Special features	The Hilliard Thermoplier Pliers are used to create or modify force points, to create space, to create slots, or to form hooks in aligners. Force points generate pressure and guidance to move teeth into desired position.	E.A. Beck & Co has been family owned and operated for over 55 years. We offer a lifetime warranty, against defects in material and workmanship, on our pliers.	Special notch function in the tip of the plier allows for easy, hassle-free removal of the QuickKlear Brackets without the need to first remove the archwire or risk of splintering the bracket.	Precision aligned with tapered tips for consistent and delicate bending.

Special features	Hu-Friedy's cutters and pliers use the highest-quality forged surgical-grade stainless steel. That is strong, yet lightweight and perfectly balanced; designed to provide superior control with effortless versatility.	Very sturdy; does not score wires, suitable for bending the arms of expanders for wires up to 1.5 mm.	The Choice by MASEL Orthodontic Instrument line offers stylish and strong instruments with high-quality, surgical-grade German steel forgings, and tungsten carbide-tipped cutting pliers, for durability against corrosion and reliable results.	Olympus instruments are guaranteed against corrosion due to the high-grade medical stainless steel used in manufacturing.

Special features	An exquisite product offering for the orthodontic professional. Laser engraved part numbers and applicable wire sizes for easy identification. Diamond-honed cutting edges and tips that will stay aligned and perform smoothly for stress-free use.	All our pliers have ergonomically contoured handles for comfort. Each instrument is marked on the inside of the handle with cutting and/or bending range.	Hand crafted through 80% of the process. Stringent quality control for consistent performance and reliability. Contoured corners around joint area for a slim-line look and feel.	This Bird Beak will take the place of two instruments, which creates less handling of the instruments and less sterilization.

Special features	Premium LX3 Alloy will not tarnish like other inferior steel on the market. This results in a cutting edge that lasts up to three times longer. Since 1993, Precision Plier Service has specialized in orthodontic pliers exclusively.	Slender rail design allows easy access to posterior regions. Blade tips feature a filleted design, allowing for an easy, low-force cap removal on any convertible buccal tubes and brackets.
