

Kaltura Quick Start Guide

- Content Management (Content Tab)
- Content Syndication & SEO (Content Tab)
- Live Streaming (Content Tab)
- Video Delivery Settings (Settings Tab)
- Access Control Settings (Settings Tab)
- Advertising (Studio Tab)
- Player Design (Studio Tab)

Content Management

- Logging into the Kaltura Management Console (KMC)
- **Uploading videos from your desktop to your website**
 - Upload videos to the KMC
 - o Embed videos on your site
- **Creating and embedding a playlist on your website**
 - o Manual Playlist
 - o Rules Based Playlist
 - o Embed a playlist on your site
- Creating and managing content categories
- Migrating content from your existing hosting / video service

Logging into the Kaltura Management Console (KMC)

Go to the Kaltura Management Console (KMC) at: <u>http://www.kaltura.com/index.php/kmc</u> and log-in with the credentials that you received in the "Kaltura Registration Confirmation" email.

_

Creating Playlists and embedding them on your website

A playlist is a list of media items (videos, audios, images) that can be embedded with a player in your website. Manual playlists allow you to select a static list of items, while rules based playlists allow you to define a dynamic list.

Go to the Content tab >Playlist section and select either a Manual Playlist or a Rule Based Playlist

ilters	« Playlists Table				
earch Playlists	Q Hame	Playlist	Created On	Publish	
reated between:	HD Man	Manual	02/11/10 20:34	Preview & Embed	Add Manual Playlis
ear Dates	III rule	Rule Based			Add Rule Based Play
	tan	Manual		l Manual Playlist tule Based Playlist	

Creating a Manual Playlist

- 1. Enter a name for your playlist (required) and select Manual in the Type field.
- 2. Using the Filters search for the entries you'd like to include the results will appear in the Entries Table.
- 3. Add entries to your playlist by clicking the desired entry followed by the Add or Remove buttons.
- 4. Click "Save" to complete the process.

Creating a Rules Based Playlist

A rules based playlist is a dynamic playlist that is automatically updated when content is uploaded or edited. For example you can create a "Most Viewed" playlist, a "Most Recent" playlist, as well as a playlist based on single or multiple filters, such as "videos tagged with "dogs" and created during January 2010".

Your playlist can be based on a single rule or multiple rules:

Single Rule Playlist

- 1. Enter a name for your playlist (required).
- 2. Using the Filters search for the entries you'd like to include the results will appear in the Entries Table.

Note: You can choose more than one type of filter (for instance, text search + date + media type), the logical relationship between fields will be an "AND" relationship.

3. Select your preferred video order from the Order By drop down menu

- 4. Select the total number of entries you'd like to include in the playlist via the Limit Playlist result box.
- 5. Click "Save Changes" to complete the process.

Name:		My new play	/list 2

Save

Multiple Rule Playlist - Advanced Mode

Advanced Mode enables you to create playlists based on multiple rules.

- 1. Click Switch to Advanced Mode.
- 2. Enter a name for your playlist (required).
- 3. Click Add Rule to create a new playlist rule (see Single Rule Playlist to learn about creating rules)
- 4. Add any number of additional rules. Use the Remove Rule and Edit Rule buttons to make changes to your list of rules.
- 5. Rules will be applied to the playlist in the order they appear, so use the arrows to change the order of the rules

My new playlist 2				_	? 8

Embedding a Playlist on your site

4. Go to the Content tab > Playlists section and locate the playlist that you want to place on your website. Click on Preview & Embed.

Spen source video Dashb Manage Moderate Playtists	oard Content Studio Settings Syndicate Upload			
Filters	« Playlists Table			
Search Playlists	Hame	Playlist	Created On	Publish
Created between:	My new playlist 3	Rule Based	02/18/10 16:03	Preview & Embed
	HD Man	Manual	02/11/10 20:34	Preview & Embed

5. Select your preferred playlist skin from the drop down menu and grab the embed code.

6. Add the embed code to your website HTML source.

Creating and Managing Content Categories

Media entries are divided into categories. The different categories are built in a tree-like hierarchy where each category can include multiple sub-categories.

1. To add a content category click Edit on the top left corner of the Filter bar.

Kaltura	Dashboa	ard	Content		
Manage Moderate	Playlists	Syndica	te	Upload	
Filters		« Er	ntries	Table	
Search Entries	٩	Thumb	onail	Name	
Additional Filters		DIL	JERT.	dilbert	
Categories	Edit			animat	
🖃 All (43)	-			dartmo	
⊡ ariel (1)					
⊡ sub (1)		and the second sec		Trailer	

2. Add or remove categories by clicking on the "+ / -" icons that appear when you hover with your mouse over a specific category.

