QuickShip

Project schedules are crucial. Your reputation is crucial. Quality at a fair price is crucial. Bruck offers you peace of mind with our most popular LED fixtures made here in the USA. Stay competitive and flexible with the Bruck QuickShip program. A 2-5 production day lead time allows for stress free projects. QuickShip products are below. Call Bruck customer service today for more information or to place an order. Its quick and simple.

QuickShip items must be on Separate Purchase Order clearly marked QuickShip Additional or alternative products may be entered, must be approved, if inventory allows.

- Chroma Z15 LED Track Heads up to 50 units
- GEO 2 circuit, 2 neutral track system, matte silver and white finish
- ECO 1 circuit track system, matte silver and white finish
- Zonyx Track 1 circuit line voltage track, matte chrome finish
- QuickShip orders must be received before 10am PST for that day to be included. After 10am, shipping will be based on the following business day as first day.
- QuickShip orders adhere to all standard Bruck terms and conditions.
- Change order of any type may re-set lead time, although our efforts will be to ship on time.

ECO System

Eco Track

Eco Track

ECO Track is a 1 circuit, 20A rated, line voltage track system. Its lightweight, compact elegant design is easy to install saving on overall project costs. The track is a 120v 1-circuit system with 1 neutral. The rail is constructed of extruded aluminum section and the live circuit and neutral conductors are made of heavy gauge copper. ECO Track can be surface mounted, on drop rods or wire pendant suspension. Offered in white, matte silver or black. End caps are included with each piece of track.

Ordering Code:

example: **370GES - 208 - bk**

Technical Specs

- 2400VA maximum
- 120VAC input
- 20-amp circuit
- #12-gauge copper conductors are co-extruded in PVC insulator.
- Suitable for dry location only
- made for Bruck by Nordic Aluminum and listed under the name Global Trac.

Base	Length	Shape	Finish
370GES ECO Track	204 4 ft	straight	bk black
	208 8 ft	-1 factory bent	sv matte silver
	212 12 ft		wh white

Eco End Cap

End Cap for Recessed Track Mount for Bruck's ECO track. Offered in white, matte silver or black.

				wh	white

Geo Circuit Breaker CB11 / CB12

This power feed circuit breaker limits the allowable electric load that can be put on the circuit.

Technical Specs

- 2400VA maximum x 2
- 120VAC input
- Two 20-amp circuits
- made for Bruck and listed under the name Global Trac.

Ordering Code:

example: 380TEK - 11cb - bk - /050

Base		Type		Finish		Circuit Breaker	
380TEK	GEO	11cb	circuit breaker	bk	black	/010	1 amp circuit breaker
		12cb	circuit breaker, mirror	sv	matte silver	/020	2 amp circuit breaker
				wh	white	/030	3 amp circuit breaker
						/050	5 amp circuit breaker
						/070	7 amp circuit breaker
						/100	10 amp circuit breaker
						/120	12 amp circuit breaker

ZONYX TRACK

The Zonyx Track in lengths of 4ft, 6ft and 8ft is made out of anodized aluminum with insulated conductors and copper ground wire. Track is field bendable to a minimum of a 18" radius using bending machine. Each track section includes two (2) insulated end caps that are secured with set screws.

The Best Finish in the Industry

STRAIGHT SQUARE COMPOSITE POLES

MARATHON
COMPOSITE
POLES

Straight Square Composite Poles offer a unique solution to today's demanding requirements for lighting standards that enhance design. Their contemporary look is favored by architects, engineers and planners.

Benefits

- Ease of installation
- Lightweight for easy handling
- Will not rust, rot or corrode
- Dent resistant
- Non-conductive

4" Square ZA and ZB Series (Anchor Base and Direct Burial)

- 4"x4" Straight Square
- Mounting Heights to 25'
- Smooth Finish
- Multiple Color Options
- Tenon Top or Capped for Side Drilling
- Anchor Bolts Included (5/8"x21"x3")
- Base Cover Included
- 8" Bolt Circle

5" Square ZA and ZB Series (Anchor Base and Direct Burial)

- 5"x5" Straight Square
- Mounting Heights to 30'
- Smooth Finish
- Multiple Color Options
- Tenon Top or Capped for Side Drilling
- Anchor Bolts Included (3/4"x30"x3")
- Base Cover Included
- 10"- 12.5" Bolt Circle

