rod	RA1	57.00
		With 2 Rods	RA2	71.00

Replacement on 8538, 8539 starters	NEMA 1, 12	Size 0 and 1	RB1	42.80
		Size 2	RB2	42.80
On commercial enclosures or Type S combination starters	NEMA 4	W1 is a boot only and must be used with RA or RB Kit listed above	W1	28.70
Replacement on Class 8536 Type S starters	NEMA 1 with slip-on covers	Size 00, 0 and 1	SC1	7.20
		Size 2	SD1	12.00
		Size 3	SE1	14.30
Retro-fit kit Class 8940 Pump Panel	NEMA 3R	Reset for use with 9065TJF Series B OLR	RTJF	42.80

Separate enclosures can be used with open style devices for field assembly of enclosed controls. These enclosures, plus the open style components, are equivalent to a factory-assembled device. Separate enclosures are to be used only with the equipment listed below:

- **NEMA 4 and 12** Class 9991 separate enclosures for Type S devices are supplied as standard with closing plates. See selection chart below for specific number of closing plates on Various enclosures. For applications requiring enclosures without closing plates, contact your nearest Schneider Electric sales office.
- **NEMA 3R** enclosures for field assembly of equipment for outdoor applications are provided with three closing plates, a reset mechanism and predrilled panel as standard. For conduit connection to the top of these enclosures, select watertight hubs from listing on Digest page 3-10 in accordance with applicable code requirements. Square D's NEMA 12 enclosures can also be modified for outdoor use. For details, refer to NEMA 12 enclosure modification information on page 16-95. **NOTE: Not for use in high-corrosive outdoor locations or sea coast environments.**
- **NEMA 4X** enclosures for Type S devices, Sizes 0–2 and 30–60 Ampere, are provided as standard without closing plates. Cover mounted control units for NEMA 4X separate enclosures are available as a factory modification only.

When closing plates are removed from NEMAs 4, 12 & 3R enclosure covers, the openings can be used for easy installation of Class 9001 Type K or Type SK cover mounted control units. Convenient Class 9999 modification kits containing Class 9001 Type K control kits can be found on page 16-109.

NEMA Type 1 and Flush Mounting

Flush Mounting Selection Table

**Flush Mounting General Purpose** separate enclosures for Type S Sizes 0-2, 30-60 ampere are provided with knock-outs in the cover for field assembly of one Class 9999 push button or selector switch kit and one Class 9999 pilot light kit. (Refer to Class 9999 for selection.) For Type S Size 3, 100 ampere, three closing plates are provided for installation of Class 9001 Type K oilight control units. For enclosure dimensions, refer to page 16-96.

- ♦ CP2 Discount Schedule, not CP1.
- ★ Enclosure suitable for starter with melting alloy or solid state overload relay only.
- ▼ For horizontally arranged Class 8702 contactors replace reset assembly with a Class 9001 Type K51 closing plate.
- △ For electrically held contactors only. See page 16-95 for mechanically held contactors.
- Series B starter enclosure.
- ◇ If cover mounted control units are required, select oversized enclosure listed on page 16-95.

**NEMA 1, 4 and Oversized**

**For Addition of Control Circuit Transformer**

The Class 9991 enclosures listed below accept an open type Class 8502 or 8536 Type S, NEMA Size 0, 1, 1P, or 2 contactor or starter along with a fused control circuit transformer (Form F4T) to allow field assembly of enclosed controllers. In the cover of the Class 9991 Type SCG1 enclosure, knock-outs are provided for field addition of Class 9999 cover-mounted control units. All other Class 8502 & 8536 enclosures include a panel with space and drilling for an open-type device and a fused control circuit transformer. In addition, three closing plates are included in each cover for easy installation of Class 9001 Type K or SK control units.

Oversized enclosures for open type Class 8903 Type L & LX, 20 A and Type S, 30 and 60 A electrically and mechanically held lighting contactors include a panel with space and drilling for an open-type contactor and fused control circuit transformer (Form F4T) and/or an auxiliary relay for use with single pole pilot devices (Form R6). When an auxiliary relay is required, use a Class 8501 Type XO11 relay. Three closing plates are provided as standard for easy installation of Class 9001 Type K or SK control units. **Note:** A Class 9991 Type SCG1 NEMA 1 separate enclosure can also be used for Class 8903 Type SMO, 30 A electrically held lighting contactor if Form F4T (control transformer), with or without cover control units is required.

- ▲ For mounting in SCG1 enclosure, a Class 9991 Type S1 adapter bracket is also required — \$44.00
- NEMA 12 modified for outdoor use (see below).
- ◆ For price list and complete description, see the Class 9070 section. **Note:** Class 9991 Type SCG1 enclosure is provided with a Class 9999 Type SF4 fuse block as standard.
- ★ For contactors (Class 8502), a separate closing plate is provided with each enclosure to replace the reset mechanism with the exception of Class 9991 Type SCG1 which requires a separate reset closing plate. Class 9999 Type SG2 — \$14.30
- ▼ The standard cabinet has a brushed finish.
- △ Mechanically held.

**NEMA 12/3R Enclosures Modified for Outdoor Applications (not to be used in salt air or corrosive environments)**

**Field Modifications for NEMA 3** dusttight, raintight and sleet resistant outdoor applications are as follows: Watertight conduit hubs or equivalent provision for watertight connection at the conduit entrance shall be used.

**Field Modifications for NEMA 3R** rainproof and sleet resistant outdoor applications are as follows:

1. Watertight conduit hubs or equivalent provision for watertight connection at the conduit entrance, when the conduit enters at a level higher than the lowest live part, shall be used.
2. Drain holes of 1/8 inch diameter shall be added to the bottom of the enclosure.

Class 9001 Type K oiltight/watertight control units can be easily installed in NEMAs 4, 12, and oversized NEMA 1 separate enclosures provided with closing plates. When installing control units simply remove the closing plates and install the proper Class 9001 Type K components. Convenient control unit kits complete with assembled and pre-wired operators for quick installation are available as Class 9999 user modification kits. See Table 16.250 for contents of each control unit kit. Class 9001 Type SK NEMA 4X corrosion resistant control units may be used as an alternate.

Figure 10

Factory installed modifications are available for the classes of control equipment listed in the respective tables. Prices shown are **additions** to standard equipment prices and are **not** to be used as separate selling prices. Kits are also available for many field modifications and normal parts replacement on most control items. Refer to Classes 9998 and 9999 for complete listings.

**Standard equipment dimensions and enclosure construction may not apply when certain special features are added. Such cases should be referred to the factory with complete description when accurate dimensions are required.**

**NOTE:** If UL label is required, consult Schneider Electric CCC at (1-888-778-2733).  
Some Forms are not UL Listed.

- ▲ All push buttons are momentary contact unless specified otherwise.
- Indicate pilot light color as **Form P1** (red) or **Form P2** (green), etc. as shown in the table below. Unless otherwise requested, standard practice is to wire red pilot light to indicate device is energized. No additional auxiliary contact is required. Also, standard practice is to wire green pilot light to indicate device is de-energized. An additional normally closed auxiliary contact is supplied. A wiring diagram must be supplied for other pilot light colors and/or arrangements.
- ◆ Pilot lights available at 120 to 600 V only.
- ★ Specify marking and/or Class 9001 Type KN or Type SKN legend plate required.
- ▼ Specify appropriate Class 9001 Type K or SK operator required.
- △ To determine the maximum number of auxiliary contacts which can be added to each Type S device and for the appropriate "X Form", refer to the tables in the Class 8536 section on page 16-15 (for non-reversing single-speed devices) or the Class 8736 section on page 16-52 (for reversing or two-speed devices). For Class 8600 Reduced Voltage controllers, consult Schneider Electric CCC at (1-888-778-2733).
- Various form combinations selected may force the use of a larger enclosure.

M10	—	—	338.00	450.00	720.00	1260.00	3015.00	4725.00

- ★ Not available for NEMA Size 7.
- ▼ Cannot be used with Marine controls.

**■ Selection of Control Circuit Transformers**

The standard primary/secondary voltages for control circuit transformers are indicated in the following table.

**Table 16.266:**

AC-OPERATED DEVICES With Control Transformers	
Voltage	Code
60 Hz (Primary-Secondary)	
120-12Δ	V88
120-24Δ	V89
208-120	V84
240-24Δ	V82
240-120	V80
277-120	V85
480-24Δ	V83
480-120	V81
480-240	V87
600-120	V86
Specify	V99

- Δ 12 V coils are not available on Sizes 3-7.
- 24 V coils are not available on Sizes 4-7.

To order, select the desired device with the appropriate transformer Form designation. Then convert the previously selected voltage code (V●●) to reflect the desired primary/secondary voltage for the transformer. The secondary voltage should equal the previously selected coil voltage of the device.

**Example:**

You have previously selected a Class 8536SDG1V02S. V02S means that you need a coil voltage of 120-60/110-50 wired for separate control. You would like to add **Form FF4T** with the transformer voltages being 480 volt primary, 120 volt secondary with Solid State Overload Relay Protection Class 20 Trip Class (H20).

The new and complete class, type, voltage code and form number will be:

Class            Type            Voltage Code            Form □  
8536            SDG1            V81            FF4H20T

- Form numbers should always be shown in alphabetical order. Each letter indicates the beginning of a new form and may be followed by one or more numbers.

Class 8502, 8536, 8538, 8539, 8702, 8736, 8738, 8739, 8810, 8811 and 8812

**Solid State Overload Relay Factory Modifications (Forms)**

The solid state overload relay is available on NEMA Size 00–7.  
For Class 8536, 8538, 8539, 8736, 8738, 8739 and 8810 devices.

**SPECIAL NOTE for Class 8810 devices:**  
You MUST SPECIFY TWO SEPARATE FORM NUMBERS TO GET MOTOR LOGIC OVERLOADS ON TWO SPEED STARTERS. The catalog number will be alphanumeric.  
EXAMPLE: Open Style, Size 4 Two Speed Starter with MOTOR LOGIC Overload Relays Required.  
Single Winding, 460 V, Constant or Variable Torque  
High Speed FLA = 96 A  
Low Speed FLA = 27 A (use Size 2 Overload)  
Catalog Number to Order: 8810SF01V02H20H202S  
Where: Form H20 is a Size 4 Contactor with a 45-135 A MOTOR LOGIC Overload Relay for the High Speed and form H202 is a 15–45 A MOTOR LOGIC Overload Relay on the low speed contactor.

**Table 16.267: Classes 8536, 8538, 8539, 8736, 8738, 8739 and 8810**

**Table 16.269: *New!* Adapted Bimetal Overload Relay for NEMA Type S Starter**

This bimetallic overload relay is available on NEMA Sizes 00, 0 & 1 for Class 8536, 8538, 8539, 8736, 8738 and 8739 devices. To order a starter with the adapter ONLY add Form E to the catalog number (8536SBG2V02ES). When ordering with the adapter and bimetallic overload relay installed, please use the following table as a guide.

Sample Catalog Number: 8536SCO3V02E2160S  
NEMA Size 1 Starter controlling a 7.5 hp motor (FA 11)  
Bimetal would be: LRD16L (9 to 13 FLA)

- ▲ If controller has a control transformer, price that transformer with additional capacity for the relay provided.
- This adder, used with a NEMA 4X enclosure, applies only to Classes 8538, 8539, 8738, 8739 and 8810 non-reversing.
- ◆ Specify control and line voltage.
- ★ Motor hp and voltage required when placing order. Meters will be panel mounted in NEMA 12 enclosures.
- ▼ To determine the maximum number of auxiliary contacts which can be added to each Type S device and for the appropriate "X Form", refer to the tables in the Class 8536 section on page 16-15 (for non-reversing single-speed devices) or the Class 8736 section on page 16-45 (for reversing or two-speed devices). For Class 8600 Reduced Voltage controllers, consult Schneider Electric CCC at (1-888-778-2733).
- △ NEMA Type 7 & 9 enclosures not available with Class 8600 devices.
- Available only on SPIN TOP™ and cast aluminum NEMA 7/9 enclosures.

- ▲ To order an unlatch coil add the letter "L" to the type number and the letter "B" to the suffix number. Example: For a 120 V 60 Hz unlatch coil order a Class 9998 Type XL44B. Price for the 9998 Type XL coil series is \$114.00.
- Series C (Double Pole) and Series E (Single Pole).
- ◆ Use next higher voltage, 60 Hz coil.
- ★ Not dual rated. 125 Vdc or 250 Vdc only.
- ▼ CP1 discount schedule.

Class 9998 replacement parts kits are available for servicing Square D relays, contactors, and starters as well as pressure, vacuum, and float switches. Each kit contains the necessary movable and stationary contacts, contact springs (when required—NEMA Size 3 and above do not include contact springs, and springs are not available), and additional hardware required to service the devices listed below. When servicing devices having more poles than contained in the corresponding kit, it may be necessary to order an additional kit.

Class 9998 Type SO1

### Contact Units for Melting Alloy Type Overload Relays

One normally closed contact, Class 9998 Type SO1, is provided in each overload relay block on Type S starters Sizes 00-6. The Class 9998 Type SO1 contact unit listed below is provided as standard in each Class 9065 melting alloy overload relay. Contact modules can be easily replaced and are identified in the table below. Isolated overload relay alarm circuit contacts are available as an optional feature. A pilot light or alarm bell can be wired in series with this contact to indicate that the overload relay has tripped. For further information on isolated alarm contacts refer to Class 9999 Types SO4 and SO5 (page 16-113).

Table 16.288:

Magnetic Starter			Description ▲	Parts Kit Number	\$ Price
NEMA Size	Type	Series			
00-4 & 6	SA-SF SH	A & B	Standard N.C. contact unit	Class 9998 Type SO1 ■	39.40
5	SG	A	Standard N.C. contact unit	3110251450	134.00
			N.C. and N.O. alarm (three point) contact unit	3110251451	196.00

▲ Refer to page 16-110 for contact ratings.

■ The Type SO1 is also the replacement contact unit for Class 9065 Type M melting alloy overload relays.

Overload Contact Unit  
Part No. 31102-514-50.  
Used on Size 5 Starter  
(8536SGO) with Melting Alloy  
Overload Relay.

### Class 9998 Type UB Universal Baseplate

A universal baseplate may be used to retrofit a Square D Type S NEMA starter into an application which is currently using a competitive NEMA starter. The universal baseplate is a metal plate which attaches to the panel in the location of the starter to be replaced. The Type S starter then mounts to the baseplate. It is available for NEMA Sizes 00 through 4, and mounting screws are provided with each plate.

The universal baseplate adapter allows the Type S starter to replace the following competitive starters:

Table 16.289:

Competitor Starter	NEMA Size	Baseplate	NEMA Size	Baseplate	NEMA Size	Baseplate	NEMA Size	Baseplate	\$ Price

### Melting Alloy Overload Relay Jumper Strap Kits

Jumper strap kits are for use on three-phase manual or magnetic starters with melting alloy overload relays only, where a three-phase starter is used to control a single-phase motor. These kits will include two jumper straps, a wiring diagram showing how to wire a three-phase starter to control a single-phase motor, and single-phase (one thermal unit) selection tables.

**Cover-Mounted Control Units**

Class 9999 push button, selector switch and pilot light cover-mounted control unit kits can be easily field installed in a NEMA 1, 3R, 4 or 12 Type S contactor or starter enclosure cover. Knockouts or removable closing plates are furnished with many enclosure covers for convenient field installation of control units. Kits are supplied with leads and clearly illustrated instructions. The Class 9999 cover mounted control unit kits are identical to the units which are factory installed.

- ▲ Also requires N.O. auxiliary contact for holding circuit contact when used on Class 8903 electrically held lighting contactors.
  - Each pilot light kit contains 1 red and 1 green lens cap.
  - ◆ The coil voltage must be the same as the pilot light rating. Kit contains one Class 9001 Type KP1R31120V, 60 Hz red pilot light control unit. For other voltages, refer to Class 9001 Type KP.
  - ★ User made openings are required in order to field install these modification kits on standard 8502, 8536 Type S Sizes 0-2, and 8903 Sizes 30-60 A NEMAs 4 and 12 enclosures.
  - ▼ To mount control unit in a NEMA 1 enclosure, a Class 9999 Type BLX bracket is also required, \$35.60.
  - △ For Class 8903 (mechanically held contactor) control unit kits, refer to the Class 8903 section, page 16-65.
- Note: There are no field modification kits available for the polyester enclosures.

**Table 16.293: NEMA 1 Enclosure Closing Plates**

Class 9999 Type SA3 Push Button Kit

## Auxiliary Contacts for Manual and Magnetic Contactors and Starters

### Internal Contacts

Internal Auxiliary Contact

Class 9999 Type SX11 internal contact kit is a replacement unit for the N.O. holding circuit contact supplied as standard on Type S Sizes 00–2 three phase starters and contactors. The Class 9999 Type SX12 is a replacement unit for the N.C. electrical contact which is furnished as standard on Type S, Sizes 00–2 mechanically interlocked devices (e.g., Class 8736 reversing starters). Internal contacts are also used on Class 2510 Types M & T manual starters. The internal contacts can be used for other applications as long as the electrical rating is not exceeded. See table below for electrical ratings.

### External Contacts

External Single Circuit Auxiliary Contact

Class 9999 Type SX6 external auxiliary contact is supplied as standard for the N.O. holding circuit contact on Type S Sizes 3–7 starters and contactors. Additional auxiliary contacts can be added to Type S contactors, starters and lighting contactors. These contacts mount on either side of the basic contactor and are available with convertible or non-convertible contacts. The contacts of the convertible version can be changed from N.O. to N.C. or vice versa in the field. The non-convertible version has fixed contacts, either N.O. or N.C.

To determine the number of auxiliary contacts which can be added to each Type S contactor or starter, refer to the Class 8536 or Class 8736 section.

See table below for electrical ratings.

Table 16.295: Maximum Ratings for Type S Auxiliary Contacts and Timers

Class 9999 Type	Contact Ratings				Class 9999 Type	Contact Ratings			
	Volts AC	AC Only (35% Power Factor)		Continuous		Volts AC	AC Only (35% Power Factor)		Continuous
		Make	Break				Make	Break

		1-N.C. Contact	SX14	99.00
		1-N.O. & 1 N.C. Isolated Contacts	SX15	134.00
		1-N.O. Overlapping Contact	SX16▲	134.00
		1-N.C. Overlapping Contact	SX17▲	134.00
<b>Internal—Non-Convertible</b>				
SA-SD	00–2	1-N.O. Contact	SX11■	99.00
		1-N.C. Contact	SX12■	99.00

▲ Types SX9 and SX10 or Types SX16 and SX17 must be used together and mounted on the same side of the contactor. They are suitable for applications where it is necessary for a normally open contact to overlap a normally closed contact.

■ Types SX11 and SX12 are not applicable for use on NEMA Sizes 3 or larger. Internal contacts can also be used on Class 2510 Types M and T manual starters.

## Motor Logic—Class 9999

### Isolated Auxiliary Contacts for Motor Logic Overload Relays

Overload relay auxiliary contacts are available factory installed or in kit form for field installation on Motor Logic overload relays. These contacts may be used for isolated alarm contact applications.

Table 16.300:

For Use With		Parts Kit Description	Class 9999 Type	\$ Price
Class & Type	NEMA Size ♦			
8536 SA-SJ	00B through 7	N.O. or N.C. Auxiliary Contact (Field Convertible)	AC04	57.00
9065 SS, SR, SF, ST	00B through 7			

### DIN Adapter

The DIN adapter provides a method to mount the Motor Logic overload relay to a 35 mm DIN rail.

Table 16.301:

For Use With		Parts Kit Description	Class 9999 Type	\$ Price
Class & Type	NEMA Size ♦			
9065 SS or SF	00B, 00C, 0, and 1	DIN Adapter	DA01	23.90

### Lug-Lug and Lug-Extender Kits

A Class 9999 LL0 Lug-Lug Kit can be field installed on separately mounted overload relays. The standard Size 00B, 00C, 0, and 1 Class 9065 Type SS and SF overload relays are supplied without lugs. A Class 9999 LB0 Lug-Extender Kit is designed for Size 00B, 00C, 0, and 1 Retrofit Starter Applications. This kit allows the lugs to be in the same location as the Class 9065 melting alloy overload relay, eliminating the need for additional wire length.

Table 16.302:

For Use With		Parts Kit Description	Class 9999 Type	\$ Price
Class & Type	NEMA Size ♦			
9065 SS or SF	00B, 00C, 0, and 1	Lug-Lug Kit for separate mounting	LL0	42.80
9065 SS or SF	00B, 00C, 0, and 1	Lug-Extender Kit for retrofitting existing NEMA S starters	LB0	35.60

### Remote Reset Module

The Remote Reset Module can be easily field installed on solid state overload relays. This module will allow the overload relay to be reset from a remote location.

Table 16.303:

For Use With		Parts Kit Description	Class 9999 Type	\$ Price
Class and Type	NEMA Size ♦			
536 SA-SJ	00B through 7	Remote Reset Module	RR04 ■	162.00
9065 SS, SR, SF, ST	00B through 7			
8536 SE-SF	3 and 4	Top Mounting Bracket	RB34 ▲ ■	100.00
9065 SS, SR, SF, ST	3 and 4			

- ▲ To be used to mount the remote reset module on the top of the overload relay.
- 120 Vac power required.
- ♦ NEMA Size 00B and 00C are not actual NEMA sizes. These designations are used to differentiate the lower FLA of these devices from the NEMA size 00 Motor Logic Solid State Overload Relay.

### Power Pole Adders

Class 9999 Type SB9 Double Power Pole Adder

One single or double circuit power pole kit may be field added to a basic 2 or 3-Pole Type S contactor or starter Sizes 0, 1 and 2, or 30–60 A lighting contactors. See table below for selection. The ratings for these power pole adders correspond to the NEMA contact ratings found on page 16-105. A two or three pole contactor or starter accepts only one single or double circuit unit. A power pole cannot be used on four or five pole devices or devices which are mechanically interlocked.

To add a power pole to a Size 0 and 1 device, remove return springs.

When adding a power pole to a Size 2 or 60 A device, a coil change is required. Select a 4- and 5-Pole coil from the coil selection table on page 16-105, or specify Form Y118 as noted in the footnote below.

Class 9999 Type SB9 Double Power Pole Adder

When adding Sizes 0–2 power pole kits to a Size 3–7 or 100–800 A device, an adapter bracket (9999 SBT1) is required. The Class 9999 Types SB6 through SB15 power pole kits are suitable for copper wire only. Types SB21 through 25 are supplied with lugs suitable for copper and aluminum wire.

Table 16.304:

For Use With		Power Pole Adder Kit		
Type	Size	Description	Class 9999 Type	\$ Price
SB, SC & SM	0, 1 & 30 A	One N.O. power pole adder	SB6	158.00
			SB11▲	287.00
			SB21▲	287.00
SB, SC & SM	0, 1 & 30 A	One N.C. power pole adder	SB7	158.00
			SB12▲	287.00
			SB22▲	287.00
SB, SC & SM	0, 1 & 30 A	One N.O. and one N.C. power pole adder	SB8	365.00
			SB13▲	656.00
			SB23▲	656.00
SB, SC & SM	0, 1 & 30 A	Two N.O. power pole adders	SB9	365.00
			SB14▲	656.00
			SB24▲	656.00
SB, SC & SM	0, 1 & 30 A	Two N.C. power pole adders	SB10	365.00
			SB15▲	656.00
			SB25▲	656.00
SE-SJ & SQ-SZ & SJ	3-7 & 100-800 A	Adapter Bracket	SBT1	100.00

▲ To order a Size 2 or 60 A power pole kit complete with a new starter coil, specify Form Y118, voltage and frequency and add \$140.00 to the price of the kit (e.g., Class 9999 Type SB11 Form Y118, 120 volts, 60 cycles. Priced at \$426.00).

Class 9999 Type SB6 Single Power Pole Adder

### Control Circuit Fuse Holder

The control circuit fuse holder is designed to be used on Type S contactors and starters, Sizes 00–7, when either one or two control circuit fuses, 600 V maximum, are required. The Type SF3 and SF4 fuse holders will accept standard 600 V Bussmann Type KTK or equivalent fuses (13/32" x 1-1/2"); 6 A maximum. The SFR3 and SFR4 will accept Class CC 600 V Bussmann Type KTK-R or equivalent fuses only.

Table 16.305:

Description ■	Class 9999	
	Type	\$ Price
Single Fuse Unit	SF3	64.00
Single Fuse Unit for Class CC Fuse	SFR3	64.00
Two Fuse Unit	SF4	86.00
Two Fuse Unit for Class CC Fuses	SFR4	86.00

■ Fuses not included.

Class 9999 Type SF4 Fuse Kit

### Transient Suppression Module

The transient suppression module is designed to be used where the transient voltage, generated when opening the coil circuit, interferes with the proper operation of nearby integrated or solid state control circuits. The module consists of an RC circuit and is designed to suppress the coil voltage transients to approximately 200% of peak coil supply voltage. The module is wired across the coil for Type S, Sizes 00–5 and is designed for coil voltages of 120 volts only.

Table 16.306:

Description	Class 9999	
	Type	\$ Price
For Sizes 00-2	ST1	62.00
For Sizes 3-5	ST2	62.00

Class 9999 Type ST1 Transient Suppression Module

Table 16.307: How to Order

• Class Number	Class	Type
• Type Number	9999	SM1

Type SO4

### Isolated Alarm Contacts For Melting Alloy Overload Relays

Isolated overload relay alarm contacts are available factory installed or in kit form for field installation in Type S, NEMA Size 00–6▲ starters and Class 9065 Types M and S melting alloy overload relays. Type S, NEMA Size 7, utilizes a solid state overload relay which has isolated alarm contacts as a standard feature. The alarm contacts allow the starter to be used in applications which require isolated contacts, such as inputs to a computer.

Class 9999 Types SO4 and SO5 modules are interchangeable with the standard module (Class 9998 Type SO1) and may be installed on starters already in service. The case is made of clear plastic (polycarbonate) to allow for visual inspection of contacts.

**Table 16.308: Contact Unit For Melting Alloy Overload Relays**

Magnetic Starter		Parts Kit Description	Class 9999 Type	\$ Price
NEMA Size	Type			
00-6▲	SA-SH	N.O. Isolated Alarm Contact Plus Standard N.C. Overload Contact	SO4	116.00
		N.C. Isolated Alarm Contact Plus Standard N.C. Overload Contact	SO5	

▲ Isolated alarm contacts **cannot** be added in the field to the Type S Size 5 starter. Current transformers and a Size 1 overload block must be used. For factory installation specify **Form Y342**.

### Solid Neutral

The Class 9999 Type SN kit can be used on Class 8903 Type S lighting contactors and other controllers where field addition of a solid neutral is required. Each kit has lugs suitable for both copper and aluminum wire, and mounts with two screws.

**Table 16.309:**

Number of Lugs	Wire Capacity Per Lug (Cu/Al)	Class 9999	
		Type	\$ Price
4	14–2/0	SN1	134.00
3	(1) 4–600 MCM or (2) 1/0–250 MCM	SN2	392.00
3 (Dual)	(2) 2–600 MCM	SN3	624.00
2 (Dual)	(2) 6–350 MCM	SN4	392.00

### Tie Point Terminal Block

The tie point terminal block provides easy wiring of a Hand-Off-Auto selector switch or Start-Stop push buttons with separate control. The T7 terminal block requires no panel space. It simply snaps on Type S Sizes 00–4 contactors and starters by two tabs and is secured to the left hand coil terminal.

Tie Point Terminal Block

**Table 16.310:**

Magnetic Contactor or Starter		Class 9999 Type	\$ Price
NEMA Size	Type		
00-4	SA-SF	T7	33.30

**Table 16.311: How to Order**

To Order Specify:	Catalog Number	
• Class Number	Class	Type
• Type Number	9999	SO4

**Mechanical Interlock**

**General:** Type S contactors or starters can be mechanically interlocked so that only one device is energized at a time. The mechanical interlock is an interference (non-jamming) type, locking at the beginning of the stroke of any starter or contactor.

Type SM1

**Type S Sizes 00, 0, 1 and 2**—The mechanical interlock is mounted on the underside of the reversing baseplate. Two pins extend from the mechanical interlock through openings in the baseplate and engage the contact carrier of each contactor. Two styles of mechanical interlocks are used: one version for three pole contactors, a different version for four or five pole contactors. **When adding a power pole to the left-hand side of an existing Size 0, 1, or 2 three-pole reversing contactor, a new mechanical interlock must also be installed. When added to the right-hand side only, the power pole will not be mechanically interlocked with the left-hand contactor.**

**Type S Sizes 3 and 4**—The mechanical interlock is separate from the mounting pan on Sizes 3 and 4. Cams on the mechanical interlocks are operated by the contact carrier of each contactor. The mechanical interlock is attached to the underside of the two contactor baseplates on Sizes 3 and 4.

**Table 16.312: Mechanical Interlock for Two Contactors**

The following mechanical interlock kits can be used to interlock 2–5 pole contactors. Mechanical interlocks for horizontal and vertical arrangement are listed in Various pole arrangements.

			Contactor NEMA Size	Class 9999 Type	\$ Price
<p>Horizontal Type SM1 for Size 00–1 Type SM6 for Size 2 Type SM12 for Sizes 3 &amp; 4</p>	<p>Horizontal Type SM2 for Size 0 or 1 ▲ Type SM7 for Size 2 Type SM12 for Sizes 3 &amp; 4</p>	<p>Vertical Type SM2 for Size 0 or 1 ▲ Type SM10 for Size 2 Type SM11 for Size 3 Type SM13 for Size 4</p>	00, 0, 1	SM1	116.00
			0, 1	SM2	116.00
			0, 1	SM3	116.00
			0, 1	SM4	116.00
			0, 1	SM5	116.00

Class 9422 TC33 Fuse Block

Class 8538 (Series D and newer), Class 8738 (Series E and newer), and Class 8903 (Series C and newer) Type S non-fusible combination starters and lighting contactors (sizes 0–2, 30 to 60 A) can be converted to the fusible type by installing a Class 9422 Fuse Clip Kit. Both fusible and non-fusible combination devices have the same size enclosure in NEMAs 1, 4, and 12 construction, which permits this conversion. The 9422 Fuse Clip Kits contain line and load fuse clips, load base, and fuse pullers.

Table 16.318: How to Order

To Order Specify:	Catalog Number	
• Class Number	Class	Type
• Type Number	9999	R6

**General**

All tables are based on the operation of the motor and controller in the same ambient temperature, 40°C (104°F) or less. Always be certain the correct thermal units are installed in the starter before operating the motor. Each thermal unit shall be installed such that its catalog number is visible. See page 16-120, Figure 1 for complete thermal unit installation instructions. On melting alloy thermal units the ratchet wheel must engage the pawl assembly.

**Selection Procedure**

1. Determine motor data:
  - a. Full load current rating
  - b. Service factor

**NOTE:** If motor full load current (FLC) is not known, a tentative thermal unit selection could be made, based on horsepower and voltage. Refer to page 16-120.
2. Motor and controller in *same ambient temperature*:
  - a. All starter classes, except Class 8198:
    1. For 1.15 to 1.25 service factor motors use 100% of motor FLC for thermal unit selection.
    2. For 1.0 service factor motors use 90% of motor FLC for thermal unit selection.
  - b. Class 8198 only:
    1. For 1.0 service factor motors use 100% of motor FLC for thermal unit selection.
    2. For 1.15 to 1.25 service factor motors use 110% of motor FLC for thermal unit selection.
3. Motor and controller in *different ambient temperatures*:
  - a. Multiply motor FLC by the multiplier in Table A. Use the resultant full load current for thermal unit selection.
4. Locate proper selection table from index, pages 16-117 and 16-118.
  - a. The proper thermal unit number will be found adjacent, to the right of the range of full load currents in which the motor FLC or resultant full load current falls.
5. See page 16-119 for calculation of trip current rating.

**Slow Trip Thermal Unit Selection**

To select Type SB slow trip thermal units, the selection table for a standard Type B thermal unit may be used with the following modifications: For continuous rated motors having service factors of 1.15 to 1.25, select thermal units from the standard Type B table using 93% (102% for Class 8198) of the full load current shown on the motor nameplate and then substitute an SB for the B in the thermal unit type number.

Example: A motor with a full load current of 12 A controlled by an 8536SCG3 would require B22 thermal units for standard trip applications and SB19.5 thermal units for slow trip applications. The SB is selected by multiplying 12 A times 93% for 11.16 A and using this value to select B19.5. Then add the S prefix to arrive at SB19.5.

For continuous rated motors having a service factor of 1.0, select thermal units in the same manner using 84% (93% for Class 8198) of full load current shown on the motor nameplate.

**NOTE:** SB thermal units are used on Size 0, 1, 2 and only some Size 3 applications. Check thermal unit tables for current ranges.

- ▲ Series letters listed refer to the marking on the nameplate of the basic open type starter. When the starter is supplied in a controller containing other devices, the controller may have a different series letter marked on the enclosure nameplate.
- Small enclosure tables apply for Class 8904 non-combination and non-reversing starters. For combination and reversing Class 8904 starters refer to the large enclosure selections, index above.
- ◆ For Class 8630 starters divide the delta connected motor full load current by 1.73, and use this quotient to select thermal units.
- ★ For Class 8640 and Class 8940 (MD, PD, ME, PE, MF, PF, MG and PG) starters use the full load current of each motor winding as a basis for thermal unit selection—normally one-half total motor current.
- ▼ Large enclosure tables apply for Class 8904 combination and reversing starters. For non-combination and non-reversing Class 8904 starters refer to small enclosure selections, page 16-117.
- △ Use for Autotransformer Starters (Fusible and Circuit Breaker).
- Order Type E thermal units by number from Schneider Electric, Furnas Electric Company, Batavia, Illinois or a Furnas distributor at \$13.50 each, subject to motor control discounts.
- ◇ Type A thermal units for full load currents lower than those listed in this table are available. For complete information, consult Schneider Electric CCC at (1-888-778-2733).
- ☆ Form Y81 must be specified to use quick trip (Class 10) or slow trip (Class 30) thermal units on Size 3 starters and quick trip (Class 10) thermal units on Size 4 starters.
- ▽ This device will accept Type SB slow trip (Class 30) thermal units. For selection, see page 16-116.
- Refers to type number of starter in MCC, not actual type number of MCC.
- \* Divide the motor FLC by 60 and use this quotient to select the appropriate thermal units.

## Calculation of Trip Current Rating

**Trip Current Rating**—Trip current rating is a nominal value which approximates the minimum current to trip an overload relay in an ambient temperature, outside of the enclosure, of 40°C (104°F). In all selection tables except Class 8198, the trip current rating is 1.25 times the minimum full load current shown for the thermal unit selected. For Class 8198, the trip current rating is 1.15 times the minimum full load current. This applies to bimetallic overload relays with the trip adjustment set at 100 percent.

### Calculation Procedure

1. Use the selection table for the specific controller involved.
2. Find the minimum motor full load current listed for the thermal unit in question.
3. Multiply that current by 1.25 (1.15 for Class 8198). The result is the trip current rating.

**Example 1:** Determine the thermal unit selection and trip current rating for thermal units in a Class 8536 Type SCG3 Size 1 magnetic starter used to control a three-phase, 1.15 service factor motor with a full load current of 17.0 Amperes, where the motor and controller are both located in a 40°C (104°F) ambient temperature.

1. From Table 13 the proper selection is B32.
2. The minimum motor full load current is 16.0 Amperes.
3. Trip current rating is  $16.0 \times 1.25 = 20.0$  Amperes.

**Protection Level** is the relationship between trip current rating and full load current. Protection level, in percent, is the trip current rating divided by the motor full load current times 100. In Example 1 the protection level for the B32 thermal unit is:  $20.0/17.0 \times 100 = 118\%$ .

National Electrical Code, Section 430-32, allows a maximum protection level of 125% for the motor in the above example.

**Minimum Trip Current** (also called ultimate current) may vary from the trip current rating value, since ratings are established under standardized test conditions. Factors which influence variations include: the number of thermal units installed, enclosure size, proximity to heat producing devices, size of conductors installed, ambient (room) temperature, and others.

Except for ambient temperature-compensated overload relays, an ambient temperature higher than 40°C would lower the trip current, and a lower temperature would increase it. This variation is not a factor in selecting thermal units for the average application, since most motor ratings are based on an ambient temperature of 40°C, and motor capacity varies with temperature in about the same proportion as the change in trip current. Temperature-compensated relays maintain a nearly constant trip current over a wide range of ambient temperature, and are intended for use where the relay, because of its location, cannot sense changes in the motor ambient temperature.