Categories	Done editing	Categories Do	ne editing
⊟ All (43)	<u>^</u>	🗄 Ali (43)	-
🖃 ariel (1)		ariel (1)	
🗆 sub (1) 🗖		Add New Category	98
🗆 Bulk3 (6)		Japanese Subtitles	
⊟ h264 (4)	_	Add	
⊡ vp6 (1)	≣	Bulk4 (4)	

- 3. To change the tree location of any category just drag-and-drop categories from one location to another.
- 4. To assign a media entry to a specific category, just drag-and-drop the entry from the entries table on the right to the desired category on the left.

Migrating content from your existing hosting / video service – Bulk Upload Process

- 1. Go to the Content tab > Upload section > Import from Existing Host
- 2. Download the sample CSV file the file contains examples of how to add the URLs and metadata of your existing content. Replace the sample data with your own.

		These categories will be use when pushing your content to the various shar websites	ing
		Add Feed	

4. Login to your <u>Kaltura–TubeMogul account</u> and go to Advanced Tools > More Tools > select "MRSS Feed Manager" > Submit your feed

iTunes

This feed allows you to submit your content to the iTunes Store as a podcast.

- 1. Go to the Content tab > Syndicate section and click Create New Feed.
- 2. Enter the feed name (required), select iTunes from the Feed Type drop down, enter the iTunes Parameters and click Add Feed
- 3. To test the feed before submitting to the iTunes Store:
 - (a) copy the URL
 - (b) Launch the iTunes application installed on your desktop
 - (c) Go to Advance > Subscribe to podcast and submit the feed URL
- 4. To **submit this feed** to the iTunes Store as a podcast/ video podcast: Note that you will need an active Apple ID and the iTunes application installed
 - (a) Copy the feed URL
 - (b) Go to <u>https://phobos.apple.com/WebObjects/MZFinance.woa/wa/publishPodcast</u> (launches iTunes application in the right page)
 - (c) Submit your feed

This feed is ready for submission 🛛 😯 😒
then open the specific entry that you would like to transcode, go to the Flavors tab, and select the "Convert" option. If you wish to transcode multiple entries into HQ MP4 for Export, please contact Kaltura professional services: http://corp.kaltura.com/support/form/project/13
In order to test this feed before submitting to the iTunes Store please follow these steps (Note that you will need the iTunes application installed):
1. Copy the feed URL http://www.kaltura.com/api_v3/getFeed.php?feedId=0_eky94t82
2. Launch the iTunes application installed on your desktop
3. Inside iTunes go to "Advance > Subscribe to podcast" and submit the feed URL there In order to submit this feed to the iTunes Store as a podcast/ video podcast, please follow these steps (Note that you will need an active
Apple ID and the iTunes application installed):
1. Copy the feed URL http://www.kaltura.com/api_v3/getFeed.php?feedId=0_eky94t82
2. Go to https://phobos.apple.com/WebObjects/MZFinance.woa/wa/publishPodcast
(launches iTunes application in the right page)
3. Submit your feed
ок

SEO

Submitting feeds to major search engines helps to increase your content's SEO, and ultimately direct more traffic to your website.

Google

- 1. Go to the Content tab > Syndicate section and click Create New Feed.
- 2. Enter the feed name (required), select Google from the Feed Type drop down, enter the Google Parameters and click Add Feed

Add Video Feed	Q 8
*Feed Name:	New Feed 2010
Select Content:	All Content
	 Only content from this playlist
	My new playlist 3
Feed Type:	Google
Google Parameters:	
Content Flavor:	Source 🛛 🔻 🧭 Add to default transcoding profile
*Landing Page:	http://www.news24.us
	ike to appear in the Google search results for each video in this feed. The system h entry.For example: "http://mysite.com?videoid="
Playback directly from Google?:	Yes and use this video player:
	Player with black hover controls
	This player will appear within the Google search results page
	No, only linkback to my site
Adult Content:	This feed includes adult content
	Add Feed

3. Submission of video feeds to Google is free of charge, yet requires some technical knowledge. It is recommended that your website's webmaster be available for assistance.

