5. Ensure the power supply and electric current are under stable condition. Avoid sharing the same power supply with high voltage consumption appliances
6. When plug and unplug the TF card, please do it gently.
7. If the device is not in use, please unplug the power supply.

## 6. Accessories

Function	Description	Remarks
CPU	High-performance single-chip ARM Cortex A9 Quad Cores	
DDR	1G DDR3	
FLASH	8GB /16GB EMMC	
DISPLAY	23.1 inch , Innolux S231AJ1 TFT LCD 158*1920	
TF CARD	Support TF card expansion	Support multimedia playback
USB PORTS	Provides 3 USB 2.0 ports, and is connected to the computer as a software upgrade interface and U disk, camera, TP and other peripheral expansion	
POWER INPUT	DC 12V/2A Power input, TYPE_C interface	Standby<0.5W
LANGUAGE	Support	
WIFI	Support 2.4G

## **FCC Caution:**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning for Mobile device:

This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.