## Calculation of Trip Current For Ambient Temperatures Other Than 40°C

For a controller ambient temperature other than 40°C (104°F) trip current can be calculated by applying a correction factor from the curve in Figure 1. The approximate trip current for a particular ambient temperature is the product of (1) the multiplier M corresponding to the temperature and (2) the 40°C trip current rating.

**NOTE:** Ambient temperature is the temperature surrounding the starter enclosure. Normal temperature rise inside the enclosure has been taken into account in preparing the thermal unit selection tables.

**Example 2:** Determine the trip current for the motor and controller in Example 1, except the controller is in a 30°C (86°F) ambient temperature. From the curve in Figure 1 the multiplier M is 1.1 at 30°C. Approximate Trip Current is  $16.0 \times 1.25 \times 1.1 = 22$  Amperes

### Approximate Thermal Unit Selection Based On Horsepower and Voltage

**General**—Thermal units selected using approximate full load currents from the table below will provide a trip current between 101% and 125% of full load current for many 4-pole, single speed, normal torque, 60 Hz motors. Since full load current rating of different makes and types of motors vary so widely, these selections may not be suitable.

Thermal units should be selected on the basis of motor nameplate full load current and service factor. Thermal unit sizes originally selected on an approximate basis should always be rechecked and corrected at the time of installation if required.

**Instructions:**

1. Locate motor horsepower and voltage.
2. Determine approximate full load current from the table below.
3. Use approximate full load current in place of actual nameplate full load current and follow instructions on page 16-116.

### Only Use This Table When Motor Full Load Current Is Not Known

Table 16.385:

Motor Horsepower	Motor Full Load Current					
	Three Ø				Single Ø	
	200 V	230 V	460 V	575 V	115 V	230 V
1/6	—	—	—	—	4.4	2.2
1/4	—	—	—	—	5.8	2.9
1/3	—	—	—	—	7.2	3.6
1/2	2.5	2.2	1.1	0.9	9.8	4.9
3/4	3.7	3.2	1.6	1.3	13.8	6.9
1	4.8	4.2	2.1	1.7	16	8
1-1/2	6.9	6.0	3.0	2.4	20	10
2	7.8	6.8	3.4	2.7	24	12
3	11.0	9.6	4.8	3.9	34	17
5	17.5	15.2	7.6	6.1	56	28
7-1/2	25.3	22	11	9	80	40
10	32.2	28	14	11	—	50
15	48.3	42	21	17	—	—
20	62.1	54	27	22	—	—
25	78.2	68	34	27	—	—
30	92	80	40	32	—	—
40	120	104	52	41	—	—
50	150	130	65	52	—	—
60	177	154	77	62	—	—
75	221	192	96	77	—	—
100	285	248	124	99	—	—
125	359	312	156	125	—	—
150	414	360	180	144	—	—
200	552	480	240	192	—	—

**NOTE:** These currents should not be used for selection of fuses, circuit breakers or wire sizes. See NEC tables 430-248 through 430-250. For motors rated 208-220 volts, use 230 V column. For motors rated 440 to 550 volts, use 460 and 575 V columns, respectively.

### Mounting Thermal Units

Figure 1

Always be certain the correct thermal units are installed in the starter before operating the motor. Thermal units should always be mounted so that their type designation can be read from the front of the starter (see Figure 1). Melting alloy thermal units should be mounted so that the tooth of the pawl assembly can engage the teeth of the ratchet wheel when the reset button is pushed.

Mounting surfaces of starter and thermal units should be clean and care should be taken to insure that thermal unit mounting screws are fastened securely.

Table 8

This is only a partial listing. Consult Digest pages for more information.
<b>Numerals</b> Used to define specific, physical arrangements such as number of poles for devices type T02 or protection type for devices type T36 and T40. Numbering varies with type of device. Consult Digest listings for specific device numbers.									

**TeSys N Contactors**

TeSys N contactors are used to switch heating loads, capacitors, transformers and electric motors where overload protection is provided separately. TeSys N contactors are available in NEMA Sizes 00 through 7. Target market segments include Hospitals, Retail, Food & Beverage, Marine, Oil & Gas and Mining, Metals & Minerals.

TeSys N non-reversing contactor, Size 1

TeSys N non-reversing contactor, Size 3

TeSys N reversing contactor, Size 4

**TeSys N Reversing Contactors**

TeSys N reversing contactors are used for starting, stopping and reversing AC motors where overload protection is provided separately. TeSys N reversing contactors are mechanically and electrically interlocked and are available in NEMA Sizes 00 through 7. Target market segments include Hospitals, Retail, Food & Beverage, Marine, Oil & Gas and Mining, Metals & Minerals.

**TeSys N Starters**

TeSys N starters are used for full-voltage starting and stopping of AC squirrel cage motors. Starters are available in NEMA Sizes 00 through 7 and come standard with Motor Logic Class 10/20 selectable solid state overload relays. Starters with bimetal overload protection can be assembled from TeSys N contactors and TeSys D overload relays. For more information on TeSys D relays, see Table 16.395 below.

		120 V	LAD4T3G	26.20
		208-240 V	LAD4T3U	26.20

- ☞ Installing the suppressor into the cavity makes the electrical connection. Overall width of the contactor remains the same.
- \* For Size 00-2 with DC coils, 3-pole contactors are fitted with built-in bidirectional diode suppression as standard.

LAD4T3B

**Table 16.407: Cabling Accessories**

Usage	Mounting on	Operating Voltage 50/60 Hz	Catalog Number	\$ Price	
For adapting existing wiring to a new product or for use with top-mounting accessory.	Size 00-1, AC only	Without coil suppression	LAD4BB	23.00	
		With coil suppression (varistor)	24 V	LAD4BBVE	23.00
			120 V	LAD4BBVG	23.00
			120-240 V	LAD4BBVU	23.00
For adapting existing wiring to a new product or for use with top-mounting accessory	Size 2, AC only	—	LAD4BB3	26.20	

LAD4BB••

The following accessories require use of cabling accessories (LAD4BB●●) for proper mounting. See page 16-145 for illustration.

**Table 16.408: Electronic Serial Timer Modules**

These solid state modules delay the energizing of the contactor coil, and feature built-in varistor surge suppression.

Type	Operational Voltage	Time Delay	Catalog Number	\$ Price
	24–250 Vac			
On-delay	Size 00–2	0.1–2 s	LA4DT0U	82.
		1.5–30 s	LA4DT2U	82.
		25–500 s	LA4DT4U	82.

**Table 16.409: Interface Modules ▲**

These modules allow the contactor coils to be energized from low voltage and low current level signals. They come in mechanical relay and solid state versions. The relay plus manual operation versions include a lever for manually turning the contactor on and off. When a module receives a low level signal, it allows the separate-sourced control voltage to flow to the contactor coil. It saves space and wiring time compared to conventional interposing relays.

LA4DFB

TeSys N Self-Protected combination starters combine the requirements of motor overload and short-circuit protection into one smaller package. These next-generation starters are manufactured in accordance with NEMA standards and are UL listed. They offer superior performance and efficiency and are easier to install and maintain.

In order to select a TeSys N Self-Protected combination starter, follow the 5-step process described below.

**1. Choose a base configuration**

**Table 16.421: Base Configurations**

Ratings			Type 1 enclosure				Type 12/3R enclosure				Type 4/4X enclosure				
Motor Voltage (V)	Max. HP		NEMA Size	Non-reversing starter		Reversing starter		Non-reversing starter		Reversing starter		Non-reversing starter		Reversing starter	
	Single phase	Three-phase		Base Configuration Number	\$ Price	Base Configuration Number	\$ Price	Base Configuration Number	\$ Price	Base Configuration Number	\$ Price	Base Configuration Number	\$ Price	Base Configuration Number	\$ Price

**2. Choose Thermal Overload Relay (Plug-in Control Unit)**

The thermal overload relay is a control unit that plugs into the TeSys U starter. No tool is needed to install or remove the control unit.

If you do not wish to select the thermal overload relay at this time, select Thermal Overload Relay Type codes N1 or N3 in function of the motor configuration (single phase or 3-phase) in Table 16.422. A thermal overload relay can be selected and ordered later on independently before installation.

In order to select a thermal overload relay, you must follow the next 2 steps. First, select the thermal overload protection type code in Table 16.422. Secondly, select the full load amperage code in Table 16.423 on page 16-153.

**2.1 Choose the thermal overload protection type.**

**Table 16.422: Thermal Overload Protection Types**

	Advanced Control Unit		Multifunction Control Unit		No Control Unit (Ordered later on independently)	
					Single Phase	3-Phase
<b>\$ Price</b>	180.00		738.00		—	
<b>Thermal Overload Protection Type Code</b>	4▲	1▲	2▲	3▲	180.00

- ▲ Form S must be added at the end of the catalog number.
- Form S6 must be added at the end of the catalog number. Current limiter is provided and factory installed.
- ♦ Two fuses in primary and one fuse in secondary provided as standard.
- ★ Fuse holder with 2 fuses provided as standard.

## 4 Choose Communication Type

If you do not need communication capabilities, select communication code N.

If a Communication protocol is selected, Control Voltage must be 24 Vdc (Control Power Source Codes BD, BD1, BD4 or BD6 only. Refer to Table 16.424)

**Table 16.425: Communication Code**

Communication Protocol	Communication Code	\$ Price
Modbus	M	262.00
Modbus TCP/IP	E	712.00
CANopen	C	262.00
DeviceNet	D	262.00
Beckhoff	B	262.00
Profibus	P	262.00
Advantys STB	A	262.00
AS-interface	J	226.00
AS-interface V2	K	226.00
No Communication	N	—

## 5 Choose Factory Modifications

When choosing Factory modifications, the Form code must be added at the end of the catalog number. If several forms are selected, they must be arranged in alphabetical order. There are two types of Forms available: abbreviated forms and standard forms.

### 5.1 Abbreviated Forms

Abbreviated forms are defined combinations of the most commonly ordered standard forms and are part of the profiled configurations with short lead time. For example, abbreviated form CP1 is a combination of standard forms C and P51.

Abbreviated forms cannot be mixed with other standard forms, with the exceptions of forms S and S6. If your combination of forms is not available as an abbreviated form, use only standard forms and arrange them in alphabetical order. For example, T40CG1CFG7NCP1S is a valid catalog number with the abbreviated form CP1. If you want to add Form P68, the valid catalog number is T40CG1CFG7NCP51P68S. T40CG1GFG7NCP1P68S is invalid because abbreviated form CP1 cannot be used with standard form P68.

**Table 16.426: Abbreviated Forms**

Factory Modifications	Form	\$ Price
Hand/Off/Auto Selector Switch + Red ON LED Standard Pilot Light	CP1	672.00
Hand/Off/Auto Selector Switch + Green ON LED Standard Pilot Light	CP2	672.00

**Overview**

Designed and manufactured to tackle the toughest power and process control challenges, the Model 6 Motor Control Center features industry-finest innovations that provide unmatched performance, high reliability, and low maintenance. The Model 6 Motor Control Center has integrated industry-leading components into the smallest and most flexible footprint possible to meet your power, control, and automation needs. The Model 6 provides superior performance, as well as long, reliable operation with enhanced safety features.

Model 6 Unit

Model 6 Motor Control Center

Model 6  
Motor Control Center

Model 6

### Model 6 Structure Features

- Horizontal main bus uses captive splice bar assembly; allows splicing without removing units
- Horizontal bus is located at the top of the structure for easy installation, inspection and maintenance  
Available ampacity 600 A, 800 A, 1200 A, 2000 A, and 2500 A
- Sliding non-conductive bus barrier
- 300 A and 600 A vertical bus
- Vertical bus openings built on 3-inch centers
- Optional automatic vertical bus shutters are available
- Mounting channel includes leveling notches for ease of alignment
- Full depth vertical wireway available, either 4-inch or 9-inch width
- Vertical ground bus is standard

### Model 6 Unit Features

- Cast metal handle, color coded for clear indication of disconnect position (including “Tripped”)
- Twin-handle cam (“Butterfly”) mechanism standard on all plug-on units (except Compac™ 6)
- Rugged unit construction features solid rear, side and hinged bottom plates
- Forward tilted pull-apart control terminal blocks standard with NEMA Type B or C wiring
- Starter units available with Class 8536 Type S NEMA or D-Line IEC
- Available overload relays on starter include: melting alloy, bimetallic, Motor Logic™, and TeSys T™
- Control station plate for pilot devices is mounted on front of unit (no cables across door hinge)
- Easily accessible control transformer
- Starter mounted on right-hand side of unit, adjacent to wireway, for ease of cable termination

### Available units include:

- Automation equipment
- Altivar™ AC drives
- Altistart™ soft starts
- Surge Protection Device (SPD) units
- PowerLogic™ circuit monitor and power meter
- Compac 6 starters and branch feeders
- Reduced voltage starters
- Distribution transformers and panelboards
- Empty mounting units
- Masterpact™ drawout main circuit breakers
- Master terminal compartments
- Automatic transfer switches
- Full voltage non-reversing
- Full voltage reversing
- Circuit breaker branch feeders
- Fusible switch branch feeders
- Full voltage 2-speed
- Programmable logic controllers
- Incoming devices
- Tie breakers

New!

### Intelligent Motor Control Center—Model 6 iMCC

Streamline troubleshooting and maximize uptime by incorporating “intelligent” components and cabling solutions into your motor control center.

Access the information you need in real time—anywhere, anytime. Designed to work on open network protocols, the Square D™ brand Model 6 iMCC allows you to monitor AC drive parameters, view full voltage starter status, spot abnormal conditions immediately and quickly diagnose equipment failures from any networked computer.

Communication protocols available: CANopen, DeviceNet™, Ethernet, Modbus™, and PROFIBUS. Connect to your network control system and communicate with every unit in the iMCC regardless of your communication protocol. Monitor each motor and load so you can know what’s going on at all times and take action before problems arise.

### Merchandised Units (shipment in 3 days)

Model 6 Industrial Package units (white) are available for ordering by catalog number. A listing of types available by quick shipment may be found on the following pages. This limited offering includes popular combinations of types and options. Catalog numbers consist of class number (8998), disconnect and device types, horsepower or ampacity ratings and options (for example, 8998SBA001XFTMA). See table below. All units are UL Listed.

### Combination Starters Catalog Numbering System

Units rated as follows:

- Model 6 Industrial Package, 480 V, 60 Hz, NEMA 12 enclosure
- Type 1B wiring, 100,000 AIR rating, 1 N.O./1 N.C. auxiliary interlock on each contactor

For more information, contact your nearest Schneider Electric sales office.  
Complete Model 6 Motor Control Centers are available from the factory.

**Combination Starters with Motor Circuit Protector Disconnects**

Model 6 NEMA-rated FVNR combination starters use PowerPact™ Motor Circuit Protectors.

Ratings: 480 V, NEMA 12, Type 1B-D wiring, 100,000 AIR. Units include 1 N.O./1 N.C. auxiliary contacts. Units with pilot devices use 22 mm type. Units without pilot devices include a station plate with knockouts for five 22 mm devices.

Thermal units are not included with melting alloy overloads.

**Combination Starters with Fusible Switch Disconnects**

Model 6 NEMA-rated FVNR combination starters listed below use fusible switches with Class R fuse clips (fuses not included).

Ratings: 480 V, NEMA 12, Type 1B-D wiring, 100,000 AIR. Units include 1 N.O./1 N.C. auxiliary contacts. Units with pilot devices use 22 mm type. Units without pilot devices include a station plate with knockouts for five 22 mm devices.

Thermal units are not included with melting alloy overloads.

**Compac™ 6 Combination Starters with Motor Circuit Protector Disconnects**

NEMA-rated Compac 6, half-height FVNR combination starters use GJ frame Mag-Gard™ Motor Circuit Protectors.

Ratings: 480 V, NEMA 12, Type 1B-D wiring, 100,000 AIR. Units include 1 N.O./1 N.C. auxiliary contacts. Units with pilot devices use 22 mm type. Units without pilot devices include a station plate with knockouts for four 22 mm devices. Thermal units are not included with melting alloy overloads.

**Compac 6 Combination Starters with Fusible Switch Disconnects**

NEMA-rated Compac 6, half-height FVNR combination starters listed below use fusible switches with Class J fuse clips (fuses not included).

Ratings: 480 V, NEMA 12, Type 1B-D wiring, 100,000 AIR. Units include 1 N.O./1 N.C. auxiliary contacts.

Units with pilot devices use 22 mm type. Units without pilot devices include a station plate with knockouts for four 22 mm devices. Thermal units are not included with melting alloy overloads.

† For spring terminal versions of LC1D09–LC1D65A, add 3 to the catalog number prior to adding the voltage code (for example, LC1D12G7 becomes LC1D123G7, and LC1D40AG7 becomes LC1D40A3G7. Note that 40–65 A spring terminals are only on the control terminations and not on power terminations). There is no charge for this modification.

• For ring tongue versions of LC1D09–LC1D65A and LC1DT20–LC1DT80A, add 6 to the catalog number prior to adding the voltage code (for example, LC1D09G7 becomes LC1D096G7, and LC1D50AG7 becomes LC1D50A6G7). There is no charge for this modification.

Note: Use this table **only** to interpret current catalog numbers. Some combinations are not available.

- ▲ Complete the catalog number by adding the coil voltage code from Table 18.11 on page 18-6 (for example, LC1D09G7).
- For DC version of these devices, replace the **C** with a **P** (for example, LC1D80004\*\* becomes LP1D80004\*\*). This applies only to 80 A, 4-pole devices.
- ◆ For ring tongue versions of LC1D09–LC1D65A and LC1DT20–LC1DT80A, add **6** to the catalog number prior to adding the voltage code (for example, LC1D09G7 becomes LC1D096G7 and LC1D50AG7 becomes LC1D50A6G7). There is no charge for this modification.
- ★ For spring terminals versions of LC1D09–LC1D65A, add **3** to the catalog number prior to adding the voltage code (for example, LC1D12G7 becomes LC1D123G7 and LC1D40AG7 becomes LC1D40A3G7. Note that 40–65 A spring terminals are only on the control terminations and not on power terminations). Ring tongue terminations have a 10% adder to list price.
- ▼ For slip-on connector versions of LC1D09 and LC1D12 only, add **9** to the catalog number prior to adding the voltage code (for example, LC1D09G7 becomes LC1D099G7). There is no charge for this modification.

200–330	F265–F500	LR9F7375 ■	LR9F7575 ■	333.00
300–500	F265–F500	LR9F7379 ■	LR9F7579 ■	737.00
380–630	F400–F630	LR9F7381 ■	LR9F7581 ■	905.00

■ When mounting overload relays LR9F5●57–LR9F5●71 directly beneath the contactor, supporting the relays with a mounting plate is recommended. With overload relays LR9F7●75–LR9F7●81, use of a support mounting plate is mandatory.

♦ IEC standard 60947-4 specifies the following trip times when the overload relay senses 7.2 times the setting current: Class 10—between 4 and 10 seconds; Class 20—between 6 and 20 seconds.

★ Interconnection kit LA7F407 is required to mount an LR9F●71 to an LC1F185.

- ▲ Use voltage codes from Table 18.11 to complete the catalog number (for example, LC2D09G7).
- Includes mechanical interlock without electrical contacts. Installer to complete wiring for electronically interlocking contactor operating coils by using a N.C. auxiliary contact integrated in the contactor or optional LADN or LAD8N auxiliary contact block.
- ♦ For LC2D09–LC2D32, electrical interlock can be included by adding a V to the end of the catalog number (for example LC2D09B7V). List price adder: \$5.00.
- ★ For these items, order two non-reversing contactors and one mechanical interlock separately. See page 18-4 and 18-14 for selection.
- ▼ Includes mechanical interlock (LA9D11502) with prewired electrical contacts for interlocking contactor operating coils.

**How to Order:**

Components are available for customer assembly of TeSys F reversing contactors. For example, the following components must be ordered to build a reversing contactor, 75 hp @ 460 V, with a 120 V / 60 Hz coil:

LC1F265

**Table 18.13: Example of Components**

Description	Quantity	Catalog Number
Contactors	2	LC1F115G6
Lugs (page 18-12)	6	DZ2FF1
Auxiliary contacts	2	LADN11
Power connections	1	LA9FF976
Mechanical interlock	1	LA9FF970

**Table 18.14: 3-Pole Contactors**

		24 (DC only)	LA4DB3B	56.00
		72 (DC only)	LA4DB3S	56.00

- ◊ Installing the suppressor into the cavity makes the electrical connection. Overall width of the contactor remains the same.
- ◊ For LC●D09–LC●D65A with DC or low consumption DC coils, 3-pole contactors are fitted with built-in bidirectional diode suppression as standard.
- ◊ Mounting at the top of the contactor on coil terminals A1 and A2.

**Table 18.27: Cabling Accessories**

Usage	Mounting on	Operating Voltage 50/60 Hz	Catalog Number	\$ Price
For adapting existing wiring to a new product or for use with top-mounting accessory.	LC1D09 to D38 LC1DT20 to DT60 AC only	Without coil suppression	LAD4BB	23.00
		24–48 V	LAD4BBVE	23.00
		50–127 V	LAD4BBVG	23.00
		110–250 V	LAD4BBVU	23.00

LAD4BB\*\*

TeSys D contactors ..... pages 18-4, 18-6  
 TeSys D overload relay accessories ..... page 18-16  
 TeSys D replacement coils ..... pages 18-18 to 18-19  
 Dimensions ..... pages 18-40 to 18-46

The following accessories require use of cabling accessories (LAD4BB●●) for proper mounting. See page 18-9 for illustration.

**Table 18.28: Electronic Serial Timer Modules**

These solid state modules delay the energizing of the contactor coil, and feature built-in varistor surge suppression.

Type	Operational Voltage ▲		Time Delay	Catalog Number	\$ Price
	24–250 Vac	100–250 Vac			
On-delay	LC1D09–D65A	LC1D80–D150	0.1–2 s	LA4DT0U	82.
			1.5–30 s	LA4DT2U	82.
			25–500 s	LA4DT4U	82.

▲ For 24 V operation, the contactor must be fitted with a 21 V coil: coil voltage code Z5 for 50 Hz; Z6 for 60 Hz; and ZD for DC.

**Table 18.29: Interface Modules ■**

These modules allow the contactor coils to be energized from low voltage and low current level signals. They come in mechanical relay and solid state versions. The relay plus manual operation versions include a lever for manually turning the contactor on and off. When a module receives a low level signal, it allows the separate-sourced control voltage to flow to the contactor coil. It saves space and wiring time compared to conventional interposing relays.

▲ Lug kits ending in the number 6 include 6 identical lugs. In some cases the LR9F overload relay mounted directly on the load side of an LC1F contactor will require a different size lug for your choice of contactor and overload. If the two sizes are different, order 3 of each size lug. Mounting hardware (screws, washers, and nuts) are provided with the contactors and overload relays, not with the lugs. See Table 18.39 for pricing.

Table 18.38: Lugs, 2- and 4-Pole ♦

Contactor Type LC1	Lug Kit Catalog Number	Qty. Required		AL/CU Cable Size
		2-Pole	4-Pole	
F115	DZ2FF1	4	8	14 to 2/0
F150, F185	DZ2FG1	4	8	6 to 3/0
F225, F265, F330	DZ2FH1	4	8	6 to 300 MCM
F400	DZ2FJ1	4	8	4 to 500 MCM
F500	DZ2FK1	4	8	2 X 2 to 600 MCM
F630	DZ2FL	■	■	3 X 2 to 600 MCM
F780	DZ2FX1	4	8	4 X 1/0 to 750 MCM

■ For 2-pole F630 contactors, order two DZ2FL1 (L1 and T2), and two DZ2FL3 (L2 and T1). For 4-pole F630, order two DZ2FL1 (L1 and T4), four DZ2FL2 (L2, T2, L3, T3) and two DZ2FL3 (L4 and T1).  
♦ Lugs for LC1F contactors and overload relays must be ordered separately. Each kit consists of one lug. Mounting hardware (screws, washers, nuts) are provided with the contactors, not the lugs. See Table 18.39 for pricing.

Table 18.39: Lugs Pricing

Lug Catalog Number	\$ Price	Lug Catalog Number	\$ Price
DZ2FF6	39.30	DZ2FH1	11.00

DZ2FG1	11.00		

These clear plastic protective shrouds are an effective means to meet international touch-safe requirements for power terminals. They are designed to be used with power cables that have been bolted to the terminal.

**NOTE:** The protection shrouds do not attach to contactors or overloads using DZ2F lug kits.

Table 18.40: Power Terminal Protection Shrouds

For Use With 2-, 3-, And 4-pole Contactors	Number of Shrouds Per Set	Catalog Number	\$ Price
LC1F115	6	LA9F701	42.40

These clear plastic protective shrouds are an effective means to meet international finger-safe requirements for power terminals. They are designed to be used with power cables that have been bolted to the terminal.

**NOTE:** The protection shrouds do not attach to contactors or overloads utilizing DZ2F lug kits.

Table 18.63: For LC1F115, F150, F185, F265, F330, F400, F500, F630, F780, F800

LX1 coils are the standard coils that are included when a voltage code is added to the contactor part number. The LX9 coils may be ordered separately for special applications. LX9 coils do not include a built-in normally open holding circuit contact; a separate auxiliary contact block with a N.O. contact should be added to the contactor. Both the LX1 and LX9 coils can be used on the previous F-line contactors.

- ♦ LC1F780 contactors operate on 2 coils as a set. The LX1FX part number includes both coils.
- ★ The 600 V coils for the F400, F500 and F630 do not include an auxiliary contact for holding circuits. If required, select appropriate contacts from page 18-8.
- ▼ Also requires rectifier DR5TE4U for 110–240 V coils, DR5TE4S for 380–440 V coils. See Table 18.64 for pricing.
- Δ Coil circuit requires a separately mounted rectifier. Order from Table 18.64.
- Complete the catalog number by adding the suffix (for example, LX1FF024).

Application Note on Contactor Drop-out Times:

Contactors using LX1, FH, FJ, FK, FL, and FX coils have longer drop-out times. For critical applications such as emergency stop functions:

- Select a fast drop-out coil (LX9), or
- Use a maintained contact Stop button, or
- Use an interposing relay.

TeSys F DC Coils

LX4 coils are the standard coils when a voltage code is added to the part number. The LX9 coils may be ordered separately for special applications. LX9 coils do not include a built-in normally open holding circuit contact; a separate auxiliary contact block with a N.O. contact should be added to the contactor. Both the LX4 and LX9 coils can be used on previous F-line devices.

TeSys D enclosed full-voltage starters are available in Type 1 and Type 12/3R enclosures through 50 hp at 460 V. The enclosed D-line accepts standard D-Line accessories and all Insta-Kits™ control units and control power transformer kits. Standard capacity control power transformers with built-in fuse block can be installed in the standard enclosure. For extra capacity, please refer to your local distributor or Schneider Electric sales office.

**Table 18.74: Catalog Number Nomenclature**

**Δ Control Power Transformer**

Add price from page 18-23. Select letter for primary voltage of CPT:

Voltage	No Transformer used	208	240	480	600
Code	O ▲	L	M	T	X

▲ Letter O, not zero.  
Note: If control transformer is used, the only options available are 24 or 120 V as the secondary of the transformer. Also, DC voltages are not available when control power transformer is used.

**□ Contactor/Starter Coil Voltage**

Select coil voltage from table:

Voltage	24	120	208	240	480	600
AC	B	G	L	U	T	X
DC	B	—	—	—	—	—

**◇ Coil Frequency**

Select:  
7 = dual frequency coils (50/60 Hz.)  
6 = 60 Hz.  
D=DC

Note: For 9 to 65 A contactors, only dual frequency coils are available; 80 A contactors, the 24–240 V coils are dual frequency only (50/60 Hz.). The 480–600 V coils are 60 Hz. only. See catalog 8502CT9901 for other restrictions.

**▽ Overload relay type**

Select:  
0 = No overload relay  
1 = Class 10 Trip  
2 = Class 20 Trip

**Table 18.75: ☆ Overload Relay Range**

(Select code from the table below)

65	48–65	D40, D50, D65	107.

■ Available for Class 10 only.  
◆ Available for Class 20 only.  
Note: If no overload relay is required, leave this portion of the catalog blank. Add appropriate price adder to the base price of the starter.

Dimensions .....page 18-48

IEC combination starters combine the requirements of motor overload and short circuit protection in one convenient compact package. All devices provide Type 2 Coordination through 30 hp at 460 V. Devices are available in Type 1 and Type 12/3R enclosures. The IEC combination starter line accepts standard TeSys D accessories and all Insta-Kits™ pilot devices and control power transformer kits. Standard capacity control power transformers with built-in fuse block can be installed in the standard enclosure. For extra capacity, please refer to your local distributor or nearest Square D/Schneider Electric sales office.

**NOTE:** Use tables and notes from page 18-21 to complete the catalog numbers.

**Factory Modifications and Insta-Kits™ Selection**

Add the factory modification code to the end of the catalog number created from page 18-21. With the use of Insta-Kits™, only one operator scheme is allowed. Only the combinations of operators and pilot lights shown below can be ordered.

Pilot lights will be at the coil voltage indicated in the catalog number for the starter.

**Table 18.82: Factory Modifications**

- ▲ Add these forms to the catalog number selected on page 18-21. The numbers as shown are for use in NEMA 1 Enclosures. For uses in NEMA 12/3R change the 6 to a 7 (ex A06U becomes A07U). Price remains the same. The change DOES NOT apply to control power transformer forms.
- Pilot lights are wired such that the light is on when the contactor is energized. For non-LED type pilot lights, a green lens is installed on the unit when shipped. A red lens is included for use as applicable.
- ◆ Select Insta-Kits™ from table below.

**Table 18.83: Insta-Kits™ Selection**

Total VA	Insta-Kits™ Catalog Number	\$ Price
50	LA9TFD32★	140.00
100	LA9TFD80★	246.00
150	LA9TFD15★	343.00

★ Complete the part number for the Insta-Kits™ by selecting the voltage code from the appropriate tables below.

The TeSys U motor starter is integrated, making it simple to choose and install. It consists of a control unit snapped in a power base. TeSys U can be configured to fit specific applications as well. Optional accessories include a reverser, a current limiter, predictive maintenance options, and communication options.

For detailed information about TeSys U, visit our website.

Selecting TeSys U Motor Starters in Three Steps

Table 18.112: Step 1. Select Power Base (Only two different bases up to 32 A)

Control Connection	Max. Current (A)	Three Phase (HP max.)				Single Phase (HP max.)		Self-Protected Power Base

ATSU01●●

E231693  
CCN NLDX

LR96921  
Class 3211 06

The GV family of products are 3-pole, horsepower rated, UL 508 listed manual starters. They include a manual disconnect, class 10 ambient-compensated thermal overload relay, and instantaneous, magnetic trip mechanism in one compact unit.

Any GV manual starter can be used alone for local manual control of a motor with individual full-load currents up to 220 A. The GV products may also be used in group motor installations in accordance with National Electric Code article 430-53. Group motor installations give you greater panel density for smaller size and require fewer parts and less wiring for installation when compared to conventional panel designs.

The GV2P and GV3P products also have an additional UL 508 type E rating as a stand-alone, self-protected manual combination starter. The UL 508 type E rating requires the addition of line side insulating barrier GV2GH7 for the GV2P, or GV3G66 for the GV3P. The GV2P and GV3P self-protected manual combination starters may also be combined with specific size contactors from the LC1D product family for a UL 508 Type F combination starter construction. These products have a UL-listed short circuit current rating from 10–100 kA depending on application size and voltage. See the Schneider Electric website for more information.

**How to Order**

To order a basic motor starter, select the model number (GV2ME\*\*, GV2P\*\*, or GV3P\*\*) with the appropriate thermal setting from the table below. The thermal trip range and setting should be determined from the motor nameplate full-load current.

**Table 18.133: GV2, GV3**

**Motor Protector Circuit Breakers**

Motor protector circuit breakers provide built-in thermal and magnetic protection. They are used in two-device motor feeder solutions to provide protection against short circuits, overloads, and phase imbalance.

**Table 18.135: Two-Device Solutions—Electronic Motor Protector Circuit Breakers with UL Ratings: H-Frame (150A), J-Frame (250 A), and L-Frame (600 A) ■ (refer to discount schedule DE2)**

■ Two-device solutions (these electronic motor protector circuit breakers include short circuit and overload protection):

- 1 contactor, plus
- 1 electronic motor circuit protector with a Micrologic 2.2 M

♦ The standard trip unit offers Class 5, 10, and 20 and phase unbalance or phase loss protection.

APP2D1•

The AK5 pre-fabricated bus bar system provides a quick and easy method of mounting control devices. All components are finger safe, UL Listed, CSA approved and CE marked. Although the AK5 system can be screw mounted onto any type of support, it **must be mounted** on the AM1DL201 DIN rail when component mounting plates incorporating a tap-off are used. When using tap-offs, the nominal operating current of the bus bar (160 A @ 35°) must not be exceeded.

**Table 18.158: 160 A, 3-Phase Busbar System**

AK5JB143

TeSys U Self-Protected combination starters combine the requirements of motor overload and short-circuit protection into one compact package. These next-generation starters offer superior performance, efficiency, and a unique modular design to fit your needs with optional communication and predictive maintenance capabilities. They are UL listed, easy to install and maintain.

In order to select a TeSys U Self-Protected combination starter, follow the 5-step process described below.

**1. Choose a base configuration**

**Table 18.186: Base Configurations**

**2. Choose Thermal Overload Relay (Plug-in Control Unit)**

The thermal overload relay is a control unit that plugs into the TeSys U starter. No tool is needed to install or remove the control unit.

If you do not wish to select the thermal overload relay at this time, select Thermal Overload Relay Type codes N1 or N3 in function of the motor configuration (single phase or 3-phase) in Table 18.187. A thermal overload relay can be selected and ordered later on independently before installation.

In order to select a thermal overload relay, you must follow the next 2 steps. First, select the thermal overload protection type code in Table 18.187. Secondly, select the full load amperage code in Table 18.188.

**2.1 Choose the thermal overload protection type.**

**Table 18.187: Thermal Overload Protection Types**

	Advanced Control Unit			Multifunction Control Unit	No Control Unit (Ordered later on independently)	
					Single Phase	3-Phase
\$ Price	180.00			738.00	—	
Thermal Overload Protection Type Code	A▲	B▲	C▲	D▲	N1	N3
<b>Protection Type</b>

				240	AC	24	DC	BD2	827.
				208	AC	24	DC	BD2	827.
			Three-Phase	240	AC	24	DC	BD2	827.
				480	AC	24	DC	BD2	827.
				600	AC	24	DC	BD6	1072.

- ▲ Form S must be added at the end of the catalog number.
- Form S6 must be added at the end of the catalog number. Current limiter is provided and factory installed.
- ♦ Two fuses in primary and one fuse in secondary provided as standard.
- ★ Fuse holder with 2 fuses provided as standard.

### 4 Choose Communication Type

If you do not need communication capabilities, select communication code N.

If a Communication protocol is selected, Control Voltage must be 24 Vdc (Control Power Source Codes BD, BD1, BD2 or BD6 only. Refer to Table 18.189).

If additional I/O is needed with communication, select communication code N in Table 18.190 and choose between Forms W10, W11, W12, W13 and W14 in Table 18.204.

Table 18.190: Communication Code

Communication Protocol	Communication Code	\$ Price
Modbus	M	262.00
Modbus TCP/IP	E	712.00
CANopen	C	262.00
DeviceNet	D	262.00
Beckoff	B	262.00
Profibus	P	262.00
Advantys STB	A	262.00
AS-interface	J	226.00
AS-interface V2	K	226.00
No Communication	N	—

### 5 Choose Factory Modifications

When choosing Factory modifications, the Form code must be added at the end of the catalog number. If several forms are selected, they must be arranged in alphabetical order. There are two types of Forms available: abbreviated forms and standard forms.

#### 5.1 Abbreviated Forms

Abbreviated forms are defined combinations of the most commonly ordered standard forms and are part of the profiled configurations with short lead time. For example, abbreviated form CP1 is a combination of standard forms C and P51.

Abbreviated forms cannot be mixed with other standard forms, with the exceptions of forms S and S6. If your combination of forms is not available as an abbreviated form, use only standard forms and arrange them in alphabetical order. For example, LE1U16BDG7NCP1S is a valid catalog number with the abbreviated form CP1. If you want to add standard Form P68, the valid catalog number becomes LE1U16BDG7NCP51P68S. LE1U16BDG7NCP1P68S is invalid because abbreviated form CP1 cannot be used with standard form P68.