- Lead time is 2 weeks
- Freight Allowed \$2,000.00, Prepaid & add under \$2,000.00
- ZA - Include anchor bolts and base cover
- ZA - Pre-shipped Anchor Bolts are prepaid and add
- Standard colors are Black, Bronze, White and Gray
- Standard tenon sizes are 2 3/8" and 3"
- For cut down poles use full length pole
- Contact factory for pricing regarding options or modifications
- Advise Size, Location and Orientation of Drilling Requirements (ref. Drawing)

Gazelle Express 2013

Updated Program Details

- 13 specification quality, shallow depth, energy efficient LED and CFL luminaires.
- Orders received by 10:00 AM (Eastern time) ship by 5:00 pm within 72 hours.
- Fixtures ship complete. Freight allowed: Over \$7000.
- 50 luminaires (maximum) per Type on each purchase order (or consult RSM).
- All LED luminaires standard with 0-10V dimming, multi-voltage (120-277V) and 3500°K (see below for 30K or 41K).
- All compact fluorescent products standard with multi-wattage and multi-voltage (120-277V) ballast.
- U.L. Listed: Wet Locations (LED)
Wet, Damp, Dry Locations, Covered Ceilings (CFL)

Options offered for LED luminaires:

- 45 Gasket between trim flange and ceiling
- 46 Gasket between lens and trim
- EI Remote emergency inverter for 100% rated lumen output; 120 or 277V, 60 Hz input; specify voltage
- NFL Narrow flood for GRR-04002 (0.5 SC), GRR-06019 (0.4 SC) or GRS-04042 (0.4 SC)
- SPT Spot distribution for GRR-04002 (0.4 SC) or GRS-04042 (0.3 SC)
- 30K 3000°K color temperature instead of 3500°K
- 41K 4100°K color temperature instead of 3500°K

Options offered for CFL luminaires:

- 39 Dimming ballast - Lutron EcoSystem 5% (120-277V)
- 45 Gasket between trim flange and ceiling
- 46 Gasket between lens and trim
- 73 Internal one lamp EM ballast: specify voltage

Please consult www.kirlinlighting.com for the most current and complete luminaire and Gazelle Express Program information

lighting since 1895

0812

Non-accessible Ceilings

A1 0°–15° slope

Designed for flat or gently sloping non-accessible ceilings (0°–15° slope) where the electrical box is pre-installed either surface mounted or recessed in the ceiling. System conceals mounting hardware to provide a clean, finished look.

- Mountable on 0°–15° sloped ceiling
- Stranded aircraft cable with full vertical adjustment at fixture
- 4" octagonal box (supplied by others)
- Canopy is 5-1/4" diameter x 3/4" high for power and non-power mounts
- Optional cover ring available for surface mounted power (not shown)

Quantity

Maximum 250 mounts

Suspension Length

24"

48"

T-bar Ceilings

A2 Fixed position mount (standard tee, slot tee, tegular tile)

Uses fixed placement of 1/4"–20 threaded rod (supplied by others) and integral electrical box (supplied by Ledalite) to work with all T-bar ceiling types.

- Stranded aircraft cable with full vertical adjustment at fixture
- Integral electrical box (supplied by Ledalite)
- Canopy is 3" diameter x 7/32" high for power and non-power mounts
- Tile cut-out is 2-1/2" diameter for power or 3/4" diameter for non-power
- 1/4"–20 threaded rod (supplied by others)

Power Cord Options

4 Wire

5 Wire

A5 Variable position mount (standard tee, standard tile*)

Variable position mount allows flexible placement of luminaires in the tile. Good for products with off-grid mounts or spaces where ducting and/or other structural barriers require mounting flexibility. *Note: Consult factory for non-standard ceiling types and tiles.

- Aligned by T-bar on 2' spacing and secured to structure
- Adjusts to both 1" and 1-1/2" high T-bar ceiling types
- Stranded aircraft cable with full vertical adjustment at fixture
- 4" square box (supplied by others)
- Canopy is 3" diameter x 7/32" high for power and non-power mounts
- Tile cut-out is 2-1/2" diameter for power and non-power mounts

A6-1 On-grid mount (standard 15/16")

A6-2 On-grid mount (standard 9/16")

A6-3 On-grid mount (slot 9/16" x 5/16")

On-grid mounting system clips directly to tee in either orientation. Quick and simple to install.

- Supported by T-bar and secured to structure
- Stranded aircraft cable with full vertical adjustment at fixture
- 4" square box (supplied by others)
- Canopy is 3-3/4" diameter x 7/32" high for power and non-power mounts
- 65 lbs maximum static load

Note: Supports T-bar (15/16" and 9/16") and Slot T-bar (9/16" x 5/16") ceiling types. Compatible with Ledalite fixtures that provide 4', 8' or 12' mount spacing. To meet seismic requirements, additional tie-offs may be required. Consult local codes.

