

# SHARK MP200™ in Enclosure

For Three Phase and Single Phase MP200™  
Metering Systems

**ENCMP200**

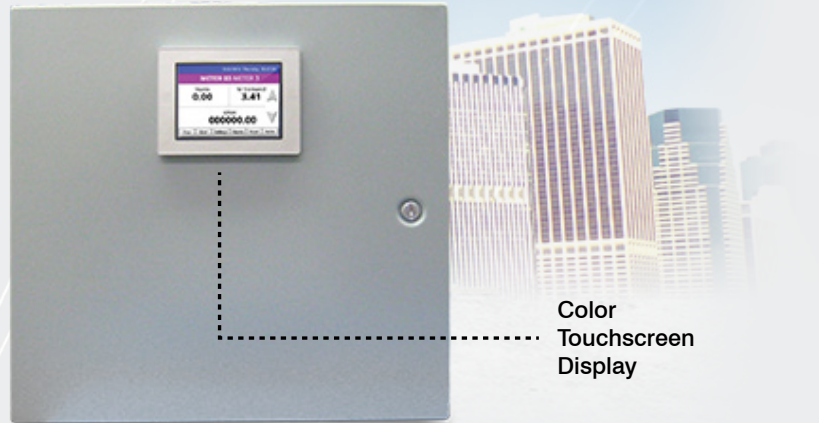

**Pre-wired Multipoint Metering Solution**

Ready for Installation

- For Retrofit Meter Solutions
- Extends Switchgear Capability
- Optional BACnet®\* or LonWorks®\* Communication Protocols
- Pre-Wired and Configured
- Nema Type 1 Rated Enclosure
- Eliminates Wiring and Installation Errors

## Description

EIG's MP200™ in enclosure lets you expand your switchgear capability and/or easily meter circuits without expensive and time-consuming redesign. Simply mount the enclosure in any convenient location, next to your switchgear or on a wall, and you are ready to go with no downtime. Using the MP200™ in enclosure allows you to meter up to 24 single phase or 8 three phase loads and send the data with a variety of communication protocols.