Table 18.191: Abbreviated Forms

Factory Modifications	Form	\$ Price
Hand/Off/Auto Selector Switch + Red ON LED Standard Pilot Light	CP1	344.00

### Product Panorama

<b>Push Buttons</b>	<b>19-2</b>
<b>Control Stations</b>	<b>19-4</b>
<b>Pendant Stations</b>	<b>19-5</b>
<b>Tower Lights</b>	<b>19-6</b>

### 22 and 30 mm Most Common Complete Operators

XB4, XB5 (22 mm) and Class 9001 Type K, SK (30 mm) most common complete operators assembled with contact blocks and and light modules. Start-Stop, Hand-Off-Auto, and other configurations are offered in this simplified quick selector.	<b>19-8</b>
---	-------------

### Compact Pilot Lights

The Compact Pilot Light ranges include the <b>XVL</b> miniature LED type; the <b>Type O</b> low-cost incandescent; and the <b>Type J</b> incandescent, push-to-test types.	<b>19-10</b>
--	--------------

### 16 mm Push Buttons

<b>XB6 16 mm Push Buttons</b> , selector switches, and pilot lights with a plastic bezel are intended for high density panels such as laboratory and test fixtures.	<b>19-12</b>
---	--------------

### 22 mm Push Buttons

<b>XB4 22 mm Push Buttons</b> , selector switches, and pilot lights with a metal bezel are designed for industrial applications, and combine ease of installation and robustness.	<b>19-23</b>
---	--------------

<b>XB5 22 mm Push Buttons</b> , the plastic version of the XB4 unit, is particularly suited to applications requiring a resistance to chemical agents and/or double electrical insulation.	<b>19-42</b>
--	--------------

<b>XB5R Plastic and XB4R Metal Wireless, Batteryless Push Buttons</b>	<b>19-63</b>
---	--------------

<b>XB5S Biometric Switches</b>	<b>19-65</b>
--------------------------------	--------------

### 30 mm Push Buttons

<b>Class 9001 Type K Chrome-Plated Oiltight/Watertight Push Buttons</b> are intended primarily for machine tool and heavy-duty industrial applications.	<b>19-67</b>
---	--------------

<b>Class 9001 Type SK Non-Metallic Watertight operators</b> are designed for use in highly corrosive areas.	<b>19-77</b>
---	--------------

<b>Class 9001 Type KX operators</b> are Square-Shaped Multifunction Control Units that mount in a Type K mounting hole. This highly versatile line saves space by combining push buttons and pilot lights into one common operator.	<b>19-94</b>
---	--------------

### Control Stations and Enclosures

<b>XAL</b> control stations are available pre-assembled or custom assembled. These control stations use push buttons and pilot lights from the <b>XB5 22 mm</b> range. <b>XAP</b> enclosures are available in glass reinforced polyester, die cast metal and flush mount.	<b>19-100</b>
---	---------------

<b>Type B Standard Duty Control Stations</b> in 1, 2, and 3 button configurations are available as predetermined complete stations.	<b>19-103</b>
---	---------------

<b>Class 9001 Type KY/SKY Heavy Duty Control Stations</b> are ideally suited for commercial and industrial applications. Available in die cast metal, stainless steel, painted sheet steel, and reinforced polyester.	<b>19-105</b>
---	---------------

### Tower Lights

<b>Tower Lights and Beacons.</b> XVB, XVC, XVE, and XVP tower lights and beacons provide long distance indication of the operation status or sequences of a machine with lights or buzzers.	<b>19-107</b>
---	---------------

### Pendant Stations

Our full line of pendant stations for most crane and hoist applications range from the light to medium duty <b>BW</b> and <b>XAC</b> pendants to the heavy duty <b>SKYP</b> pendants.	<b>19-117</b>
---	---------------

### Foot Switches

The <b>Type A</b> foot switch is a heavy duty industrial foot switch which can be used in a variety of industrial applications.	<b>19-124</b>
---	---------------

### Rotary Cam Switches

<b>K2 and K30-K150 Rotary Cam Switches.</b> Miniature, Custom, and Power Switching Cam Switches provide an inexpensive and versatile means of switching from 10 A logic control through 150 A power switching.	<b>19-126</b>

**Standard, Push-To-Test, and Remote Test Pilot Lights**

Class 9001 Type J compact pilot lights are designed to be mounted in a 0.69 in. (11•16 in. or 17.5 mm) diameter mounting hole. Each terminal accepts up to two 14 AWG wires (CU only). Type J compact pilot lights meet NEMA 4 (watertight) and NEMA 13 (oiltight). Type JT push-to-test pilot lights have contacts built into the encapsulated body. Type JTR remote test pilot lights have dual inputs for one push remote testing—all you need is a push button with a current rating equal to or greater than the total lamp draw. Type JTR remote test pilot lights can also be energized from two separate input signals of the same voltage and polarity. This is done by wiring the Test terminal to the second input signal.

- ▲ Illuminated selector switches can be assembled by using a contact block/light module assembly in conjunction with a selector switch head, supplied without handle, and a transparent handle. See page 19-16.
- The LED must be the same color as the push button cap.
- ◆ The LED must be the same color as the lens.
- ★ Order bulbs separately. See page 19-22.
- ▼ Neon bulb can only be used with a red, yellow, or white cap.
- △ Electrical components with connection by printed circuit board pins are available. See page 19-22.

			Red	ZB5AS14 ▲	
		60 mm	Black	ZB5AS22	112.00
			Red	ZB5AS24	

▲ Other key numbers:

- key no. 421E: add the suffix 12 to the catalog number.
  - key no. 458A: add the suffix 10 to the catalog number.
  - key no. 520E: add the suffix 14 to the catalog number.
  - key no. 3131A: add the suffix 20 to the catalog number.
- Example: The catalog number for a Ø 40 mm red mushroom head for a trigger action, maintained push button, with release by key no. 421E becomes: ZB5AS94412.

■ Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

- ▲ Wireless and batteryless push button and receiver, factory-paired.
- For additional components, these devices can be field-paired.
- ♦ Supplied with output function set to momentary. Outputs programmable to maintained and Start-Stop.
- ★ Non-programmable momentary output function.
- ▼ Supplied with a magnet.
- △ Mounting collar ZB5AZ009 (plastic) or ZB4BZ009 (metal) to be ordered separately.
- Only heads ZB4RZA0 and ZB5RZA0 are mechanically compatible.
- ◇ Cap to be ordered separately: see Table 19.184 on page 19-64.
- ☆ This cap is fitted by Schneider Electric and cannot be removed (risk of damage).

### Biometric Switches

The fingerprint-reading biometric switch is designed for use in industry to restrict access to systems or machines. No interface is required to program or operate the switch: it is an independent unit.

Two types of products are available:

- Maintained biometric switches, Type XB5S1B, with two fixed states
- Momentary biometric switches, Type XB5S2B, with pulse output

The biometric switch is aimed at two types of users:

- The administrator who manages the registration and deletion of fingerprints
- The operator who, once registered, uses the product as a control unit

The product is of monolithic design (a single plastic housing) and is mounted by a nut (hand-tightened without the need for tools) in a standard 22 mm diameter hole. It operates on a 24 Vdc supply.

The product connects to the power supply and to the control output (relay or PLC) with a 2 meter cable or with an M12 connector.

It can be installed on a flat, horizontal, or vertical surface.

Two protective covers are available (see table below)

- One to protect the active face of the sensing screen. This cover is attached with a self-adhesive hinge
- One made of 12 gauge stainless steel — designed to cover the entire switch — which protects the entire switch from the outdoor environment (rain, sleet, snow, sunlight, UV protection). It also gives some protection from someone trying to break into the switch

### Description

The product consists of a dark gray housing, with the following on its front face:

- A sensing screen (1) that allows the registration of fingerprints and subsequent recognition of the registered fingerprints
- A green LED output state indicator (2), which illuminates when the output is activated (N.O. solid state contact)
- An orange LED (3), indicating an administrator's Registration mode
- An orange LED (4), indicating an operator's Registration mode
- A red Reset LED (5), which indicates in Delete mode that the administrator is deleting all or part of the memory
- A red LED (6) which flashes to indicate an unrecognized fingerprint or incorrect operation

**Table 19.187: Complete Units**

**Table 19.189: Biometric Switch Specifications**

Biometric Switch, Types XB5S1B**** and XB5S2B****		
Product certifications		UL, CSA,  IEC 61000-6-2 / IEC 61000-6-4
Degree of protection	Conforming to EN/IEC 60529	IP 65, NEMA 1, 2, 3, 3R, 12
Ambient air temperature	Storage	-25 to +70°C
	Operation	-5 to +50°C
Vibration resistance	Conforming to IEC 60068-2-6	1 gn, 9 to 500 Hz. Amplitude 3 mm, 5 to 9 Hz
Electric shock resistance	Conforming to IEC60068-2-27	50 gn, duration 11 ms
Connection method	Cable	Length: 2 m, 3-wire, pre-wired
	Connector	M12
Materials	Housing	Polyamide PA66
	Cable	PvR 3 x 0.34 mm <sup>2</sup>
Memory capacity		200 records (100 users, operators, or administrators, each registering 2 fingerprints)
Output state indicator		Green LED
Short-circuit protection		By gG fuse, 250 mA
Rated supply voltage		24 Vdc with protection against reverse polarity
Voltage limits (including ripple)		20–30 Vdc
Switching capacity		≤ 200 mA with protection against overloads and short-circuits
Residual voltage, closed state		≤ 1 V
No-load current consumption		≤ 50 mA
Delays	First-up	< 2 s
	Response time	< 1 s
	Recovery time	< 1 s

**NOTE:** Momentary switch has 0.5 s output pulse.

- ▼ Choose one color from the Color Codes table here, and insert the color code in Type number. **Example: KR9** with a yellow knob = **KR9Y**
- △ Add the voltage assembly code as chosen from page 19-86. **Example: KR8P** with a 277 V 50–60 Hz voltage = **KR8P8**
- ◻ The knob must be the same color as the LED light module chosen, for example, for a green LED, use a green knob.
- ◊ On neon light modules, use clear knobs only.
- ☆ These operators can be ordered complete with contact blocks. For maximum block usage, see page 19-88. Add the "H" number chosen from page 19-88 to the end of the operator Type number and add the cost of the "H" number to the operator cost.
- ▼ KR11UH1 has 1 KA1 (1 N.O., 1 N.C.) and KR12UH1H1 has 2 KA1 (2 N.O., 2 N.C.).
- ◊ To obtain a red knob with "Push Emergency Stop" printed on the red knob—substitute "R05" in place of "R" and add \$2.10 to the price.
- \* For 1-3/8 in. or 2-1/4 in. Dia. Knob:
  - a) Order Type -20 or -21 knob from page 19-92.
  - b) Order 9001K54 adapter (no charge)—allows Type -20 or -21 knob to fit on push pull operators. Voids UL and NEMA 6 rating.
  - c) Can order assembled operator by adding color code to Type -20 or -21. **Example: 9001KR9R** would be **9001KR9R20** or **9001KR9R21**. No price adder.
- ◊ See page 19-67 for contact sequences.
- ◊ See Table 19.193.

Table 19.193: Color Codes

Color	KR8, KR9
Black ◊	B
Red	R
Green	G
Blue	L
Yellow	Y
White	W
Orange ◊	S
Clear	C
Amber	A
Gray	—

◊ These colors are not available on illuminated push-pull operators.

- ▲ These operators can be ordered complete with contact blocks. For maximum block usage, see page 19-88. Add the "H" number chosen from page 19-88 to the end of the operator type number and add the cost of the "H" number to the operator cost.
- Add the voltage assembly code as chosen from Table 19.248 or Table 19.249 on page 19-86. **Example:** K2L▲ with 240 Vac/Vdc = K2L25
- ◆ On neon light modules, use clear color caps only.
- ★ The cap must be the same color as the LED light module chosen, e.g., for red LED, use red color cap.
- ▼ Add the color code as chosen from the color cap table. **Example:** K2L25◆ with a blue 136 mushroom button = K2L25L2
- ▲ The only difference between a no guard (K2L◆) operator and mushroom button operator is the color cap.
- Price includes operator, light module, contact block, and color cap.
- ◇ Price includes operator, light module, and color cap.

Manual Return ▲, Operator Only (without contact blocks)		
Without Knob	KS88	42.80
With Knob (select style and color from table 19.168 below)	KS88♦	53.00
Key Operated with E10 Key (Codes 11, 12, 13, 14, 15)	KS88K★	138.00

Illuminated Operators	Cat. No.	\$ Price
Manual Return ▲, Operator Only (without contact blocks)		
Without Knob, 110-120V 50-60 Hz Transformer	KS88J1	158.00
With Standard Red Knob, 110-120V 50-60 Hz Transformer	KS88J1R	167.00
With Other Color Knob and other voltage Light Module ■ ♦	KS88J■♦	158.00

- ▲ These operators can be ordered complete with contact blocks. Add the "H code" from page 19-88 as needed for your application.
- Add the voltage assembly code as chosen from page 19-86. Example: K25J■ with 208Vac = K25J3.
- ♦ Add the knob color code from table 19.204. For LED, knob color must match LED.
- ★ Add the key withdrawal code from Table 19.205.

Table 19.204: Selector Switch Assembly Code and Knob Cat. No.

Color	Standard Knob		Gloved Hand Knob		\$ Price
	♦ Knob Code	Cat. No.	♦ Knob Code	Cat. No.

06	2.5 kΩ	14	1 MΩ
Tandem Potentiometer			
Suffix ▼	Resistance		
	Front	Rear	
82	1 kΩ	1 kΩ	

▼ For the complete part number, add the suffix from Table 19.207 to the catalog number from Table 19.206. Example: 9001K2105.

Any potentiometer with a shaft 7/8" long and 1/4" diameter may be used with these operators

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories. See pages 19-85 through 19-92.

Shown below is a simplified method of selecting a selector switch to meet almost any combination of contact sequences.

**Step No. 1**

Determine the contact sequence(s) required. Set up a target table like the one shown for the example below.

Contact Sequence				
0—contact open	1—contact closed	↙	↑	↘
A		1	0	0
B		0	1	0
C		0	0	1

**Step No. 2**

Look for a cam type common to all sequences in Table 19.208, Table 19.209, or Table 19.210. For the example above, Table 19.209 would be used. For the contact sequences A (1 0 0), B (0 1 0) and C (0 0 1) of the example above, cam types F and L are common to all three sequences.

**Step No. 3**

Next, use the cam type common to all the sequences (if several cam types are common, choose one) to find the operator type number. Go to the proper page number as indicated in the table below:

Number of Positions	Push Button Line	Page Number
2	Type K, Type SK, Type KX	19-70, 19-80, 19-88, 19-95, 19-97
3	Type K, Type SK, Type KX	19-71, 19-81, 19-88, 19-95, 19-97
4	Type K, Type SK, Type KX	19-72, 19-82, 19-93

If for the example above a manual return operator with a standard black knob is required and:

The F cam type is chosen, the operator type number is:

- Type K—Class 9001 Type KS46B (from page 19-71)
- Type SK—Class 9001 Type SKS46B (from page 19-81)
- Type KX—Class 9001 Type KXSDFB (from page 19-97)

The L cam type is chosen, the operator type number is:

- Type K—Class 9001 Type KS401B (from page 19-71)
- Type SK—Class 9001 Type SKS401B (from page 19-81)
- Type KX—Class 9001 Type KXSDLB (from page 19-97)

**Step No. 4:**

Determine the contact blocks required by using the same table in Step No. 2.

If, for the example above, the F cam type is chosen:

- Use a 9001KA3 mounted on side no. 2 for sequence A (1 0 0).
- Use a 9001KA3 mounted on side no. 1 for sequence B (0 1 0).
- Use a 9001KA2 mounted on side no. 1 or 2 for sequence C (0 0 1).

If, for the example above, the L cam type is chosen:

- Use a 9001KA2 mounted on side no. 2 for sequence A (1 0 0).
- Use a 9001KA2 mounted on side no. 1 or a 9001KA3 mounted on side no. 2 for sequence B (0 1 0).
- Use a 9001KA3 mounted on side no. 1 for sequence C (0 0 1).

One Type KA1 double circuit block can be used in place of one Type KA2 single circuit block plus one Type KA3 single circuit block mounted on the same side.

**NOTE:** When ordering, add prefix 9001 to the catalog number.

**Table 19.208: 2 Position Selector Switch**

- ▲ Add the voltage assembly code as chosen from Table 19.248 or Table 19.249 on 19-86. **EXAMPLE:** KT▲R31 with 208 Vac red LED = KT37LRR31
- Add the color code as chosen from Table 19.212. **EXAMPLE:** KP1■ with a blue fresnel cap = KP1L31
- ♦ The cap must be the same color as the LED light module chosen, e.g., for green LED, use green color cap.
- ★ On neon light modules, use clear color caps only.
- ▼ On remote test pilot lights use only full voltage or resistor voltage assembly codes. Do not choose LED, neon or transformer codes. For AC use only.

**Table 19.212: Color Caps**

Color	Plastic Fresnel	Plastic Domed	Glass

			B	1	0	0	0	0	
		KA1	POS 2 (4)	A	0	0	0	0	1
			B	0	0	0	1	0	

The joy stick operator is ideal for applications where only one circuit is to be energized at one time. The three position joy stick closes one circuit in each Up-Down or Right-Left position with all circuits open in center position. The five position operator closes one circuit in each Up, Down, Left and Right position with all circuits open in center position.

Momentary contact operators are spring return to the center position. Maintained operators remain in position and must be returned manually. Operators with latch cannot be operated until the latch button in center of handle is pressed.

(1) Contact Closed (0) Contact Open

For use in hazardous locations—See page 19-87. Legend plate and contact block not included.

**Inserts** are field convertible. For colors not listed, order operator without insert, plus separate color insert from page 19-92. Up to two Type KA contact blocks can be mounted in tandem (total of four blocks). Selector push buttons cannot be illuminated.

**Table 19.215: Selector Push Button Operators—UL Types 4, 13/NEMA 4, 13**

Rocker Arm Operating

**Table 19.220: Rocker Arm Operating Lever**

Type	\$ Price
K50	77.00

Allows two standard push buttons to be operated independently of each other. Price does not include push buttons or legend plates. Order push buttons and legend plates from pages 19-67, 19-89, and 19-90—specify which marking is to be inverted.

Push-on Push-off Module 9001K85

**Table 19.221: Alternate Action—Push-on, Push-off Module**

Type	\$ Price
K85	42.80

This module can be added to standard 9001 Type K, KX, SK or T momentary push button operators. Contact blocks mounted behind this module (maximum of 2) are held in the depressed position when the operator is pressed once, and released to their normal position when the operator is pressed again. For a N.C. circuit, use a 9001KA3 or the N.C. contact of either a 9001KA1 or 9001KA4. For a N.O. circuit, use the N.O. contact of either a 9001KA4 or 9001KA6.

**Table 19.222: Off Delay Push Button—UL Types 4, 13/NEMA 4, 13**

Description	Type (All Colors)			\$ Price
	Full Guard	Extended Guard	No Guard	
Timed Contact 1 N.O. and 1 N.C.	KRD1UH1	KRD2UH1	KRD3UH1	277.00
Timed Contact 2 N.O. and 2 N.C.	KRD1UH2	KRD2UH2	KRD3UH2	514.00

Timing period is adjustable from 0.1 second to 60 seconds and begins after button has been released. Devices include a pack of seven color inserts for color coding the push button. See 19-92 for Universal color insert. Contacts are quick make-quick break.

Note: When mounted in top or bottom hole of a Type K enclosure, device requires one additional space below or above operator. When mounted other than in top or bottom hole, device may require two additional spaces, one above and one below operator. Closing plates must be installed on unused holes.

Color	■ SKR1, 2, 3 Place Color Code in Type Number	★ SKR4, 5, 24, 25 Place Color Code in Type Number
Blue	L	L
Yellow	Y	Y
White	W	—
Orange	S	S
Gray	E	—

- ▲ The universal push button operators include one each of the following color inserts: black, red, green, yellow, orange, blue and white.
- See Table 19.225.
- ◆ Knob has the words "Emergency Stop" in raised letters highlighted in white for readability.
- ★ See Table 19.225.
- ▼ These operators can be ordered complete with contact blocks. For maximum block usage, see page 19-88. Add the "H" number chosen from page 19-88 to the end of the operator type number and add the cost of the "H" number to the operator cost.

**NOTE:** To select and order contact blocks, light modules, and accessories, see pages 19-85 through 19-92.

- △ To obtain a red knob with "Push Emergency Stop" printed on the red knob—substitute R05 in place of "R" and add \$2.10 to the price.
- Choose one color from Table 19.227 and insert the color code in the type number. **Example: SKR9□ with a yellow knob = SKR9Y**
- ◊ Add the voltage assembly code as chosen from page 19-86. **Example: SKR8P◊ with 277 V 50–60 Hz = SKR8P8**
- ☆ The knob must be the same color as the LED light module chosen; e.g., for green LED, use green knob.
- ▽ On neon light modules, use clear knobs only.
- These operators can be ordered complete with contact blocks. For maximum block usage, see page 19-88. Add the "H" number chosen from page 19-88 to the end of the operator type number and add the cost of the "H" number to the operator cost.
- \* SKR11UH1 has 1 KA1(1 N.O., 1 N.C.) and SKR12UH1H1 has 2 KA1 (2 N.O., 2 N.C.).
- ◊ For positions, refer to Tables 19.228 and 19.229.

- ▲ These operators can be ordered complete with contact blocks. For maximum block usage, see page 19-88. Add the "H" number chosen from page 19-88 to the end of the operator type number and add the cost of the "H" number to the operator cost.
- Add the voltage assembly code as chosen from page 19-86. **EXAMPLE: SK2L■ with 240 Vac/Vdc = SK2L25.**
- ◆ On neon light modules, use clear color caps only.
- ★ The cap must be the same color as the LED light module chosen e.g., for red LED, use red color cap.
- ▼ Add the color code as chosen from the color cap table below. **EXAMPLE: SK2L25▼ with a blue 1-3/8 in. mushroom button = SK2L25L20.**
- △ The only difference between a no guard (SK2L) operator and mushroom button operator is the color cap.
- Price includes operator, light module, contact blocks and color cap.
- ◇ Price includes operator, light module and color cap.

**Table 19.231: Color Caps**

- ▲ Add the voltage assembly code as chosen from Table 19.248 or Table 19.249 on page 19-86.  
EXAMPLE: SKT♦R31 with 208 Vac red LED voltage = SKT37LRR31.
- Add the color code as chosen from the color cap table below.  
EXAMPLE: SKP1♦ with a blue fresnel cap = SKP1L31.
- ♦ The cap must be the same color as the LED light module chosen, e.g., for a green LED, use a green color cap.
- ★ On neon light modules, use clear color caps only.
- ▼ Use only full voltage or resistor voltage assembly codes on remote test pilot lights. Do not choose LED, neon or transformer codes. For AC use only.

**Table 19.241: Color Caps**

	Interlocked Assembly One Button Maintained	Other ■	SKR12■H1H1		SKR12■	

- ▲ Universal for SKR11,12 includes 2 each of black, red, green, yellow, orange, blue, white.
- Choose one color for each button. R = red, G = green, B = Black.  
**Example: 9001SKR11 with top button gray and bottom button orange = 9001SKR11ES.** See Table 19.227

by Schneider Electric  
www.schneider-electric.us

The Class 9001 Type KA contact blocks are Fingersafe® contact blocks (meeting VDE 0106 Part 100). They have one screw mounting and captive (backed out) plus/minus terminal screws. These contact blocks are double-break, direct-acting contacts. Because of the wiping action of these contacts, they are suitable for use with programmable controllers. All contact blocks listed below accept up to 2 #12–#24 AWG solid or stranded wires. Recommended tightening torque for screw terminals is 7 lb-in.

**NOTE:** When ordering, add prefix 9001 to the catalog number.

**Table 19.243: Standard Contact Blocks**

Description	Symbol	Type	\$ Price
 (Clear Cover)	 Direct-Acting	KA1	42.80
 (Green Cover)	 N.C. Contact Late Opening	KA2	21.50
 (Red Cover)	 Direct-Acting	KA3	21.50
 (Clear Cover)	 N.O. Contact Early Closing	KA4	42.80
 (Red Cover)	 N.C. Contact Late Opening	KA5	21.50
 (Green Cover)	 N.O. Contact Early Closing	KA6	21.50

**Table 19.244: Additional Circuit Arrangements**

Sequencing ▲ N.O. Contact of KA4 closes before N.O. Contact on KA1		Order One Type KA4 and One Type KA1	85.60
Overlapping ▲ N.O. Contact of KA4 closes before N.C. Contact of KA5 Opens		Order One Type KA4 and One Type KA5	64.30

▲ For push buttons or two-position selector switches only. For sequencing or overlapping contacts on other operators, refer to catalog 9001CT0001.

Symbol	Contact Blocks with Binder Head Screws (not Fingersafe)			Gold Flashed Contacts with Standard Pressure Wire Terminals	
	Type	Quantity ■	\$ Price	Type	\$ Price
	KA21	25-Up	42.80	KA31	71.00
	KA22	25-Up	21.50	KA32	35.60
	KA23	25-Up	21.50	KA33	35.60

 N.C. Contact Late Opening	KA25	25-Up	21.50	KA35	35.60

■ Minimum order quantity is 25. The price represents one individual contact block.

**Contact blocks listed below are not Fingersafe, but provide:**

- Terminals that accept ring tongue/fork tongue connectors
- Short single circuit contact blocks (0.75" deep vs. 0.97" deep on the Fingersafe)
- Same as old style Series G product available prior to March, 1989.
- For assembled operators, use form Y238 (add to catalog number as suffix, for example: 9001KRU1H13Y238)

**Table 19.245: Contact blocks (not Fingersafe)**

## 30 mm Push Buttons

Hazardous locations do not always require the use of explosion-proof equipment like the Class 9001 Type BR control stations. Selecting the most appropriate device for the location can save you money. For more information on the types of hazardous locations, contact your local electrical inspector.

**Table 19.250: Square D Offering According to Class, Division, and Group**

For			Use
Class	Division	Group(s)	
I	1	A	1. Intrinsically Safe System
I	1	B, C, D	1. 9001 BR station
I	2	A	1. 9001 K, SK, KX control stations with restrictions ▲ 2. Intrinsically Safe System
I	2	B, C, D	1. 9001 BR station 2. 9001 K, SK, KX control stations with restrictions ▲ 3. Intrinsically Safe System
II	1	E, F, G	1. 9001 BR station 2. Intrinsically Safe System
II	2	E, F	1. 9001 BR station 2. 9001 K, SK, KX control stations with restrictions ▲ 3. Intrinsically Safe System
II	2	G	1. 9001 BR station 2. 9001 K, SK, KX control stations with restrictions ■ 3. Intrinsically Safe System
III	1, 2	—	1. 9001 BR Station 2. 9001 K, SK, KX control stations with restrictions ■ 3. Intrinsically Safe System

- ▲ Any Class 9001 Type K, SK or KX operator can be used in an area classified as Class 1, Division 2 hazardous locations, if:
1. Only logic (KA40 series) or power (KA50 series) reed contact blocks are used.
  2. All Type K and SK illuminated operators are UL approved for use in Class I Division 2 areas. ♦
  3. Type KX illuminated operators do not use 4 lamp light modules, or 2 lamp light modules other than the transformer type. ♦
  4. The operators are mounted in any NEMA 4 & 13 enclosures.
- Any Class 9001 Type K, SK, or KX operator mounted in a Class 9001 Type KY, KYSS, KYAF, SKY enclosure may be used, except potentiometer operators.
- ♦ Add Form Y243 to single lamp Push-To-Test pilot lights.
- Note: For ▲ and ■: UL Listed: File E10054(N), CCN NOIV.

## Type K, SK and KX Electrical Components

Class 9001 / Refer to Catalog 9001CT1103

**NOTE:** When ordering, add prefix 9001 to the catalog number. All contact blocks listed below accept #12–18 solid or stranded wire.

**Table 19.252: Hermetically Sealed Logic Reed Contact Blocks** △  
Suitable for use on low energy level circuits

Description	Symbol	Type	\$ Price
		KA41	86.00
		KA42	42.80
		KA43	42.80
		KA44	86.00
		KA45	86.00

Max. Vac/Vdc	Maximum Load		
	Resistive	Inductive	Continuous
32/30	.25 A	.10 A	.5 A
120/100	8 VA	3 VA	.5 A

The maximum number of logic and/or power reed contact blocks per operator is as indicated on individual selection tables for standard contact blocks, **except:**

- On 3 position selector switches with cams C, D, E, F, G, L, or M, mount reed blocks on **one side only** (either side), maximum 2 in tandem.
- On 4 position selector switches, mount reed blocks on **one side only** (either side), maximum 2 in tandem.
- On joysticks or on Type KR8 or SKR8 push-pull operators, mount reed blocks on **one side only** (either side), maximum 2 in tandem.

**Table 19.253: Hermetically Sealed Power Reed Contact Blocks** △

Description	Symbol	Type	\$ Price
		KA51	143.00
		KA52	101.00
		KA53	101.00
		KA54	143.00
		KA55	143.00

Volts	AC NEMA C300 ★				Continuous Carrying Amperes
	Make		Break		
	A	VA	A	VA	
120	10.00	1200	1.000	120	3.0
240	5.00		.500		

Volts	DC NEMA Q150 ▼				Continuous Carrying Amperes
	Make		Break		
	A	VA	A	VA	
115	.50	58	.50	58	3.0

Note: The power reed contact blocks can be used with standard industrial relays and starters through NEMA Size 4. Minimum voltage is 5 V and the minimum current is 1 mA.

- ★ Inductive Rating—35% Power Factor.
- ▼ Inductive and Resistive Ratings
- △ Not for use in pendant stations.

**Example:** A Type KR1B push button with 2 Type KA1 contact blocks would be Class 9001 Type KR1BH2.

The design of the Class 9001 Type KA contact blocks allows them to be mounted side by side and/or in tandem. This enables you to specify an operator and a particular arrangement of contact blocks (shipped completely assembled) with a single Type number.

**NOTE:** When ordering, add prefix 9001 to the catalog number.

**NOTE:** For "H" Codes not shown in this table, contact your local Schneider Electric Customer Care Center.

**Mounting Hole for All Types K, SK, and KX Control Units**

\*Units also mount in 1.20 dia. Dual Dimensions: INCHES / 30 Millimeters

**Hole Punch:** Use Greenlee Tool #60242 to punch mounting hole and notch.

**Maximum Contact Block Usage**

(Includes Types K, SK and KX)

- **2 blocks mounted side by side only:** Any 2, 3 or 4 position spring return selector switch (non-illuminated, illuminated or keyed).
- **2 blocks mounted in tandem on one side only:** Any 2 operator interlocked push button.
- **2 blocks mounted in tandem (total of four blocks):** Any selector push button, keyed push button, 2, 3, or 4 position maintained selector switch (non-illuminated, illuminated or keyed), push-pull operators (non-illuminated or illuminated), joy stick, dual push button.
- **3 blocks mounted in tandem (total of six blocks):** Single momentary push buttons (non-illuminated or illuminated).

*NOTE: When ordering, add prefix 9001 to the catalog number.*

**Table 19.266: Padlock Attachments**

	Used On	Description	Type	\$ Price
	<b>Types K and SK</b> selector switches and potentiometers (will not work with gloved-hand knob).	Cover type attachment that can be padlocked to keep unauthorized personnel from tampering with the operator.	K7	42.80
	<b>Types K and SK</b> selector switches and potentiometers (will not work with gloved-hand knob).	Same as 9001K7 but with spring loaded lockout cover.	K107	56.00
	<b>Types K and SK</b> illuminated push buttons (with or without guard) and key operated push buttons.	Cover type attachment that can be padlocked to keep unauthorized personnel from tampering with the operator.	K108	42.80
	<b>Types K and SK</b> illuminated push buttons (with or without guard) and key operated push buttons.	Same as 9001K108 but with spring loaded lockout cover.	K109	57.00
	<b>Types K and SK</b> maintained push-pull operators using 1.375 in. dia. mushroom buttons (-20 series as shown on page 19-92).	Cover type attachment that holds mushroom button in depressed position and can be padlocked.	K110	54.00

**Table 19.267: Protective Boots**

Note: These Type KU protective boots are recommended for very dirty environments or severe hose down, but they are not required for UL Type 4 rating on the Type K operators or UL Type 4 or 4X rating on the Type SK operators. The K1 wrench (see page 19-93) is required for installation of these boots.

For Non-Illuminated Push Buttons *			Clear Color for	Type	\$ Price

- ▲ Includes one each of the following color inserts: Black, Red, Green, Yellow, Orange, Blue, and White.
- "EMERGENCY STOP" is in raised letters and hot stamped white across the front of the mushroom button.
- ◆ The mushroom button cap listed here may be assembled to a 9001KR1U or SKR1U to form a 9001KR4 or SKR4.
- ★ The mushroom button cap listed here may be assembled to a 9001KR1U or SKR1U to form a 9001KR5 or SKR5.
- ▼ The mushroom button cap listed here may be assembled to a 9001KR20 to form a 9001KR24 or SKR24 or SKR20 to form a 9001SKR24.
- △ The mushroom button cap listed here may be assembled to a 9001KR20 to form a 9001KR25 or a SKR20 to form a 9001SKR25.
- These color caps are opaque and are for use on non-illuminated operators only.
- ◇ Includes two of each of the following color inserts: Black, Red, and Green.
- ☆ May be used on KR8 and KR9 operators. Order mushroom button and K54 adapter (no charge) from page 19-88. Using the K54 adapter voids Type 6 rating.
- ▽ Red knob with "Push Emergency Stop" marked on top of knob.

*NOTE: When ordering, add prefix 9001 to the catalog number.*

Fingersafe™ Cover for 9001KM	6508804101	3.00

▼ Allows Type -20 and -21 mushroom color caps to be used on push-pull operators. Use of 9001K54 voids Type 6 rating.

**Table 19.273: KU Replacement Ring Nuts (Threaded Inside and Out)**

Used On	Part Number	\$ Price
KU1 through KU8, KU27, KU37, KU47	3105204101	4.35
KU17, KU18	3105205901	10.65

**Table 19.274: Interlock**

For mechanically interlocking two push buttons so that only one button can be depressed at a time. A Type K3 attachment is furnished with the 9001 KR11, KR12, SKR11, SKR12, SKRU1 and SKRU11 operators. However, these are maintained operators and the K3 interlock serves to release one of the buttons when the other is depressed. When used with momentary contact buttons, the K3 interlock **does not** hold the buttons in the depressed position. It simply prevents pushing both buttons at the same time. The Type K3 interlock is mounted behind the operators. Operators not included.

Type	\$ Price

All Type KX push buttons and pilot lights have a blank insert as standard. These blank inserts can be custom marked using a marking pen, a mechanical lettering set, press letters, or a tape lettering machine that marks a tape which can then be transferred to the blank insert.

To have legend inserts installed into the operators, order the operator as normal and then indicate where to install the legend inserts using the numbered positions shown on the operator ordered.

Example: 9001KXRL1GRGRH2 with a  
9001KXN 401 in position 1  
9001KXN 503 in position 2  
9001KXN 504 in position 3  
9001KXN 402 in position 4

*NOTE: When ordering, add prefix 9001 to the catalog number.*

- ▲ Each KXAC28 includes a clear cover and 1 each of all colors. If the same color is required for position #1 and #2 of the KXPB operator, order 2 of Type KXAC28.
- When specifying color codes—the first will be installed in #1 and the second in #2. The price for BOTH color codes is **\$6.60**.
- ♦ Each KXAC48 includes a clear cover and 1 each of all colors. If the same color is required for position #1 and #2 of the KXPC operator, order 2 of Type KXAC48.
- ★ When specifying color codes—the first will be installed in #1, the second in #2, the third in #3 and the fourth in #4. The price for ALL FOUR color codes is **\$6.60**.
- ▼ Two required per operator. When ordering an assembled operator—specify two code numbers. The first code will be assembled into #1 and the second code will be assembled into #2.

This pre-assembled, two-button station now comes complete with internal and external strain relief. Oversized finger grips on the rear of the enclosure make it easy to grip and operate.

- Well suited for standard hoist applications
- Push button legend inserts
- Field-installable mushroom button
- Full cover gasket, to exclude harmful contaminants

# Type XACA Worksheet

Use this worksheet to assist in component selection. Custom orders for XACA pendant stations must be placed through the Product Selector in Quote to Cash. There is a 10% charge for assembly.

## XACA Order Guide Instructions

Custom built pendant stations

1. Determine the number of operators needed, then choose an enclosure with a corresponding number of holes.
2. Select the type of operator, contact block, and appropriate nameplate for each function required.
3. Check for special functions that may be required. These items could include mechanical interlocks, adapters for self-supporting cable, lower support rings, protective guards, etc.