Order cantilever hangers separately:

HSC-02-18-Q
HSD-02-18-Q

18" hanger, wall plate, semigloss white, intermediate
18" hanger, wall plate, semigloss white, end

For individually mounted luminaires, order two end hangers for each reflector.

For a continuous row, order two end hangers. To determine the quantity of intermediate hangers, total the number of reflectors in the row and subtract one. Example: A row of five reflectors requires two end hangers and four intermediate hangers.

S205 - small semi-recessed wall washer with hood, integral driver, overlapping trim, semigloss white, 700mA, 3000K/80+ CRI

G3 LED PARKING GARAGE & CANOPY

G3 Single LED Array

G3 Dual LED Array

PHILIPS GARDCO, LED PARKING GARAGE & UNDER CANOPY, G3

The Philips Gardco G3 parking garage luminaire combines excellent performance with value, providing one of the most energy efficient lighting solutions for the energy and budget conscious. A complete selection of optical systems are available, including a concentrated downlight for use at entrances or at higher mounting heights. G3 luminaires are available with dimming, as well as motion response technology to expand potential energy savings. The G3 is also available with the LimeLight Wireless Lighting Control System.

1. Only available in 120 or 277V.
2. See page 5 for more information on motion sensor provided.
3. Available with luminaires featuring dual LED arrays only.
4. Only available in 120 through 277V.
5. G3-RC luminaires must be configured and quoted by factory prior to ordering.
G3-RC luminaires rated to 35°C
6. Available with 38LA single LED array luminaire only.

7. G3-EM configuration not available for use in Canada.
8. Consult factory. Warm White may increase lead time.
9. 120 through 277V Only. Specify actual input voltage.
10. 'BX' bird excluding shroud is for 'PB-NP' pendant mount only.
Field installed and requires 12" minimum pendant length. Pendant by others.
11. For use with 'MR' motion response when field programming is required.
If desired, only one programmer is needed per job.
12. Not available with 350 or 530mA drive currents.

Accessories (Order Separately)

FS1R-100⁹ – MR hand held programmer (For use with 'MR' motion response when field programming is required). If desired, only one is needed per job.

Specifications

General Description

The Philips Gardco G3 parking garage luminaire combines excellent performance with value, providing one of the most energy efficient lighting solutions for the energy and budget conscious. A complete selection of optical systems are available, including a concentrated downlight for use at entrances or at higher mounting heights. G3 luminaires are available with dimming, as well as motion response technology to expand potential energy savings. The G3 is also available with the LimeLight™ Wireless Lighting Control System.

Housing

Modular die-cast driver housing with one to four die-cast LED array heatsink assemblies.

IP Rating

IP66 rated driver housing with dedicated IP66 optical assemblies. Motion response luminaire are rated IP65.

Energy saving benefits

System efficacy up to 109 lms/W with significant energy savings over PSMH systems less controls. Optional MR motion response sensor provides added energy savings during unoccupied periods and works as a 'Smart Luminaire' requiring no added wiring or commissioning at install.

Electrical

Driver efficiency (>90% standard). 120-480V available (restrictions apply). Temp range: -40°C (-40°F) to 40°C (104°F). Open/short circuit protection. Optional 0-10V dimming to 10% power. RoHS compliant. Surge protector standard and is in accordance with IEEE / ANSI C62.41.2 guidelines, with a surge current rating of 10,000 amps. 2-73VAR-3270 features a variable driver that allows for drive current to be switched between 350 mA, 410 mA, 530 mA, or 700 mA. Variable driver ships as a 700 mA.

LED Board and Array

Luxeon R LED only: 94-120 lms/W, System only: 80-109 lms/W. Color temps: 3000K, 4000K, 5700K +/- 250K. Minimum CRI of 70. Aluminum metal clad board. RoHS compliant.

LED Performance:

PREDICTED LUMEN DEPRECIATION DATA ¹⁹				
Ambient Temperature °C	Driver mA	Calculated L ₇₀ Hours ^{19,20}	L ₇₀ Per TM-21 ^{20,21}	Lumen Maintenance % @ 60,000 hours
Up to 40 °C	Up to 1050 mA	> 350,000 Hours	> 54,000 Hours	97.1%
^{19.} Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions. ^{20.} L ₇₀ is the predicted time when LED performance depreciates to 70% of initial lumen output. ^{21.} Calculated per IESNA TM21-11. Published L ₇₀ hours limited to 6 times actual LED test hours.				

