- Dimmable: No
- Voltage: 220 - 240 V

## Durability

- Lifetime of lamp: 10000 hour(s)

8718696715406

# Highlights

## Cool, energizing light (3000K)

Light can have different color temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more cozy light, while those with a higher Kelvin value produce a cool, more energizing light.

## Energy saving

Enjoy the energy-savings of LEDs without sacrificing light quality

## Instant light when switched on

No need to wait: Philips LED light bulbs provide their full level of brightness immediately upon switching on.

## Safety and security

If you're working late or out for the night, you can simply turn your connected lights on or off remotely. That way you can make it look like you're at home, even when you're not. You can also set your lights to come on at a set time. Ideal if you're away on holiday but you want people to think you're still in! The lights will switch on just before you arrive home from work; that way you'll never come back to a dark house again.