Functions (optional)	Catalog number of enclosure	XACA	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Attachments

Position	Type	Catalog No.
14	Adapters for self-supporting cable type BBAP (available only with cable sleeve Ø8–26 mm)	XACB961
15	Lower support ring	XACA971
16	Protective guard for base mounted selector switch or 40 mm emergency-stop push button	XACA982
17	Protective guard for key switch	XACA983

### Mechanical Interlock (XACA009)

This line of pendant stations consists of polymeric enclosures (2 through 10 units), push button units (1 through 5 speed) and laminated legend plates. All enclosures have an extra single unit space near the top which permits the installation of a toggle switch, a Type SK operator or pilot light, or a warning label. All enclosures come with a stainless steel hanger bracket and internal strain relief post. Enclosures are yellow and have a threaded opening in the top.

**NOTE:** When ordering, add prefix 9001 to the catalog number.

Table 19.369: Enclosure Catalog Numbers

Number of Buttons	Conduit Entrance Size	Enclosure Only ▲	\$ Price	Enclosure For Assembled Station ■	\$ Price
		Cat. No.		Cat. No.	
2	3/4"-14 NPT	SKYP2	189.00	SKYP20	◆

10	1 1/4"-11 1/2 NPT	SKYP10	428.00	SKYP100	

- ▲ Class 9001 SK push-to-test pilot lights and remote test pilot lights will not fit in these enclosures.
- Assembled pendant stations consist of an enclosure, operators and legend plates. All custom orders must include the pendant key sheet available as shown on page 19-123.
- ◆ The price of an assembled pendant SKYP station includes the enclosure and components plus a 10% assembly charge. (Example: 9001 SKYP2 (\$189) + SKRU1 (\$129) + SKN201 (\$8.60) = \$326.60 + 10% = \$360).

SK52

The price of the total station consists of the price of each individual component plus a 10% charge for assembly.

- ① Available as 9001SKSTS1
- ② Includes legend plate, gasket and ground plate to be used with toggle switch.
- ③ Tri-laminated legend plate having a yellow or red background on a black core.
- ④ 19 characters each side.
- ▲ Class 9001 Type SK Push-To-Test Pilot lights and Remote Test Pilot lights will not fit in these enclosures.

**Heavy Duty Industrial Foot Switches—Oiltight, Watertight, Dusttight and Driptight Enclosure, NEMA 2, 4 and 13**

**▲ DANGER**

**HAZARDOUS APPLICATIONS**

Do not use foot switches on machines without point-of-operation protection.

**Failure to follow these instructions will result in death, serious injury, or equipment damage.**

**AW2**  
Type AW Foot Switch with Top Pedal Shield and Side Shields

**Foot Switch Selection**

Foot switches are used to control many industrial processes, while leaving the operator's hands free to perform other functions. The type or model of foot switch suitable for each application will vary depending on factors such as the control function required, degree of protection required, production methods, unusual conditions, government regulations, etc. In some applications more than one foot switch may be required, as when two or more persons are operating a machine. In these cases, safe practice and regulations require that the foot switches be wired in series making it necessary that each operator's foot switch be actuated before the machine will cycle.

Only the user can be aware of all the conditions and factors present during setup, operation and maintenance of the machine; therefore, only the user can determine which foot switch(es) can be properly used. When selecting a foot switch for a particular application, the user should refer to the applicable ANSI standards and OSHA regulations. The National Safety Council's Accident Prevention Manual also provides much useful information.

In some applications, such as power presses, additional operator protection such as point-of-operation guarding must be provided when a foot switch is used as an actuator. This is necessary since the operator's hands and other parts of the body are free to enter the pinch point area and serious injury can occur. The shielding provided on foot switches cannot protect an operator from injury. For this reason the foot switch cannot be substituted for or take the place of point-of-operation protection.

A Trilingual Danger Sign regarding the need for point-of-operation protection is supplied with each foot switch. The sign incorporates three languages: English, Spanish and French. Additional copies of the sign are available by contacting your Square D sales office.

**AW132**  
Type AW with Oversized Pedal Shield and Side Shields

**AW124**

**Type AW Fully Shielded Foot Switch with Oversized Pedal Shield, Side Shields and Safety Door.** The Safety Door is interlocked with the pedal to prevent operation due to shock or vibration. It prevents accidental pedal operation by requiring a simple but intentional motion to lift the door before inserting the foot.

**Operating Temperature:** -30 to +60 °C (-22 to +140 °F)

**NOTE:** When ordering, add prefix "9002" to the catalog number.

**Table 19.373: Foot Switch Catalog Numbers**

- ▲ 2 N.O. and 2 N.C. isolated, direct acting contacts.
- A single pole snap switch that contains two double break contact elements (1 N.O. and 1 N.C.) must be used on circuits of same polarity. A double pole snap switch contains two electrically separated sets of contact elements allowing use on circuits of opposite polarity. Each set that contains two double break contact elements (1 N.O. and 1 N.C.) must be used on circuits of same polarity.
- ♦ For replacement cover drilled to accept latch. For Series C foot switches order AC9. Price is \$182.00 No replacement cover available for Series A or B devices drilled to accept latch. AC8 is spring return only.
- ★ WARNING: These foot switches must not be used to operate machines or equipment where the possibility of operator injury exists. Typical uses include Emergency Stop functions, "Dead Man" controls, signal functions (lights, bells, etc.).

Instructions for the Key Sheet on page 19-127

- From the chart below, choose the switching angle as determined on the key sheet (see page 19-127). This identifies the angular location and the position numbers for the various positions of the rotary cam switch. **Zero degrees or straight up is always position 1.** Use these position numbers when completing the target table.
- Terminals on the cam switch have the same numbers as the terminal numbers on the target table. **Contact 1-2 is a single contact.**

**NOTE:** When indicating a contact closure, place "X" within the square as shown in the contact sequence example.

Explanation of the Contact Sequence Example Below

- Contact 1-2 is open in all positions except position 2.
- Contact 3-4 is closed from the 2nd through the 4th position. The contact does not open while switching from one position to another.
- Contacts 5-6 and 7-8 overlap between positions 2 and 3.
- Contact 9-10 is closed in positions 2 and 3. It is open momentarily while switching between positions 2 and 3.
- Contact 11-12 closes momentarily when switching from position 2 to position 3. This contact is not closed in position 2 or position 3.

**NOTE:** Position 1 is an off position

Date		P.O. Number	Qty	

**To order custom cam switches:**

1. Indicate the contact size at right (9003 K2)
2. Indicate the desired switching angle at right. **If the switching angle is not indicated, the factory will determine the angle from the table to the right.**
3. From the example shown on page 19-126, fill in the target table on page 19-128.
4. Indicate the operator/handle type.
5. If the operator/handle bezel has a legend and legend marking is desired, indicate the legend marking on the back of this form.
6. If a separate legend is required, indicate the legend type on the right and the marking on the back of this form.

Table 20.26: Specifications and Catalog Numbers

Virtu™ 30 mm

M30  
30 mm (1 or 2 m)

M30  
30 mm (8 m)

Specifications							
Sensing Characteristics							
Sensing Range	102–1000 mm (4–39 in.)		51 mm to 1 m (2–39 in.); 119 mm to 2 m (4.7–79 in.)		304.8 mm to 8 m (12–315 in.)		
Sensing Frequency	180 kHz		200 kHz		75 kHz		
Power Requirements							
Supply Voltage	12–24 Vdc discrete, 15–24 Vdc analog		12–24 Vdc discrete; 15–24 Vdc analog		12–24 Vdc discrete; 15–24 Vdc analog		
Supply Current	40 mA discrete, 90 mA analog (excluding load)		80 mA (excluding load)		80 mA (excluding load)		
Environmental Ratings							
Operating Temperature	0 to 70 °C (32 to 158 °F)		0 to 50 °C (32 to 122 °F) discrete –20 to 60 °C (–4 to 140 °F) analog		–20 to 60 °C (–4 to 140 °F) TF option: –40 to 60 °C (–40 to 140 °F)		
Environment	NEMA 4X (indoor use only), IP67		NEMA 4X (indoor use only), IP67		NEMA 4X (indoor use only), IP67		
Construction							
Barrel, ØxL	30 x 1 x 95.26 mm (1.18 x 3.75 in.)		30 x 1 x 95 mm (1.18 x 3.74 in.)		30 x 1 x 116 mm (9.18 x 4.58 in.)		
Housing Material	PBT Resin		PEI Resin		PEI Resin		
Transducer	Glass Epoxy		Silicon Rubber or Fluorosilicone		Glass Epoxy

- ▲ Indicates NEMA or IEC Type Rating available for each product.
- For indoor use only—not UV protected.
- ◆ Enclosure ratings are NEMA 1, 2, 3, 4, 6, 6P, 12, and 13 except for option 21 (low force) which is NEMA 1 only. The 9007 MS/ML05 (omni-directional operation) enclosure ratings are NEMA 1, 2, 12, and 13

Table 21.2: Sealing

Type	Material
Standard shaft seals on lever types	Fluorocarbon rubber (FKM)
9007C, CR	
Plunger and wobble stick boots	Neoprene; Fluorocarbon optional
All other seals	Nitrile (Buna N); Fluorocarbon optional
R.B.Denison™ L	PVC
9007T and FT	
Shaft seal	Nitrile (Buna N)
Cover gasket	Nitrile (Buna N)
Base plate gasket	Cellulose fiber laminate
XCKJ, XCKL, XCKS	Nitrile (Buna N)
XCMD, XCKD, XCKP, XCKT, XCKN, XCNR	Nitrile (Buna N) and silicon

Table 21.5: Contact Function Diagrams

- Make-before-break (overlapping) SPDT**  
The normally open contact closes before the normally closed contact opens.
- Break-before-make (offset) SPDT**  
The normally closed contact opens before the normally open contact closes.
- Simultaneous make and break—SPDT**  
The normally closed contact opens at the same time as the normally open contact closes.

- A=Maximum travel of the operator in mm or degrees.
- B=Tripping travel of the contact.
- C=Reset travel.
- D=B-C=Differential travel.
- P=Point from which positive opening is assured

Table 21.6: Wiring Diagrams

Form A	Form B	Form C	Form AA	Form BB	Form CC	Form X	Form Y	Form Zb	Form Z	Form XX	Form YY	Form ZZ

Table 21.3: Ambient Temperature Ranges

The low temperatures listed below are based on the absence of freezing moisture or water. Care should be taken to avoid sub-freezing temperatures where dripping or splashing water is present and to avoid bringing a cold switch into a warm humid atmosphere and then back into sub-freezing temperatures. The water or moisture can freeze around the switch lever arm or plunger and cause jamming.

Type	Low Temperature	High Temperature at Full Rated Load
9007 C		
Lever Type	-20 °F (-28.9 °C)	+185 °F (+85 °C)
Plunger & Wobble Stick Type	0 °F (-17.8 °C)	+185 °F (+85 °C)
9007 FT★, T	-10 °F (-23 °C)	+185 °F (+85 °C)
HL100/HL300	0 °F (-17.8 °C)	+350 °F (+177 °C)
L100/L300	0 °F (-17.8 °C)	+200 °F (+93 °C)
9007 MS/ML	-4 °F (-20 °C)	+221 °F (+105 °C)
XCKJ, XCKL, XCKP, XCKT	-13 °F (-25 °C)	+158 °F (+70 °C)
XCMN, XCKN, XCNR	-13 °F (-25 °C)	+158 °F (+70 °C)
XCKS	-13 °F (-25 °C)	+158 °F (+70 °C)
XCMD	-13 °F (-25 °C)	+158 °F (+70 °C)

- ★ The Type FT will withstand hot falling sand up to +300°F (+149 °C); however, ambient temperature for the FT switch is the same as the Type T above (+185 °F, +85 °C). Do not use in higher temperature ambients.

Some switches are available with higher or lower temperature limits, by selecting special versions or special options. Refer to the respective product sections for further information. (Ex.: 9007MS/ML, see page 21-9.)

- ▼ Type C52 compact unit ratings at 125 Vdc—same ratings as C54, CF53 and CR53 at other voltages.

**Contact Configurations**—Direct opening contacts meet IEC 60947-5-1 requirements.

For contacts used in safety applications (end of travel, emergency stop device, etc.) the assurance of direct opening is required (see IEC 204, EN 60204 or NF C 79-130) after each test. The opening of the contact must be verified by testing with an impulse voltage (2500 V).

Note: Alternate Current Ratings—Several product lines offer special versions or options with alternate contact configurations or contact materials, which may result in current ratings that differ from those listed above. Refer to the respective product sections for further information.

**Industrial Snap Switches Without Enclosures**

Industrial snap switches have been incorporated in many Square D products such as timers, specialty push buttons, foot switches, operating mechanisms, door interlocks, motor control centers, limit switches, and many other control products.

**Recommended Actuator:** An adjustable actuator is recommended. If nonadjustable actuator is used, a resilient type or a mechanical stop should be used to prevent “bottoming” of button mechanism.

**Adjustable Actuator Overtravel:** Minimum recommended overtravel in both trip and reset directions is 0.015 in.

**Adjustable Actuator Total Travel:** Maximum differential limit plus 0.030 in. (Example: 0.076 in. for Type AO2.)

**Nonadjustable Actuator Total Travel:** Fully retracted—at least 0.139 in. for Type AO1 and 0.160 in. for Types AO2 and CO3 from mounting surface. Fully engaged—at least 0.061 in. but not closer than 0.045 in. from mounting surface.

**Contact Configurations:** Single-pole snap switches that contain two double-break contact elements (1 N.O. and 1 N.C.) must be used on circuits of the same polarity. Double-pole snap switches contain two electrically separated sets of contact elements allowing use on circuits of opposite polarity. Each set contains two double-break contact elements (1 N.O. and 1 N.C.) that must be used on circuits of the same polarity.

9007MS

The heavy-duty, miniature MS limit switch is completely encapsulated and intended for difficult applications such as machine tools, earth moving equipment, and general transportation. 9007MS04S0084

The switch has 40 mm mtg hole centers.

**Table 21.10: Specifications**

Temperature range (The minimum temperatures listed are based on the absence of freezing moisture or water.)	-4 °F to +221 °F (-20 °C to +105 °C) For -40 °F / -40 °C minimum temperature, see Forms 21 and 80 in Table 21.13 on page 21-9.

- ▲ See available options below. Add to the end of the catalog number. Up to three options may be added, if applicable.
- This catalog number is for devices with a standard cable and no options. See Table 21.13 for other cable length selections and general options.

**Table 21.13: Cable Length and General Options Designators: 9007MS01Sxxxy**

Replace xx and yy in the catalog number above with the designators in the tables below. Some combinations of cable lengths and options are unavailable; consult Schneider Electric.

Cable Length (xx) ▲	Designator
No cable ◆	00
3 ft—standard	01
6 ft	02
9 ft	03
12 ft	04
18 ft	05
33 ft	13

◆ Use with options 54, 55, and 82.

General Options (yy) ▲	Designator
#16 AWG SJTO cable (MS only)	02
Side entrance #18 AWG SJTO cable	06
Gray #18 AWG SJTO cable	10
#18 AWG individual conductors	11
Male 4 pin mini-connector with 3 ft cable (MS only)	12
Low force (18 oz), low temp (-40 °F / -40 °C), NEMA 1 only	21
High Pre-travel—adds 0.030	30
Male 4 pin micro-connector in housing (DC type) (MS only)	54
Male 5 pin micro-connector (DC type) (ML only)	55
Low temperature (-40 °F / -40 °C), 9007MS04 (NEMA 1 only)	80
Tapped holes in top of plunger housing (MS and ML)	81
Male 4 pin micro-connector in housing (AC type) (MS only)	82
Black #18 AWG SJTO cable (ML only)	83
Male 4-pin micro-connector in housing (AC type) (no cable)	84

Shown with side entrance cable, option 06

**Table 21.14: Style 7 Levers—0.75 in. (19 mm) diameter, nylon or steel roller (9007 prefix is not required on lever catalog numbers)**

Length		Catalog Number 1/4 in. (6 mm) Wide		Catalog Number 1/2 in. (13 mm) Wide		Catalog Number 3/4 in. (19 mm) Wide	Catalog Number 1 in. (25 mm) Wide
inch	(mm)	Nylon	Steel	Nylon	Steel	Nylon	Nylon
0.875	(22.23)	7A2N	7A2	7B2N	7B2	7F2N	7J2N
1.375	(34.93)	7A3N	—	7B3N	—	7F3N	7J3N
1.5	(38.10)	7A1N	7A1	7B1N	—	7F1N	7J1N
1.75	(44.45)	7A7N	—	7B7N	—	7F7N	7J7N
2.00	(50.8)	7A4N	—	7B4N	—	7F4N	7J4N

Note: Lever tightening torque for mounting the lever on the shaft: minimum 17 lb-in.  
Other levers available. See catalog 9006CT1007. For inside (reverse) roller option at no charge, replace 7 with 7X. (Ex: 7A2N changes to 7XA2N.)

Lever

**Table 21.15: Specialty Arms (9007 prefix is not required on lever catalog numbers)**

Description	Catalog Number
Style 7D adjustable length 1-3/8" to 3-3/8"—0.75" diameter, 1/4" wide, metal roller	7D
Style 7DN adjustable length 1-3/8" to 3-3/8"—0.75" diameter, 1/4" wide, nylon roller	7DN
Style 7S spring nylon, 6" rod, 0.3" diameter	7S
Style 7N nylon rod, 5" long, 0.3" diameter	7N

Note: Lever tightening torque for mounting the lever on the shaft: minimum 17 lb-in.

9007MS04S0084

**Male plug (face) pin-outs**

Note: DC connectors are rated 3 A, 250 Vac/Vdc.

1. Pre-cabled connection components: replace the "\*" in the catalog number with the required cable length in meters, either 1, 2, 3, 5, 7 or 10.  
Example: ZCMC21L• becomes ZCMC21L7 for a 7 m (23.0 ft) cable.  
Note: only cable lengths of 1, 2 and 5 m (3.3, 6.6, and 16.4 ft) are available for pre-cabled connection components ZCMC37L• and ZCMC39L•.

Dimensions: mm (in.)

1. Can only be used on ZCMD25 bodies.

1. For further details, see catalog 9006CT1007.

Dimensions: mm (in.)

1. For further details, see catalog 9006CT1007.

**Table 21.41: Levers (for use with ZCKG00 heads only—these arms will not fit ZCKD heads)**

Description	Size	Adjustment ▼ Increments	Catalog Number
Delrin roller	0.9 in. diameter, 0.2 in. wide, 1.6 in. long	5° or 45°	ZCKY11
Steel roller	0.9 in. diameter, 0.2 in. wide, 1.6 in. long	5° or 45°	ZCKY13
Ball bearing roller	0.9 in. diameter, 0.2 in. wide, 1.6 in. long	5° or 45°	ZCKY14
Adjustable length Delrin roller ★	0.74 in. diameter, 0.2 in. wide, 4.2 in. long (max.)	5° or 90°	ZCKY41
Steel roller	0.74 in. diameter, 0.2 in. wide, 4.2 in. long (max.)	5° or 90°	ZCKY43
Steel rod, square ★	1/8 in. side, 5.4 in. long (max.)	5° or 45°	ZCKY51
Fiberglass rod, round ★	1/8 in. diameter, 5.4 in. long (max.)	5° or 45°	ZCKY52
Steel rod, round ★	1/8 in. diameter, 5.4 in. long (max.)	5° or 45°	ZCKY53
Plastic rod, round ★	1/4 in. diameter, 8.4 in. long (max.)	5° or 45°	ZCKY59
Fork, 2 track Delrin roller	0.9 in. diameter, 0.2 in. wide for ZCKE092	5° or 45°	ZCKY71
Coil spring lever ★	4.41 in. (112 mm)	5° or 45°	ZCKY81
Spring rod lever ★	7.05 in. (179 mm)	5° or 45°	ZCKY91

★ Flexible operators do not guarantee positive opening operation.  
▼ Reverse mounting (for ZCKG00 head)—The higher increment (45° or 90°) is a positive opening contact feature which ensures no loss of mechanical effort between the actuation point and the moving contact bridge of the N.C. contact even if the lever is loosely mounted on the head shaft.

**Acceptable Wire Sizes: 14–24 AWG**

**Recommended Terminal Clamp Torque: 13 lb-in**

**ZCKG00 Programming**

The ZCKG00 head is field convertible to CW, CCW, or CW/CCW.

Reverse Lever Mounting

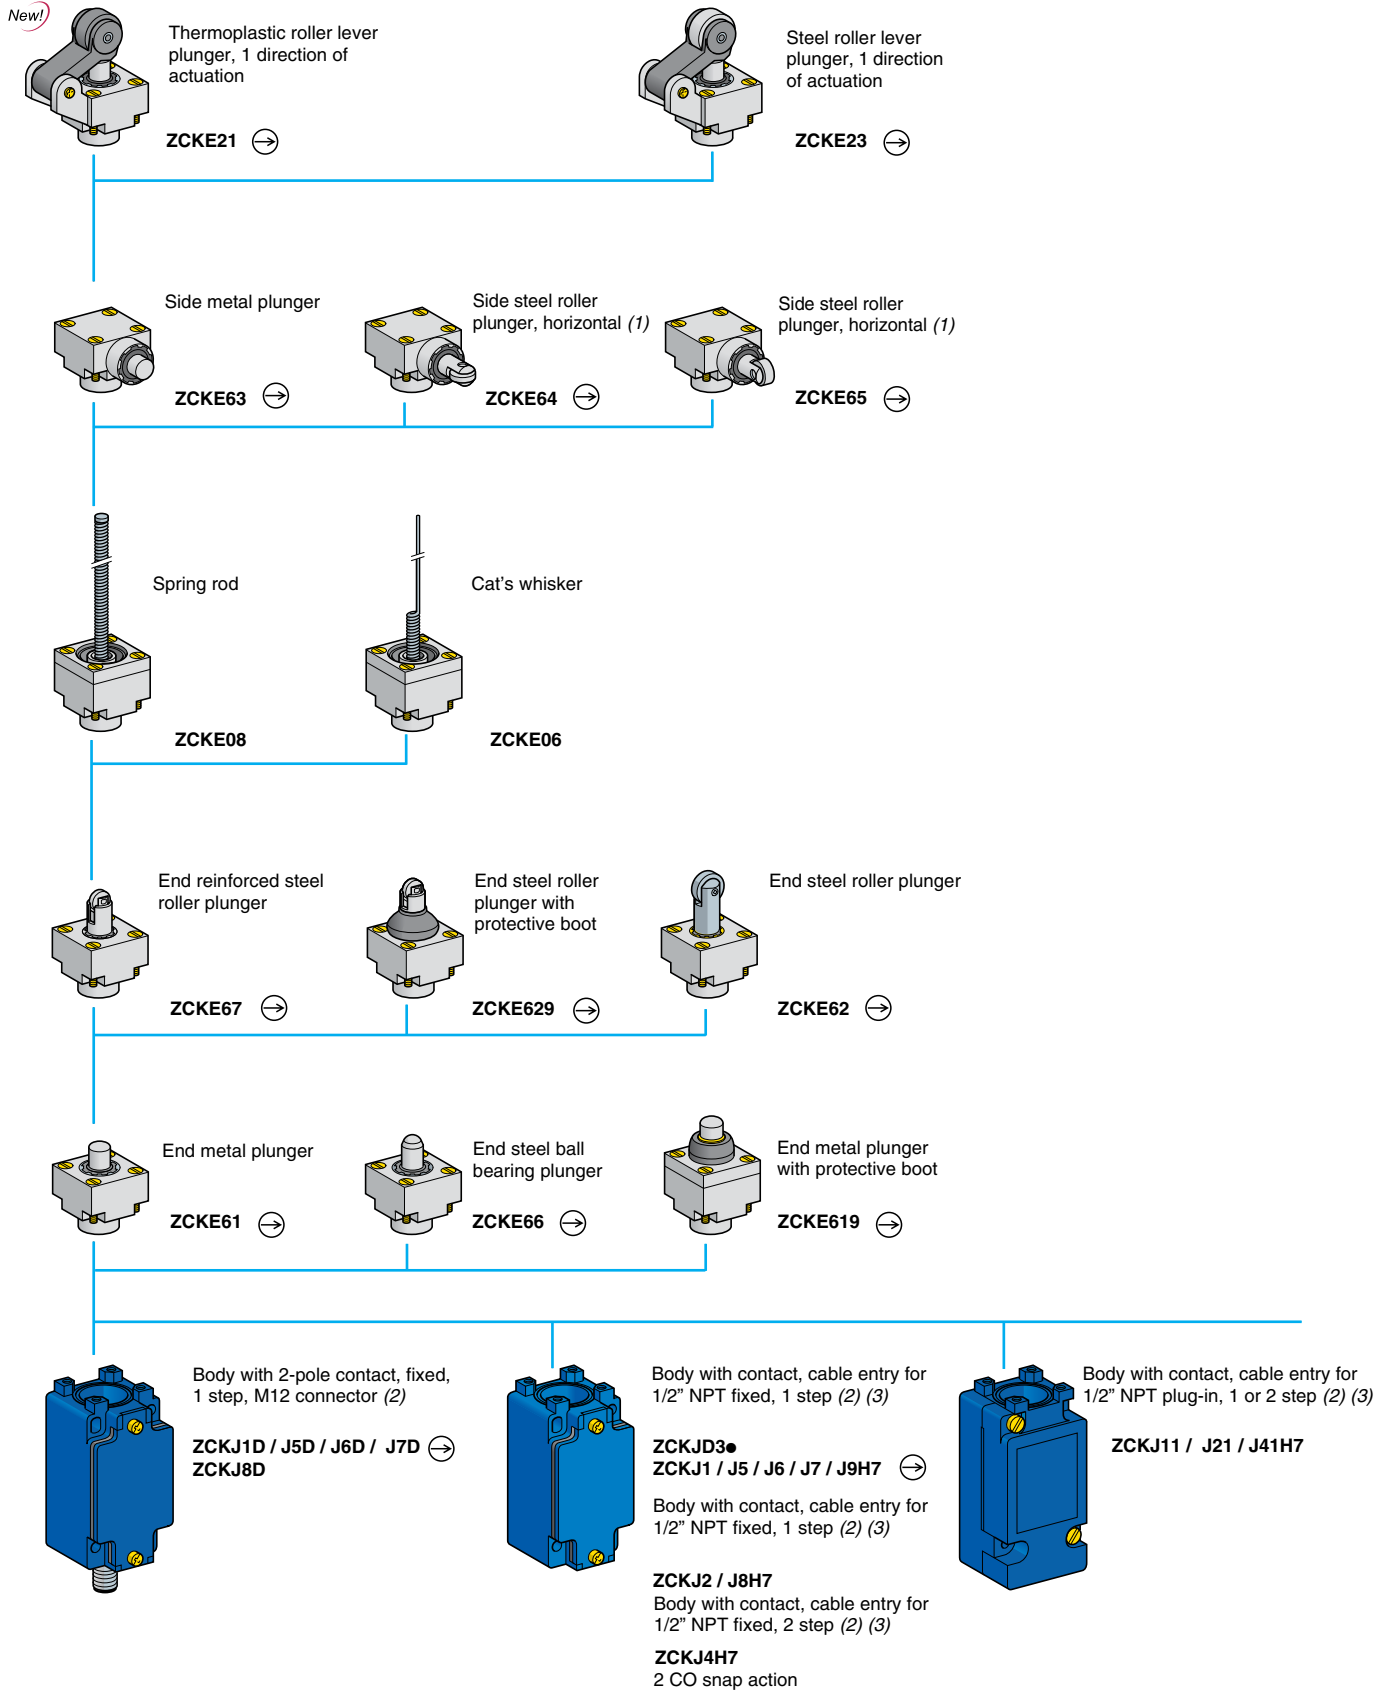

File CCN 42259 NKCR

File Class LR25490 3211 03

- (1) Cannot be used with bodies ZCKJ4H7 and ZCKJ41H7.
- (2) For further information, see page 21-27.
- (3) For a cable entry tapped ISO M20 x 1.5, change H7 to H29. Example: ZCKJ1H7 becomes ZCKJ1H29.  
For a cable entry tapped Pg 13.5, delete H7 from the catalog number. Example: JCKJ1H7 becomes ZCKJ1.

New!

- ⊕ Head assuring positive opening operation when used with a conforming lever.
- (4) Adjustable throughout 360° in 5° steps, or in 90° steps by reversing the notched washer.
- (5) Adjustable throughout 360° in 5° steps, or in 45° steps by reversing the lever mounting.
- (6) Suitable for bodies with contacts ZCKJ1 / J2 / J31 / J39H7.

XCKJ fixed body type precision switches with an SPDT configuration have direct opening contacts to meet most international standards.

Table 21.42: Specifications

Rated Power (conforms to IEC 947-5-1, duty categories AC15 and DC13)	
Temperature range	-13 to +158 °F (-25 to +70 °C); optional -40 to +248 °F (-40 to +120 °C). The minimum temperatures listed are based on the absence of freezing moisture or water.
Enclosure rating	NEMA 1,2,3,4,12; IEC Type IP66

**Table 21.53: Lever Arms**

Description	Adjustment Increments	Catalog Number
<b>Adjustable or Flexible Operators ♦</b>		
Adjustable Delrin roller, 0.74 in. diameter, 0.2 in. wide, 3 in. long (max.)	5° or 90°	ZCKY41
Adjustable steel roller, 0.74 in. diameter, 0.2 in. wide, 3 in. long (max.)	5° or 90°	ZCKY43
Adjustable rod-square, steel, 1/8 in. side, 5.4 in. long (max.)	5° or 45°	ZCKY51
Adjustable rod-round, fiberglass, 1/8 in. diameter, 5.4 in. long (max.)	5° or 45°	ZCKY52
Adjustable rod-round, steel, 1/8 in. diameter, 5.4 in. long (max.)	5° or 45°	ZCKY53
Adjustable rod-round, plastic, 1/4 in. diameter, 8.4 in. long (max.)	5° or 45°	ZCKY59
Coil spring lever	5° or 90°	ZCKY81
Spring rod lever	5° or 90°	ZCKY91
<b>Reverse Mounting</b>		
Delrin roller 0.9 in. diameter, 0.2 in. wide, 1.6 in. long ☞	5° or 45° ★	ZCKY11
Steel roller 0.9 in. diameter, 0.2 in. wide, 1.6 in. long ☞	5° or 45° ★	ZCKY13
Ball bearing roller 0.9" diameter, 0.2 in. wide, 1.6 in. long ☞	5° or 45° ★	ZCKY14
Fork, 2 track, Delrin roller, 0.9 in. diameter, 0.2 in. wide for ZCK-E09	5° or 45° ★	ZCKY61
Fork, 1 track, Delrin roller, 0.9 in. diameter, 0.2 in. wide for ZCK-E09	5° or 45° ★	ZCKY71

♦ Adjustable and flexible operators do not guarantee positive opening operation.

★ Reverse mounting: The higher increment (45°) is a direct (positive) opening contact feature which ensures no loss of mechanical effort between the actuation point and the moving contact bridge of the direct (positive) contact (N.C.) even if the lever is loosely mounted.

New!

**NOTE:** Order the mushroom operator cap from Table 21.56 on page 21-33.

**NOTE:** Head 9007C is for use with levers LA19 and LA4.

Plug-in Replacement Units	To order the basic switch and head without the plug-in receptacle base, substitute the letters "CO" for the first "C" in the type number. Example: Open type replacement for Type C54B2 is Type CO54B2.										
Acceptable Wire Sizes: 12–22 AWG	▲ These devices are factory set to operate the contacts in both the CW and CCW directions. Mode of operation is field convertible to CW only or CCW only. To order factory converted devices—for CCW only operation, change the "2" at the end of the type number to "1" (Example: C54B2 becomes C54B1); for CW only operation, delete the "2" at the end of the type number (Example: C54B2 becomes C54B).										
Recommended Terminal Clamp Torque: 7 lb-in (0.80 N•m)	■ Can be converted to horizontal roller type in the field. To order horizontal roller version add the letter "H" at the end of the equivalent vertical roller version type number (Example: C54F would become C54FH).										
	◆ To lock the nut in the desired position, crimp the slot near the bottom of the nut.										

Selection Mode Arrow

**Mode Change—Lever Arm Type**

Mode of operation is easily convertible to clockwise, counterclockwise, or both. Simply point the arrow to the letters representing the desired direction—CW, CCW, or CW/CCW. All parts are captive.

Description	Part Number
<b>Conduit Seal Only</b> Conduit seal fits in conduit entrance and excludes liquids	5 hole seal 3103248801 9 hole seal 3103281501
<b>Adapters</b>	
Switch with adapter plate permitting substitution of any Type C switch with standard box for any Type T switch with Style B baseplate	Form Y147
Adapter plate kit only (plate plus mounting screws) for above	Class 9007 Type BT1
Adapter plate to allow direct substitution of Type C plunger switches for Type B plug-in plunger switches— <b>use only</b> if there is a problem in lining up cam tracks	Standard Box Compact Box Class 9007 Type CT10 Type CT13
Adapter plate kit permitting direct substitution of any Type C lever arm switch with standard box for ANY Type AW lever arm switch	Class 9007 Type CT11
Metric conduit-connection adapter—male 1/2" NPT on one end, female 20 mm on the other end	Class 9007 Type CT12

- Dimensions: 0.22 x 2.94 x 1.54 in.
- ◆ Dimensions: 0.22 x 2.07 x 1.54 in.

**Rotary lever arms  
9007C\*\*\* A, B, C, N, T5, T10**

Special Features	Form
<p><b>Optional Shaft Equipped With 9007T / 9007FT Hub:</b></p> <p>Any lever arm Type C, CF or CR switch can be furnished with an optional shaft and hub combination which will accept the lever arms normally used with Type T and FT limit (position) switches. To order, add S9 as suffix to the device type number. For example, to order a 9007 C54B2 with this modification, order as a 9007 C54B2-S9. For details about the switches and lever arms that can be furnished with this modification, see catalog <b>9007CT1007</b>.</p>	
<p><b>Hub Only:</b></p> <p>Can be field installed on any Type C lever type switch.</p>	<p>Cat. No. 9007S9</p>
<p><b>LED Pilot Light, 24-120 Volts AC or DC on Plug-In Type Switch (Type C52, C54, C62, C64, C66, or C68):</b></p>	
	<p>Addition of LED pilot light in parallel with N.O. contact (light normally on) P5</p> <p>Addition of LED pilot light in parallel with N.C. contact (light normally off) P6</p> <p>Addition of two LED pilot lights, one in parallel with N.O. contact (light normally on), one in parallel with N.C. contact (light normally off) P7</p> <p>Addition of two LED pilot lights in parallel with N.O. contacts (lights normally on) (Types C62, C64, C66 or C68 only) P8</p> <p>Addition of two LED pilot lights in parallel with N.C. contacts (lights normally off) (Types C62, C64, C66, or C68 only) P9</p> <p>Addition of one isolated LED pilot light (light on when load is energized) (Type C54 only. Not available with Y1901.) P10</p>
<p><b>Pre-Wired Receptacle</b></p>	
<p><b>Single Pole</b></p>	Y1901
<p><b>Tamperproof Screws—Complete Switch Only</b></p>	Y1905

<p>Other versions with different wiring diagrams for automotive requirements are available.</p>	
	
<p><b>Low Temperature—Lever Types Only:</b> Limit (Position) switch will operate in an ambient temperature range of -40 to +185 °F (standard limit switch ambient temperature range is -20 to +185 °F). Minimum temperature is based on the absence of freezing moisture or water.</p>	Y128
<p><b>Fluorocarbon Rubber (FKM) Gaskets And Seals</b></p> <p>Substitute fluorocarbon rubber gaskets and seals on:</p> <ul style="list-style-type: none"> <li>Lever arm type, standard box (shaft seals on lever arm types are fluorocarbon rubber as standard)</li> <li>Lever arm type, compact box (shaft seals on lever arm types are fluorocarbon rubber as standard)</li> <li>Plunger type, standard box</li> <li>Plunger type, compact box</li> </ul> <p>Substitute fluorocarbon rubber boot only on plunger type switches</p> <p>Note: Fluorocarbon rubber has been shown to resist sunlight aging problems.</p>	Y140 Y140 Y140 Y140 Y1401
<p><b>Direct Acting Contacts</b> ⊕</p> <p>Substitution of direct acting contact unit for snap switch of single-pole switch: One pole, normally closed, slow-make slow-break, direct acting contact mechanism substituted for standard snap switch on Types C52, C54, CF53, and CR53 devices.</p> <p>This mechanism was designed for use in emergency overtravel applications. The movable contact of this basic switch unit is acted upon directly by the actuating mechanism of the limit switch—it does not depend on the force exerted by a snap-switch blade or a spring to open the circuit. Because these contacts are slow-make slow-break, they are best suited for applications where they are not actuated during normal operation, but only if abnormal overtravel is encountered.</p> <p>★ The direct acting contacts described above come standard on the 9007CLS1 hoist overtravel switch.</p>	 <p>Direct Acting Contact Mechanism (shown without cover)</p>

To convert sequences, remove the base plate, positioning plate and latches. Reassemble the positioning plate and latches as shown.						Not Adjustable			

- ▲ Pre-travel listed may vary up to 5° additional for universal switches or up to 2° additional for standard switches due to the free travel of the lever arm at the initial position.
- Linear travel of cam on 1-1/2 in. lever arm.
- ◆ Remove the spring from the positioning plate.
- ★ Sequence 3, 7, and 8 devices are available but are not recommended where high speed cams or lever arm snap-back is present. The application should be checked and No. 12 sequence substituted where possible.

