Introduction

This document lists the issues addressed by this release. All known issues published under previous release notes still apply until listed as "Fixed Issues".

IMPORTANT INFORMATION

General

- Microsoft Internet Explorer 8 is not a supported browser. The browsers officially supported for use with Summation Pro are Internet Explorer 9 or higher.
- MS Outlook 2007 is no longer supported for reduced PST export option. MS Outlook 2010 or higher is required to perform reduced PST exports.

Requirements

- For general software and hardware requirements, please see <http://accessdata.com/solutions/e-discovery/summation/technical>.

5.6.3 PATCH 3 FIXED ISSUES

The following issues have been resolved in this patch:

General

- Archive file types (i.e. PST, NSF, etc.) are now hidden by default and will only display when enabling the Folders Quick Filter. (29471)
- Custom Field data now shows up within Reports. (29776)
- Resolved many Chinese translation issues within Map/Review. (28945,28946,28947)

Viewer

- Resolved issue with Keyboard Scrolling within Standard Viewer. (26956)
- Able to navigate to specific page in standard viewer while page continues to load. (29626)
- Resolved issue with Fit To Width not working in Standard Viewer. (29675)
- Scrolling within the Standard Viewer is a lot smoother. (29676)

Transcripts

- Better handling on page numbering for large multi-volume PTX transcript files. (29621)

Production/Exports

- Performance improvements in Production / Export Sets creation page. Able to populate large sets of labels and display its counts in seconds. (28755)
- Resolved issue with Lag in opening exported PDF documents with redactions. (29746)

Collection /LitHold (eDiscovery)

- Ability to download files uploaded to LitHold. (29709)
- Deleting jobs will only delete the collection data within the Job Data folder and nothing else. (29734)
- Apostrophes in a person's name or email address caused lit hold error. (24716)

Migration (Iblaze/Enterprise)

- Resolved the issue of too many lines inserted into the ObjectAnnotations table when migrating annotations. (29736)
- Converting to new annotation xml is much faster. (29681)
- All annotations files are now migrated with enterprise/iblaze migration. (29812, 29438)
- Vocabulary is now populated for migrated transcripts. (29894)
- We'll now maintain the color of redactions created from Iblaze/Enterprise. (29750)
- Redaction Reason Text is now migrated successfully. (29760)
