### 3MarketStream is the all in one financial solution, for people on the go.

Users have access to global market data at their fingertips, whatever they are doing. Through streaming data via the 3G network, MarketStream delivers time-critical financial data at high-speed when in 3's Broadband Zones, enabling users to keep up to date with the finance market on the go.

MarketStream is the first choice for accurate, fast financial data. Providing access to over 30 exchanges from the Reuters data source, Reuters News feed, Intra-day Charting and Alerts. This all in one solution combines financial data, mobile phone, the ability to surf the web or connect to a laptop as a broadband modem, organiser, email, camera and voice calling.

### MarketStream Features:

- Access to real-time Reuters market data from 30 financial exchanges across the globe covering ASX Stocks, Options, FX, Futures, Indices, News and Commodities.
- Streaming portfolios provide users with a list of stocks, indices and other instruments they wish to follow, presenting price and trading information as it happens in real time, with up to 12 instrument parameters available.
- Reuters News provides wide and in-depth coverage of Equity, FX, Treasury, Energy, Metals and Commodity Sectors.
- MarketStream enables users to set limit alerts on instruments in their portfolio for an immediate warning of important price changes by using IP Connectivity, unlike others using SMS.
- Intra-day charting - displaying a graphical view of any selected instrument illustrating, in real-time, price movements during present day trading.
- High speed access to information when in 3's Broadband Zones in most areas of Sydney, Melbourne, Adelaide, Brisbane, Gold Coast, Perth and Canberra. You will also be able to access information whilst roaming on to most parts of Telstra's GPRS network. International connectivity via roaming on mobile operator networks across the globe. See [www.3business.com.au/coverage](http://www.3business.com.au/coverage).

The Almax data service saves time for busy investors and traders, enabling accurate monitoring of stock and futures data with remarkable speed and ease.

Almax Information Systems are the end-of-day data specialists for ASX and ASX24 data. Our end-of-day data is based solely on the official values provided by each exchange – we do not use data derived from a real-time feed, which can be inherently flawed with uncorrected errors.

Our data service includes software to download the daily trading data for each exchange and automatically maintain a historic database for share splits, name changes and other changes to the capital structure of a company. This ensures that your analysis is based on comparable data, where years of historic data is back-adjusted for changes that effect the capital structure and, therefore the share price, of a company.

The Almax automatic adjustment system is integral to the service we provide and the value we add as your data supplier, although the adjustments themselves are based on the official information provided by the relevant Exchange.

AAP Australia's National News Agency leads the way in providing detailed editorial coverage of the Australian and international finance markets from an Australian point of view. AAP's speed, accuracy and in-depth coverage make the Finance News Wire an invaluable tool for financial markets information vendors, online finance vendors, and third party subscribers including banks and stockbrokers.

AAP's Finance Newswire provides real time coverage of the equity, interest rates, commodities and foreign exchange markets along with economic analysis of local and overseas markets. AAP provides extensive reporting of these areas and have specialist writers who cover each topic. The Australia-wide resources of AAP ensure we have coverage in every capital city in Australia and can bring additional resources to where major stories break.

While we focus on Australia, AAP recognises that our markets do not operate in a vacuum. Our own journalists and those of our international agency affiliates ensure superb round the clock coverage of world financial markets.

Breaking news stories are delivered 7 days a week, primarily on weekdays, covering mergers, acquisitions, bankruptcy, management changes, profit announcements, boardroom coups and major corporate alliances and deals.

In addition, AAP produces a number of market reports on each trading day with updates in the morning, at noon and at the close of the market.

For more information, or to request samples of our content, please contact us on (02) 9322 8129 or email [newsforbusiness@aap.com.au](mailto:newsforbusiness@aap.com.au)

Cooltrader Pty Ltd supply a low cost, high value for money, method of obtaining ASX end of day data. All data files can be downloaded from either our web site or emailed direct to the end user. Data includes equities, indices, warrants and options, and coming soon – exchange traded options.

