# Console Protection Guarantee

Pelican's  
Console

Protection Guarantee assures you of Pelican's commitment to quality and customer satisfaction. The Protection Guarantee warrants the connection (the plug port of the video game console and the plug of the Pelican controller) between the controller and your video game console system., i.e., that with the proper use of our controller (see manual) we agree to replace or repair your video game system in the event that our controller directly causes damage to your game console as a result of our controller failing to perform properly. Circumstances that may cause our protection guarantee to take effect might be one of the following :the video game console does not acknowledge a controller which has been plugged in, original controller fails to operate after using a Pelican controller, other non-pad controllers fail to operate after using a Pelican Controller. This protection warranty does not include the video game power supply, any part relating to the CD/DVD load and read mechanism, internal operating system, nor the cabinet of the video game system. This warranty will not apply if the Pelican controller is not used as directed in the product manual enclosed. For further information or help please contact us toll free at (800) 331-3844 or on line at <http://www.pelicanperformance.com>

## Overview

Wireless Blade 2.4 Street controller uses advanced 2.4 GHz technology and Channel-Hopping which gives you the ability to play without the limitations and hassles of typical corded controllers and switch-dependent controllers. All of this gives you lightning fast control over your favorite games without cords to trip over, channels to set, or fears of outside interference disturbing play control. There are a few buttons, LED's (lights), and features not found on your basic Xbox® Controller. The following is an explanation of these elements.

**Auto-Hopping** This removes the hassle of setting channels via a series of switches or having your connection corrupted by interference. Auto-hopping moves to the nearest, clearest channel for you, with no breaks in play, to make sure your signal never lags behind your commands. **Simply press the CONNECT button on the receiver, wait three seconds and press the BACK button on the controller to make a connection. This programs the Host to connect to the Controller every time it is used.**

## Features & Benefits

### **Auto On/Off:**

The controller will automatically go to sleep mode after 3 mins. of no action. Holding the START button for 5 seconds also sends the controller to sleep. Touch any of the four action buttons (A,B,X,Y), START, or BACK to power up your new wireless controller.

**Hyper-Responsive Controls:** Our controls are made out of top quality components so that you lose nothing in control and response when you need it most over the life of your controller.

### **Signal LED:**

If the LED light lights up green when pressing an action button or moving the analog sticks, your 2.4 Street controller has a link and is working properly.

### **Relocated Black and White Buttons:**

The Black and White buttons have been relocated to give the user greater comfort and a much quicker reaction time than other controllers.

### **Battery Compartment:**

2.4 Street controller requires the use of two AA batteries (not included). The batteries were placed in between the triggers making the 2.4 Street controller's weight perfectly balanced. Double check and make sure batteries are inserted correctly.

### **Power Save Mode:**

When not in use for 3 min the 2.4 Street controller automatically goes into a sleep mode to conserve batteries. A touch of any action button puts the controller back into play mode. The Rumble Motors will automatically disable when the batteries are getting low. You can disable the Rumble Motors manually by pressing the D-Pad Down and Back at the same time. You can restore the Rumble Motors by pressing the D-Pad Up and the Back button.

## **WARNING**

Please verify that all the batteries are inserted correctly. If they are inserted incorrectly, it may cause personal injury as well as damage to your 2.4 Street Wireless Controller.

# Directions

1. Make sure your Xbox® is turned off.
  2. Remove the battery lid and place 2 AA batteries into the 2.4 Street Wireless controller. Make sure the batteries are inserted as shown in the battery compartment.
  3. Insert the receiver into the Xbox® controller slot of your choice and power up the Blade Street and then your Xbox®. **Note:** Press the Connect button on the Receiver once (Signal LED will FLASH slowly). Then press the Back button on controller. This programs the Receiver to connect to that Controller every time it is used. This operation can be done again and again to connect to multiple controllers.
  4. Alternatively, if any problems should occur during play (due to low batteries, receiver disconnection from the system, etc.) you can turn the controller off and then on, check the control, and if you still do not have signal, press the connect button on the receiver, wait three seconds and then press the Back button.
- Note:** If you are using more than one 2.4 Street controller, simply repeat the above steps and it should connect exactly the same way on an available channel.
5. Insert a game into your Xbox®.
  6. You are now ready to play.

# Troubleshooting

If you are having difficulties with your new 2.4 Street controller please refer below:

## ***My system turns on but I don't see anything on the TV.***

1. Check to verify that your A/V cable is properly connected to your system.
2. Check to verify that your A/V cable is properly plugged into your television set.

## ***My 2.4 Street Wireless Controller does not respond.***

1. Check to verify that your batteries are inserted correctly.
2. Check to verify that the power is on. Check to verify that the signal LED is blinking.

## ***The power LED is on but my 2.4 Street does not respond while in the system menu.***

1. Check to verify your Receiver / Transmitter unit is firmly and properly plugged into controller port one through four (match the port with player controller selection).
2. Check to verify that the receiver is firmly connected to the system and the light is on. Then, press the connect button, wait three seconds and press Back on the controller in the corresponding slot.

## Warranty Card

Pelican warrants to the original consumer purchaser that the product will be free from defects in materials and / or workmanship for a period of 5 years from the date of purchase. If a defect covered by this warranty occurs during this period, Pelican at its option will repair or replace, at no charge, any part that Pelican determines to be defective.

To obtain warranty service during the warranty period, send the defective product postage pre-paid, with a money order for \$4.00 (in U.S. currency) to cover the return postage and handling, along with proof of purchase and the date of purchase to:

**Pelican Performance**  
1840 East 27th Street  
Vernon, CA 90058

This warranty shall not apply if the product has been damaged by abuse, misuses, negligence, accident, modification, tampering or by any other causes unrelated to defective materials and / or workmanship.

Repair or replacement as provided under this warranty is Pelican's exclusive prerogative. ANY APPLICABLE IMPLIED WARRANTIES, INCLUDING WARRANTIES OR MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HERE BY LIMITED TO 5 YEARS FROM THE DATE OF PURCHASE AN ARE SUBJECT TO THE CONDITIONS SET FORTH IN THIS LIMITED WARRANTY. IN NO EVENT SHALL PELICAN BE RESPONSIBLE FOR ANY INCIDENTAL DAMAGES THAT MAY RESULT FROM THE BREACH OF ANY EXPRESS OR IMPLIED WARRANTIES. This warranty gives you specific legal rights, and you may also have other legal rights, which vary from state to state.