Note: To obtain a Type FT Foundry Switch, change the "T" at the beginning of the equivalent Type number to "FT" (for example, TUB1 changes to FTUB1).

▲ The lever must not be allowed to snap freely from any overtravel position.

**Interpreting the Catalog Numbers**

Use the table below to interpret the catalog numbers of the L100/L300 switches. Do **not** generate new catalog numbers from the table. If the required contact sequence is not listed, contact your local field office.

The only modifications to the existing catalog numbers are:

- Mounting Plates—Style 1, 2, 3 or 4
- Front Covers—Metal, transparent plastic, or transparent plastic with a neon light.
- Special Features—Select from catalog 9006CT1007 and add to the type number.

Style	Housing	Function	Mounting Plate	Front Cover	Contact Arrangement
L	1 0 0	W S	2	P F	

Standard (mill)	100	Two circuit single operation	WS	1	M	Standard metal
Extra heavy duty (foundry)	300					
		Two circuit dual operation	WD	2	PF	Transparent plastic
		Triple circuit	WT	3	GF	
		Neutral	WN	4

XMLG pressure transmitters and pressure switches are characterized by their ceramic pressure-measuring cell. The deformation caused by the pressure is transmitted to the resistors of a Wheatstone bridge silk-screened on the ceramic. The change in resistance is then processed by the integrated electronics, providing either a digital or analog output signal.

Table 22.1: Specifications

Enclosure Rating	IP66, IP67 conforming to IEC/EN 60529, NEMA 4
Ambient Temperature (Operation)	-15 to +85 °C (+5 to +185 °F)
Media Temperature	-15 to +125 °C (+5 to +257 °F)
Precision (Linearity, Repeat Accuracy, Hysteresis)	Transmitters: <0.3%; pressure/vacuum switches: <1%
Repeat Accuracy (PNP/NPN output)	0.1% of the measuring range
Current Consumption	Transmitters: < 20 mA Pressure/vacuum switches: < 4 mA
Maximum Load Current	Transmitters: < 20mA Pressure/vacuum switches: 150 mA switching capacity
Rated Voltage	12/24 V for transmitters and pressure/vacuum switches
Voltage Limits	24 V for transmitters and pressure/vacuum switches
Fluids Controlled	Hydraulic oils, air, fresh/sea water, corrosive fluids from -15 to +125 °C (+5 to +257 °F)
Materials in Contact with Fluid	Ceramic Al <sub>2</sub> O <sub>3</sub> , stainless steel type AISI 303, Viton® FPM, PPS (leakage protection for P> 40 bar)
Output Response Time	< 2 ms

Table 22.11: Connector Wiring

DIN 43650A	M12	Metri-Pack

XMLF is a user-friendly electronic pressure switch with an easy-to-read four digit display and finger-operated adjustment buttons for scrolling up and down through the menu functions. Burst pressure is six times the nominal pressure (up to 1,800 bar or 26,100 psi).

- DC versions are protected against reverse polarity, short circuit, and overvoltage.
- DC versions are double insulated.
- Response time display: 3 levels (slow-normal-fast).

Available in four versions:

- Universal sensor with 1 analog output (4–20 mA) and 1 digital output
- Universal sensor with 1 analog output (1–10 V) and 1 digital output
- Dual stage sensor, 2 digital outputs, 24 Vdc (17-33 Vdc)
- Electronic pressure switch with relay output, 120 Vac (102–132 Vac)

The XMLF electronic pressure switch can be set without any tools once connected to a 24 Vdc power supply. It is ergonomically designed to be easy to hold and to set. The pressure connection is on the bottom of the switch and the electrical connector on the top, giving the switch a slim, straight-through profile. It has built-in water hammer resistance. It is available in AC and DC versions, each of which feature a 4-digit LED display. It is programmable to display either bar or psi. Digital solid state outputs are programmable as NPN or PNP, and N.O. or N.C.

Window mode (FEN) allows the switch to operate between selected minimum and maximum settings. Outputs change state when the pressure ranges outside the window settings.

Display	The display shows the pressure in the circuit up to a value of twice the maximum pressure size of the device (for example, XMXF.6000... displays values up to 1200 bar). If the pressure is higher than 130% of the pressure range, the display blinks. The display shows two digits after the decimal point from –1 to 2.5 bar (–14.5 to 36.25); one digit after the decimal from 10 to 70 bar (145 to 1015); and no digits after the decimal from 100 to 600 bar (1450 to 8700). In all cases, the display shows no values below 2% at the beginning of the scale.

Figure 22.3: XMLF...E2...●

XML international pressure switches meet IEC, Cenelec, UL, and CSA standards. They are CE marked.

- Fixed differential (XMLA), adjustable differential single-pole (XMLB) or double-pole (XMLC), and dual stage (XMLD)
- Range listed is on increasing pressure (psi, bar, kPa)
- External pressure setting window available
- 1 N.O.–1 N.C. snap acting contacts standard
- Temperature range: –13 to +158 °F (–25 to +70 °C)
- Enclosure rating: IP65 with plug-in connector, IP66 with terminal connections
- Operating rate: up to 120 operations per minute for diaphragm and 60 per minute for piston
- Media connection: 1/4" NPT
- Conduit connection: 1/2" NPT

Table 22.19: Specifications

<b>Enclosure Rating</b>	Screw terminal models: IP66 conforming to IEC/EN 60529 Connector models: IP65 conforming to IEC/EN 60529	
<b>Ambient Temperature</b>	<b>Operation</b>	–25 to +70 °C (–13 to +158 °F)
	<b>Storage</b>	–40 to +70 °C (–40 to 158 °F)
<b>Repeat Accuracy</b>	< 2%	
<b>Fluids Controlled</b>	Hydraulic oils, air, fresh water, sea water, 32 to 320 °F (0 to +160 °C), depending on the model Steam, corrosive fluids, viscous products, 32 to 320 °F (0 to +160 °C), depending on the model	
<b>Operating Rate (operating cycles/minute)</b>	Piston version switches: up to 60 cycles/minute for temperatures above 32 °F (0 °C) Diaphragm version switches: up to 120 cycles/minute for temperatures above 32 °F (0 °C)	
<b>Operational Characteristics</b>	~ AC-15; B300 (Ue = 240 V, Ie = 1.5 A; Ue = 120 V, Ie = 3 A) --- DC-13; R300 (Ue = 250 V, Ie = 0.1) conforming to IEC 947-5-1 Appendix A, EN 60 947-5-1	
<b>Type of Contacts</b>	Silver tipped contacts XMLA & XMLB: 1 C/O single-pole contact (4 terminal), snap action XMLC: 2 C/O single-pole contacts (8 terminals), simultaneous snap action XMLD: 2 C/O single-pole contacts (8 terminals), staggered snap action	
<b>Resistance Across Terminals</b>	< 25 mΩ conforming to NF C 93-050 method A or IEC 255-7 category 3	
<b>Terminal Referencing</b>	Conforming to CENELEC EN 50013	
<b>Short-Circuit Protections</b>	10 A cartridge fuse type gG (gl) recommended	
<b>Connection</b>	Screw clamp terminals Clamping capacity, min: 1 x 0.2 mm <sup>2</sup> , max: 2 x 2.5 mm <sup>2</sup>

NEMA 4, 4X, 13

Class 9012 single stage pressure switches are control circuit rated devices used in pneumatic or hydraulic systems on a wide variety of machine and process applications to protect the equipment and control or monitor the system pressure.

- Type G machine tool switches are available with NEMA Type 4, 4X, and 13 (IEC IP66) enclosure ratings.
- The NEMA 7 and 9 devices are UL listed for use in the following hazardous locations: Class I, Divisions 1 and 2, Groups C and D; and Class II, Divisions 1 and 2, Groups E, F, and G.
- Enclosure materials are cast aluminum.
- To ensure repeatability and minimize setting drift, pressure settings should fall within the middle 80 percent of the pressure range.

- ▲ For metric threads, add M after the W on all types (offered at an additional cost). To order a Pg13.5 electrical conduit entry and a 1/4"-19 BSP pressure connection, add M12 to the end of the catalog number, as well as adding "M" after "W" for metric threads. For example:  
9012GAW1 = 1/2" NPT electrical conduit entry  
9012GAWM1 = 20 x 1.5 mm electrical conduit entry  
9012GAWM1M12 = Pg13.5 electrical conduit entry and 1/4-19 BSP pressure connection.
- The differential adds to the range setting and determines the operating point on rising pressure.

File LR25490 Class 3211-03 G+W, G+O, G+G  
File LR26817 Class 3218-02 G+R

Complies with IEC 60957.5.1, 5C8.3.4 when protected with a Bussmann CCKTK-R-10 fuse.

**Differential-Pressure Operation**

Pressure switches for differential-pressure operation monitor the change in the difference between two pressures. Type G differential-pressure switches are used in applications to signal that a predetermined pressure difference has been reached as a result of a widening or increasing difference between the two pressures. They can also signal that a predetermined pressure difference has been reached as a result of a narrowing or decreasing difference between the two pressures.

9012GGW1

**Dual-Stage Operation**

Type G dual stage pressure switches are designed for use in applications where two separate pressure operations must be controlled by a single pressure monitoring device. These controls are most commonly used where dual functions are required or in sequencing applications such as alarm, followed by shutdown.

**Ordering Dual-Stage Pressure Switches**

- Specify Class 9012 Type..., and indicate the high or low operating point for each stage within the limits shown in the above table.

**Example:**

Class 9012 Type GKW4  
Set: Stage 1 at 30 psi decreasing pressure  
Stage 2 at 50 psi decreasing pressure  
(20 psi spread)

Differential of each stage will be approximately as shown in the table above.

- For available modifications see page 22-18. If one or more of these modifications are desired, add the appropriate Form to the Class and Type. Arrange form letters in alphabetical order when ordering more than one modification.

**Table 22.43: Class 9049 Accessories for Class 9012 Pressure Switches**

Description	Applies to Class	Type
Stainless steel surge reducer for use on oils, coolants, and hydraulic fluids (not recommended for air or water)	9012G	A26S

**Type GAW—Sensitive Control Applications**

9016GAW vacuum switches are provided with double throw contacts; normally open and normally closed circuits allow these controls to be used for standard or reverse action applications.

Standard devices can be mounted from the front with the bracket provided. Two mounting screws are required for a firm attachment to any smooth, flat surface. Allowance must be made for flange projection. Controls with Form F modification include two mounting feet with 9/32" mounting holes on 3-3/4" centers. Range and Differential adjustments are internal and exposed by removal of the front cover.

Maximum allowable positive pressure: 100 psig.  
Diaphragms are oil resistant, nitrile butadiene (Buna N) rubber.  
Electrical Ratings and Temperature Limitations—See page 22-14 for Type G machine tool.  
Dimensions—See page 22-17.

**Table 22.44: Class 9016, Diaphragm Actuated**

Range on Decreasing Vacuum (In. of Hg)	Adjustable Differential Adds to Range▲ (In. of Hg)	Contact Arrangement	Pipe Tap (NPTF)	Enclosure	
				NEMA 4, 4X & 13	NEMA 7 & 9 ■
				Type	Type
0–28.7	At Minimum Range: 0.8–9 At Mid-Range: 1.3–7.4	1 N.O., 1 N.C.	1/4"-18	GAW1	GAR1
0–25	5–20	1 N.O., 1 N.C.	1/4"-18	GAW2	N/A
0–28.3	At Minimum Range: 1–9 At Mid-Range: 1.7–7.4	2 N.O., 2 N.C.	1/4"-18	GAW21	GAR21
0–25	5–20	2 N.O., 2 N.C.	1/4"-18	GAW22	N/A

▲ Add Differential to Range to obtain the operating point on increasing vacuum (within vacuum limitations). The differential increases linearly over its range.  
■ The minimum differential doubles with NEMA 7 & 9 enclosures.

File E12158  
CCN NKPZ

File LR25490

Note: UL Listed control equipment. Type 4 must have Form T; otherwise these Types are component recognized. If conduit or pressure line is rigid, UL; if both are flexible, UR.

- Designed for the control of electrically driven water pumps. Diaphragm actuated.
- Type FSG is the standard water pump switch, suitable for all types of pumps: jets, submersible, reciprocating, etc.
- Type FYG is designed to meet higher horsepower and pressure requirements.
- Type FRG is reverse acting: contacts open on falling pressure.

For accessories, refer to page 22-28.

**Table 22.66: Class 9036, 2-Pole, Single Lever Operated**

Contact Operation	NEMA 1 Type	NEMA 4 Type	NEMA 7, 9 Type
Close on liquid rise	DG2	DW31	DR31
Open on liquid rise	DG2R	DW31R	DR31R
Close on liquid rise	GG2	GW1	GR1
Open on liquid rise	GG2R	GW1R	GR1R

Order the universal mounting bracket and float accessory kits separately from the Class 9049 Accessories section on page 22-28. Types GW and GR use a center-hole float. Devices with Form C use a center-hole float. All others use a tapped-at-top float.

**Table 22.67: Modifications**

Description	Factory Installed Form	Field Installed Class 9049 Kit
<b>Types DG, DW, DR</b>		
Reverse action (Type DG)	R	A58
Compensating spring (Type DG)	C	A19
Compensating spring (Type DR, DW)	C	A20
Compensating spring and reverse action	CR	Not available
<b>Types GG, GW, GR</b>		
Compensating spring for Type GG2	C	9049A13
Combination of compensating spring and reverse action (Type GG2)	CR	9049A13
1 N.O., 1 N.C. contact configuration	H	Not available
Combination of comp. spring & 1 N.O., 1 N.C. contact for Type GG2	CH	Not available
Reverse action (Type GR, GW)	R	Not available

**Table 22.68: Class 9049 Float Accessory Specifications (oz)**

Item	Type A6	Type A6S	Type A6C	Type A6CS	Type A6A	Type A6CA
Net buoyancy ■ (in water) 7" float	60▲	60▲	70▲	70▲	60▲	70▲
Weight of 5 ft rod	18.5	16.9	18.5	16.9	6	6
Weight of extra ft of rod (per ft)	3.7	3.4	3.7	3.4	1.2	1.2
Total weight of stops	3 (2 stops)	3 (2 stops)	6 (4 stops)	6 (4 stops)	3 (2 stops)	6 (4 stops)

- ▲ Net buoyancy of float has been calculated with float 80% submerged, thus allowing 20% factor of safety.
  - Buoyancy data is calculated for use in water. Consult factory for buoyancy data in media with a different specific gravity than water.
- When ordering float accessories**, first specify the desired float accessory package, such as 9049A6 or 9049A6CS, then as a second item give the number of additional rod kits required. For example, for a 9049A6 with 15 ft of rod, order as follows:  
Item A = 9049A6, quantity = 1; Item B = 9049T1, quantity = 4.

**Table 22.69: Maximum Forces at Which Switches Are Tested (oz)**

Type	Force Up To Trip	Force Down To Trip	Weight Supported with Compensating Spring	Type (with or without Form H)	Lever Length Position	Force Up to Trip	Force Down to Trip	Weight Supported with Compensating Spring at Max. Adjustment (oz)

\* See 1993 NEC Article 430-84

**Open Tank or Sump Applications, Float Switch, Class 9036 Type FG**

The Class 9036 Type FG30 pedestal style float switch is designed for liquid level control with electric motor operated pumps either directly or through a magnetic starter. It can also be used to activate alarms in liquid level control systems. The upward or downward movement of the lever arm of the Class 9036 Type FG30 float switch controls the On and Off positions corresponding to the water level changes required to turn the pump or alarm on and off.

Ambient temperature ratings: Min. -30 °C (-22 °F); Max. +105 °C (+220 °F)

**Table 22.71: Type FG Float Switch and Accessories**

Description	Class	Type
2-pole, NEMA 1, contacts close on liquid rise	9036	FG30
Plastic center hole float (1 required)	9049	A60
33.75 inch aluminum rod, 2 float stop assemblies and attaching hardware (1 required)	9049	A61

**Closed Tank, Class 9037 Type E**

Type E switches are flange mounted and float movement is transmitted through a Quad-Ring® seal.

Build up the switch to meet your exact requirements from the **basic switch**, **float rod**, and **float** groups below. Switch may be assembled in the field to give contacts that open on liquid rise or close on liquid rise. Consult Schneider Electric for use in media with a different specific gravity than water.

Ambient temperature ratings: Min. -30 °C (-22 °F); Max. +105 °C (+220 °F)

**Table 22.72: Class 9037 Type E**

Application	Post Length L (in.)	NEMA 1	NEMA 4	NEMA 7 & 9
		Type	Type	Type
For minimum water level change	2-5/8	EG8	EW8	ER8
	4-11/16	EG10	—	—
For maximum water level change	2-5/8	EG9	EW9	ER9
	4-11/16	EG13	EW13	—

22 PRESSURE, VACUUM, AND FLOAT SWITCHES

9036FG  
9049A60  
9049A61

9037EG with  
9049ER3 Rod Kit

Type H switches are attached to the tank by means of a 2-1/2 in. screw-in bushing. An external pointer indicates the float position within the tank when the unit is mounted. Switches come complete with stainless steel float and rod. A Buna N Quad-Ring® seal is used between the float rod and sealing connector. Normal application is at atmospheric pressure, but where higher pressures are encountered, the switch will withstand tank pressures up to 50 psi at temperatures up to +220 °F. Occasional replacement of the Quad-Ring seal may be necessary. Ambient temperature ratings: Min. -30 °C (-22 °F); Max. +105 °C (+220 °F)

- ▲ Rod length has been determined using the weight of the rod material furnished on Class 9049 accessories (3/8" O.D. tubing). Other types of rod should be weighed and compared to the Maximum Weight of Rod column in Table 22.79.
- Add 2 oz for Form N5 High Water alarm.

**Type C, Closed Tank, with Bushing**

Flange mounted with bushing for control of liquid level within a closed tank. Build up the switch to meet your requirements from the basic switch, rod kit, and float kit groups below.

Type C switches are attached to the tank by means of a 2-1/2 in. screw-in bushing. An external pointer indicates the float position within the tank when the unit is mounted. Switches come complete with screw-in connector, stainless steel float and rod.

Zelio RSL slim interface relays save valuable panel space with a 6 mm width and have a 6 Amp general purpose load rating. Features include:

- Pre-assembled option: relay and socket are combined into one catalog number.
- Universal AC/DC sockets have built-in protection from transients and reverse polarity voltages (see catalog DIA3ED2090304EN-US for more detailed information).
- Accessories, which include isolators, ID tags, and bus jumper save valuable installation time.

**Zelio™ Plug-In Interface Relays**

Zelio RSB interface relays and sockets provide the optimum combination of robust performance and space saving for the most demanding applications. Relays are rated at 8 A, 12 A, and 16 A (250 Vac / 28 Vdc). Features include:

- Optional protection modules for protection against electrical spikes
- Optional plastic hold-down ejector clips
- Socket or printed circuit board installation options

**Table 23.5: Relays (sold in lots of 10)**

**Zelio™ Plug-In Relays**

Zelio RXM miniature plug-in relays and sockets provide a complete system solution in response to the most demanding applications ranging from 3A to 12A. Some of the features include:

- Test button with removable lock-down door for testing the contacts (depending on model)

- Green LED indication of relay status (depending on model)
- Mechanical indication of relay status (standard)
- Optional protection modules to protect against electrical spikes
- Bus jumpers for connecting multiple terminals reduce installation time

Zelio™ Plug-In Relays

Zelio RUM plug-in relays and sockets provide a complete system solution in response to the most demanding applications up to 16 A. Some of the features include:

- Test button with lock-down door for testing the contacts (depending on model)
- Green LED indication of relay status (depending on model)
- Mechanical indication of relay status (standard)
- Optional protection modules to protect against electrical spikes
- Bus jumpers for connecting multiple terminals reduce installation time

Square D™ Plug-In Relays

8501K relays are designed for multipole switching applications at 240 Vac or lower. These relays have industry standard wiring and pin terminal arrangements which allow for their use as replacements for many competitive relays without wiring or hardware modifications.

- 12 A relays
- DPDT or 3PDT
- Manual operator/ green pilot light options
- Motor load (hp) ratings
- DPDT latching models available
- AC or DC operation
- RoHS Compliant

(See Stocked Relay Table above)			

For sockets and accessories, see page 23-14.  
For track, see page 24-16.

**Square D™ Alternating Plug-In Relays**

8501KA alternating relay is designed to minimize pump and motor wear by equalizing run time between parallel components in a multi-pump system.

The relay is controlled by an external control switch. The switch may be any type of contact closure; for example the contacts of a timing relay or the closure of a float switch. The 8501KA relay also has a toggle switch that allows the operator to lock one side of the duplex system in the “on” position.

- 12 A Resistive Rating
- SPDT or DPDT
- Toggle switch for load control
- LED Load Indicators
- Horsepower Rated
- AC and DC Control
- UL Listed w/ Square D Socket
- Rohs Compliant

**Table 23.42: Type KA — Alternating Relay**

**Table 23.43: Relay Availability**

Type	AC & DC Voltage			AC Voltage
	12	24	120	240
Voltage Code	V36	V14	V20	V24
8501KA81***			S	
8501KA82***			S	
8501KA112***			S	
8501KA112A***			S	

**Notes:**

- AC Voltage is 50/60 Hz
- S = Stocked. “S” items have a 2 week lead time and minimum order requirement.
- All other part numbers are considered factory order (FO) and require a minimum order quantity of 25 and have a lead-time of 18 weeks

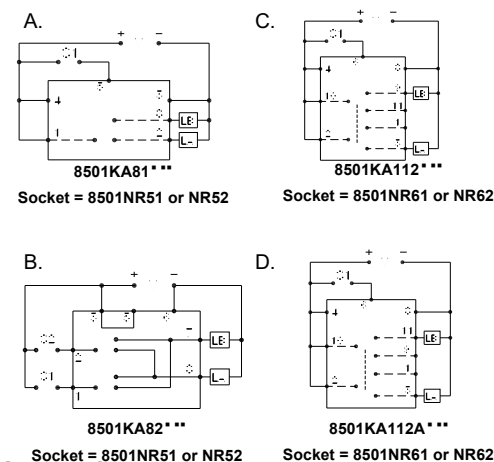

**Table 23.44: Contact Ratings**

Type	AC				DC	
	AC Volts	Resistive Amperes	HP	Pilot Duty	DC Volts	Resistive Amperes
8501KA81***	120	12	1/3	—	30	12
	240	12	1/2	B300		

**Table 23.45: Alternating Functions**

Diagram	Toggle Switch Position	Detail	S1 = Control Switch 1	S2 = Control Switch 2	LA = Load 1	LB = Load 2	
A, C & D	Alternate	Closing S1 alternates the loads between LA and LB.					
	Lock 1	LA is ON and LB is OFF. S1 is not used in this mode.					
	Lock 2	LA is OFF and LB is ON. S1 is not used in this mode.					
B	Alternate	Closing S1 alternates the loads between LA and LB. S2 will only control LA.					
	Lock 1	S1 will control LA and S2 will control LB					
	Lock 2	S1 will control LB and S2 will control LA.					
ALL	The cross wired option allows extra system load capacity through simultaneous operation of both motors when needed (LA and LB energize simultaneously when both S1 and S2 are closed—relay contacts are not isolated)						
	Input voltage must be applied at all times for proper alternation. Use of a solid state control switch for S1 or S2 may not initiate alternation correctly. S1 or S2 voltage must be from the same supply as the unit’s input voltage (see wiring diagrams). Loss of input voltage resets the unit; LA becomes the lead load for the next operation.

**Square D™ Miniature Plug-in Relays**

8501R miniature plug-in relays have a 10 A resistive rating, the same as the Type K plug-in relays, but are much smaller. The compact size of these relays makes them ideal for downsizing equipment and applications where space is at a premium.

- SPDT through 4PDT
- AC or DC operated
- Horsepower rated
- Socket compatible
- Manual operator/ green LED pilot light options
- Silver tin oxide contacts

**Square D™ Miniature Plug-in Relays**

8501R relays are suited for use as logic elements and power switching output devices. The short stroke motion of the armature provides long mechanical life required for high speed operation of control systems. Different contact compositions allow these relays to be used in a variety of applications. Fine silver (gold flashed) and bifurcated crossbar (gold overlay silver) are suitable for high contact reliability and low level switching requirements. Silver tin oxide is best suited for inductive loads. Class I Division II sealed relays can be used in specified hazardous locations.

★ When used with the appropriate 8501 NR Socket.

For sockets and accessories, see page 23-14.

**Pilot Light Option**

An internal green pilot light is available in both AC and DC versions for positive indication of power to the coil.

**Manual Operation Option**

To speed circuit testing, a manual operator (test button) can be provided. The relay can be manually switched to simulate normal operation.

**NOTE:** All Type R relays with a manual operator must be used on circuits of the same polarity.

**Table 23.58: Contact Ratings (Contact material is Silver Tin Oxide)**

Square D™ Sockets

8501NR sockets are designed for use with plug-in Class 8501 Type K, KA, and R relays, and 9050JCK timers. The 8501NR45 screw terminal sockets have pressure wire clamps that accept 1 or 2 #16–22 wires. All other sockets have pressure clamps that will accept 1 or 2 #12–22 wires.

The recommended tightening torque for all terminals is 7-8 lb-in.

- All devices stocked in central warehouse
- DIN track mount or direct panel mount
- Tubular sockets available in easy-to-wire single tier or double tier versions
- RoHS compliant

TeSys™ D IEC Style Relays

These 600 volt relays are approved for use around the world. TeSys D relays are usually mounted on 35 mm DIN 3 track, but can also be mounted directly to a panel. The fixed contacts in these relays have a NEMA A600 and Q600 ratings, in addition to the standard IEC ratings, making them suitable for use in most any control circuit. Low consumption versions of this relay are available for use with low level DC signals from a computer or a PLC. Adder decks can be added to a basic five pole relay to make it up to an 11 pole relay. The serrated silver-nickel contacts with wiping action provide excellent reliability in 12 or 24 volt control circuits. Special auxiliary contacts are available for switching low power down to 5 volts at 10 mA. Timer and mechanical latch attachments are available.

■ Alternating relays CA2SKE available in these voltages only. No other voltages are available.

**Alternating Relays, CA2SKE**

Refer to Catalog 8501CT9701

These alternating relays are used to alternate the use of 2 motor circuits. When the coil is energized the first time, one contact closes and will open when the coil is de-energized. When the coil is energized again, the other contact will close and will open when the coil is de-energized. The contacts from these alternators are to be used in the control circuit of the starters that are controlling pump or compressor motors.

**Approvals:** UL File: E164353 CCN: NKCR; CSA File: LR43364 Class: 3211 03.

Control Relay

### AC Control Relays

- Straight-through wiring
- Plug-in contact cartridges for easy contact conversion and replacement
- Contact conversion without removing terminal screws or wires
- Self-lifting pressure wire connectors
- Replaceable coil

Table 23.98: AC Control Relays

Normally Open Convertible Instantaneous Contacts	Control Relay ▲

6	XMO60	457.00

■ Attachments not permitted on this relay.

### AC Timing Relays

- Easily convertible On Delay or Off Delay
- Two adjustable timing ranges
- Repeat accuracy well above ±10%
- Convertible 1 N.O. and 1 N.C. timed contacts
- Large knob for easy adjustment of time delay
- Off Delay mode times out even after loss of power.

Table 23.100: AC Timing Relays

### AC Latching Relays

- Mechanical latch holds all contacts switched even after removal of power from replaceable latching coil.
- Provides sequence memory in the event of power loss. Ideal for press control, process control and punch presses.
- Replaceable unlatch coil to switch contacts back to original state.

**DC Control Relays**

Type XDO40 Control Relay

- Replaceable, highly reliable pure DC power plant: no economizing resistors, overlapping contacts or dual-wound coil.
- Utilizes the same Type XB adder decks and attachments as the AC version.
- Offers all the features of the AC relay.
- Available in up to 8 poles.
- All contact poles are usable since no overlapping contacts are needed.

**Table 23.108: DC Control Relays**

Note: Do not use any 8501 Type XC4 Master Cartridges on any DC-operated device.

**DC Latching Relays**

Type XDO40XDL Latching Relay

- Mechanical latch holds all contacts switched even after removal of power from replaceable latching coil.
- Provides sequence memory in the event of power loss.
- Ideal for sequencing applications such as press control, process control and punch presses.
- Replaceable unlatch coil to switch contacts back to original state.

**Table 23.112: DC Latching Relays**

Normally Open Convertible Instantaneous Contacts	Latching Relay	
	Type	\$ Price

	in.	mm	
2-4	7.76	197	3.9
6-8	8.98	228	4.2

**DC Utility Relays**

Type XUDO40 Utility Relay

Ideal for utility plant applications where reliable performance and a pure DC power plant is required. In addition to the Type XDO relay features, the Type XUDO provides:

- Up to 12 poles N.O. or N.C.
- Nominal 125 Vdc coil, capable of handling 140 Vdc continuously and picking up at 105 Vdc after having been operated at 140 Vdc continuously. Other voltages with comparable operating characteristics are available.
- Enclosed device capable of operating in 145°F ambient.

**Table 23.114: DC Utility Relays**

• Voltage Code			

For Replacement coils, see page 23-24  
For UL and CSA approvals, see page 23-22

Table 23.118: Type X™ Relays

	Description	Type	\$ Price
	<b>Mechanical Latch Attachment</b> —Mounts on any 2 through 8-pole relay (except XMO master relay). The Type XL and XDL latch attachments are identical in size and mounting provisions. The Type XLAC latch attachment has a continuous-duty-rated coil which is replaceable. <b>The Type XDLDC latch attachment has an intermittent-rated coil (replaceable) and should be connected through a N.O. contact of the basic relay if the input signal is maintained to the unlatch coil.</b> AC Latch Attachment DC Latch Attachment	XL▲ XDL▲	169.00 222.00
	<b>Pneumatic Timer Attachment</b> —Mounts only on any 0 through 4-pole AC or DC relays (except XMO master relay). It provides 1 N.O. and 1 N.C. convertible timed contacts, which are the same Type XC1 cartridges used on the basic relay. Two timing ranges are available, and conversion from On Delay to Off Delay or vice versa is easy. <b>Off Delay</b> 0.2–60 seconds 5–180 seconds <b>On Delay</b> 0.2–60 seconds 5–180 seconds	XTD1 XTD2 XTE1 XTE2	336.00 336.00 336.00 336.00
	<b>Timer Lockout Cover</b> —Fits over the time delay adjustment knob of any Type XT timing attachment. The Lockout Cover is designed to protect the time setting against accidental adjustment. It mounts directly to the timing attachment with two included screws.	XJ1	9.00
	<b>Adder Decks</b> —Adder decks are used to expand the number of poles on a relay. The basic 4-pole relay can be easily converted to an 8-pole or 12-pole relay by installing one or two adder decks. The Class 8501 Type XB20 comes with 2 convertible contact cartridges and will accept 2 additional convertible contact cartridges. The Class 8501 Type XB40 comes with 4 convertible contact cartridges. The same Type XB adder deck is used for both the middle and upper decks of the AC or DC relay.  With 2 N.O. contact cartridges With 4 N.O. contact cartridges	XB20 XB40	48.00 98.00
	<b>Contact Cartridges</b> —The Type X relay offers 4 Types of contact cartridges. All are color-coded for visual identification of each Type. <b>Standard Cartridge</b> —The standard cartridge, used for most applications, has a black case. <b>Overlapping Cartridge</b> —Same NEMA Type A600 AC rating as standard cartridge and a NEMA Type P150 DC rating. When it is used in the N.O. mode it will close early and when used in the N.C. mode it will open late. If two or more are used together, the N.O. contacts will close before the N.C. contacts open as the relay picks up. Overlap also occurs during dropout. Overlapping cartridge has a red case. <b>May be ordered factory installed:</b> • Substitute 1 N.O. and 1 N.C. overlapping cartridges for 2 standard cartridges. • Substitute 2 N.O. and 2 N.C. overlapping cartridges for 4 standard cartridges. • Substitute 3 N.O. and 3 N.C. overlapping cartridges for 6 standard cartridges. • Substitute 4 N.O. and 4 N.C. overlapping cartridges for 8 standard cartridges. <b>Master Cartridge</b> —Features the same contact ratings as the Type XC1 standard cartridge except it has a 20 ampere continuous current rating instead of 10 amperes. It can be used in circuits where a master relay is required. Master cartridge has a blue case. <b>Maximum of 6 master cartridges may be used on any 7 and 8-pole AC relays. Do not use any master cartridges on 9-12-pole AC or any DC-operated devices. Note: If master cartridges are added to a standard relay, attachments (latch mechanism, timers, etc.) cannot be used.</b> <b>Logic Reed Cartridge</b> —See logic reed adder deck above.	XC1 XC2 Form Y1591 Y1592 Y1593 Y1594 XC4	24.20 24.20 Add 24.20 Add 24.20 Add 24.20 Add 24.20 60.00
	<b>Mounting Track</b> —The mounting track has pre-punched mounting holes to simplify mounting the track on the control panel. The relay mounting screws are factory installed on the track so that the relays can be hung prior to tightening the screws. 9 in. long for 4 relays 18 in. long for 8 relays 27 in. long for 12 relays 36 in. long for 16 relays	XM4 XM8 XM12 XM16	19.70 29.80 36.40 42.90
	<b>Manual Test Tool</b> —Provides a means of manually switching the contacts of a basic relay or timing relay and holding all contacts in their switched state until the tool is removed. This simplifies the checking of control circuits without power on the coil or contacts.	XA1	6.10
	<b>Transient Suppressor</b> —Consists of an R-C circuit designed to suppress coil generated transients to approximately 200 percent of peak voltage. It is particularly useful when switching the Type X relay near solid state equipment. It is designed for use on coils up to 120 Vac.	XS1	48.00
	<b>NEMA 1 Enclosure</b> —Formed from sheet steel to provide strength and rigidity. Two conduit knockouts are located in both the top and bottom of the enclosure. The enclosure is furnished with self tapping screws for mounting the relay inside the enclosure. Accommodates a single 4 or 8-pole AC or DC relay, 12-pole AC relay, 4-pole AC latching relay, and 4-pole AC timing relay. Note: The 4-pole DC latching relay, 4-pole DC timing relay, 8-pole AC and DC latching relays and 12-pole utility auxiliary relay will not fit.	Class 9991 Type UE7	29.60

**Schneider Electric Solid State Relays**

Solid state relays do not have any moving parts to wear out. Combined with vibration resistance, arc-less switching and the lack of acoustical noise, you have the ideal product for switching applications that demand reliable execution. For added reliability the Zelio™ SSRP and SSRD solid state relays utilize Direct Copper Bonding (DCB) technology to decrease internal temperatures and improve the overall quality of the product.

Key features include:

- Input voltage range 3 to 32 Vdc, 90 to 280 Vac
- Breaking capacities up to 125 A
- Zero voltage turn on, low EMI / RFI
- No moving parts
- Shock and Vibration resistant
- No acoustical noise
- Fast response
- Arc-less switching
- Long life (>10<sup>9</sup> operations)

### Square D™ General Purpose Plug-In

9050JCK46V20

9050JCK timing relays are designed to provide low-cost timing in a plug-in housing. The Types JCK11 thru 59 provide ±1% repeat accuracy. The Types JCK60 and 70 offer ±0.1% repeat accuracy. These timers are directly interchangeable with many other 8 and 11 pin tube base timers.