Our software includes:

- AmiBroker – probably the most powerful charting software available today
- EzyCharts – easy to use software, but still has every function available.

Also available are Historical Data CD's, magazines and books.

**About CQG**

CQG is the industry's highest-performing, most cost effective solution to integrate market data, technical analysis and order routing. Data coverage includes futures, options, FI, FX, equities, indices, news, and reports from around the world. CQG leads the industry in providing reliable data, superior decision making and execution software with customer support that understands the trader.

CQG offers two innovative trading platforms with the speed and support traders have come to rely on:

- CQG Integrated Client combines the power of CQG's analytical charts and tools with fast, dependable order execution at no extra charge. The Integrated Client has four types of order routing interfaces, two of which offer trading directly from the price chart.
- CQG Trader offers the speed and reliability of our charting product in a quote and trading platform.

CQG provides trade routing to eCBOT, CME, Globex, Euronext, Eurex, Montreal, NYMEX, ICE, DME, ASX24, and SGX, with additional exchanges added regularly.

**CQG Integrated Client**

CQG earned a solid reputation through years of reliable performance, providing traders with CQG's innovative trading interface complete with accurate global market data and professional analytical tools. CQG Integrated Client provides an ideal solution for all trader needs. CQG provides worldwide market coverage including futures, options, equities, news, fixed income, foreign exchange, government/industry reports and indices.

**CQG Trader**

For the trader who does not require a technical analysis tool, CQG offers a streamlined order execution platform. Many of CQG's FCM partners offer the CQG Trader as their order entry and account management interface.

Founded in 1996, FlexTrade Systems is the global leader in broker-neutral algorithmic trading platforms and execution systems for equities, foreign exchange and listed derivatives. A pioneer in the field, FlexTrade introduced the first trading system that allowed clients to control and customize their proprietary algorithms while maintaining the confidentiality of their trading strategies through a vendor-provided, broker-neutral platform.

Change is the only constant in electronic trading. That's why FlexTrade is continuously upgrading its products and services and has recently introduced several new innovative trading, risk-management and analytical tools. All can be tailored to meet the demanding requirements of a global client base of more than a 150 buy- and sell-side firms, including many of the largest investment banks, hedge funds, asset managers, commodity trading advisors and institutional brokers.

The core business of Iguana2 is aggregating, managing and reselling sharemarket data to the financial services community.

Based in Sydney, Australia, Iguana2 offers complete coverage of both the Australian and New Zealand stock exchanges, as well as limited coverage of other major markets.

With over twelve years experience in providing sharemarket services on the Internet, Iguana2 has developed the technology, skills and know-how to deliver a variety of solutions to fit clients' needs.

One of Iguana2's major strengths is the ability to customise its data services to suit each individual client. From raw data feeds, to complex interactive sharemarket content websites, Iguana2 can provide a solution that is easy to implement, robust, efficient and cost-effective.

Iguana2 services can be broken down into four separate areas:

**Spark Trader** – A streaming market information service for stockbrokers and equity market professionals.

**Investor relations services** – We provide ASX and NZX listed companies investor relations content which can be displayed within corporate websites and intranets. Live and delayed prices, share price charts, announcement archives and calculators make up some of the services we offer.

**Content and website management** – Development and management of share market related websites and applications all which leverage off our proprietary market information systems. We work with our clients to develop unique services which incorporate their own branding and look 'n feel.

**Custom data solutions** – We supply custom data solutions to institutional and retail brokers, fund managers, banks, listed companies and private individuals. We deliver data via multiple distribution methods including FTP, HTTP, SCP and email. The data delivered can be up to the second using our XML services or can be as simple as a closing price file which is emailed at the end of the day.

**Infoscan** has a range of quality services designed to assist the management of financial risks by both business users and private investors. Our services are delivered in a number of cost effective ways ranging from wireless to the Internet. The quality financial information powering our services is sourced directly from banks and exchanges and from premier suppliers such as Reuters.