LED Thermal Management

The housing design provides thermal radiation fins in the upper housing to provide the excellent thermal management critical to long LED system life.

Optical Systems

Type 5 symmetrical, Type 3 asymmetrical, Type 1R rectangular and CD concentrated downlight. Type 1R is designed to meet IES minimums with one luminaire per parking bay compared to the typical two per bay. Diffuse lens is available with Type 5 to limit perceived luminaire brightness, resulting in reduced performance.

Mounting

A die formed 14 ga. galvanized steel plate is supplied for mounting to a recessed, surface, or rigid pendant hung 4" (10.16 cm) j-box (standard j-box and rigid pendant by others). An integral hanger tab on the plate supports the luminaire during wiring. All pendants, including rigid pendants and swivel pendants (utilized with the balanced j-box PB-NP option), are supplied by others.

Caution: Philips Gardco is not responsible for failure of mounting components supplied by others. Proper care should be exercised in mounting component selection to insure adequate luminaire support, given luminaire weight, vibration potential and thermal conditions present in the application. If luminaires are supported solely by screws into a composite j-box, additional support directly to structure is recommended. Failure to properly support the luminaire may cause damage or injury, for which Philips Gardco is not responsible.

G3-RC Luminaires

Luminaires are provided only as part of a complete parking garage control system. The system includes the luminaire with wireless remote control module and motion sensor, and all components and services that comprise the LimeLight™ Wireless Lighting Control System. The entire system must be configured and factory quoted by Philips Gardco prior to ordering.

Motion Sensors

G3-MR, G3-MRCP luminaires may be specified for additional energy savings during unoccupied periods. See page 5 for detailed information.

G3-EM Luminaires

When power is lost, G3-EM luminaires provide emergency light output, for a minimum of 90 minutes. Luminaires include the Tenergy emergency battery pack, model 11867. A combined Indicator Light / Test Switch is provided as part of the door frame and lens on every G3-EM luminaire. G3-EM is suitable for use in ambient temperature conditions from 40°C (104°F) maximum to -10°C (14°F) minimum. G3-EM configuration is not available for use in Canada.

Listings

ETL/cETL listed to the UL 1598 standard, suitable for Wet Locations. Suitable for use in ambients from -40° to 40°C (-40° to 104°F). The quality systems of this facility have been registered by UL to the ISO 9001 series standards. G3 luminaires with Type-3, 5, SDL and 1R optics, equipped with Cool White and Neutral White LEDs only, are DesignLights Consortium® qualified.

Finish

Each luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) textured polyester powdercoat finish. Standard finish of all diecast assemblies shall be Natural Aluminum paint.

Warranty

G3 Luminaires feature a 5 year limited warranty. LED luminaires with LED arrays feature a 5 year limited warranty covering the LED arrays. LED drivers are covered by a 5 year limited warranty. PIR sensors carry a 5 year limited warranty from the sensor manufacturer.

Motion Response Luminaires

Motion Sensors

G3-MR luminaires include a passive infrared (PIR) motion sensor (WattStopper® FSP-211 equipped with an FS-L2V lens) capable of detecting motion within 22 feet of the sensor, 360° around the luminaire, when placed at an 8 foot mounting height. The PIR sensor is mounted as indicated in drawings on page 3. Available in 120V or 277V input only. Motion sensor off state power is 0.0 watts.

In Motion Response (MR) luminaires, when no motion is detected for 10 minutes, the Motion Response system reduces the wattage by 90%, to 10% of the normal constant wattage, reducing the light level accordingly. When motion is detected by the PIR, the luminaire returns to full wattage and full light output. Dimming on low is factory set to 90% with duration set at 10 minutes.

FS1R-100 Wireless Remote Programming Tool

The FS1R-100 Remote Programming Tool accessory permits adjustment of sensor settings, including duration and dimming level on low, without the need to connect any wires to the luminaire.

The FS1R-100 Wireless IR Programming Tool is a handheld tool for setup and testing of WattStopper FSP-211. It provides wireless access to the FSP-211 sensors for setup and parameter changes.

The FS1R-100 display shows menus and prompts to lead you through each process. The navigation pad provides a familiar way to navigate through the customization fields.

Within a certain mounting height of the sensor, the FS1R-100 allows modification of the system without requiring ladders or tools simply with a touch of a few buttons.