- Up to ±0.1% repeat accuracy
- Timing from 0.05 seconds to 999 hours
- Available in 5 timing modes
- DPDT contacts (2 N.O. and 2 N.C.)
- 10 A contact rating
- Transient protected
- Hold down spring available
- Variable or fixed time delay
- Horsepower rated
- RoHS compliant

**Zelio™ Temperature Controllers**

The new Zelio REG temperature controllers offer seamless interfacing with solid state relays, electromechanical relays, PLCs, variable speed drives and HMI displays make them a key component to controlling the temperature in your process.

Offer includes 3 versions:

- A 24x48 mm (1/32 DIN) cost effective solution for basic temperature control needs.
- A 48x48 mm (1/16 DIN) balanced version for optimal price and functionality.
- A 96x48 mm (1/8 DIN) full-featured version for complete performance and function.

Key features include:

- Modbus communication for easy data exchange with other automation products
- Simple parameter settings
- IP66 certification enables dust resistance
- Flash memory (saves configurations)
- Compatible with a wide range of sensors
- Advanced Functions (standard): PID, fuzzy logic, auto-tuning, soft start
- Optimized programming
  - Common software for all products in the temperature relay range (freely downloadable from www.schneider-electric.us).
  - A single cable enables connection to both a computer and PLCs.
  - Simple adjustment of parameters.
  - Saving of configurations.

### Zelio™ Current Measurement Relays

Zelio Current Measurement Relays are designed to measure under and overcurrent, without external sensors. Current measurement relays enable continuous monitoring of the operation of electrical and mechanical loads such as motors and resistors. They are DIN rail mountable and the control status is indicated by an LED.

#### RM17JC Current Control Relay

- Monitors a.c. currents
- Designed to monitor overcurrent
- Equipped with an integrated current transformer

#### RM35JA Current Control Relays

- Selection between overcurrent or undercurrent
- Automatic d.c. or a.c. recognition
- Selectable memory function

**Zelio™ Level Control Relays and Zelio™ Pump Control Relays**

Zelio level control relays control one or two levels with fill or empty function. The settings are protected by a sealable cover, control status is indicated by an LED, and they are DIN rail mountable. RM35LM is designed to control levels of conductive liquid, and RM35LV is designed to control levels of other materials.

**Application examples for RM35LM:**

- Detecting pump seal failures
- Spring, town, industrial and sea water
- Metallic salt, acid or base solutions
- Liquid fertilizers
- Non-concentrated alcohol (<40%)

- Liquids in the food-processing industry: milk, beer, coffee, etc.

**Application examples for RM35LV:**

- Chemically pure water
- Fuels, liquid gasses (inflammable)
- Oil, concentrated alcohol (>40%)
- Ethylene, glycol, paraffin, varnish and paints

**Pump control relay RM35BA10** can operate on a single-phase or 3-phase supply. It incorporates three functions in a signal unit:

- Over and under current measurement
- Phase presence control
- Single or three phase

It has two operating modes which are designed to control a pump via two external signal inputs (Y1 Y2). These two signals are controlled by volt-free contacts. Control inputs Y1 and Y2 can be connected to:

- Level sensor
- Level relay
- Pressure sensor
- Push button

**Table 23.167: Pump Control Relay**

**Phaseo™ DC Power Supply**

Phaseo switch mode power supplies are totally electronic and their output voltage is regulated. They offer:

- Compact size
- High degree of output voltage stability

For use with Universal power supplies, see optional function modules in catalog 8440CT0601/08, which offer a set of solutions to meet the needs for continuity of service such as:

- Immunity to microbreaks
- Voltage holding during power outages
- Voltage holding during power supply equipment failure

ABL8MEM12020

**Table 23.171: Modular, Single Phase**

Meets all the needs of simple automation systems with power ratings from 7 to 60 W and an output voltage of 5 Vdc, 12 Vdc, or 24 Vdc.

ABL8WPS24200

**Table 23.174: Universal, Three Phase**

This three-phase, 480 to 960 W, 24 Vdc output offering is particularly suited for complex machines and processes. Energy reserve, diagnostics and choice of manual or auto reset are integrated into these units.

Input Voltage (Vac)	Output Voltage (Vdc)	Nominal Current (I)	Auto-Protection Reset	Catalog Number	\$ Price

**Zelio™ Analog Interface Modules**

The Zelio Analog range of converters is designed to convert signals emitted by sensors or electrical measurement devices, into standard electrical signals that are compatible with automation platforms and controllers. They also allow the connection distance between a sensor and a measurement device to be increased, for example, between a thermocouple and a programmable controller

### Zelio™ Logic 2 Smart Relays

Zelio Logic 2 smart relays meet the demands of applications that require more flexibility than a simple relay, timer, or counter, but are too small or simple for the smallest Nano PLC. The Zelio Logic SR2 range is an exact replacement for the obsolete SR1 range, but with an expanded feature set. Designed to accept control outputs just like a relay, Zelio Logic 2 features dual language capability, using either Function Block Diagramming (FBD) or Ladder Logic Programming (LL), and can be programmed easily by using either the front panel or by using ZelioSoft software.

- ▲ Orders must specify the standard package quantity (Std. Pack) or multiples of that quantity.
- These maximum current values assume the use of insulated copper conductors with 75°C temperature rating and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of the wire which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the size, insulation class, and other characteristics of the wire used. The UL ratings are shown. The CSA rating may be higher or lower. Refer to the catalog for CSA ratings.
- ◆ One end-barrier is required for each assembly of like blocks.

▲ Orders must specify the standard package quantity (Std. Pack) or multiples of that quantity.

■ These maximum current values assume the use of insulated copper conductors with 75°C temperature rating and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of the wire which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the size, insulation class, and other characteristics of the wire used. The UL ratings are shown. The CSA rating may be higher or lower. Refer to the catalog for CSA ratings.

♦ One end-barrier is required for each assembly of like blocks.

These measuring transducer terminal blocks with screw connection technology are characterized by easy operation and clarity. All switching statuses are clearly visible. Due to the extensive range of flexible accessories, costs and time are saved when executing transducer test circuit tasks.

▲ Orders must specify the standard package quantity (Std. Pack) or multiples of that quantity.  
■ Can only be used at the end of a group of terminals.

RoHS Compliant

**Standard Terminal Block Assemblies**

The assemblies listed in the table below consist of 6 ft (two 3 ft lengths packaged together) of terminal blocks. The terminal blocks are mounted on snap-off mounting track, which can be easily broken every 5/16 in. Every tenth terminal block is marked to aid in counting off the proper number of terminal blocks. After adding the proper end barrier and a slip-in end clamp to the blocks that were broken off, the custom assembly is ready for installation.

**Table 24.32: Standard Terminal Block Assemblies**

Description	Type	\$ Price
Assembly of 188 Type GA6	GA6188BC	530.00
Assembly of 204 Type GR6	GR6204BC	674.00
Assembly of 94 Type GF6	GF694BC	1311.00
Assembly of 296 Type GM6	GM6296BC	830.00
Assembly of 188 Type GP6	GP6188BC	653.00

**Custom Terminal Block Assemblies**

Order an assembly built as required for the application. As standard, custom assemblies use 9080GH mounting track with screw on end clamps. Other options are available from the table below.

**One terminal block type:** The number of blocks in the assembly is added to the end of the catalog number of the desired block. Example: an assembly of 25 9080GR6 blocks would be **9080GR625**.

**More than one terminal block type in an assembly:** A detailed drawing or sketch of the desired assembly must accompany the order.

**Table 24.34: Custom Terminal Block Assemblies**

Option	Suffix	Example
Substitute slip-in end clamps	<b>C</b>	9080GR625C
Substitute snap-off channel	<b>B</b>	9080GR625BC ▲
For direct mount assembly of 9080GK6 blocks	<b>D</b>	9080GK67D
Add a blank vinyl marking strip	<b>M</b>	9080GR625M
Add pre-marked (1–25 only) marking strip	<b>MPO</b>	9080GR625MPO
Mount on 35 mm DIN 3 track instead of 9080GH track	<b>T</b>	9080GR625T

▲ The 9080GH10 screw-on end clamp is **not** recommended for use with snap-off channel. It is recommended that the 9080GH11 slip-in end clamp be used. Therefore, when the suffix **B** is used, it should be followed by the suffix **C**.

**Table 24.33: Custom Assembly Pricing**

Block Type	\$ Price Per Block/Terminal	Block Type	\$ Price Per Block/Terminal

- ▲ These maximum current values assume the use of insulated copper conductors with 75°C temperature rating, and are calculated based on NEC Article 310, Table 310-16. In most cases this value is the maximum ampacity of that wire or combination of wires (as listed in the above table) which has the greatest current carrying capacity. The actual allowable current for a particular application depends on the number, size, insulation class, and other characteristics of the wires used.
- Discount schedule CP5.

**Selection**

To properly select a Class 9080 Type GCB circuit protector, follow these steps:

1. Determine the inrush correction factor from Table 24.41.
2. Determine the temperature correction factor from Table 24.42.
3. Determine the sealed current of the load that is being protected.
4. Multiply the sealed current by the two correction factors and choose the closest circuit protector.

Note: Choosing a circuit protector with a value lower than the calculated value might cause nuisance tripping, while choosing the larger might provide a protector that will not properly protect the load.

File CCN E152841 QVNU2 (UL1077)

File Class 025490 3211 07

**Example:** Solenoid with sealed current of 0.75 A, an inrush ratio of 1:6, and in an ambient temperature of 85°F:  $0.75 \times 1.5 \times 1.05 = 1.18$  Choose the 1.2 A protector

**Tripping Time:** Tripping time of the circuit protector is determined from Table 24.43. Divide the circuit protector value by the temperature correction factor from Table 24.42 to determine actual rated current referenced in Table 24.43.

**Table 24.41: Table A—Inrush Ratio Correction Table**

Note: For resistive loads, use inrush correction factor of 1.0.

Inrush Ratio	1:1 to 1:4	1:5	1:6	1:7	1:8
Factor	1.3	1.4	1.5	1.6	1.7

**Table 24.42: Table B—Ambient Temperature Correction Table**

Ambient Temperature	70°F	100°F	120°F	140°F	160°F	180°F	200°F
	(21.1°C)	(37.8°C)	(48.9°C)	(60°C)	(71.1°C)	(82.2°C)	(93.3°C)
Factor	1.0	1.1	1.2	1.3	1.4	1.5	1.6

**Table 24.43: Table C—Tripping Times in Seconds at 70°F (21.1°C)**

Percent rated current	100%	200%	300%	400%	500%	600%	1000%	2000% and greater
Tripping Time (s)	no trip	10–40	38	1.5–9	0.8–6	0.003–4	0.003–2	Max. 0.02

Note: When several protectors are channel mounted adjacent to each other, the "no trip" current will be 80% of rated current at 70°F.

- \* These covers must be ordered in multiples of 5. Each cover comes with two self-tapping screws.
- ▼ Will not work on a 9080LBA362106 block.

Application Data

Voltage Rating—Class B & C—600 V  
Blocks are rated based on NEC Table 310-16 using 75°C wire.  
Aluminum blocks are tin plated high conductive aluminum.  
Copper blocks are tin plated high conductive copper.

Housing material:

- Miniature Blocks are made from high impact thermoplastic rated at 125°C. max. & -40°C. min.
- Full Size Blocks are made from general purpose phenolic rated at 150°C. max. & -40°C. min.

All blocks have a flammability rating of UL 94V-0.

Most blocks have a short circuit current rating for UL508A up to 200 kA for branch circuit applications. For the actual ratings, see catalog 9080CT9603R9/08.

	3	FB3611M	24.30	FB3611CC	24.80	

**Application Information:**

**Base material:**

- $\blacktriangle$  Base is high impact thermoplastic—maximum operating temperature 125°C
- $\blacksquare$  Base is general purpose phenolic—maximum operating temperature 150°C
- $\blacklozenge$  Base is high impact polyester—maximum operating temperature 130°C

**Clip material:**

- All 30 and 60 A fuse clips are copper alloy tin plated.
- All 100 and 200 A fuse clips are one piece aluminum with copper spring tin plated.
- All Class H, R and J fuses are standard with reinforced fuse clips.

**Lug termination:**

- All 30 A blocks have pressure wire connectors.
- All 60, 100 and 200 A blocks have box lug connectors.

**Approvals:**

- The Type M fuseholders are UL component recognized (File E40747 CCN IZLT2).
- The Type H, R, J and CC are UL Listed (File E40747 CCN IZLT).
- All fuseholders are CSA certified (File 70360 Class 6225-01).

Flammability rating of all FB fuse blocks is UL 94V-0.

AT1PA2

AT1PA4

AT1PA7

AT1HB2

The TELEFAST 2 system is a set of products for the rapid connection of I/O modules (24 Vdc discrete, analog and counters) to Various control circuit components. These components act as a substitute for screw terminal blocks, remotely locating and partly eliminating the single wire connections. The system connects only to channels with HE10 and SUB-D connectors, or to standard terminal blocks with a cabled connector.

Variations within the listing of modules include those with and without relays (electromechanical and solid state), analog and counter modules, and special function modules. Pre-wired cables available allow you to connect directly to:

- Schneider Electric (Modicon™ family)
  - TSX Premium™
  - TSX Micro
  - TSX Series 7
  - Twido
  - Quantum™
  - Compact
  - April S5000/7000
  - NUM1020/1060
- Siemens
  - S7 – 200/300/400
  - S5 – 95U to 155U
- Allen-Bradley
  - SLC500

**Advantys TELEFAST 2 Product Features**

In addition, other accessories include:

- I/O simulators
- Continuity blocks
- Label marking software
- Splitter bases (16, 23, and 32 channels)
- Mounting kits
- Detachable terminal strips
- Wiring pass-through connectors
- Fuses

**NOTE:** Not all features available on all modules.

**XPS Safety Relay** (p. 25-4)

**XPSMC Safety Controller** (p. 25-4)

**XPSMF Safety PLC** (p. 25-5)

**AS-Interface Safety at Work** (p. 25-5)

**XUSL Light Curtain** (p. 25-6)

**XCSDM Non-Contact Safety Interlock Switches**(p. 25-7)

**XY2 Cable Pull Switches** (p. 25-8)

**Safety Relays**

XPS safety relays for controlling individual safety functions of the system. **25-4**

**Safety Controller**

XPSMC safety controllers for use where multiple safety relays and multiple safety functions are required, or where there is a greater interaction between the various safety functions required on the machine. **25-4**

**Safety PLC**

XPSMF Safety PLC for use in safety systems where multiple functions are required, or where the interaction between the various components of the safety system is more complicated. **25-5**

**AS-Interface Safety at Work**

AS-Interface for use where multiple safety functions and their interaction need to be monitored. All safety information is transmitted using a safety communication bus. **25-5**

**Light Curtains**

XUSL light curtains for use in point of operation guarding and perimeter guarding. Available in 14 mm (finger) or 30 mm (hand) minimum object sensitivity (MOS) as well as perimeter or body detection, all with a wide range of protected heights. **25-6**

**Safety Interlock Switches**

XCS safety interlock switches for mechanical interlocking of gates and guards. Locking and non-locking versions are available. **25-7**

**Non-Contact Safety Interlock Switches**

XCSDM non-contact safety interlock switches for interlocking of gates and guards, where no contact is desired between switch and actuator. **25-7**

**Safety Limit Switches**

XCS safety limit switches for a wide variety of safety related functions, including end of travel notification, over-travel indication, safety related positioning of machinery/tooling or component parts, as well as gates and guards. **25-8**

**Cable Pull Switches**

XY2 cable pull switches for Emergency Stop control around conveyors, assembly lines, and large machines. **25-8**

**Palm Operators**

9001 Type P palm operators for applications such as power operated presses, and two hand control applications. **See catalog MKTED208051EN-US**

Safety-related systems are comprised of many components, and no single safety component will ensure the safety of the system. The design of the complete safety-related system and level of safety desired must be considered before choosing products. The whole safety-related system needs to be integrated as part of the initial design, not added on after the machine is built. Schneider Electric can provide a wide range of products for the protection of personnel for machine guarding applications and safety-related system architectures.

#### Safety PLCs—XPSMF

Safety PLCs are used where the safety-related solution is complicated, or where there are a greater number of safety inputs or outputs required. They are also used where safety inputs and outputs need to be distributed around the machine or production area.

#### Safety Controllers—XPSMC

Safety controllers are used in applications where multiple safety relays would be required to control the safety-related system, or where the interaction between the individual safety relays would require significant inter-wiring. The simple-to-use software allows the user to easily develop the safety-related control system, providing a cost effective solution.

#### Safety Relays—XPS

To tie the whole safety system together, XPS safety relays are used to monitor the safety inputs, outputs, and feedback from the system to determine when the system is safe to start and when the system should be shut down.

#### AS-Interface Safety at Work—AS-i

AS-Interface provides the safety solution of multiple safety relays on a communication bus that can transmit both standard and safety relevant data. The safety solution is simply configured with the easy to use configuration software.

#### Light Curtains—XUSL

Some machine operations may not allow gates or guards to be used, and other applications require high visibility of the process or easy accessibility. For these applications, XUSL light curtains may be the best choice and are available in many protected heights, minimum object sensitivities, and configurations.

#### Safety Interlock Switches—XCS

To protect operators, maintenance, and other personnel, safety systems may require the interlocking of mechanical gates or guards. We provide both locking and non-locking mechanical XCS safety interlock switches in many body styles and contact arrangements.

#### Non-Contact Safety Interlock Switches—XCSDM

Sometimes no contact between the safety interlock switch and its actuating key is desired, such as in food and

beverage applications, so we provide several different types of XCSDM non-contact safety interlock switches.

#### Safety Limit Switches—XCS

In some applications, the position of components is important to the safety of the machine, and devices such as safety interlocks or light curtains are impractical. These applications are ideal for safety limit switches. They can also be used on gates and guards to verify a closed position or a fully open or overtravel position.

#### Cable Pull Switches—XY2

In most applications, emergency stopping is required to shut the machine down in case an emergency or problem arises. Where an individual emergency stop is required, the XB4/XB5 emergency stop push buttons are available in various types, sizes, and nameplates. On large machines or conveyors a high number of emergency stop operators may need to be installed. As more individual e-stop buttons are required, using an XY2 cable pull switch becomes a more economical solution based on ease of use, installation time, and cost effectiveness.

#### Palm Buttons—9001 P

Press applications demand two hand control units for operator protection that are large and easy to operate while wearing gloves. Other press applications, such as stop and inch, also need large buttons for operators wearing gloves. The 9001 P palm buttons offer a variety of operators to meet these needs.

#### Other products for use in safety systems

We offer many other products that are suitable for use in safety-related circuits, such as:

- XB4/XB5 emergency stop push buttons—See **Section 19**
- XV indicating banks—See **Section 19**
- TeSys contactors and relays—See **Section 18**
- Limit switches with positive/direct opening N.C. contacts—See **Section 21**

All of the machine safety products discussed in this section are designed to work together to allow you to meet your various safety requirements. When properly applied, these products will allow you to meet SIL 3 per IEC 61508, Category 4 per EN 954-1 and ISO 13849-1, and performance level “e” per ISO 13849-1, and help you meet domestic and international safety requirements, standards, and codes.

The next few pages give an overview of our wide offering of machine safety products. Catalog **MKTED208051EN-US** gives a detailed description of our offering, including safety PLCs, safety controllers, safety relays, AS-Interface, safety interlocks, light curtains, safety interlocks, non contact safety interlocks, cable pull switches, and palm buttons. This catalog also provides additional information on domestic and international safety standards and codes, and much more information to help you develop safety

XPS Safety Relays

Many different architectures for safety related solutions are available in Schneider Electric's product offering, from safety relays to safety PLCs. The architecture can determine what SIL level or performance level can be achieved with the safety related solution. Various architectures may have inherent benefits such as simple selection or increased levels of diagnostics, but their cost effectiveness can depend on the size and complexity of the safety related system and the features and functions required. Some of the features and benefits of these various architectures are:

**XPS Safety Relays**

- Local diagnostics (LEDs)
- Remote diagnostics (solid-state outputs)
- Plug-in connectors simplify maintenance
- Select only the safety functions needed
- Simple installation
- Simple replacement
- Proven electromechanical reliability
- No software to learn or use

XPSMC Safety Controller

**XPSMC Safety Controllers**

- Simplicity and flexibility
  - 16 or 32 inputs and 10 safety outputs
  - A wide library of predefined and certified safety functions
  - User-friendly software configuration
  - Reduced wiring
  - Only one product to install and implement
- Local and remote diagnostics via serial link to PC or PLC
  - Reduced implementation time and downtime
  - Reduced troubleshooting time

XPSMF Safety PLC

**XPSMF Safety PLCs**

- Increased productivity because of:
  - Reduced machine down time
  - Reduced overall engineering costs incurred during installation and maintenance
  - Reduced system complexity by having a single network solution instead of many
- XPS-MF will simplify the entire system by:
  - Saving space
  - Reducing wiring
  - Increasing overall system flexibility by use of programming and device placement (network capability)
  - Providing complex diagnostics (network capability)
  - Saving time and money due to reduced maintenance
- SafeEthernet protocol

AS-Interface

**AS-Interface Safety at Work**

- Enables safety related solutions to be integrated into the distributed architecture
- Reduces wiring requirements and speeds implementation
- Allows quick and flexible connection of safety interfaces via vampire connector
- Provides simple software configuration
  - Drag and Drop
  - On-line diagnostics
- Provides diagnostics without additional wiring
- Lowers costs from design to operation

All of our machine safety products—such as safety interlocks, light curtains, and cable pull switches—can be used with any of the safety devices listed above. The final safety related control system could meet the safety levels indicated in Table 25.1, depending upon how the circuit is designed.

**Table 25.1: Maximum Levels of the Architectures for Safety Related Solutions**

	Category 4 per EN 954-1 and Performance Level "e" per ISO 13849-1	SIL 3 Per IEC 61508
XPS Safety Relays	Yes	No
XPSMC Safety Controllers	Yes	Yes
XPSMF Safety PLCs	Yes	Yes
AS-Interface Safety at Work	Yes	Yes

## XPS Safety Relays

XPS Safety Relay

XPS safety relays monitor various safety inputs, start sequences, and feedback from starters and relays to allow machinery operation only when all safety controls are in their appropriate state and are functioning properly. Inputs can be from emergency stop push buttons, cable pull switches, limit switches, light curtains, safety interlock switches, or two hand control stations.

XPS safety relays give users increased functionality and flexibility when designing equipment to meet safety requirements and standards in the U.S., for the European Safety Directive, IEC safety requirements and meet Category 4 of EN 954-1 and EN/ISO 13849-1. Most devices can be configured for single or dual channel inputs, and for either monitored start, non-monitored start, or automatic start. Removable wiring terminals or non-removable wiring terminals are available on most module types.

The XPS product family complements our broad safety product offering with modules for many specific safety functions and applications, as well as devices for use in general types of applications. There are even devices whose safety functions can be configured at the time of installation.

### Preventa XPS Includes the Following Types of Safety Relay Modules:

- Specific purpose modules such as limit switch monitoring, zero speed, timing, two-hand control, press control, and others
- Multifunctional configurable devices with multiple sets of inputs whose functions can be configured from 15 pre-defined functions, allowing greater flexibility and functionality
- Broad range of devices for emergency stop applications
- Expansion modules to increase the number of safety outputs
- Many devices compatible with light curtains

### Features and Benefits

- LEDs are provided to indicate power, input, output, and feedback loop status.
- Solid state outputs provide compatibility with system controllers for diagnostics, troubleshooting, and correct system operation.
- Most devices are available with either removable or non-removable terminals.
- Most devices are available with a monitored start function to detect welded contacts or incorrect status in the start function and also to detect tampering with the start circuit.
- Dual voltage devices are available for use with either 120 V or 24 V power to reduce your inventory and increase flexibility.

## XPSMC Safety Controllers

XPSMC Safety Controller

The XPSMC safety controllers can be used for monitoring all of the different safety tasks for your applications in one safety controller. All of the functions of the various safety relays are built into the hardware and software. The XPSMC safety controllers meet SIL 3 per IEC 61508, Category 4 per EN 954-1 and ISO 13849-1, and performance level “e” per ISO 13849-1. The associated configuration software makes development of the safety solution simple, using drag and drop techniques to configure the safety system. Detailed diagnostics provide an in depth overview of the status of the inputs and outputs.

### Features and Benefits

- Safety inputs
  - 16 or 32 safety inputs
- Safety outputs
  - Six safety semiconductor outputs
  - Two safety relay outputs, with two relay contacts each (for a total of four relay outputs)
  - One output for muting indicators
- Control outputs
  - Eight control outputs are used to supply the safety inputs in order to detect incorrect wiring or short circuits in the wiring.

### Configuration Software

- The wide device library of certified safety related functions simplifies the development of safety applications.
- Using the simple to use XPSMCWIN software, the configuration can be developed without special training.

### Diagnostics with PC and Software

- Using the diagnostics mode, the XPSMCWIN software provides an exhaustive overview about the status of the safety functions.
- The status of the inputs, the safety devices and the outputs are indicated by various colored indicators.

### Diagnostics with LEDs in the Front Cover

- 6 LEDs indicate the status of the controller.
- 8 LEDs indicate the status of the safety outputs.
- 16 or 32 LEDs indicate the status of the safety inputs.
- Input/output errors are indicated by blinking of the corresponding LED.

**XPSMF Safety PLCs**

XPSMF PLC

The XPSMF Safety PLCs are programmable logic controllers that can be interfaced with the machine control system to meet US, EN, and IEC safety requirements. All XPSMF Safety PLCs meet the requirements of SIL 3 per IEC 61508, Category 4 per EN 954-1 and ISO 13849-1, and performance level “e” per ISO 13849-1. The XPSMF can perform all of the various safety functions required in today’s machinery. These functions can be programmed by using one or more pre-defined and certified function blocks (CFB) or by creating your own configuration and function blocks.

**Features and Benefits**

- Increased productivity because of:
  - Reduced machine down time
  - Reduced overall engineering costs incurred during installation and maintenance
  - Reduced system complexity by having a single network solution instead of many
- Saving space, reducing complexity
  - Reducing wiring
  - Increasing overall system flexibility by use of programming and device placement (network capability)
  - Providing complex diagnostics (network capability)
  - Saving time and money due to reduced engineering and maintenance

**Hardware**

- Certified to SIL 3 per IEC 61508, Category 4 per EN 954-1 and ISO 13849-1, and performance level “e” per ISO 13849 -1, UL/CSA
- Each Safety PLC contains two processors (redundancy)
- SafeEthernet protocol
- Standard bus communication using Ethernet
- 2 or 4 RJ45 connection points (depending on version)
- Connect hardware in any orientation
- LED diagnostics on PLC housing
- Removable terminals
- Compact range contain DIN rail attachment simplifying installation

**AS-Interface Safety at Work**

ASISAFEMON1B Monitor

AS-Interface, the recognized cabling system for sensors and actuators, has been enhanced. Standard process information and information relating to safety can now be transmitted over the same yellow cable. Certified to SIL 3 per IEC 61508, Category 4 per EN 954-1 and ISO 13849-1, and performance level “e” per ISO 13849-1, the AS-Interface “Safety at work” system meets the needs of the most common safety applications, such as:

- Monitoring of emergency stops with instantaneous break contacts (stop category 0)
- Monitoring of emergency stops with delayed break contacts (stop category 1)
- Monitoring of safety interlocks and limit switches with and without interlocking
- Monitoring of light curtains

**Features and Benefits**

- Simplicity
  - Just add the required safety devices to the standard AS-Interface network.
- Integration
  - Standard data and safety relevant data is transmitted over the same communication bus—no need for a separate safety network.
- Flexibility
  - Monitor multiple devices and control multiple safety sectors.
- Diagnose
  - From one screen, see the status of the safety interfaces and the system.
- Safety
  - Category 4 per EN 954-1 and ISO 13849-1
  - Performance level “e” per EN/ISO 13849-1
  - SIL 3 per IEC 61508
- Multifunctional
  - Monitor up to 31 safety interfaces.
  - Available with 1 or 2 independent output groups.
- Segmentation of safety sectors
  - Multiple safety monitors can be connected to the same AS-Interface network.
  - Monitors can be configured to monitor different groups of safety interfaces.
- 45 mm wide housing

**ASISWIN2 Configuration Software**

- Drag and drop methodology
- Predefined, certified safety functions for user selection
- On-line diagnostics of AS-Interface Safety System
- Password protection

XUSL Type 4 light curtains provide point of operation protection for large areas without the need for gates or guards. They allow excellent visibility of the machine or process and free access to the machine while providing protection for personnel. Light curtains are made up of an array of infrared light beams to form a protected area. Whenever one or more of the light beams is broken, the light curtain sends a stop signal to the machine safety control circuit.

XUSLB and XUSLD light curtains for point of operation safeguarding are available in either single or multiple segment configurations. Choose the one that best meets your application requirements. These versions are available in either 14 mm or 30 mm minimum object sensitivity (MOS). Fixed and floating blanking is standard on the XUSLD.

XPSLP perimeter guard light curtains detect the presence of a body as it enters a protected area. They are available in single or multiple beam systems.

### Features and Benefits of All XUSL Light Curtains

- Slim and rugged design results in an esthetically pleasing small mounting footprint suitable for aggressive environments.
- Broken Beam Indicators for EVERY beam on ALL devices (patented).
  - Makes alignment easier, reducing installation time and cost.
  - Identifies which beams are broken.
  - Identifies exact channel (fixed blanking) select beams.
  - Simplifies troubleshooting and re-adjustment, reducing downtime.

XUSLB and XUSLD  
Light Curtain

### XUSLB and XUSLD 2-Box Light Curtain

Two box light curtains are ideal for installations where it is desirable to mount and wire only two components, transmitter and receiver. These devices are self-contained and the receiver provides the safety outputs.

#### Features and Benefits

- 14 and 30 mm minimum object sensitivity (MOS)
- 14 mm MOS protection heights: 280 - 1360 mm (11.0 - 53.5 in.)
- 14 mm MOS sensing range: 7.0 m (22.9 ft.)
- 30 mm MOS protection heights: 320 - 2120 mm (12.6 - 83.5 in.)
- 30 mm MOS sensing range: 8 m or 20 m (26.2 or 65.6 ft.)
- 38 x 50 mm housing size (1.5 x 1.97 in.)
- 24 Vdc supply voltage
- Broken beam Indicators for EVERY beam on ALL devices
- Female connector cables sold separately (5 m, 10 m, 15 m, and 30 m)
- Configurable by hand held programming and diagnostic module (PDM)
- Cascadable devices available in the XUSLD versions - up to 4 segments

### XUSLP Perimeter Guard for Body Detection

Perimeter guarding light curtains are used around work cells and for guarding around the perimeter of machinery. They are also used in place of gates or doors. These two box systems simplify installation, since no inter-wiring is required between the emitter and receiver. Installation is further simplified with the passive receiver version, which only needs to have the emitter wired. No wiring is required for the receiver.

#### Features and Benefits

- 1 to 6 beams
- Sensing distance up to 70 m (230 ft.) depending upon configuration
- Height: 750 mm (29 in.) to 1800 mm (68 in.)
- Minimum object sensitivities: 300, 400, 500, or 600 mm (11.8, 15.75, 19.69, or 23.62 in.) and single beam
- Visible, red broken beam Indicators
- Short circuit protected
- IP67
- Display for diagnosis and working mode
- No need of shielded wire up to 120 m (394 ft.)
- Restart and start interlock
- External device monitoring /machine primary control element monitoring (EDM/MPCE)
- Machine test signal (MTS)
- 3 types of coding (A, B, C) by internal switches

XUSLP Light Curtain

XUSLP Light Curtain

**XCS Safety Interlock Switches  
For Gate or Guard Interlocking**

XCSA Safety Interlock Switch

XCSMP

XCS safety interlock switches verify that the doors, gates, or guards are closed before a process which could be harmful to personnel can start up. The hazards to personnel can be mechanical, electrical, hydraulic, pneumatic, chemical, or thermal. The various sizes and shapes of safety interlock switches are designed for a wide variety of applications. These mechanical devices have two components: a switch and an actuating key. When the gate or guard is closed, the actuating key attached to the gate or guard is inserted into the switch, closing the safety contacts, allowing the machine to be started. When the gate or guard is opened, the actuating key is removed from the switch, and the safety interlock switch contacts open.

XCS safety interlock switches are designed to meet demanding requirements in the US and Europe, as well as the rest of the world. The flexibility of the XCS line allows one XCS device to perform the same functions as several competitor's devices. This means that fewer XCS devices may be required to cover your needs.

Specifically designed for the protection of machine operators, maintenance and other personnel, the XCS switches can be used in a wide range of applications where a gate, door or guard is a part of the safety related system.

**Features and Benefits**

- Simple, rapid installation saves time and labor
- Device flexibility reduces stock requirements
- Wide variety of body styles, contact arrangement, and operators meet a variety of application requirements
- Bodies available in metal or plastic
- Switches are interchangeable between new and older devices, as well as with competitor's devices
- A variety of actuating keys are suitable for all applications
- Pre-wired devices and many connector options available to make wiring and installation easier

**The Following Types of Safety Interlocks are Available:**

- Non-locking
- Locking with push button or key release
- Locking by electrical solenoid
- Rotary shaft operation, for use on hinges of doors
- Rotary lever for hinged guards
- Pre-wired compact body

**XCSDM Non-Contact Safety Interlock Switches  
For Non-Contact Gate or Guard Interlocking**

XCSDMP

XCSDM4

XCSDM non-contact safety interlock switches are designed for the same functions as mechanical safety interlock switches. The difference is that the non-contact safety interlock switches are magnetically coded devices and require no contact between the switch and coded magnet. This is a benefit where door or guard mis-alignment is an issue, or where the machine designer does not want to use a mechanical device.

**Benefits of Non-contact Devices:**

- Food, beverage and pharmaceutical applications require that no contaminants be trapped in or around devices.
- Non-contact devices have no inherent operating force and are well-suited for applications such as lightweight or plexiglass doors, where cracking or breakage is prevalent with standard mechanical safety interlock switches.
- Wash down applications where a standard mechanical safety interlock switch would be more difficult to clean, especially in the actuating key receptacle.
- Where small size is critical or a slim profile is desired

**Features and Benefits of XCSDMC, XCSDMP, and XCSDMR**

- Tolerates gate or guard alignment problems
- Wider temperature range for a plastic bodied device than any competitor's products
- Multiple coded-magnet approach directions allow for maximum flexibility of mounting options
- Suitable for Category 4 safety circuits when used with a safety relay or safety controller.
- Available with or without LEDs
- Connector and cabled versions available

**Features and Benefits of XCSDM3 and XCSDM4**

- Meets SIL 2 and 3 per IEC 61508, Category 3 and 4 per EN 954-1 and EN/ISO 13849-1 and performance level "e" per EN/ISO 13849-1 without the need for a safety relay or safety controller
- Connector and cabled versions available
- Multicolor LEDs for diagnostics and status
- Multiple coded-magnet approach directions allow for maximum flexibility of mounting options

## Safety Limit Switches

XCS Safety Limit Switch

### XCS Safety Limit Switches

Preventa XCS safety limit switches are used in machine safety systems for a wide variety of safety related functions, including end of travel notification, overtravel indication, safety related positioning of machinery/tooling or component parts, as well as interlocking gates and guards. They are often used in conjunction with safety interlock switches for mechanical and electrical redundancy on doors and guards.

#### Features and Benefits

- Meet US and European safety standards requiring that switches used in safety related applications have positive opening contacts
- Tamper resistant covers over mounting screw and head adjustment to reduce potential for tampering
- Red color allows easy visibility and identification of safety related limit switches
- Two body styles available:
  - Compact, pre-wired with cable
  - Compact, with conduit entry

### XCSP/XCSD Safety Limit Switches

The XCSP (plastic body) and XCSD (metal body) safety limit switches are identical in size and features. The only difference is the enclosure and conduit entry. XCSP and XCSD safety limit switches are for use in safety related applications including end of travel notification, overtravel indication, safety related positioning of machinery/tooling or component parts, as well as interlocking gates and guards.

#### Features and Benefits

- Positive opening contacts standard in all devices
- Snap acting contacts
- Slow make/slow break contacts
- Several head types available
- Metal and Plastic body styles available
- Several conduit types available
- Tamper resistant cover

### XCSM Safety Limit Switches

The XCSM safety limit switches come pre-wired in multiple lengths of electrical cable for simplified installation. The XCSM safety limit switches are for use in safety related applications including end of travel notification, overtravel indication, safety related positioning of machinery/tooling or component parts, as well as interlocking gates and guards.