### ASX

Real time, Delayed and End of Day market data

**Mobile:** Any internet enabled cell phone can have live snapshot ASX inside your network coverage area. No more tied to a desk or office AND no more pagers.

**Internet:** View Real time or delayed snapshot rates in any internet browser, no more custom software required, just an internet browser.

**End of Day:** Used in charting packages such as EzyCharts and MetaStock, or to value portfolios.

We also offer real time Foreign Exchange rates and a wide range of international financial data that can be easily incorporated with the above.

### ASX24

End of Day market data direct from the Exchange. We offer mobile, desktop and internet delivery options to meet all your needs anywhere, anytime from quotes to charts and much more.

Used in charting packages such as EzyCharts and MetaStock, or to value portfolios.

We also offer End Of Day Commodities, Equities, Indices, Foreign Exchange and Money Market rates from around the world that can be easily incorporated with the above.

Interactive Data provides a comprehensive suite of financial market information services for a broad range of applications, including:

- End-of-day valuation and asset administration data vital to pre and post-trade processing and investment management administration. Our services cover over 180 exchanges and other markets plus evaluations on millions of unlisted, illiquid fixed income securities. These services are used extensively throughout the world by leading banks, brokerage firms, insurance companies, money management firms, government agencies, stock exchanges, trading houses, custodians, and fund managers.
- Real-time datafeeds, featuring global exchange content and hundreds of proprietary news and information providers, to power market data redistributors, in-house market data systems, infomedia sites, web-based applications, internal research, etc.
- Real-time global financial market data together with powerful and cost-effective trading analysis and decision support applications, such as eSignal and FutureSource. These services are used by tens of thousands of day traders and investors around the world.
- Corporate actions and descriptive data services covering 99% of global listed equities, as well as millions of fixed income securities.
- Sophisticated fixed income portfolio management software program used by over 500 leading global institutions for portfolio analysis, performance attribution, benchmarking and risk management.

Service formats and content as well as delivery mechanisms can be customized to meet individual client requirements.

IRESS is a software development company that designs, develops, markets and supports share market information and trading systems and financial planning systems. IRESS has a comprehensive suite of subscription-based products designed to meet the needs of equity traders and financial planners in Australia and New Zealand.

IRESS products include:

**IRESS** – Information system providing live, dynamic share market information and analytical tools. There are a number of versions of this product including web-based and desktop installed products.

**IOS** – IRESS Order System: An order management system, which facilitates buying and selling shares. Different flavours of IOS are available for different markets and for retail and institutional traders.

**IPS** – IRESS Portfolio System: A comprehensive retail portfolio management tool with full capital gains tax (CGT) management. IPS offers valuation, performance and CGT reporting of all investment types; including equities, managed funds, fixed interest and derivatives.

**FTS** – IRESS Funds Trading System: A tool for constructing and managing large corporate funds.

**RMS** – IRESS Risk Management System: A specialist product for professional traders in derivatives markets. E.g. options traders.

**ETS** – IRESS Equity Trading System: A portfolio management tool for broker principal traders.

**IRESS Web Services** – A programming interface for integrating live market data into third party websites or web applications.

**IRESS FIX Interface:** FIX is an international protocol for disseminating financial information between two unrelated parties. The IRESS FIX Interface allows IOS clients to transmit and receive order information.

**Xplan:** Tools for financial planning including:

- Client data management
- Client relationship management (CRM)
- Portfolio reporting
- Designing and constructing investment portfolios
- Insurance risk analysis.

### Overview

Market Analyst provides premium quality market data for home investors, professional traders and financial institutions. Select from a range of live and end of day options to suit your trading requirements.

All data options feed directly into Market Analyst's world renown range of charting products. To trial the Market Analyst data service download a Market Analyst charting package, once downloaded you will be up and running and ready to trade.