Here are the technical guidelines for submission:

- a. Google Webmaster Tool Setup
 - Setup a Google Webmaster account for your website: <u>https://www.google.com/webmasters/tools/home</u>
 - Setup your website in the Google Webmaster Tool follow the directions here: <u>http://www.google.com/support/webmasters/bin/answer.py?hl=en&answer=34592</u> Make sure your site is valid based on the Google instructions.
- b. Feed submission
 - Create a server page on your website that redirects to this feed URL For example, for a php implementation save a php file named redirect.php with the following content (replace the XXXXX with your feed URL)
 <?php Header("HTTP/1.1 301 Moved Permanently"); Header("Location : XXXX");

 Login to the Google Webmaster Tool <u>https://www.google.com/webmasters/tools/home</u>
 - Within the Google Webmaster Tool go to
 "Site configuration > Sitemaps > Submit a sitemap"
 - Submit the feed as your redirect page in your site, for example <u>http://mysite.com/redirect.php</u>

Live Streaming

- **Basic setup**
 - HW & SW setup
 - Set up a stream in the KMC
 - o **Broadcasting setup**
 - Viewing setup
- **Advanced configuration options**

Kaltura's Live Streaming is a paid service. To enable live streaming for your account <u>contact us</u> or call +1-800-871-5224

Once your account has been enabled, follow the steps below to set up Kaltura's Live Streaming service.

Basic setup

HW & SW setup

- Download Flash Media Encoder (FME) from: http://www.adobe.com/products/flashmediaserver/flashmediaencoder/
- 2. Install FME on your local Windows machine (follow the FME installation guide and minimum requirements described in Appendix A of this document)
- 3. Connect your camera to the installed computer

Set up a stream in the KMC

1. Login into the Kaltura Management Console, navigate to the Content/ Manage tab and click on the "New Live Stream" button.

ilters		« Entrie	es Table

2. Fill in the form with the following details:

- Name the name of the stream that will appear in the KMC entries list
- **Description** a description of the stream (optional)

• **Primary encoder IP** – the public address that will be used for streaming (the computer where the client encoder is installed)

Note: your IP address can be retrieved by browsing from the computer where the FME is installed to http://www.whatismyip.com/

- Secondary encoder IP if you are using two encoders for redundancy, fill in the secondary encoder. If you are using only a single encoder, simply copy the Primary encoder IP to the secondary encoder IP field.
- **Broadcasting password** the password required for broadcasting. You will be required to fill this into your client encoder (FME). If you do not chose a password the system will create one for you. Note: it may take up to 20 minutes until the stream is provisioned with the CDN.

Broadcasting setup

Go to the "Broadcasting" tab of the live entry you just created and copy the details to your FME, you can do this either by copying the details manually, or by using the "Export XML to FME" option:

Viewing setup

1. Click on the "Preview & Embed" link from the KMC

- 2. Select the player from the drop down menu and copy the embed code
- 3. Paste the embed code within an HTML page
- 4. Browse to the page where the embed code was inserted and press "play" on the video player.

Advanced configuration options

There are multiple factors that influence the video quality for live streaming. In order to receive good results you should optimize the settings based on your specific needs.

The table below can be used as a starting point for optimization and setup - it provides a rough estimate for the different factors based on the video dimensions.

Video Dimensions	Bitrate Required (Mbps)	Camera Requirements	FME HW Requirements	Broadcaster Uplink, Viewer Downlink Requirements (Mbps)	Throughput example for 1000 concurrent viewers of 1 hour broadcast
320x240	0.3		Dual Core 2GB RAM	0.4	135 GB
640x480	1.4	support frame size & bitrate	Quad Core Xeon 3GB RAM	2	630 GB
1024x720	3.5		8 Core Xeon 3GB RAM	5	1600 GB

For further reading on how to set up these parameters in FME, as well as additional advanced configuration options please refer to the FME guide available at: http://help.adobe.com/en_US/FlashMediaLiveEncoder/3.0/Using/flashmedialiveencoder_3_help.pdf

Video Delivery Settings

- Video Delivery Settings
 - HTTP Delivery
 - **<u>RTMP Delivery with Adaptive Bitrate</u>**
 - Adding the flavor selector module

Video Delivery Settings

Choose between two types of video delivery settings - HTTP Delivery or RTMP Delivery with Adaptive Bitrate.

HTTP Delivery

With HTTP Progressive download, the digital media begins downloading and once a specified amount of data becomes available to the video player, the media begins to play while the rest of the data continues to buffer.

To select this delivery setting go to Content > Manage > Preview and Embed and select Progressive Download (HTTP) from the drop-down menu.