#### Features and Benefits

- Positive opening contacts standard in all devices
- Snap acting contacts
- Slow make/slow break contacts
- Several head types available
- Plastic body
- Pre-wired in various cable lengths
- Tamper resistant cover

## Cable Pull Switches For Emergency Stop Operation

XY2 Cable Pulls

### XY2 Cable Pull Switches

XY2 cable pull switches provide emergency stop signaling at any point along a cable up to 165 feet in length. This is preferable to installing many individual emergency stop push button stations along a conveyor or around the machine, providing a more cost effective solution. Typical applications include conveyor systems, packaging, textiles, transfer machines, presses, woodworking equipment and paint lines.

Operation is based on the taut cable principle. The cable must be tight and have appropriate tension applied to set or reset the switch. Once cable tension has been set, the device will open the N.C. control contacts if either the cable is pulled or if it becomes slack due to stretching or breakage of the cable.

Normal stop versions are used where a momentary, non-emergency signal is required at any point along a cable.

#### Features and Benefits

- Cable lengths: XY2CE 165 ft. and XY2CH 50 ft.
- Emergency stop versions (available in XY2CE and XY2CH)
  - The N.C. contact opens the control circuit and mechanically latches, and will remain latched in the open position until an operator manually resets it
  - Emergency stop versions have positive/direct opening contacts as standard
  - Device will not reset if out of adjustment
- Normal stop versions (available in XY2CE and XY2CH)
  - Normal stop versions are used where a momentary, non-emergency signal is required
  - Normal stop versions do not latch contacts open or include positive opening contacts
  - Normal stop versions are provided with snap action contacts for momentary stop

#### XY2CE

- 165 ft. maximum cable length
- Adjustable tripping force
- Available with 2 N.O. and 2 N.C. contacts

#### XY2CH

- 50 ft. maximum cable length
- Two viewing windows to aid in adjusting the switch
- Manual tripping force adjustment
- Adjustment indicator
- Traction force indicator

The Altivar 212 drive is for use with three-phase asynchronous motors for variable torque pump and fan applications. Select the Altivar 212 drive using the motor nameplate voltage, the full load ampere rating = and the table below. The Altivar 212 drive includes 3 logic inputs, 2 analog inputs, 1 analog output, and 2 relay outputs (with 1 NO and 1 NO/NC contacts). The Altivar 212 drive includes an integrated 4 digit, 7 segment LED display with a 7 button keypad and includes an RJ45 Modbus port plus a four-screw terminal block for BACnet, Modbus, Metasys N2 and Apogee P1 communication protocols. LonWorks™ is available in an option card.

- ▲ Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 1 hp to 10 hp at 230 Vac 3 phase and up to 100 hp at 460 V, add "S337" to the end of the catalog number. On 15 hp to 60 hp at 230 Vac 3 phase, add "337" to the end of the catalog number. In both cases multiply price by 1.2 to obtain new price. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on 55 kW/75 hp @ 230 Vac 3 phase and higher and 90 kW/125 hp @ 460 Vac and higher.
- Product does not contain an EMC filter.
- ◆ Product ships with a DC choke that must be field mounted. A 5% line reactor may be purchased and installed in place of the DC choke. Add "D" to the end of the catalog number to receive just the AC drive and multiply the listed price by .96 to obtain new price.
- ★ These products can be ordered with LonWorks® or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add \$550 to the price. Add "BN" to the end of the part number to receive a BACnet option card. Add \$225 to the price.
- ▼ These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking.
- Δ When ordering replacements for Square D™ brand E-Flex™, MCC and M-Flex™ enclosed drive controllers containing the Altivar 61 drive, identify the replacement catalog number by referring to the applicable instruction manual, the side nameplate on power converter, or using the graphic keypad (menu 1.11 identification).

	125	110	125		16899.
	150	132	150		19179.
	—	160	180		20795.
	200	200	220		24290.
	250	250	290		28950.
	350	315	355		35950.
450	400	420	46750.		
550	500	543	59590.		
700	630	675	78490.		
800	800	840	103390.		

- ▲ Conformal coating is standard.
- An AC 5% line reactor is mandatory.
- ◆ These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking.

Altivar™ 61 Single-Phase Drives

In an application where it is necessary to use a 240 V single-phase input for a 3-phase motor, the drive must be derated; therefore, the power listed on the drive nameplate will be higher than the power rating on the motor nameplate.

For more information on wire and line reactor sizing, refer to *Altivar 61 and 71 Supplementary Ratings (30072-451-38)* and Price Guide 8800PL9701 for line reactor selection and pricing.

- ▲ Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 0.5 hp to 5 hp at 230 Vac single-phase, add "S337" to the end of the catalog number. On 7.5 hp to 25 hp at 230 Vac single-phase, add "337" to the end of the catalog number. In both cases multiply price by 1.2 to obtain new price. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils.
- These products can be ordered with LonWorks® or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add \$550 to the price. Add "BN" to the end of the part number to receive a BACnet option card. Add \$225 to the price.
- ◆ Product does not contain an EMC filter.

- ★ Miscellaneous Options A06, B06, C06, and D06 are mutually exclusive. Add Misc. Option number to S-Flex 212 Catalog Number when ordering communications card factory installed.
- ▼ For Modbus control, see the Instruction Manual.

NOTE: See the Instruction Bulletin for set up instructions.

All S-Flex 212 Enclosed Drives are supplied with:

- Altivar™ 212 power converter
- Square D™ circuit breaker disconnect (Power Fuses for 460 V version only)
- UL 508C coordinated short circuit rating for 100,000 A
- Adjustable Frequency Controller-Off-Bypass selector switch
- Local/Remote configurable on controller
- Power On red LED
- Bypass Run green LED
- Fire/Freezestat interlock for Adjustable Frequency Drive and Bypass mode
- Form C Adjustable Frequency Controller fault auxiliary contact
- Modbus RJ-45 communication port
- Smoke Purge Function
- Bypass Run Auxiliary Contact
- Drive Run Auxiliary Contact
- Full Voltage Bypass Power Circuit with overload relay
- 120 Vac fused control power transformer

**Altistart™ 48 Soft Starts**

The Altistart 48 soft start combines ease of selection with simple installation and high motor control performance. With its exclusive motor Torque Control System, the Altistart 48 helps eliminate uncontrolled motor acceleration and deceleration, a problem inherent with standard voltage—ramp soft starts. The Altistart 48 includes features to help with motor and machine protection and is available for motors ranging from 208 to 575 volts. In addition to a built-in display and programming terminal, a remote keypad option and programming software is available to ease integration and commissioning. The Altistart 48 has a built-in Modbus™ port and is offered with serial communication gateways to such popular networks as Ethernet and DeviceNet™.

**Open Style Soft Starts 50–60 Hz, Three-Phase, 690 V Maximum—AC3 Duty**

The Altistart 48 soft start must be selected using the table below, based on nameplate full load ampere rating of the motor. The horsepower ratings shown in table are for reference only.

**Table 26.14: Altistart 48 Selection and Pricing▲**

400	450	500	1000	1200	1200	ATS48M12Y	10600.

- ▲ Motor full load amperage (FLA) must not exceed the ampere rating of the soft start.
- Low Inertia—Connected motor load inertia equal or less than 10 times motor rotor inertia.  
High Inertia—Connected motor load inertia greater than 10 times motor rotor inertia.

**NOTE:** For severe duty or high inertia loads, derate by 1 hp size.

**Altistart™ 22 Open Style Softstarter**

The Altistart 22 unit uses both voltage and torque control to provide a softstart and soft stop for three-phase asynchronous motors between 17 and 590 amps.

**Table 27: ATS22 Selection and Pricing**

Select the Altistart 22 softstart using the nameplate full-load ampere rating of the motor and the table below. The horsepower ratings are for reference only.

**Enclosed Altistart™ 22 Motor Controllers**

Enclosed Altistart 22 (ATS22) solid-state combination motor controllers are a pre-engineered, integrated solution for reduced voltage starting and soft stopping of standard three-phase asynchronous induction (squirrel cage) motors. The Enclosed 22 controllers consist of a disconnect means and an ATS22 softstarter in a stand-alone enclosure. Enclosed 22 controllers integrate the ATS22 softstart technology into a combination package for application requirements up to 125 hp at 480 V.

- 3–50 hp, 208 V
- 5–60 hp, 230 V
- 10–125 hp, 460 V

Mod	Pilot light cluster #3	\$ Price
C07	Consists of red "RUN", green "OFF" and yellow "FAULT" pilot lights. Provides standard red "RUN (ON)" green "OFF" and yellow "FAULT" pilot lights for status annunciation.	270.00
Mod	Pilot light cluster #4	\$ Price
D07	Consists of red "RUN (ON)" (push-to-test), green "OFF" (push-to-test) and yellow "FAULT" (push-to-reset) pilot lights. Provides push-to-test type red "RUN (ON)" standard green "OFF", and push-to-reset type yellow "FAULT" for status annunciation.	540.00

**Meter Display Options (pick one)**

Mod	Elapsed time meter	\$ Price
B08	Provides a seven-digit analog, non-resettable elapsed run time meter. Not available on Type 3R Enclosures	348.00

**Miscellaneous Options**

**(multiple compatible options may be selected)**

Mod	Floor mounting kit	\$ Price
A10	Only available for size D enclosures.	105.00

**Rules:** Available for power options S05, N05, R05, Y05.

Mod	150 VA additional control power capacity	\$ Price
B10	Provides 150 VA additional control VA capacity for customer use.	150.00

## Information and Selection

For information and selection, contact your nearest Schneider Electric sales office or visit our website:  
www.schneider-electric.us

## Technical Support

### Drive Product Support Group

For support and assistance, contact the Drive Product Support Group. The Drive Product Support Group is staffed from 8:00 am until 6:00 pm Eastern time to assist with product selection, start-up, and diagnosis of product or application problems.

EMERGENCY Technical phone support is available 24 hours a day, 365 days a year.

**Toll Free:** 888-778-2733  
**E-mail:** drive.products.support@schneider-electric.com  
**Fax:** 919-217-6508

## Services (On-Site)

Square D Services is your single source of service expertise for all major brands of electrical equipment. With our national network of service locations and qualified experts, Square D Services is capable of providing customer-based solutions anywhere in the United States. Services responds to your requests, seven day a week, 24 hours a day.

**Toll Free:** (888-778-2733)

## Customer Training

Schneider Electric offers a variety of instructor-led, skill enhancing and technical product training programs for customers. For a complete list of drives/soft start training with dates, locations, and pricing, please call:

**Phone:** 978-975-9306  
**Fax:** 978-975-2821

## Packaged Product Documentation

### Standard Documentation

Each adjustable frequency drive or soft start shipped includes one set of instruction bulletins. Each set of instruction bulletins includes installation, start-up, troubleshooting and wiring diagram information. Separate Approval and/or Record Drawings are not included.

### Approval and Record Drawings

All factory orders for enclosed drives and soft starts come with factory supplied user drawings and are identified by a factory order number. The factory supplied drawing set typically includes:

- Enclosure outline drawing
- Power elementary drawing
- Control elementary drawing
- Interconnection drawing

These drawings are also available in DWG, DXF, IGS, Microcad and PDF formats upon customer request.

## Modicon™ PLC Products

### Modicon™ TSX Micro™ PLC

Compact and cost-efficient, this mid-range PLC boasts the power and flexibility OEMs find most desirable. Optional integrated safety relays, half-size I/O and web-enabled modules provide seamless connection to supervisory maintenance

systems plus minimize real estate. PCMCIA memory cards preserve your investment when expanding. Communication options include Ethernet and ASi for global access using Open standards. More details are available at [www.schneider-electric.com](http://www.schneider-electric.com).

### Modicon M340™ PAC

Our latest midrange PAC is the most integrated ever! Highly requested by industrial OEMs and end users, the all-power-inside concept boasts high-performance processing and small size to create a system that provides flexibility beyond any before. With up to 3 built-in CPU

communication ports, large memory options, 64 channel high-density modules, and embedded web-servers, the Modicon M340 is a powerful solution for industrial OEMs and end users demanding more productivity in their PACs. The Modicon M340 PAC supports advanced communications such as enhanced EtherNet/IP which support both EtherNet/IP, Modbus TCP/IP and daisy chain loop communications on the same 4-port, rack mounted switch module. It will also support DNP3.0 in serial or Ethernet in a rack-mounted RTU module. The Modicon M340 PAC is programmed with Unity Pro software, which allows users to dramatically reduce setup time and effort with features like drag 'n drop CANopen bus setup and standard IEC 61131-3 language selection. Designers gain fast, easy and efficient startups. More details are found on our website or in the latest Modicon M340 catalogs and brochures. More details are available at [www.schneider-electric.com](http://www.schneider-electric.com), or in catalog **DIA6ED2081007EN-US**.

### Modicon Premium™ PLC

Ideally suited for discrete manufacturing, complex OEM applications as well as municipality and infrastructure applications, this cost-effective PLC line features integrated functions such as weighing, interpolated motion control, and process loops. Using the built-in Ethernet port, user-

customized web page capabilities, and a range of popular Open-standard fieldbus connections the Modicon Premium enables seamless communication with enterprise systems providing low-cost remote maintenance diagnostics. More details are available at [www.schneider-electric.com](http://www.schneider-electric.com), or in catalog **MKTED208054EN-US**.

### Modicon Quantum™ PLC

The Modicon Quantum PLC is our high-end, full function PLC designed for high I/O count industrial applications that require high performance such as Pharmaceutical, Petrochemical, Food & Beverage, Automotive, and others. Quantum also offers true bumpless hot standby. Quantum processors

can be programmed with Unity Pro. It will also support legacy 984 ladder logic programs in the LL984 Unity Pro editor by simply importing the legacy application program. Concept™ application software and ProWORX™ 32 application software are also supported on the Quantum platform. The Unity Quantum's onboard memory can exceed 3 Mbytes. The Unity Quantums can have more than 7 Mbytes of extended memory on a PCMCIA card for data and application storage combined. They can have over 8 Mbytes of just data storage. The Quantum PLC also offers Safety PLC versions certified for use in up to SIL3 applications. This includes both standard and hot standby capability as well as redundant I/O. It programs with Unity Pro XLS. The SIL3 offer stresses both high reliability as well as high availability. More details are available at [www.schneider-electric.com](http://www.schneider-electric.com), or in catalog **MKTED208011EN-US**.

Information about the SIL3 Quantum is available in brochure **8000BR0808R03/10**.

### Unity™ Pro Application Software

Unity Pro is a new generation software platform for application development. Unity Pro is compatible with all Industrial End User midrange and highend controllers including Modicon M340, Premium and Quantum PLCs. Unity provides a collaborative automation environment that enables individuals and teams to work together more effectively, reducing the cost of developing and

managing automation solutions. Unity Pro XLS software is used to program the SIL3 Quantum as well as all Unity-based, standard Quantums, Unity-based Premiums and M340s. Since one software package can program all the platforms, it greatly simplifies development and support issues. It integrates commercial IT technologies like Ethernet, VBA, XML and hyperlinks within the traditional control framework to enable customers to reduce the cost of automating both discrete and batch control applications. More details are available at [www.schneider-electric.com](http://www.schneider-electric.com), or in brochure **8000BR0935R02/10**.

### Unity Application Generator

Unity Application Generator is an advanced design and generation software tool that integrates multiple PLCs and HMI/SCADA systems to provide an automation solution rivaling a Distributed Control System (DCS). UAG supports structured project design by providing a software tool to bridge from the process engineer to the control/automation designer (from the P&ID to the automation system). UAG will capture and re-use the Customer's best practices within application-specific libraries that reduce the dependency on experts and enable standardization and increases software robustness. Single database entry avoids duplicate effort and resulting errors. Automatic Application Generation including the automatic configuration of networks in multi device systems increases efficiency, improves software quality, speeds commissioning while simultaneously reducing project risk. Integrated change tracking and automatic documentation generation reduces engineering effort and enables system validation. UAG integrates Unity PLCs (M340/Premium/Quantum), Vijeo Citect, Connectors for leading HMI/SCADA systems, Modbus TCP/IP communication and OFS/OPC. Additional information can be found at [www.schneider-electric.com](http://www.schneider-electric.com).

### Concept™ and PL7™ Application Software

Concept and PL7 comply with the IEC 61131 standard for programming software. Concept and PL7 can be programmed in four IEC languages including two text-based editors (Structured Text and Instruction List), and two graphic-based editors (Sequential Function Chart and Ladder Diagram). In addition, Concept can be programmed

using the IEC compliant graphic editor for Derived Function Blocks. The Concept and PL7 software both promote productivity by using structured programming, which increases reusability while reducing maintenance costs. Concept can be used to program the Quantum, and Momentum PLCs while PL7 can be used to program the Micro and Premium. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

### ProWORX™ 32 Application Software

ProWORX 32 is the simple programming solution to program your Modicon PLCs using 984 ladder logic programming. Compatible with

584, 984, Modicon Micro, Momentum, Compact, and Quantum. Schneider Electric Automation Services maintains the tools necessary to upgrade your ProWORX 32 application to a Unity Pro application with ladder logic that is designed to mirror the 984LL application. More information can be found at [www.schneider-electric.com](http://www.schneider-electric.com).

## Magelis™ Small Panels HMI Products

The Magelis STO/STU, XBT N, XBT R, and XBT RT Small Panels have been specifically designed to satisfy the requirement for panels that are compact and easy to use. These terminals are easy to configure and work seamlessly with other Schneider Electric equipment to provide a complete automation solution, dedicated to simple or compact machines.

### Magelis STO/STU

The new Magelis STO and STU panels enhance the Magelis small panels range by offering more flexibility, more communication capability, and a quick and easy revolutionary mounting system. Powered by Vijeo Designer software, these panels bring a cost-effective solution to all machine builders. The new Magelis STO & STU terminals adapt to your needs by integrating the latest technological innovations to enhance machine productivity. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

### Magelis XBT N/R

The Magelis XBT N and R matrix screen text display units accommodate up to four lines of large font (20 mm high) text for easy viewing. Rated for IEC 60529, NEMA 4X outdoor use, Class I Div II and UL508, the sturdy Magelis XBT N and R displays feature an ergonomically designed keyboard with up to 20 keys and ports to handle either point-to-point or multipoint communications. A truly global solution, the XBT N and R displays provide low-cost connectivity to all Schneider Electric PLCs using Modbus™ and Uni-Telway™ protocols, support Latin, Cyrillic, Katakana, Greek and Chinese fonts, and six languages. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

### Magelis XBT RT

The Magelis XBT RT semi-graphic touch screens accommodate up to ten lines of 33 characters of text. Rated for NEMA 4X, Class I Div II and UL508, the sturdy Magelis XBT RT displays semi-graphic objects, bar graphs, curves, buttons, and bitmaps and has ports to handle either point-to-point or multipoint communications. With the ability to choose between touch screen and keypad combination or keypad only operation, the XBT RT, is adaptable. Like the other Magelis small panels, the XBT RT displays provide low-cost connectivity to all Schneider Electric PLCs using Modbus and Uni-Telway protocols and several major third party protocols and supports multiple languages, including Japanese, Cyrillic, Greek and Chinese. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

## Magelis Advanced Panels HMI Products

The Magelis XBT GT, GK, GH and GTW graphic terminals offer numerous connectivity options from Ethernet to USB. With their exceptional image quality and choice of touch screen and/or keypad interface, they are flexible enough for a large range of applications. When combined with Vijeo Designer configuration software, application designs are unlimited.

### Magelis XBT GT

Available in six sizes (3.8, 5.7, 7.4, 10.4, 12.1 and 15 inches) and 4 function levels, the Magelis XBT GT graphical touch screen terminals are designed to fit all your HMI application needs. Some offer: multimedia capability with a large processing capacity; openness with unequalled connectivity via numerous communication ports and multilink communication for simultaneous equipment control; ease-of-use with simple installation and simple configuration with Vijeo Designer software. The entire product range is RoHS compliant. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

### Magelis XBT GK

With three models to choose from and two sizes screen sizes, 5.7 and 10.4 inches, the Magelis XBT GK offers a lot of flexibility. The XBT GK uses the same technology of the popular XBT GT but adds a keypad and industrial mouse pointer for extra control and data input that can be configured to operate simultaneously with or without the touchscreen. In a dusty or dirty environment, the keypad enables the use of the terminal, even while wearing gloves. There is an extra added safety feature where two keys can be simultaneously pressed to ensure command order security and the keys can be locked during delicate phases of an operation. Vijeo Designer, the single software package for the entire Magelis Advanced Panel range, ties the solution together. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

### Magelis XBT GH

Powered by Vijeo Designer software and based on the same technology as XBT GT, the XBT GH hand-held panel combines intuitive operation, quality, durability, mobility and safety with rugged corded mobile design and integrated safety features. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

### Magelis XBT GTW

Available in two color touch screens sizes, 8.4 and 15 inches, the Magelis XBT GTW terminals offer a Windows environment open to the Web (local and remote diagnostic and maintenance functions) and multimedia applications (streaming video on IP, Webcam management, sound and an integrated video output). With this open platform, the XBT GTW allows you to enhance your HMI applications with Vijeo Designer, while providing total access to Microsoft Office software (Excel, Word, PowerPoint, etc.) and data editing with Office Viewer or Acrobat Reader, two pre-installed applications.

The front panel USB port provides connectivity for peripherals. Numerous communication interfaces such as dual-Ethernet, multiple USB ports and slots provided for PCMCIA (15") and Compact Flash slots are available. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

## Magelis™ HMI Products

### Magelis Industrial PCs

The Magelis Industrial PC (iPC) range offers “All-In-One” or “BOX + Display” industrial PC for autonomous or distributed applications. The Magelis iPC provides the openness and ergonomics of a Windows environment in a rugged PC that is ready for tough industrial environments. With the Magelis iPC range, you will be sure to find the PC that corresponds exactly to your specifications.

#### “All-In-One” Solutions:

##### • Magelis Smart+ iPC

The new Magelis Smart+ iPC is the first industrial PC with Windows XP Pro operating system that requires no maintenance and contains no rotating parts (no hard disk or fan). The Smart+ iPC also offers all of the openness associated with Windows XP Pro. The IP65 touch screen shares the same 15" dimensions as the rest of the

Magelis range. With its Intel® Celeron® M 1 GHz processor, 1 GB of RAM, and two Ethernet ports, Magelis Smart+ iPC offers great performance, and features a solid state drive (SSD) with Windows XP Pro operating system. The industrially rugged Smart+ iPC has been certified to the most demanding standards, including UL 508 for automation equipment, UL and ATEX for hazardous locations, and marine. Magelis Smart+ iPC supports Vijeo™ Designer™ HMI applications (demonstration version can be expanded to unlimited version) and is the first maintenance-free Magelis iPC to fully support the Vijeo Citect SCADA supervisor.

##### • Magelis Smart iPC

An extension of dedicated terminals and the industrial PC, Magelis Smart is open to the Web. It meets the demands of predefined operator dialog, display and remote diagnostics and is available in 8.4, 12, or 15 inches. Practical and reliable, the Smart has simplified connections, including: 2 Ethernet ports, one with gigabit support, 4 or 5 USB ports, 2 serial ports and a

PCMCIA slot. Its also more resistant to noise and vibration with data storage on static disk (compact Flash) and no fan. The WEB Edition is ready to use as a web client or connected to the FactoryCast Web servers for remote diagnostics via the integrated Web browser. The HMI Edition (with Vijeo Designer runtime) transforms the iPC into an operator terminal.

##### • Magelis Compact iPC

Available in 8.4, 12, or 15", the Magelis Compact iPC provides data storage adapted to industrial needs, Industrial HDD disk or 8 or 16 GB Flash disk (15") only. This panel PC has several extension options, including: 1 PCI slot, dual-Ethernet ports, one with gigabit support, 4 or 5 USB ports, 2 serial ports and a PCMCIA slot. Vijeo Designer HMI software transforms the iPC

into an operator terminal with the advantages of Windows® openness (HMI Edition).

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

#### “BOX + Display” Solutions:

From the simple preconfigured Magelis Smart BOX or the Compact PC BOX to the Flex PC BOX with its advanced features, these BOX + Display solutions have in common a high level of design guaranteeing the best reliability possible.

##### • Magelis Smart BOX

The Magelis Smart BOX is preconfigured with MS Windows® and offers the same features as the “All-In-One” version.

##### • Magelis Compact PC BOX

The Magelis Compact PC BOX offers 1 PCI slot and the same features as the Compact iPC

##### • Magelis Flex PC BOX

The Magelis Flex PC BOX features:

- 2 or 4 PCI slots
- Industrial HDD 24/7 and/or 8 or 16 GB disk
- Intel® Celeron® M 440 with 1.86 GHz or Pentium Core Duo with 2 GHz 100-240 Vac or 24 Vdc power supply

#### PC BOX COMPONENTS

To complete the configuration:

- To convert the Flex PC BOX into an “All-In-One” PC, add a 15" or 19" Front Panel in touch version or 12 or 15" Front Panel in touch/keyboard version
- To connect a remote screen to the PC BOX (Smart, Compact, or Flex), add a 15 or 19" iDisplay in touch version or 15" iDisplay in touch /keyboard version.

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

#### Vijeo™ Designer

Vijeo Designer configuration software can be used to create HMI applications designed for controlling automation systems for the Magelis HMISTO/STU/GTW/IP/XBTGT/XBTGK/XBTGTW/iPC. It's the ideal design tool for the simplest control application right up to the most complex HMI installations. It offers advanced script functions, recipe management, data management, remote access via PC web browser, e-mail and multi-protocol connectivity. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

## SCADA Products

### Vijeo Citect

The flexibility of Vijeo Citect supervisory control and data acquisition (SCADA) software enables users to achieve the solution that best suits their supervision requirements for installations. Vijeo Citect offers all the functions of a modern supervisor. Its distributed client-server architecture is applicable to a multitude of applications in the most varied domains:

- Energy and infrastructures: airports, roads and tunnels, water wastewater, oil and gas, etc.
- Industries: food and beverage, mining, metals, minerals, system integrator, etc.

This development tool enables the development of any supervision application, from small stand-alone systems to large distributed redundant systems. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

### Vijeo Historian

Vijeo Historian, a data logging and reporting software, collects, compares, and records the entire flow of data on a common platform. By establishing the communication between the supervisory systems (SCADA) and database systems, such as Oracle and SQL, Vijeo Historian enables collection and management of the production data and its availability

for a vast range of client processing applications. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

**Advantys™ OTB**

The open and modular new Advantys OTB distributed I/O system offers an ideal solution for IP20 distributed input/output requirements. Users can create I/O islands managed by a master controller, via a fieldbus or communication network. It includes three communication bases for the various types of fieldbus: CANopen™, Ethernet TCP/IP, or Modbus™ RS 485 serial. Discrete or analog I/O are available. More information is available in catalog **DIA3ED2040801EN-US**.

**Advantys Telefast ABE9 Passive splitter boxes, IP67**

Advantys Telefast ABE9 splitter boxes eliminate long and difficult cable runs by avoiding the use of intermediate junction boxes. Due to their modularity and size, they are perfect for the requirements of your varying applications. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

**Modicon™ TM5 Expansion Module**

The Modicon TM5 digital I/O module offer consists of input, mixed I/O and output electronic modules (sensor and preactuator 24 V  $\pm$  power supply). They complement the embedded I/O in the various M258 controllers and LMC058 motion controllers. They are used to adapt to the application requirements as closely as possible to reduce the installation and wiring costs, and

they can be used with the CANopen communications head and with multiple controllers. These modules offer the following advantages: a removable terminal, spring terminals which can be used for quick, tool-free connection of the sensors and preactuators (and can help eliminate the need for periodic retightening), and hot swapping. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com), or in catalog **MKTED211041EN**.

**Modicon STB**

The Modicon STB is a highly modular distributed I/O platform, integrated wiring solution, and power management system that delivers effective and targeted control. With an open network adaptable to most major field buses, a flexible "island" I/O structure, and simple

configuration via the STBSUP1000 software, Modicon STB is the right choice. The Modicon STB distributed I/O can also be configured directly from Unity™ Pro application software. More information is available in catalog **MKTED208053EN-US**.

**Advantys Telefast™ ABE7 Sub-bases, IP20**

The Advantys Telefast ABE7 pre-wired system enables connection and adaptation of control signals of industrial PLC cards that are fitted with HE10 connectors. It rationalizes cabling by replacing PLC terminals and traditional terminal

blocks—thus improving simplicity and economy. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com).

**Modicon TM7 I/O Blocks, IP67**

Compact and flexible, the TM7 IP67 I/O Blocks allow connection of sensors and actuators at the heart of processes or machines in severe environments. The wide range of modules provides solutions to match your exact needs. It includes connectivity to CANopen. More information is available at [www.schneider-electric.com](http://www.schneider-electric.com), or in catalog **MKTED211041EN**.

**Modicon Momentum™ Distributed I/O and PLC**

The small footprint and open architecture of the Momentum PLC product line make it extremely versatile for a variety of automation applications. The Momentum PLC is ideal for PC-based control, distributed control, distributed I/O, and traditional, standalone PLC control. Momentum PLC options and accessories include: I/O bases, processor adapters, option adapters and communication adapters that are interchangeable and snap together to deliver optimal flexibility throughout the control system lifecycle.

Using Ethernet as its communications backbone, the Modicon Momentum M1E Processor delivers all the performance benefits of real-time control. The open architecture of the M1E processor makes it a universal controller for distributed I/O, compatible with many of the major fieldbus and control network environments.

An integral Ethernet port in the M1E allows users to perform a wide range of functions over Ethernet, including data acquisition, peer-to-peer communications, and I/O scanning. Five embedded web pages enable the use of a standard web browser to read status and diagnostic information from the processor.

The most recent addition to the Momentum product offer is the Momentum M1E ConneXium switch. This model combines the power and functionality of the M1E processor with the communication versatility of four Modbus Ethernet TCP/IP ports.

The award winning M1E not only seamlessly connects I/O and other control devices via open standards; it delivers the performance of a full function, real-time controller for stand-alone and distributed system configurations in one money-saving unit. Additional information can be found at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog **MKTED205061EN**.

## ConneXium™ Products

### ConneXium™ Ethernet Products

The ConneXium line of networking products offers a complete range of Ethernet switches (managed and unmanaged), hubs, transceivers, gateways, cabling, and diagnostic monitoring software for demanding industrial environments. With fiber and redundant capabilities, along with

advanced filtering and security features, ConneXium products improve the performance and security of the network. More details can be found at [www.schneider-electric.com](http://www.schneider-electric.com).

### ConneXview™ Industrial Ethernet Diagnostic Software

ConneXview Industrial Ethernet diagnostic software combines the power of IT-based network management programs with Schneider Electric's Transparent Ready Ethernet expertise to provide a tool specifically designed for the automation environment. ConneXview offers automatic device discovery plus Ethernet (SNMP) and control-network device (Modbus/TCP) mapping. In addition, the software has an easy-to-use graphical interface including convenient task panels for device status, settings and alarms, and topological visual graphics. Other benefits include:

- Increased overall productivity with easy-to-use diagnostics
- Expanded functionality offered with the Device Type Editor, including adding third-party devices to the library and adding unique device names for increased recognition
- An intuitive and ergonomic design that minimizes end-user training and decreases maintenance costs

## Transparent Ready™ Products

### Transparent Ready™ Solutions

Transparent Ready products cover solutions in Industrial automation to electrical Distribution, and are based on universal Ethernet TCP/IP and Web technologies. They provide seamless communication between plant floor devices, like PLCs, drives, and MCCs, with corporate business systems. Use of the open Modbus TCP/IP and EtherNet/IP protocols that are the leading industrial Ethernet protocols, broadens the scope of dedicated machine diagnostics to remote

management. Choosing Transparent Ready means opting for flexible, open automation architectures. More details can be found at [www.schneider-electric.com](http://www.schneider-electric.com).

## Network Products

### CANopen Products

CANopen is an open network that is supported by over 400 companies world wide and promoted by CAN in Automation. CANopen is standardized in the EN50325-4 and in ISO15745-2 for its device description.

The main reason for using a network is the performance and the flexibility to adapt the network exactly to the requirements of the application. CANopen provides a unique feature for the adaptation of the data transmission. Based on the producer/consumer model, CANopen allows for a data transmission broadcast, peer-to-peer, change-of-state and cyclic

communication. This means it transmits data only when required or on a specified time base. Process data objects can be individually configured. Parameters can be changed at runtime.

CANopen combines ease of installation with inexpensive devices. CANopen provides an integrated equipotential bonding in the cable. Therefore, an additional cable or stranded copper ribbon to achieve the same potential on all network devices is not necessary. Installation costs are heavily reduced.

More information on CANopen and CANopen Products is available in catalog **MKTED208054EN-US**.

**Ethernet TCP/IP Products**

The recognition of Ethernet TCP/IP, both in organizations and on the internet, has made it the communication standard of today. Its wide use is leading to a reduction in connection costs, increased performance and the addition of new functions, which all combine to ensure its durability.

Ethernet TCP/IP meets the connection requirements of every application:

- Twisted pair copper cables for simplicity and low costs
- Optical fiber for immunity to interference and for long distances
- Communication redundancy, inherent in the IP (internet protocol)
- Remote point-to-point access via the telephone network or the Internet for the cost of a local call

Ethernet TCP/IP, a truly open technology, supports all type of communication:

- Web pages
- File transfer
- Industrial messaging

With its high speed, the network no longer limits the performance of the application. The architecture can evolve without any difficulty. The products or devices remain compatible, ensuring the long-term durability of the system.

More information on Ethernet and Ethernet Products is available in catalog **MKTED208054EN-US**.

**Actuator Sensor Interface (AS-i) Bus Products**

AS-Interface (AS-i) is a versatile, low-cost, easy to-install cabling solution dedicated to distributed machines and installations as a replacement for traditional parallel wiring. AS-i technology is compatible with virtually any fieldbus or device network. AS-i is used as a quick and upgradeable industrial network—a single cable with a quick, open-ended wire system connects all the components in the automation system. It contributes significantly to improve the reliability and availability by reducing cabling errors and offering high-level electromagnetic interference immunity (EMC).

AS-i is an open network standardized in IEC 62026-2 and promoted by AS-International Association.

AS-International has over 260 members worldwide.

More information on AS-International and AS-i Products is available in catalog **MKTED208054EN-US**.

### Modicon™ M168 Programmable Logic Controller

Modicon M168 programmable logic controllers have been developed for the buildings market – offering HVAC and pump solutions for Building Management System communication networks (BACNet). Four different Modicon M168 logic controllers are available, all of which can be programmed with

SoHVAC software, providing customized applications designed to control:

- Water chiller
- Heat pumps
- Compact air/air roof-top unit
- Air handling system, twin-flow enclosure
- Precision air conditioners
- Refrigerated display windows
- Compressor racks
- Pumping stations
- Booster stations
- Circulators
- Condensate/boiler feed pumps
- Cooling tower pumps

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog [DIA6ED2110101EN-US](#).

### Modicon M238 Logic Controller

The Modicon M238 logic controller is a compact, high-performance and fully expandable PLC. It forms a part of Flexible Machine Control approach, a key component of MachineStruxure™, which brings you maximum flexibility and ensures the most optimized control solution. Modicon M238 compact logic controllers offer an “all-in-one” solution in a compact unit (157 x 118 x 86 mm excluding expansion modules). Four models are available, with different embedded communications and supply voltages. The number of I/O can be expanded on all four models by adding up to 7 expansion modules (1) of the following type on the right-hand side of the base unit:

- Digital TM2 DDI/DDO/DMM/DRA
- Analog TM2 AMI/ALM/ARI/AMO/AVO/AMM
- Up to 3 High-speed counter TM200 HSC206DT/DF
- Up to 2 AS-Interface master module TWD NOI 10M3.

Modems or communication gateways can be connected to the serial links in order to expand the connectivity capability to include Ethernet Modbus/TCP, Profibus DP, and DeviceNet.

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog [MKTED211041EN-US](#).

### Modicon M258 Logic Controller

The Modicon M258 logic controller is a compact, high-performance and fully expandable PLC. It forms a part of Flexible Machine Control approach, a key component of MachineStruxure, which brings you maximum flexibility and ensures the most optimized control solution. This PLC is

designed for machine manufacturers (OEMs) focusing on applications such as packaging, conveying and storage, textiles and woodworking, etc. It offers high-performance solutions for speed control, counting, axis control and communication functions. The Modicon M258 logic controller's dual-core processor provides extremely high performance. Core 1 is dedicated exclusively to managing program tasks and offers the maximum resources for real-time execution of the application code. Core 2 is dedicated to executing communication tasks, which have no impact on the application performance.

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog [MKTED211041EN-US](#).

