

## **(051-068-NA) - IR Receiver for Harmony Remotes for PS4 console – User Manual**

### **Setting up your Harmony remote:**

- 1) Please refer to your user manual included with your Harmony remote, or visit [setup.myharmony.com](http://setup.myharmony.com) to set up your remote.
- 2) When you add a device to the remote, enter “PDP” for the manufacturer and “IR Receiver for PS4” for the Device Model Number.
- 3) Your remote is now ready to use with the PDP IR Receiver for your PS4 console.
- 4) You can change and adjust your buttons to your liking for the PS4 console controls in the MyHarmony App.

### **Setting up your IR Receiver:**

- 1) Plug in the AC adapter into a power supply and plug the micro-usb cable to the back of the IR Receiver.
- 2) Position the PDP IR Receiver so that it has a clear line of sight with your Harmony receiver.
- 3) Turn on your PS4 console.
- 4) Go to: Settings -> Devices -> Bluetooth Devices on the PS4 console menu.
- 5) On the IR Receiver, press and hold the sync button on the back for 5 seconds until you see the red LED flashing on the front of the IR Receiver.
- 6) While the LED is flashing on the IR Receiver, you will see “PDP Harmony Box” appear on the Bluetooth menu screen. Select “PDP Harmony Box” on the Bluetooth Devices menu with a DualShock®4 Controller. NOTE: If the PDP IR Receiver fails to sync to the PS4 console, repeat steps 5 and 6.
- 7) Once the PDP IR Receiver has been synched to your PS4 console, your Harmony remote will be ready to use for your PS4 console.

### **CAUTION:**

Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

The equipment complies with FCC RF exposure limits set forth for an uncontrolled environment.  
The equipment must not be co-located or operating in conjunction with any other antenna or transmitter

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC ID: X5B-051068**

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

IC: 8814A-051068

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada,. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type de d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme aux CNR exemptes de licence d'Industrie Canada. Son fonctionnement est soumis aux deux conditions suivantes :

- (1) Ce dispositif ne peut causer d'interférences ; et
- (2) Ce dispositif doit accepter toute interférence, y compris les interférences qui peuvent causer un mauvais fonctionnement de l'appareil.