Entry ID: 0_3xu9cvx0		8 8
KDP3 Light Player	V	
	Share	
Delivery Type: Progressiv	ve Download (HTTP) 🔽]
<pre><object all"="" allows="" data="http://www /cache_st/1267046976/wid/_' /0_3xu9cw0" id="kaltura_player" na="" type="application/k-shockwav allowNetworking=" width="400"><param name="</pre"/></object></pre>	e-flash" allowFullScreen=' criptAccess="always" heig .kaltura.com/index.php/kw 7463/uiconf_id/48501/entr	ht="330" 🔤 idget y_id
	Select Code	

RTMP Delivery with Adaptive Bitrate

Adaptive bitrate is a technique of detecting a watcher's bandwidth and CPU capabilities in real time and then adjusting the quality of a video stream. The result is very little buffering, fast start time and a good experience for both high-end and low-end connections.

The RTMP protocol maintains a single persistent connection and allows real-time communication. Video and data are split into fragments, which then guarantees smooth delivery of video and audio streams.

To select this delivery setting go to Content > Manage > Preview and Embed and select Adaptive Streaming (RTMP) from the drop-down menu.

	Select Code	

Adding the Flavor Selector Module

Any entry is available in various transcoding flavors. The flavor selector module allows the viewer to manually select the video flavor he wishes to watch, based on his preferences. Note: If you are broadcasting with Adaptive RTMP then the flavor selector will be set to "auto".

In order to add the flavor's selector module:

- 1. Go to Studio > Players List and create a new player or edit an existing one.
- 2. In the Features tab, go to the Features List > Controls and check Flavor Selector.
- 3. Preview your selection and click Save Changes to complete the process.

Access Control Settings

- <u>Access Control Settings</u>
 - o **Domain Restrictions Restricting content to specific domains**
 - Geo Restrictions Restricting content to specific Countries
 - Assigning an Access Control Profile to an Entry
 - o Content Scheduling

Access Control Settings

An Access Control Profile defines authorized and restricted domains where your content can or cannot appear, countries from which it can or cannot be viewed, Kaltura Network preferences and security settings. In this area you can view existing profiles and create new ones.

Advertising

Connecting with Ad Servers and networks via adap.tv

To add adap.tv's service to your Kaltura players start by signing up with adapt.tv (<u>Contact us</u> to learn more) – you will then receive an adapt.tv Partner Key.

- 1. Go to the Studio tab and edit an existing player or create a new one.
- 2. In the Features tab, open the Advertising section from the features list.
- 3. Check the adapt.tv box and then click Options.

 - o <u>Creating a Multiple Playlist</u>

Designing and Configuring a New Player or Playlist

The Studio section of the KMC enables you to create new configurations and design for players and playlists. Add, remove and adjust multiple buttons and features, and create a look to match your site.

Start by logging-in to the KMC and going to the Studio tab. Select the type of player you would like to create: player, player with playlist (horizontal/vertical) or player with multiple playlists.

Configuring the Template Settings

1. Begin by selecting a name for your player (required). We suggest choosing an informative name – it will help you when you're ready to embed players into your site.

2. Set the Video Ratio – select normal/wide and opt to either keep or stretch your media to fit the player when the media and player aspect ratios are different.

3. Select auto-play features

4. If you're creating a Player & Playlist you'll also see the Playlist Controls – check "Automatically continue" to play the playlist media consecutively. For playlists with images, set the duration for images to be displayed during the continuous play of the playlist.

Create New	/ Player						
Template	Player Details						
Features	Player Name Player Name						
Style	Video Ratio						
	If media aspect ratio is different than player aspect ratio:						
	Keep original media ratio						
	 Stretch media to fit player 						
	Auto Play Automatically play video on page load						
	Start player muted						
	Playlist Controls						
	Automatically continue to the next entry						
	When playing images in playlist set duration to: 2 seconds						

Configuring the Player Features

In the Features Tab you can select the features (buttons, layers and modules) to be included in your player. Any changes you make will appear in the preview area (click Preview button to see changes you've made).

Create New	v Player Features	List: Select	he features you

Additional feature configuration options for playlists

When creating a playlist (either with one or multiple tabs) you will see additional configuration options under the Playlist Items section. This will allow you to display various types of information for each of the playlist items, such as number of plays, tags, rank etc.

 \rightarrow Play around some more to get a feel for the Features section and then continue to customize the player's design in the Style section.

Configuring the Player Style

In the Style Tab you can select the theme, colors and fonts for your player.

- 1. Select either a dark or light player skin.
- 2. Choose the colors of the icons/labels and online video buttons by clicking the small colored squares. This will open a color picker where you can select a color or enter a color value.