### Modicon™ LMC058 Motion Controller

The Modicon LMC058 motion controller is the optimum solution for axis control and positioning, including automation functions. It forms a part of Flexible Machine Control approach, a key component of MachineStruxure™, which brings you maximum flexibility and ensures the most optimized control solution. The Modicon LMC058 motion controller meets the needs of a wide range of applications in all business sectors. This motion controller is designed for machine manufacturers (OEMs) who require synchronized axes, focusing on applications such as packaging, conveying and storage machines, metal and wood working machines, etc. and offers high-performance solutions for velocity control, counting, axis control and communication functions. To this end, the LMC058 master motion controller includes as standard a CANopen™ master and a CANmotion master dedicated to control of up to 8 synchronized axes, with a performance of 2 ms for 4 axes. With the Modicon LMC058 motion controllers, Lexium 32 and Lexium SD3 drives, and BSH and BDH servo motors, Schneider Electric offers a complete, high performance and cost-effective solution.

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog **MKTED211041EN-US**.

### Altivar™ IMC Integrated Controller Card for Altivar 61 and Altivar 71 Variable Speed Drives

The Altivar IMC integrated controller card forms a part of Flexible Machine Control approach, a key component of MachineStruxure, which brings you maximum flexibility and ensures the most optimized control solution. The Altivar IMC integrated controller card VW3 A3521S0 is a compact optimized solution developed for Altivar 61 and 71 variable speed drives. When equipped with the ATV IMC card, Altivar 61 and 71 drives become controllers capable of meeting the needs of machine manufacturers (OEMs) in applications such as textiles, hoisting, pumping or woodworking, etc. The Altivar IMC integrated controller card VW3

A3521S0 is configured and programmed using SoMachine software (see page 27-10). The expansion capability of the Altivar IMC card is based on Schneider Electric's "Flexible Machine Control" concept. The Altivar IMC card boosts the expansion capability of machines and allows us to meet the OEM market's requirements in terms of performance, simplicity of use and openness.

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog **MKTED211041EN-US**.

### Magelis™ XBT GC HMI Controller

The Magelis XBT GC HMI Controller offer forms a part of Flexible Machine Control approach, a key component of MachineStruxure, which brings you maximum flexibility and ensures the most optimized control solution. The Magelis HMI Controller offer brings together HMI and control functions within in a single product. This reduces the amount of equipment required and the associated costs throughout the life cycle of the machine. The XBT GC range is comprised of 6 touch screen terminals, with the following, depending on the model:

- 3.8" monochrome screen, 12 integrated inputs/6 integrated outputs (sink or source)
- 5.7" monochrome or color screen, 16 integrated inputs/16 integrated outputs (sink or source)
- A wide choice of communication interfaces: USB, serial link, CANopen and Ethernet

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog **MKTED211041EN-US**.

## SoMachine™ Software Suite

SoMachine is the OEM solution software for developing, configuring and commissioning the entire machine in a single software environment, including logic, motion control, HMI and related network automation functions. SoMachine allows you to program and commission all the elements in Schneider Electric's Flexible and Scalable Control platform, the comprehensive solution-oriented offer for OEMs, which helps you achieve the most optimized control solution for each machine's requirements. Flexible and Scalable Control platforms include:

### Controllers:

- HMI controllers: XBT GC, XBT GT/GK CANopen
- Logic controllers: Modicon M238, Modicon M258
- Motion Controller Modicon LMC 058
- Integrated Controller Card Altivar IMC
- TM2, TM5 and TM7 offers

### HMI:

- HMI Magelis graphic panels: XBT GT, XBT GK

SoMachine is a professional, efficient, and open software solution integrating Vijeo™ Designer. It integrates also the configuring and commissioning tool for motion control devices. It features all six IEC 61131-3 languages, integrated field bus configurators, expert diagnostics and debugging, as well as outstanding capabilities for maintenance and visualization.

More information is available at [www.schneider-electric.com](http://www.schneider-electric.com) or in catalog **MKTED211041EN-US**.

## Twido™ Nano™

The Twido Nano PLC is a feature-rich ultra-compact controller designed especially for small control systems. Flexible, affordable, and adaptable, Twido makes it easy to build just the right control solution for your customer's application. Offering software with graphical

development, the Twido Nano PLC makes it easy to create, configure, and manage applications. Communication options include CANopen, Ethernet TCP/IP, Modbus, and ASi. More information is available in catalog **DIA3ED2090202EN**.

## Modicon™ Zelio™ Logic Controller

To meet the demand for applications that require more flexibility than a simple relay, timer or counter, but are too small or simple for the smallest Nano PLC, the new generation of Zelio Logic smart relays are now available. Designed to accept and control outputs just like a relay, Zelio Logic features dual language capability, using either Function Block Diagram (FBD) or Ladder Logic Programming (LL), and can easily be programmed by using either the front panel or by utilizing ZelioSoft software. This new generation of Zelio Logic smart relays provides customers with considerable gains from the design stage to the monitoring of their applications, due to its simplicity and flexibility.

<b>Cooling Units</b>	<b>28-8</b>
<b>Thermal Control</b>	<b>28-8</b>

*New!* **Spacial™**

**Metal enclosures and boxes**

From our small boxes to large modular floor-standing enclosures, with the Spacial range you can find the optimal fit for your applications. Our extensive range of easy-to-use accessories helps you save time during your projects.

Select between steel or stainless steel to better suit the installation environment. In our stainless-steel offer you can find the optimal solution where cleanliness or protection in highly corrosive environments are required.

**Steel: Indoor non-clean industrial environment**

The environment in industrial plants can subject electric and electronic components to dust, splashing oil, and impacts. Such environments require a range of enclosures that are suited to harsh conditions yet are easy to install.

- **Universal range**, for industry.
- **EMC (electromagnetic compatibility) range**, against electromagnetic disturbances (treated with Aluzinc).

**304L - 316L stainless steel: Demanding industrial environment**

Food and beverage, pharmaceutical, petrochemical, and infrastructure industries have particularly demanding hygiene and corrosion resistance requirements. Our Spacial range is available in two grades of stainless steel:

- **304L stainless steel**, for resistance to corrosion and ease of cleaning (often used in food production environments).
- **316L stainless steel, also known as "marine stainless steel,"** for very high resistance to corrosion (used in saline or chlorinated environments).
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

**New product family names:**

Spacial S44 - S57 - S24: *Steel industrial boxes*

Spacial SDB: *Steel junction boxes IP55*

Spacial S3DC: *Steel wall-mounting enclosures*

Spacial SM: *Compact metal enclosures*

Spacial SF: *Modular metal enclosures*

Spacial S3X: *Stainless-steel wall-mounting enclosures*

Spacial SMX: *Stainless-steel monobloc floor-standing enclosures*

Spacial SFX: *Stainless-steel modular enclosures*

*New!* **Thalassa™**

**Insulated enclosures and boxes**

Without the right protection, harsh environments can expose your installation to chemicals or other substances.

Developed to help protect your equipment in outdoor applications or harsh conditions, our Thalassa offer ranges from boxes to floor-standing enclosures made from fiberglass reinforced polyester.

Our Thalassa industrial boxes in ABS or polycarbonate are strong, easy to install, and designed to be used in highly demanding environments.

**Insulating polyester and plastic materials (ABS, polycarbonate): Outdoor infrastructures and severe industrial environments**

Outdoor infrastructures and electrical installations are exposed to direct sunlight, rain, saline mist, extreme temperatures, oil splashes, chemical and corrosive agents, and are in contact with the public.

- **Universal range**, for industry.
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

**New product family names:**

Thalassa TBS: *Insulating industrial boxes*

Thalassa TBP: *Insulating industrial boxes*

Thalassa PLS: *Insulating modular boxes IP65*

Thalassa PLM: *Polyester wall-mounting enclosures*

Thalassa PLA: *Polyester floor-standing enclosures*

**New!** **ClimaSys™**

**Thermal management**

Preserving and keeping the right temperature inside your enclosure is vital for maximizing the average service life of your installed devices. With our ClimaSys offer you can find the right solution, be it ventilation, cooling or heating, including control units for temperature, humidity and much more.

**New product family names:**

- ClimaSys CV: *Ventilation systems*
- ClimaSys CU: *Cooling unit*
- ClimaSys CR: *Insulated resistance heaters*
- ClimaSys CC: *Thermal control*

**New!** **Our software suite**

**Spacial.pro**

Spacial.pro allows you to make switchboard proposals based on the standard Spacial™ offer. A full project with several sets of switchboards is quoted in minutes, with automatic creation of the bill of material and 2D drawings for front and side views.

**ProClima**

Calculate the right choice for your thermal management requirements, according to the environment and the electrical/electronic devices installed inside the enclosure.

**Spacial.ref and Thalassa.ref**

These digital rules assist you in selecting the appropriate components for your application from our extensive product range. The tool automates product and accessory selection to help save you time and money.

**New!** **Ventilation systems with filters**

Specially recommended for installations in which the ambient temperature is lower than the desired temperature inside the enclosure, a high protection rating is required: IP54 or IP55, and the surrounding environment is relatively clean, allowing air to enter the enclosure.

- 38 to 850 m<sup>3</sup>/h.
- 5 input voltages: AC: 400/440 V, 230 V, 115 V (50/60 Hz), DC: 48 V and 24 V.
- Broad range of accessories (filters, IP55 and EMC covers, anti-vandalism kit).

**New!** **Cooling units**

Cooling units control the temperature inside the enclosure to help ensure the correct operation of the components, regardless of the outside temperature, by separating the internal and external air circuits and reducing the humidity of the enclosure.

- Cooling power from 1100 W to 2700 W.
- According to the input voltage: 230 V (50/60 Hz); 3 X 400/440 V (50/60 Hz); 115 V (50/60 Hz).
- RAL 7035 gray and stainless steel.
- A minimum height of 1800 mm (70.9 in) and door width of 800 mm (31.5 in) or side panel width of 600 mm (23.6 in) is required to install a SLIM cooling unit in a Spacial enclosure.

**New!** **Thermal control**

Thermostats control the temperature inside the enclosure and send a signal when maximum or minimum temperature values have been reached.

- Temperature control: adjustable thermostats; single or double.
- Relative humidity control: adjustable humidistat.
- Temperature and relative humidity control: adjustable hygrotherm.

### EVLink™ Electric Vehicle Charging Stations

Our Electric Vehicle Supply Equipment (EVSE) provides power to recharge the on-board vehicle batteries in Electric Vehicles (EV) and Plug-in Hybrid Electric Vehicles (PHEV). The EVSE units are Level 2 type which can charge the vehicle batteries in as little as 3-6 hours, depending on the vehicle type and level of battery charge. The EVSE will typically be fed from a 208 V or 240 V source, two-pole 40 A circuit breaker or disconnect and will be able to provide 30 A of current to the vehicle's on-board charger. All units meet or exceed SAE J1772▲ and UL standards for electric vehicle supply equipment.

#### Schneider Electric EVSE features include:

- Integral Ground Fault Protection at 5 mA
- User friendly interface to indicate power on/off, charging, system detected faults etc.
- Heavy duty cord and connector which meet SAE J1772 standards
- Automatic reset and restart after ground fault or main power loss
- Radio Frequency Identification (RFID) authentication available for outdoor units ■
- Available in indoor/outdoor, wall and pedestal mount, single and dual charger models
- Optional advanced metering functionality available to collect and monitor energy and demand profile data ♦

EV2430WS

EV230WSR

EV230PSRR

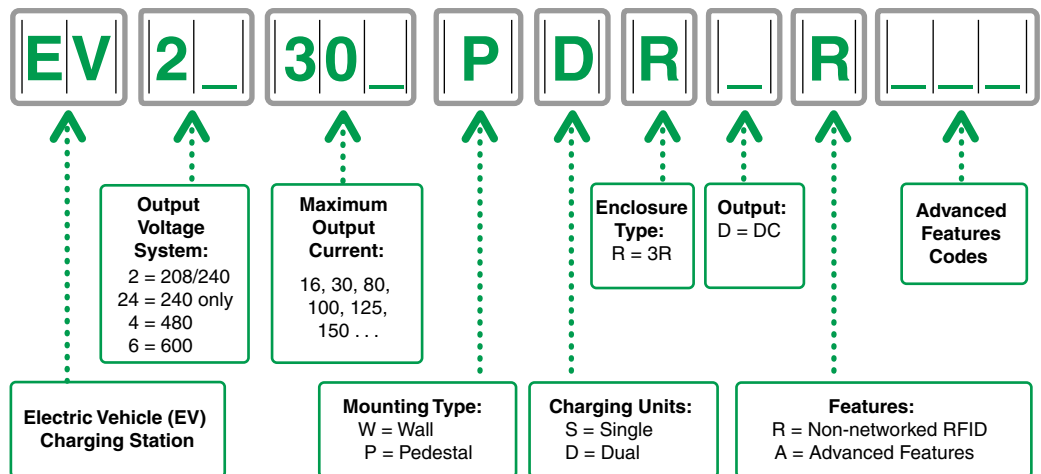

EV230PDRR

#### Coming in 2012:

- Charging Station with advanced communications and networking
- DC fast charging station which can charge 80% of EV in less than 30 minutes

Please stay tuned at [www.schneider-electric.us/go/evlink](http://www.schneider-electric.us/go/evlink)

▲ SAE J1772—standard for Electric Vehicles that defines common connectors and interfaces at various power levels for PHEV and EV established by Society of Automotive Engineers for North America.  
■ RFID—localized RFID in which the programming for the addition or removal of subscribers is done at the EVSE location.  
♦ Energy monitoring and metering options are available and can be added to provide networking and communication through an optional power meter enclosure. Please consult your local Schneider Electric sales representative for selection information or call 1-888-778-2733.

**Indoor Charging Stations (Residential Applications)**

- Interface:**
- Segmented charge and delay charge progress indicator
  - Stop Button and indicator
  - Power status and system detected fault indicator
  - Delay button and indicator

- Protection:**
- Integral Ground Fault Protection at 5 mA
  - Ground fault function tested before each charge cycle begins
  - Auto restart after ground fault or main power loss

- Enclosure:**
- Non-metallic
  - Indoor wall-mount (stud, drywall, or masonry wall)

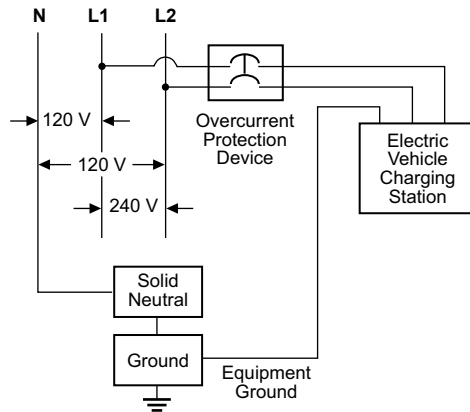

- Cable Holder:**
- Supports and helps organize the cable
  - Mounted independently from the enclosure

- Connector and Cord:**
- Complies with SAE J1772
  - Cable length: 18 ft. (5.5 m)

### Energy Efficiency Solutions Overview

Our Wiser Energy Efficiency products can give you information about your home's energy consumption and provide ways to conveniently automate energy use. Information displays can be conveniently located and easily integrated with Smart Grid energy programs. In addition, these devices provide useful information displays such as time and temperature. HVAC thermostats, an in-home display, and load controls are designed to integrate into a seamless energy control system, allowing you to easily **Make the Most of Your Energy<sup>SM</sup>**.

#### Schneider Electric Energy Efficiency Products:

- Use industry standard radio interfaces. Products are certified to the ZigBee® Smart Energy protocol
- Provide easy to use, conveniently located controls
- Signal energy with vivid color display screens
- Are designed to be integrated into Smart Grid energy efficiency programs
- Are certified to UL916, and UL489 (as applicable)
- Incorporate convenience features, such as remote thermostat control, time-of-day display, remote load control, and load scheduling
- Load controls are available in outdoor configurations

Color Based Energy Signaling

EER20100

#### Wiser In-Home Display (IHD)

- Internal rechargeable battery for power outages and convenience
- Integrates with remote measurement devices, and graphically displays energy use and signals based on demand
- Schedules Wiser components, such as load controls, load relays, and smart plugs
- Controls Wiser thermostats from remote locations
- Automatically sets time from the network
- Displays time
- Displays outdoor temperature (optional components required)

Table 29.5: Wiser In-Home Display (IHD)

Model	Industry Specifications	Power	\$ Price
EER20100	<ul style="list-style-type: none"> <li>• UL Standard 916</li> <li>• Canadian Standard CAN/CSA C22.2, No. 205</li> <li>• ZigBee® Smart Energy</li> </ul>	100–240 Vac 50–60 Hz	550.00

EER56000  
EER56100

#### Wiser Programmable Communicating Thermostats (PCT)

- Offers four programmable temperature changes per day for up to seven days
- Supports demand response through ZigBee® Smart Energy Profile
- Integrates with remote measurement devices, and graphically displays energy use and signals based on demand
- Schedules Wiser components, such as load controls, load relays, and smart plugs
- Automatically sets time from the network
- Displays outdoor temperature (optional components required)
- No batteries required, operates in four wire installations

Table 29.6: Wiser Programmable Communicating Thermostats (PCT)

EER40200

**Wiser Smart Plug**

- Supports demand response through ZigBee® Smart Energy Profile
- Plugs into 120 V electrical outlets
- Measures power used by electrical outlet loads
- Provides scheduling and remote control when used with the EER20100 Wiser In-Home Display or the EER56000/EER56100 Wiser Programmable Communicating Thermostats

**Table 29.7: Wiser Smart Plug**

EER42200  
EER42300

**Wiser Load Control Relays**

- Supports demand response through ZigBee® Smart Energy Profile
- Low voltage 120 and 240 V relays
- Measures power used by electrical outlet loads
- Provides scheduling and remote control when used with the EER20100 Wiser In-Home Display or the EER56000/EER56100 Wiser Programmable Communicating Thermostats
- EER42300 provides isolated contact outputs

EER260LLCR

**Wiser Large Load Control**

- Supports demand response through ZigBee® Smart Energy Profile
- Used with Square D™ QOPL-ILC circuit breaker devices, ordered separately
- Measures branch circuit loading (current transformer required, ordered separately)
- Provides remote control when used with the EER20100 In-Home Display or the EER56000/EER56100 Wiser Programmable Communicating Thermostats
- Provides remote disconnect switch functions

EER21200

**Wiser Ethernet Gateway**

- Allows for software monitoring, programming, and control of Wiser Energy Efficiency products via the internet
- Used with the Wiser Head End Server system

**Table 29.11: Wiser Ethernet Gateway**

Model	Industry Specifications	\$ Price
EER21100	<ul style="list-style-type: none"> <li>• ZigBee® Router type device</li> <li>• UL power adapter</li> <li>• ZigBee® Smart Energy</li> <li>• Supply voltage: 100–240 Vac, 50/60 Hz</li> </ul>	395.00
EER21200	<ul style="list-style-type: none"> <li>• ZigBee® Coordinator type device</li> <li>• UL power adapter</li> <li>• ZigBee® Smart Energy</li> <li>• Supply voltage: 100–240 Vac, 50/60 Hz</li> </ul>	395.00

EER57000

**Wiser Accessories**

- Trim ring can be used to conceal mounting imperfections, such as holes and paint lines from previous installations
- External temperature sensor provides temperature measurements when used with Wiser thermostats
- Auxiliary power supply permits Wiser thermostats to be used in specialized four wire installations

**Table 29.12: Wiser Accessories**

Model	Name	Industry Specifications	\$ Price
EER57000	Trim Ring	—	50.00
EER57100	Auxiliary Power Supply	<ul style="list-style-type: none"> <li>• UL Standard 916</li> <li>• Canadian Standard CAN/CSA C22.2, No. 205-M1983</li> </ul>	75.00

### Conext™ Series Grid Tie Inverters

The Conext™ Grid Tie Solar Inverter (Conext Series) converts photovoltaic (PV) electricity produced by solar modules into utility grade power that can be used by the home or sold to a local electrical utility. Offering high performance, clean aesthetics, innovative features, and easy installation, the Conext Series provides great value in a compact high-frequency design. The Conext Series may be installed as a single inverter for a single PV array or in a multiple inverter configuration for large PV systems or three-phase applications.

Conext™ Series  
Grid Tie Inverter

#### Features

- An NEC compliant, integrated Square D™ DC/AC disconnect eliminates the need for external DC (PV) disconnects and in some jurisdictions, AC disconnects
- Large heatsink offers excellent heat dispersion without the need for a cooling fan
- Liquid Crystal display provides instantaneous information—power level, daily and lifetime energy production, PV array voltage and current, utility voltage and frequency, time online “selling”, system troubleshooting messages, and installer-customized screens
- User-enabled Fast Sweep™ Maximum Power Point Tracking (MPPT) increases energy harvest in shaded installations
- LCD vibration sensor allows the tap of a finger to turn backlight on and easily cycle through display screens
- FCC Class B compliance

#### Installation

- Flexible Module selection due to wide PV input MPPT tracking voltage range
- Lightweight and versatile mounting bracket
- Easy access DC (PV) and AC (Utility) terminal blocks simplify wiring
- Rugged NEMA 3R inverter enclosure allows reliable indoor and outdoor installations
- Simple communications set-up for daisy-chained single phase and three-phase installation

#### Servicability

- Sealed inverter enclosure can be quickly separated from the wiring box allowing DC/AC connections to remain intact during a service event
- Ten-year standard warranty

**Table 29.13: Conext™ Inverters**

Product	Description	Part Number	\$ Price
Conext TX 2800 NA	2.8 kW inverter 208/240 V	RNW-878-2801	2040.00
Conext TX 3300 NA	3.3 kW inverter 208/240 V	RNW-878-3301	2410.00
Conext TX 3800 NA	3.8 kW inverter 208/240 V	RNW-878-3801	2575.00
Conext TX 5000 NA	5.0 kW inverter 208/240 V	RNW-878-5001	3250.00

**Table 29.14: Residential Grid-Tie Solar Package**

System Voltage	Kilowatts	Amps	DC Disconnect	Inverter	AC Disconnect	Suggested Load Center <sup>▲</sup>
250 Vdc	2.8	30	HU361RB	878-2801	D221NRB	QO130M200

600 Vdc	5.0	100	HU363RB	878-5001	D223NRB	QONQ42MS400

▲ Consult Digest Section 1 for other load center options, covers, accessories, and circuit breakers.

**NOTE:** See Digest Section 3 for additional PV switch offerings including the new UL98B 1000 Vdc PV disconnect.

Table 29.15: Specifications

Electrical Specifications (Output)				
Product Model	Conext TX 2800 NA	Conext TX 3300 NA	Conext TX 3800 NA	Conext TX 5000 NA
Nominal output power	2800 W / 2650 W	3300 W / 3100 W	3800 W / 3500 W	5000 W / 4500 W
AC output voltage (nominal)	240/208 Vac	240/208 Vac	240/208 Vac	240/208 Vac
AC output voltage range	Auto detect 240 to 208 Vac			
AC frequency (nominal)	60 Hz			
AC frequency range	59.3 to 60.5 Hz			
Max. continuous output current	11.8/13.0 A rms	14.0/15.2 A rms	16.0/16.8 A rms	21/22 A rms
Max. output over-current protection	15 A rms	20 A rms	25 A rms	30 A rms
Max. utility back-feed current	0 A			
Total harmonic distortion (THD)	THD < 3%			
Power factor	>0.99 (at rated power), >0.95 (full power range)			
Utility monitoring, islanding protection	UL 1741-2010, Ed.2 / IEEE1547			
Output characteristics	Current Source			
Output current waveform	True Sine Wave			
Electrical Specifications (Input)				
Max. Array open-circuit voltage	600 Vdc			
MPPT voltage range (CEC & CSA)	195-550 Vdc	195-550 Vdc	195-550 Vdc	240-550 Vdc
Max. input current	15.5 Adc / 14.9 Adc	18 Adc / 17.5 Adc	20.8 Adc / 19.5 Adc	22 Adc / 20 Adc
Max. array short-circuit current	24 Adc			
Reverse-polarity protection	Short-circuit diode			
Ground-fault protection	GF detection, I <sub>DIF</sub> > 1A			
Max. Peak efficiency	95.2% / 95.2%	95.6% / 95.3%	96.3% / 96%	96.7% / 96.4%
CEC Efficiency	94.5% / 94.5%	95% / 94.5%	95.5% / 95.5%	96.0% / 95.5%
Night-time power consumption	1 W			
General Specifications				
Mounting	Wall mount (mounting bracket included)			
Input and output terminal	AC and DC terminals accept wires sizes #14 to #6 AWG			
PV / Utility disconnect	Eliminates need for external PV (DC) disconnect. Complies with NEC requirements.			
Cooling	Convection cooled, fan not required			
Display	Backlit, two-line, 16-character liquid crystal display provides instantaneous power, daily and lifetime energy production, PV array voltage and current, utility voltage and frequency, time online "selling", faults messages, and installer-customizable screens			
Communications	Integrated RS232 and Xanbus™ RJ45 communication ports			
Wiring box	PV, utility, ground, and communications connections. The inverter can be separated from the wiring box.			
Warranty	Ten-year standard			
Part number (negative ground)	878-2801	878-3301	878-3801	878-5001
Environmental Specifications				
Operating Temperature Range	-13°F to 149°F (-25°C to 65°C)			
Enclosure Type	NEMA 3R (Outdoor Rated)			
Inverter Weight	31.8 kg (70.1 lbs)	32.2 kg (71 lbs)	36.5 kg (80.5 lbs)	38.9 kg (85.8 lbs)
Inverter dimensions (H x W x D)	89.3 x 40.3 x 18.5 cm 35.2 x 15.9 x 7.3 in.	89.3 x 40.3 x 18.5 cm 35.2 x 15.9 x 7.3 in.	98.8 x 40.3 x 18.5 cm 38.9 x 16 x 7.3 in.	98.8 x 40.3 x 18.5 cm 38.9 x 16 x 7.3 in.
Shipping dimensions (H x W x D)	107.0 x 57.7 x 26.0 cm 42.1 x 22.7 x 10.2 in.	107.0 x 57.7 x 26.0 cm 42.1 x 22.7 x 10.2 in.	116.5 x 57.7 x 26.0 cm 45.8 x 22.7 x 10.2 in.	116.5 x 57.7 x 26.0 cm 45.8 x 22.7 x 10.2 in.
Regulatory Approvals				
CSA Certified to UL 1741-2010 Ed.2 (Include IEEE 1547)—inverters, converters, controllers and interconnection system equipment for use with distributed energy resources; and CSA C22.2 No 107.1 FCC Class B general use power supplies.

- smart plug 29-7

**X**

**XAL 22 mm control stations** 19-100

**XB4**

- accessories 19-39
- common operators, complete with contact blocks 19-8
- complete devices 19-23
- electrical components 19-34
- illuminated operators 19-32
- pilot lights 19-31
- selector switches 19-29
- specialty operators 19-30

**XB4R**

- wireless, batteryless push buttons 19-63

**XB5**

- accessories 19-60
- common operators, complete with contact blocks 19-8
- complete devices 19-42
- components 19-63– 19-64
- electrical components 19-55
- pilot lights 19-51
- selector switches 19-49
- specialty operators 19-50

**XB5 20 mm**

- components 19-66

**XB5R**

- plastic push buttons 19-63

**XB5S**

- biometric switches 19-65

**XB6**

- accessories 19-20
- characteristics and complete devices 19-12
- electrical components 19-15
- illuminated operators 19-16
- keyed selector switches 19-19
- non-illuminated operators 19-17
- selector switches 19-18

**XCK limit switches** 21-12– 21-13

**XCKJ industrial format EN 50041** 21-24– 21-25

**XCKJ precision switches with direct acting contacts**

- limit switches 21-26

**XCKL**

- exploded view 21-20– 21-21

**XCKL components** 21-23

**XCKM limit switches** 21-20– 21-21

**XCKS** 21-19

**XCMD limit switches** 21-10– 21-11

**XCS safety interlock switches** 25-7

**XCS safety limit switches** 25-8

**XCSDM non-contact safety interlock switches** 25-7

**XCSDM safety limit switches** 25-8

**XCSP/XCSD**

- safety limit switches 25-8

**XML international pressure switches** 22-10– 22-12

**XMLF electronic pressure switches** 22-8– 22-9

**XMLG electronic pressure transmitters and switches** 22-4

**XMLK electronic pressure transmitters** 22-6

**XPS safety relays** 25-3– 25-4

**XPSMC safety controllers** 25-3– 25-4

**XPSMF safety PLCs** 25-3, 25-5

**XS basic series proximity sensors** 20-8

**XS plastic rectangular proximity sensors** 20-5

**XS plastic tubular proximity sensors** 20-6

**XUB tubular photoelectric sensors** 20-2

**XUM miniature, XUK and XUX compact photoelectric sensors** 20-4

**XUSLB 2-box light curtain** 25-6

**XUSLD 2-box light curtain** 25-6

**XUSLP perimeter guard** 25-6

**XUV and XXV ultrasonic sensors** 20-10

**XVB 70 mm tower lights** 19-110– 19-112

**XVC tower lights** 19-108– 19-109

**XVE tower light components** 19-113

**XVP 50 mm illuminated indicating banks**

- accessories 19-115

**XVP tower light components** 19-114

**XVR rotating lights** 19-107

**XVS**

- electronic alarms 19-116
- sirens 19-116

**XY2 cable pull switches** 25-8

**Z**

**ZCKD01** 21-19

**ZCKD02** 21-19

**ZCKD31** 21-19

**ZCKD39** 21-19

**ZCKD41** 21-19

**ZCKD49** 21-19

## Product Locator Index

Alphabetical Listing

<b>ZCKD59</b>	21-19	RM17UBE voltage measurement relay	23-34
<b>ZCKS</b>	21-19	RM35AT temperature control relay	23-36
<b>Zelio</b>		RM35BA10 pump control relay	23-35
Logic 2 smart relays	23-39– 23-40	RM35HZ frequency control relay	23-36
RE48 timer	23-26	RM35JA current measurement relay	23-32
RE7 timer	23-27– 23-28	RM35L level control relay	23-35
RE8 timer	23-29	RM35S speed control relay	23-36
RE9 timer	23-29	RM35UA1 voltage measurement relay	23-34
REG temperature controller	23-31	RM35UB voltage measurement relay	23-34
REXL timer	23-26	RPM plug-in relay	23-6– 23-7
RM analog interface module	23-38	RSB interface relay	23-3
RM17JC current measurement relay	23-32	RSE11 timer	23-26
RM17T phase measurement relay	23-33	RSL slim interface relay	23-2
RM17UAS voltage measurement relay	23-34	RUM plug-in relay	23-8– 23-9
RM17UB voltage measurement relay	23-34	RXM miniature plug-in relay	23-4– 23-5
		SSR solid state relay	23-25

## Conductor Ampacity Based on the 2011 National Electrical Code®

Ampacity based on NEC Table 310.15(B)(16) (Formerly Table 310.16) – Allowable Ampacities of Insulated Conductors Rated Up to and Including 2000 Volts, 60° Through 90°C (140° Through 194°F), Not More Than Three Current-Carrying Conductors in Raceway, Cable, or Earth (Directly Buried), Based on Ambient Temperature of 30°C (86°F)\*

For conduit fill see 2011 NEC Annex C.

For Information on Temperature Ratings of Terminations to Equipment See NEC 110.14(C).

Size AWG or kcmil	Temperature Rating of Conductor. [See Table 310.104(A).]						Size AWG or kcmil
	60°C (140°F)	75°C (167°F)	90°C (194°F)	60°C (140°F)	75°C (167°F)	90°C (194°F)	
	Types TW, UF	Types RHW, THHW, THW, THWN, XHHW, USE, ZW	Types TBS, SA, SIS, FEP, FEPB, MI, RHH, RHW-2, THHN, THHW, THW-2, THWN-2, USE-2, XHH, XHHW, XHHW-2, ZW-2	Types TW, UF	Types RH, RHW, THHW, THW, THWN, XHHW, USE	Types TBS, SA, SIS, THHN, THHW, THW-2, THWN-2, RHH, RHW-2, USE-2, XHH, XHHW, XHHW-2, ZW-2

2000	555	655	750	470	560	630	2000

\* Refer to 310.15(B)(2)(a) for the ampacity correction factors where the ambient temperature is other than 30°C (86°F).

\*\* See Section 240.4 (D) for conductor overcurrent protection limitations.

### Ratings for 120/240 volts, 3-Wire, Single-Phase Dwelling Services— See NEC Table 310.15 (B)(7)

These are permitted ratings for Dwelling Unit service and feeder conductors which carry the total load of the dwelling.

Rating (amps)	100	110	125	150	175	200	225	250	300	350	400
Copper	4	3	2	1	1/0	2/0	3/0	4/0	250 kcmil	350 kcmil	400 kcmil
Aluminum	2	1	1/0	2/0	3/0	4/0	250 kcmil	300 kcmil	350 kcmil	500 kcmil	600 kcmil

### NEC 210.19 Conductors — Minimum Ampacity and Size

#### (A) Branch Circuit Not More Than 600 Volts.

(1) **General.** Branch-circuit conductors shall have an ampacity not less than the maximum load to be served. Where a branch circuit supplies continuous loads or any combination of continuous and noncontinuous loads, the minimum branch-circuit conductor size, before the application of any adjustment or correction factors, shall have an allowable ampacity not less than the noncontinuous load plus 125 percent of the continuous load.

## Correction Factors

Based on NEC Table 310.15(B)(2)(a)[Formerly Table 310(16)] – Ambient Temperature Correction Factors Based on 30°C (86°F)

Ambient Temperature (°C)	Temperature Rating of Conductor			Ambient Temperature (°F)
	60°C	75°C	90°C	
10 or less	1.29	1.20	1.15	50 or less
11–15	1.22	1.15	1.12	51–59
16–20	1.15	1.11	1.08	60–68
21–25	1.08	1.05	1.04	69–77
26–30	1.00	1.00	1.00	78–86
31–35	0.91	0.94	0.96	87–95
36–40	0.82	0.88	0.91	96–104
41–45	0.71	0.82	0.87	105–113
46–50	0.58	0.75	0.82	114–122
51–55	0.41	0.67	0.76	123–131
56–60	—	0.58	0.71	132–140
61–65	—	0.47	0.65	141–149
66–70	—	0.33	0.58	150–158
71–75	—	—	0.50	159–167
76–80	—	—	0.41	168–176
81–85	—	—	0.29	177–185

### Adjustment Factors – See NEC Table 310.15 (B)(3)(a)

Where the number of current-carrying conductors in a raceway or cable exceeds three, the allowable ampacities shall be reduced as shown in the following table:

Number of Conductors***	Percent of Values in Table 310.15(B)(16) through Table 310.15(B)(19) as Adjusted for Ambient Temperature if Necessary
4 through 6	80
7 through 9	70
10 through 20	50
21 through 30	45
31 through 40	40
41 and Above	35

\*\*\* Number of conductors is the total number of conductor in the raceway or cable adjusted in accordance with 310.15 (B)(5) and (6).

### NEC 210.20(A) Continuous and Noncontinuous Loads

Where a branch-circuit supplies continuous loads or any combination of continuous and noncontinuous loads, the rating of the overcurrent device shall not be less than the noncontinuous load plus 125 percent of the continuous load.

### NEC 240.4 Protection of Conductors

Conductors, other than flexible cords, flexible cables, and fixture wires, shall be protected against overcurrent in accordance with their ampacities specified in 310.15, unless otherwise permitted or required in 240.4(A) through (G).

### NEC 240.4 (D) Small Conductors

Unless specifically permitted in 240.4(E) or (G), the overcurrent protection shall not exceed that required by (D)(1) through (D)(7) after any correction factors for ambient temperature and number of conductors have been applied.

### NEC 430.22(A) Direct-Current Motor-Rectifier Supplied.

For dc motors operating from a rectified power supply, the conductor ampacity on the input of the rectifier shall not be less than 125 percent of the rated input current to the rectifier. For dc motors operating from a rectified single-phase power supply, the conductors between the field wiring output terminals of the rectifier and the motor shall have an ampacity of not less than the following percentages of the motor full-load current rating:

- (1) Where a rectifier bridge of the single-phase, half-wave type is used, 190 percent.
- (2) Where a rectifier bridge of the single-phase, full-wave type is used, 150 percent.

## Have questions? Need technical support or on-site service?

Now there's one toll-free number to get all the information you need.

 **1-888-778-2733**

---

### Customer Care Center

The Customer Care Center (CCC) is a single point of contact where qualified personnel answer your customer service and technical support questions.

Serving all Schneider Electric authorized distributors and customers anywhere in the United States.

---

### Schneider Electric Services

Schneider Electric Services provides you with power, automation and control, and energy management services to support the lifecycle of your system, process or installation. Our solutions help you get the most out of your investment and keep your facility at peak operational performance. Any brand. Any industry. Any time.