### Market Analyst Data Features

Market Analyst uses a redundant system of multiple servers in different locations around the globe to deliver the data to you. Each server makes independent requests from the exchange to receive the data. The data then passes through a complex purification process to ensure that all the data has been correctly received.

### Automatic Corrections

Market Analyst data includes 20 + years historical data for many securities, all of this data is fully corrected for share splits, consolidations and name changes. Any new corrections are updated automatically when the data is downloaded each day.

### Data supplied in sector format

To easily compare how specific securities are travelling in comparison to other securities in the sector, Market Analyst provides the data in sector format.

### Average Data Processing Time Under 2 Minutes

The Market Analyst Data Downloader uses the same advanced programming style as the Market Analyst charting products. This means an average daily download & processing is well under 2 minutes on a standard PC, leaving you to analyse your stocks straight away.

### Live Data

Market Analyst Live Data is provided directly from Market Analyst servers to your PC. Using the latest technology systems, Market Analyst is able to provide live market action to you at a speed similar to that of your broker.

MarketPrizm is a London-based ultra low latency (ULL) trading infrastructure & market data vendor. Our focus is to provide a one-stop, cross-asset class, ULL trading ecosystem of a multi-venue (32 exchanges) distributed architecture for electronic trading across Europe, Asia & the U.S.

Our core product promise is ultra low latency market data, by co-locating in the exchanges next to the matching engines with the best-of-breed technology stacks & top-of-the-line network appliances i.e. Arista switches. Coupled with the fastest optical fiber networks, the latency is further reduced with a minimal-hop network architecture.

In addition, MarketPrizm's proprietary feed handler technology multicast market data at source from our colocations.

Our main value proposition is enabling our clients with such trading capabilities in a capital-efficient manner. MarketPrizm believes in cost-mutualizing our investments & sharing the costs across our client base to lower the unit cost for any one customer. This converts our clients' CapEx into a monthly OpEx, through flexible co-location hosting, starting from 1RU. This includes the connection to market data, ordering routing & remote command & control.

MarketPrizm's majority shareholder is Colt (LSE: COLT), which in turn is majority owned by Fidelity Investments. Fidelity Investments also fully owns KVH Telecom in Japan.

### Stay in touch with the markets anytime, anywhere with MarketSource.

More bank dealers, brokers and private traders rely on MarketSource portable trading tools than any other single solution in the world.

View live ASX and ASX24 quotes, charts, alerts and news 24/7 from your mobile phone (“i-spy”) or a dedicated device (“G3”).

**i-spy** is a powerful tool that enables you to stay in touch with the markets from your mobile phone whenever and wherever you are, throughout Australia and around the globe!

- ✓ Designed and owned in Australia, i-spy is fully supported by a local 24/7 helpdesk.
- ✓ Access live quotes, charts, alerts and news on any mobile phone handset and with any carrier – choose the telco, plan and handset that best suit you!
- ✓ Set limit alerts to SMS you immediately when the market moves to your entry or exit points – anytime, anywhere, whether you’re logged in or not!
- ✓ Select from a range of intraday and daily charts.
- ✓ No need to install software on the handset – simply log in and out of a dedicated web page at your convenience – minimal drain on your battery.

**G3** provides the same information – and peace of mind, but on a dedicated financial markets pager.

- ✓ Real-time streaming quotes, charts, alerts and news.
- ✓ Purpose-built world-leading technology for traders – incredibly easy to use!
- ✓ Multiple charts on any instrument – point and figure charts, five minute and hourly tick charts and histograms, as well as daily candlestick charts with moving averages.
- ✓ Customise your G3 screens. Create personalised watch lists.
- ✓ Set limit alerts to automatically beep or vibrate when the market reaches your entry or exit points.
- ✓ Keyword filters on news items – be alerted when stories relevant to you are released.

