NEWEST linkable MEMBER

- UCLD SERIES -

ADJUSTABLE SWIVEL HEAD DESIGN

Introducing the new UCLD Series with integral driver, swivel head and linkable functionality – a product that is both versatile and easy to install.

The integral driver eliminates the need for an external power source, allowing for direct-wire or plug-in capability. The inclusion of a dimmable swivel head allows you to direct light exactly where and how you want it. In addition, the light was designed with linkable functionality – allowing plug-and-play connectivity of up to 340 fixture watts.

It illuminates a warm, 2700K or 3000K CCT and has a 50,000 hour L70 rated life. The linkable LED Cabinet Light is available in white, bronze or brushed nickel and includes a 5 year limited warranty. It is ENERGY STAR® & Title 24 qualified and CUL listed to US and Canadian safety standards.

The UCLD Series is the latest addition to Lithonia's Linkable Under Cabinet family, and links seamlessly with linkable Xenon and T5 Fluorescent under cabinet products.

Lithonia Lighting's Linkable family is designed for versatility and hassle-free installation. Each fixture can link together to create a daisy-chain of fixtures that can be operated by a single switch. Each member of the linkable family can be easily interchanged to upgrade your existing Lithonia fixtures.

INSTALL &

INSTALLATION AS EASY AS 1-2-3

STEP 1: POWER UP

Select and connect power source for fixture - plug, direct wire or splice box.

STEP 2: MOUNT UP

Mount fixture in desired location.

STEP 3: LINK UP

Link up multiple fixtures using connector cords.