The FS1R-100 IR transceiver allows bi-directional communication between the FSP-211 and the FS1R-100 programming tool. Simple menu screens let you see the current status of the system and make changes. It can change FSP-211 sensor parameters such as high/low mode, sensitivity, time delay, cut off and more. With the FS1R-100 you can also establish and store FSP-211 parameter profiles.

The FS1R-100 operates on three standard 1.5V AAA Alkaline batteries or three rechargeable AAA NiMH batteries. The battery status displays in the upper right corner of the display. Three bars next to BAT= indicates a full battery charge. A warning appears on the display when the battery level falls below a minimum acceptable level. To conserve battery power, the FS1R-100 automatically shuts off 10 minutes after the last key press.

You navigate from one field to another using (up) or (down) arrow keys. The active field is indicated by flashing (alternates between yellow text on black background and black text on yellow background.)

Once active, use the Select button to move to a menu or function within the active field. Value fields are used to adjust parameter settings. They are shown in "less-than/greater-than" symbols: <value>. Once active, change them using (left) and (right) arrow keys. In general the up key increments and the down key decrements a value. Selections wrap-around if you continue to press the key beyond maximum or minimum values. Moving away from the value field overwrites the original value. The Home button takes you to the main menu. The Back button can be thought of as an undo function. It takes you back one screen. Changes that were in process prior to pressing the key are lost.

More information on the FS1R-100 Remote Programming Tool is available at wattstopper.com.

Landscape Lighting Stocking Guide

Philips Hadco

PHILIPS
HADCO

DISTRIBUTOR STOCK GUIDE

Philips is committed to providing our customers with the products they need when they need them. This stock guide contains hundreds of our best selling Philips luminaires and controls. Our commitment is to ship these items within 24-48 hours from the time the order is entered and received by our Philips warehouses.

Customer Service

Philips is putting our customers first. We will be the preferred lighting solutions partner by delivering innovative lighting solutions and providing an outstanding sales and service experience through a streamlined approach to our portfolio and our organization. For customers, our streamlined approach means orders for any brand or any product can be placed through one customer service department. This set-up improves our efficiency and increases our response time to our customers for quotations, order processing, technical support, warranties and more!

Philips Contact Center: 1-855-486-2216

Fax Orders: 1-800-519-2696

EDI is available to simplify your operations and improve efficiency.

Warehouse Legend and Stock Availability

Philips Lighting maintains stock levels of our lighting products in Carrollton, Texas (C) for the HADCO Landscape product line.

Stock orders for large quantities should be confirmed by customer service prior to order placement.

In order to avoid delays, it is recommended that stock orders be "stand alone" so that they may be shipped within the promised time-frame.

Terms and Conditions may vary by product family. Please consult your Philips sales representative for relevant warranty, freight claims, etc...

Our delivery promise is backed by a significant investment in finished goods and component inventory. If any unforeseen issues arise or if order volume exceeds maximum order quantity, we will do our best to meet your needs.

Philips Luminaire Smart Guide

Philips Lighting is delighted to announce that we are expanding our successful service program to better meet your need for predictable lead times of our luminaire products. The program started in July 2013 with all Lightolier branded Downlights, Accent/Track and Decorative Lighting and has been very well received. With this new January 2014 edition, the guide now includes all Philips Day-Brite, Chloride and Lightolier Indoor Luminaires.

The goal of our service program is to ensure we fully support your shelf stocking requirements and provide you with reliable leadtimes to address the demanding timelines of construction and retrofit lighting projects. This program allows you to select the product and corresponding lead time to meet the needs of your specific customer's project. We have developed the following categories:

- **Service Smart products** are in stock will be shipped in 48hrs from our warehouses*.
- **Distributor Stock products** are a subset of the Service Smart items that should be maintained on distributor shelves at all times to manage everyday contractor demand.
- **Spec Smart products** will be assembled to order and ship within 2 weeks from our factories

PLEASE SEE PAGE 163 FOR THE DISTRIBUTOR
LUMINAIRE OUTDOOR STOCK GUIDE

In this new Smart Service Guide, you will find all Service Smart and Spec Smart items, stock locations, as well as an indication of our recommended distributor shelf stock items. This new guide combines our previous Customer Service Offering and the indoor luminaires section of our Distributor Luminaire Stock Guide. Please refer to the separate digital Distributor Luminaire Outdoor Stock Guide for information on outdoor distributor shelf stock items until the full outdoor portfolio is rolled into the Smart Service Guide in the future.

