

# MOCK INTERVIEW CASE

**GOAL: Build a classifier that can predict whether a customer will be approved for credit**

## **Details about Data Set:**

- Data for the case is located in the credit\_data.csv file
- Information has been anonymized to protect client and their customers
- Last column contains results of credit approval

## **Guidelines:**

- Work in pairs and build a classifier in 2 hours
- Present your results to the class:
  - \* Explain how you developed your classifier
  - \* Measure the performance of your classifier
  - \* What additional steps would you take if you had more time?
