Technical Bulletin

DISHDRAWER

INCORRECT TECHNICAL BULLETIN NUMBERING

Due to an error January's Dishwasher Technical Bulletin was incorrectly numbered. Please change the number from DW15 to DW16.

NEW BASKET, MEGA RACK & PLATE RACK FOR DISHDRAWER

From Serial Number **NKD563704**, the above baskets and racks were changed in the Dishdrawer. The new mega rack will only fit the new basket, and likewise the old mega rack will only fit the old basket. The new plate rack, however, will fit both old and new baskets and will supercede the old plate rack in spare parts. Part numbers for the new items are as follows:

526062	Basket
526346	Rack Mega
526092	Insert Plate Rack

LEAKING AROUND LIGHT PIPES ON EARLY DISHDRAWER TUBS

We are starting to see claims come through with multiple calls for control module failure where it is finally found that water is leaking through the light pipes onto the top of the control module. If replacing a control module in a product that has the early style light pipes, please check for any signs of moisture in this area before fitting the new module.

KIT FOR INSTALLING SINGLE DISHDRAWER & BI450 OVEN IN ONE CAVITY

We now have available an installation kit that can be used when installing a BI450 oven above a Single DishDrawer in one cavity. Please note that these two products will **not fit** together, one on top of the other, under a standard 900 mm high bench top. The cavity must be built to the correct size for these two products to be installed together. There is a full set of instructions outlining these requirements supplied with the kit.

Part Number 526489 Instruction Kit DS601 / BI450