Also available from MarketSource:

- **YourTradingEdge Magazine** – see [www.yte.com.au](http://www.yte.com.au)
- **MetaStock Pro** – the most sophisticated real-time technical analysis package on the world market.
- **QuoteCenter** – real-time software and data feed bringing professional level real-time ASX, ASX24 and global market information to individual investors and traders.

|                | ✓       | ✓          |                  |         | ✓                  |             |

Norgate Investor Services provides quality end-of-day and intraday hourly snapshot data for stock markets in Australia (ASX), Asia (SGX) and USA (AMEX, NASDAQ, NYSE, OTC-BB, PinkSheets). Extensive historical data is available. Hourly snapshot data is available for the ASX and SGX.

Stock data is organised into security types (equities, indices, warrants, options) and can be organised into custom folders which allow you to segregate such as index participation, sector, industry group, dividend-paying-shares. World Indices are provided free with any subscription.

It is very important to ensure that you have an accurate record of each security's activities. The following maintenance is performed automatically:

- Equity prices are adjusted for changes to a company's capital base (such as share splits, consolidations, or capital restructures)
- De-listed securities and associated trading instruments (eg options & warrants) are moved from the main database into a "De-listed Securities" folder (from where you may delete them at your leisure)
- Expired company options, warrants, exchange traded options and interest bearing securities are delisted.
- Securities that have undergone a name or code change are refreshed to reflect the new name or code.
- Securities that have traded in a deferred settlement mode (usually due to a capital adjustment or rights issue) are merged with their original code.
- New securities that have been added to the database during the week are assigned their full names.
- S&P Global Industry Classification Scheme sector/industry group/industry/sub-industry lists, S&P/ASX 20/50/100/200/300 index constituents, and ASX short-sellable securities for the Custom Folders are updated weekly.

Data is also provided for highly liquid futures markets in Australia (ASX24), Asia (HKEX, KSE, SGX), Canada (Mx, WCE), Europe (Eurex, IPE, LIFFE) and the US (CBOT, CME, COMEX, KCBT, NYBOT, NYMEX). Coverage includes precious metals, currencies, indexes, interest rates, bonds, energy commodities, agricultural commodities. Futures data is available in individual, spliced continuous and back-adjusted continuous contract forms and extensive historical data is available.

Foreign Exchange (FOREX) data covers 82 currency pairs on an end-of-day basis. Extensive historical currency data back to 1991 is available.

**PrimeCharts** has been developing, manufacturing and maintaining stock market related software since its inception in 1986. Under the original company name **EasySoft**, the flagship product, Market Master was introduced in 1987 in the form of the Market Master suite of programs for DOS and then launched as the first range of Stock Market Software for Windows in South Africa. It has since become a leading software package in South Africa, Australia and the United Kingdom. **PrimeCharts** has users of this exciting range of analysis software throughout the world. Market Master 2000 was given the Readers Choice Finalist Award for Stocks & Commodities in 2001. We invite you to also read the Stock and Commodities feature article on Market Master X-ec at this link: [http://www.traders.com/Reprints/PDF\\_Reprints.html\\$PC\\_MARKET](http://www.traders.com/Reprints/PDF_Reprints.html$PC_MARKET).

**PrimeCharts** have over the years worked closely with their Australian Partner **ShareFinder** (<http://www.sharefinder.com/www.sharefinder.com.au>) to integrate their mechanical trading strategies – SPA and Osprey – with Market Master. Investors using Market Master with SPA or Osprey can thus be sure that their investment decisions have the backing of years of research and expertise from both these companies.

**PrimeCharts** provides data for the ASX, JSE, LSE, AIM, NASDAQ, NYSE and AMEX stock markets. We are proud to be the first seamless multi-stock market software developer in the world.

**PrimeCharts** provides the most comprehensive data feed, including:

- share prices
- gilts
- bonds
- equities
- unit trusts
- and all the major overseas indices

**PrimeCharts** has developed Market Master X-ec as an additional REAL-TIME advanced technical analysis tool for all **Bloomberg Terminals** – follow this link for more info: [www.marketmasterxec.com](http://www.marketmasterxec.com).

