Highlights

PowerCyclone 7

The aerodynamic design of PowerCyclone 7 minimizes air resistance and ensures exceptional cleaning performance through 3 highly efficient steps: 1) Air enters fast into the PowerCyclone thanks to the straight and smooth air inlet. 2) The curved airpass quickly accelerates the air upwards in the cyclonic chamber. 3) At the top of the cyclone, the exit blades effectively cut out the dust from the air.

TriActive Z hard floor nozzle

The new TriActive Z hard floor nozzle removes all dust and crumbs in one go. Unique Z-shaped design guides the dust and the bigger crumbs into the air channel without pushing them forward. Side air channels perfectly clean along the plinths. Now there is no more need to lift the nozzle to remove bigger crumbs and ensure an exceptional clean of your hard floors.

NanoClean Technology

The new innovative technology is especially developed to prevent the usual dust cloud. The new innovative technology is especially developed to prevent the usual dust cloud. The dust settles at the bottom of the dust bucket rather than staying in the air. When the bucket is opened there is no usual dust cloud.

Extra Ergonomic Dust Bucket

The side of the bucket has a specially designed spout-like shape. This enables to empty the bucket in a controlled manner without spilling the dust.

ErgoGrip Remote Control

ErgoGrip remote control enables easy maneuverability of the nozzle in tight spaces.

Integrated remote control makes it easy to increase, reduce the power or even turn off the vacuum cleaner.

Ultra Clean Air HEPA 13 filter

The Ultra Clean Air HEPA 13 filter captures at least 99.95% of all dust, ensuring a clean & allergen-free environment.

TriActive+ nozzle

The TriActive+ nozzle applies 3 cleaning actions in one go: 1) It gently opens the carpet with its specially designed soleplate to remove the dust deep down. 2) It sucks up big bits with its larger opening at the front. 3) It sweeps up the dust and dirt alongside furniture and walls with its two side brushes.