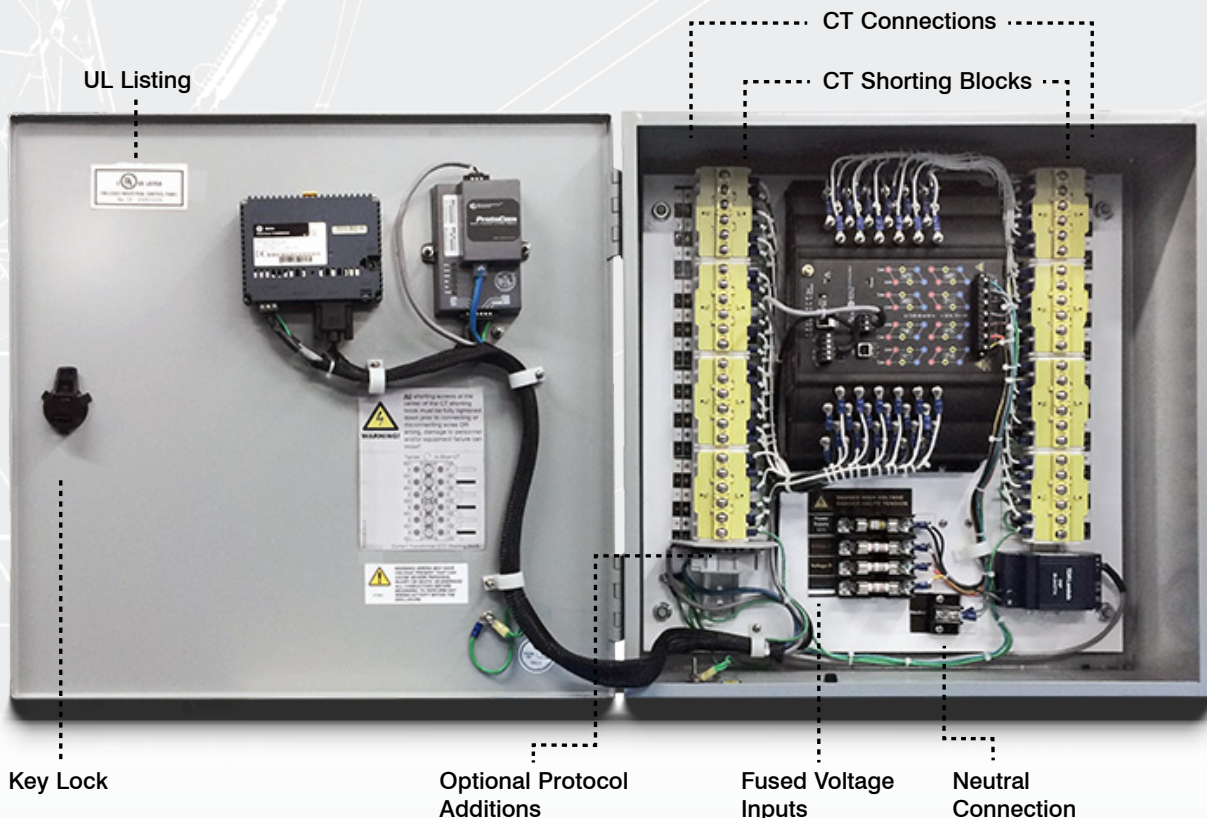

This is a perfect solution for a retrofit where there is no metering compartment available. The meter comes standard with a NEMA 1 rated enclosure and is factory wired with the meter installed. Standard equipment includes voltage fuses and shorting blocks for current transformers. The system will work directly with 120/208 and 277/480 Volt power systems.

The enclosure can be ordered with either the three phase MP200™-Y or the single phase MP200™-S meter. Optional CTs are available for each circuit. The CTs can be ordered as either split core or solid core depending on the needs of the installation. Optional ProtoCom and ProtoCom-Lon modules offer BACnet®\* and LonWorks®\* communication, enabling the MP200™ in

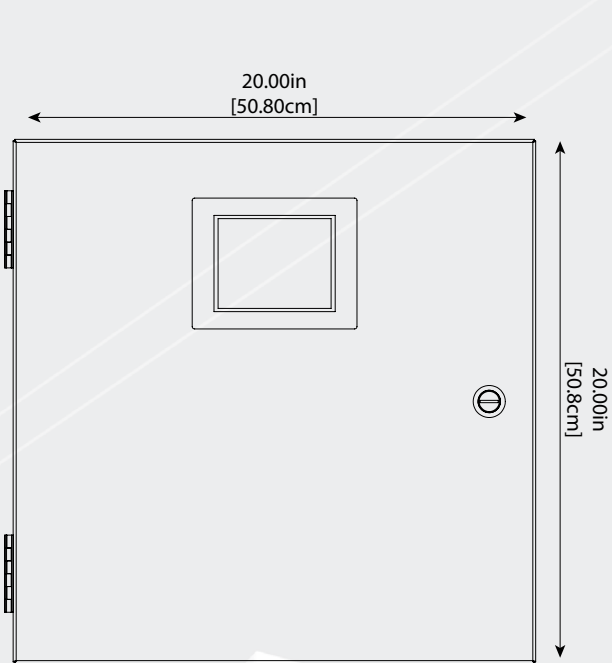

enclosure to fit seamlessly into existing Building Automation System applications.

The unit is equipped with either a 3.5" or 5.7" color touchscreen display to make data reading simple and easy. The display provides extensive circuit data for every load, including circuit analysis.

### Optional Available Current Transformers

#### Solid Core Transformers

100/5 : EI-2DARL-101  
200/5 : EI-2DARL-201  
400/5 : EI-5ARL-401

#### Split Core Transformers

100/5 : EI-1SP-100-00  
200/5 : EI-1SP-200-00  
400/5 : EI-WC-400-RA05

Specifics are available online at the EIG website.