To the users of **PrimeCharts** software, it provides Market Reports, Local and international News headlines, program updates announcements as they are released as well as company announcements, upcoming events and general news

The new Proquote International system is a market leading market data system that offers institutional buy side firms and the broader financial community in-depth coverage in over 100 markets of international equity, fixed income, currency, commodity and derivatives markets and indices. The system incorporates extensive pre-trade analytics and decision-making tools, configurable stock lists and alerts, news feeds from multiple sources including RNS, Dow Jones and AFX, in-depth company fundamentals, intra-day equity and index charting, as well as all the features you would expect at the back end to deliver a product capable of doing much more than delivering the information.

It provides rich data where you expect to find it with industry-accepted symbology and navigation combined with a Windows application look and feel, meaning it is immediately familiar to users. Ease of use is further enhanced with some of the most advanced search and filtering functionality available. The system is so easy to learn and use that the majority of new users require no training at all to be immediately productive.

It is a highly resilient system that utilises three independent data centres to ensure superior data quality, speed, and uninterrupted service to our customers.

Proquote International's user accounts and administration systems are fully portable as you can save workspaces online, giving accessibility to your Proquote data anywhere you are in the world. Proquote International also offers a mobile service with a number of different 'on the move' features which runs on various mobile devices including Blackberry handsets, PDAs, smartphones and GPRS/3G handsets. With no set up costs and no duplication of costs, you are free to monitor market developments including news, quotes for global forex and equity markets and detailed analytical charts. There is also the capability to receive SMS alerts customised to your personalised stock lists.

**Telekurs Financial** A leader in its field, SIX Telekurs specializes in procuring, creating, processing and distributing international financial information. Financial market specialists at SIX Telekurs gather information from all the world's major trading venues – directly and in real-time. SIX Telekurs' award winning database of reference data, corporate actions and pricing for 7.6 million financial instruments is structured and encoded, and is unique in terms of its depth of information and data coverage. With offices in 23 countries, SIX Telekurs combines the advantages of global presence and local know-how.

SIX Telekurs is a SIX Group company. On a global scale, SIX Group offers first-rate services in the areas of securities trading, clearing and settlement, as well as financial market information and payment transactions.

### Telekurs Financial's most important products:

- **Telekurs iD:** Web-based display product family giving users access to SIX Telekurs' entire range of data and functions. Telekurs iD is available as a java, an html and a mobile solution. [www.telekursid.com](http://www.telekursid.com)
- **Market Data Feed (MDF):** The SIX Telekurs market data feed supplies current prices and news from over 800 trading places. Historical and calculated data are provided as well and can easily be linked to pricing information. The MDF is available through various API interfaces (MDFStream, MDFSelect, APiD).
- **Valordata Feed (VDF):** Structured and fully encoded descriptive and corporate events database; includes ratings and reference data for instruments and institutions, corporate actions, cash flows, valuation prices; the data feeds are supplied several times a day. Available in Edifact, XML, ISO15022 and pdf formats.
- **Intraday Pricing Service:** Snapshot service which enables the valuation of portfolios several times daily and End of Day. The timing of snapshots is tailored to each client's requirements.

Reuters, the global information company, provides indispensable information tailored for professionals in the financial services, media and corporate markets. Reuters information is trusted and drives decision making across the globe based on its reputation for speed, accuracy and independence.

Although Reuters is best known as the world's largest international multimedia news agency, more than 90% of its revenue derives from its financial services business. Approximately 350,000 financial market professionals around the world rely on Reuters services, providing them with the information and tools they need to help them compete.

The company's core strengths lie in providing the content, analytics, trading and collaboration tools needed by financial professionals. Reuters open technology, based on industry standards, enables its customers to search, store and integrate its information with content from other sources, facilitating the way they work. Reuters also provides these users with specially designed tools to help them reduce risk, distribute and manage the ever-increasing volumes of market data, and offers bespoke automated trading products for the treasury market. In addition to the financial market professionals who rely on Reuters news to trade and make decisions, it supplies news – text, graphics, video and pictures – to media organisations and web sites across the globe.

