¹ 480V with medium base sockets may require approval of local building code authority.

² Use only when fixture vandalism is anticipated. Service life is reduced by UV discoloration from Pulse Start Metal Halide lamps. High Pressure Sodium lamps are recommended.

³ Input amps will increase by .80 with this option. Not available on 85IF.

⁴ Includes lamp and installed with fixture, including QS lamp when option is specified.

⁵ Constant wattage isolated ballast is required on all 208V and 240V Canadian orders.

NOTE: Due to the Energy Independence and Security Act (EISA) of 2007, Kim Lighting can no longer supply probe start Metal Halide ballasts with its luminaires, effective January 1, 2009. Contact Kim Lighting for availability of replacement ballasts for warranty service claims. (Visit www.aboutlightingcontrols.org or the Library of Congress website for more details).