Our commitment to you

- Our delivery promise is backed by a significant investment in finished goods and component inventory. If any unforeseen issues arise or if order volume exceeds maximum order quantity, we will do our best to meet your needs and confirm an acceptable ship date.
- Standard lead time products will ship within 6 weeks, while lead times for special, made to order and custom configured products can be confirmed by contacting the order desk.
- Lead time is from the time the order is entered and received by our warehouse. Our goal is to enter orders within 1 business day of receipt.
- To enable fast order entry, orders must be received with complete and correct catalog numbers and reference to the source of pricing (i.e. quote number or pricing program). Please reference "Smart Guide" on your orders for product in this guide.
- In order to avoid delays, it is recommended that stock orders be "stand alone" so that they may be shipped within the promised time-frame.
- To ensure we satisfy all our customers optimally and meet the committed lead times, maximum order quantities may apply. If the order exceeds the set threshold, Philips will contact you to work out a feasible schedule for your large order. It is always advised to work with your Philips representative to give advance notice of your large order.

In case you have questions, please contact your sales representative or Customer Service.

Philips Contact Center: 1-855-486-2216

Warehouse legend and stock availability

Philips Lighting maintains stock levels of our luminaires at multiple warehouses. Our warehouses are located in multiple regions across the US in order to provide our customers with quick access to the inventory you require. Look for the code in the "Stocked In" column of this Smart Service Guide.

Warehouse legend:

C = Carrollton, Texas

F = Fontana, California

N = Norwich, Connecticut

Terms and Conditions

Freight Terms: Individual order minimum of \$1,000;

\$100 shipping and handling fee for orders less than \$1,000.

1% 10th Prox 2nd, Net 25th Prox 2nd for Stock Orders

1% 10th Prox, Net 25th Prox for Drop Ship/Project Business

ZOOM! 10 Days Terms & Conditions

- ZOOM! 10 Days products ship within (10) business days if received by 12:00pm ET. ZOOM! 10 Days orders received after 12:00pm ET ship within (11) business days.
- Place your order through your Zumtobel client services representative.
- Maximum quantities are listed on each page. For orders requiring more than the shown maximum quantities, please contact your Zumtobel client services representative to work out a shipping schedule.
- Mixed orders (containing ZOOM! 10 Days items, and non-ZOOM! 10 Days items) will be given a ship date of the longest lead time on the order unless we are able to ship earlier. To avoid misunderstandings, we suggest that you place a separate order for ZOOM! 10 Days items.
- Freight allowance for ZOOM! 10 Days orders requires a minimum \$2,000 order.
- Standard Zumtobel Lighting Terms & Conditions (as they appear in our Price Guide) apply. Contact your Zumtobel client services representative for more information.

Ready To Ship Terms & Conditions

- In stock Ready To Ship products ship within (2) business days if received by 12:00pm ET. Ready To Ship orders received after 12:00pm ET ship within (3) business days.
- Check available quantities online at www.zliorderstatus.com. Place your order by emailing ZOOM!Stock@zumtobel.com. For orders requiring more than the shown available quantities, please contact your Zumtobel client services representative to work out a shipping schedule.
- Mixed orders (containing Ready To Ship, and non-Ready To Ship items) will be given a ship date of the longest lead time on the order unless we are able to ship earlier. To avoid misunderstandings, we suggest that you place a separate order for Ready To Ship items.
- If an item is not in stock, we will ship up to 50 pieces within 10 days. For larger quantities, please contact your Zumtobel client services representative.
- Freight allowance for Ready To Ship orders requires a minimum \$2,000 order.
- Standard Zumtobel Lighting Terms & Conditions (as they appear in our Price Guide) apply. Contact your Zumtobel Lighting client services representative for more information.

BASYS LED

- All options come with Dimming Driver, Clear Semi-Specular Reflector, and Natural or White Flange.
- Designed and built for maximum visual comfort, performance, and efficacy.
- Shallow 4 15/16" housing is perfect for applications with restricted plenum space.
- No visible LED "dots".
- Optimized thermal management, and built-in heat sink.
- CCT=2700K, CRI = 85 typical.
- FIF 758

- All options come with Dimming Driver, Clear Semi-Specular Reflector, and Natural or White Flange.
- Designed and built for maximum visual comfort, performance, and efficacy.
- Shallow 4 15/16" housing is perfect for applications with restricted plenum space.
- No visible LED "dots".
- Optimized thermal management, and built-in heat sink.
- CCT=2700K, CRI = 85 typical.
- FIF 759