Reuters operates its business through four customer divisions, based on the shared needs and requirements of the communities that Reuters serves:

**Sales and Trading:** focuses on Reuters core business among its sales and trading end-users dealing in the foreign exchange, fixed income, equities, commodities and energy and related markets. This segment concentrates on trading on both the buy and sell-side, delivering world class cross-asset trading data, news, analytics and transactions capability.

**Research & Asset Management:** focuses on supporting end-users such as portfolio managers, wealth managers, investment bankers and research analysts, who are making complex financial decisions outside the sales and trading environment.

**Enterprise:** targets the complete business enterprise as a customer, as distinct from the end-user. As such this segment focuses on Reuters business in enterprise information distribution systems (e.g. real time datafeeds), risk and enterprise information products.

**Media:** focuses on Reuters wholesale media business, serving the needs of the world's newspapers, television and cable networks, radio stations, websites and consumers (through [www.reuters.com](http://www.reuters.com))

Townsend Analytics is a recognized leader in technology-driven solutions for the global capital markets. For over 20 years, Townsend Analytics has been a pioneering force in revolutionizing the way the world trades by consistently developing innovative tools, data and infrastructure “firsts” that have become market standards in financial services;

- First real-time financial software under Microsoft Windows®
- First to provide real-time streaming data over the Internet
- First integrated solution for NASDAQ trading rooms
- First Windows-based direct-access trading solution
- Created the groundbreaking technologies behind Archipelago ECN and its successor ArcaEx: the first all-electronic, fully open exchange in North America

Townsend Analytics’ flagship product RealTick®, is the industry’s leading multi-asset, multi-broker, multi-route, and multi-region market data, analytics, and direct access trading platform and. RealTick is used by tens of thousands of traders globally in over 94 countries and territories.

Townsend Analytics’ four core business lines are:

- Trading Services
- Content/Data Services
- Exchange Services
- Portfolio and Risk Services

**Operating a full-scale service bureau and multiple state-of-the-art data centers**, Townsend Analytics provides the tools, expertise and infrastructure to help its customers achieve world class performance across each of their respective businesses. Townsend’s extensive customer and distributor network includes the world’s leading financial institutions, banks, hedge funds, money managers, trading desks, CTAs, FCMs, corporations and professional and retail traders.

TurboTrader ([www.TurboTrader.net.au](http://www.TurboTrader.net.au)) is the essential tool for live trading, designed specifically to assist with identifying early trading opportunities on the Australian Securities Exchange (ASX).

TurboTrader continually scans live market action and presents it without any refreshing. All information is dynamically displayed in your favourite web browser, showing the action as it happens in an easy to understand format.

Features include:

- Customisable dynamic market profiles and watch lists to filter live streaming ASX data.
- Real-time alerts to above-average volume movements, unusual activity, and other indicators.
- Dynamic market depth and course-of-trades.
- Automated Portfolio simulating paper trading with custom trading conditions.
- Candle-stick or bar charts for end-of-day and intra-day with market depth overlays.
- Relative price analysis, comparing live and historical data.
- Trade Safety filters that estimate the liquidity for safe positions.
- Pre-market analysis based on opening estimates. View the building pre-open activity.
- End-of-Day data available nightly.
- Chat rooms to discuss alerts, opportunities, chart patterns and system support.
- Simple cross-platform, browser-independent interface. No software download.
- Free no-obligation 14-day Trial, receiving real-time assistance from other members.

TurboTrader is a registered business name of The Australian Share Traders Co-operative Ltd ([www.AustralianShareTraders.com](http://www.AustralianShareTraders.com)) ABN: 50 976 789 710

The Co-op was formed by subscribers to the TurboTrader platform. With their combined resources our service will now continue to build on its existing suite of the best trading tools available. Co-operative membership is open to all subscribers of the TurboTrader platform.
