

# Multi Measurement Module Mounting Installation Note

Attach the universal mounting clamp to the multi-measurement module (MMS) mount and then mount the MMS cable in the MMS clamp according to the following instructions to ensure that cable is attached permanently. Do not remove the MMS cable from the MMS clamp.

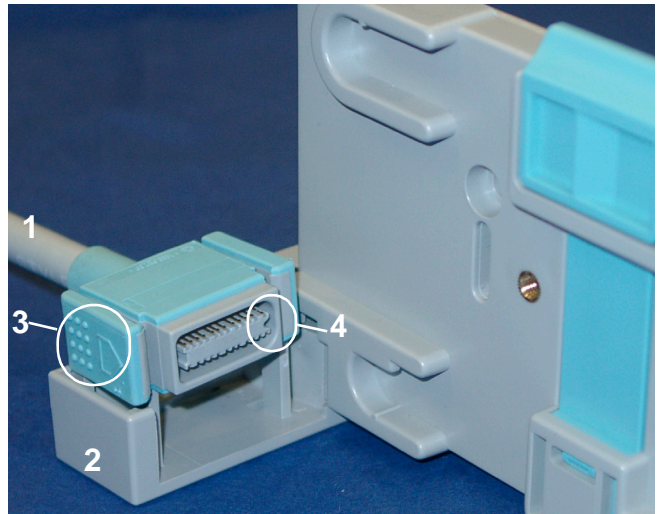

1. Attach the universal mounting clamp to the mount with two M4x16 screws either in horizontal or vertical position to suit your installation.

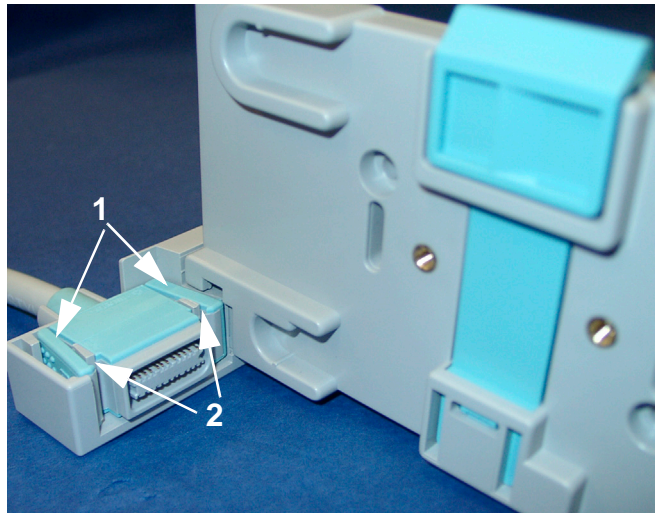

To install the multi measurement module:

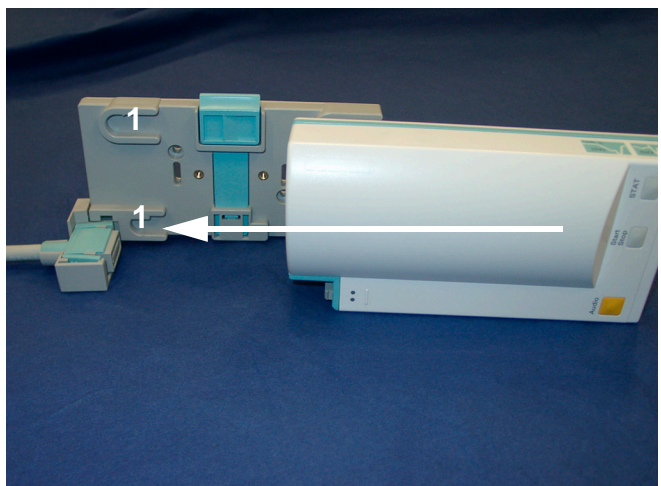

2. Place the cable (1) on the clamp (2), as shown in the picture. Use the visual guide (3) and the positioning notch (4) to ensure you have the cable correctly positioned.

3. Squeeze the side clips (1) open slightly and ease the cable into the clamp so that the clips grip the gray pillars (2).
4. Press the cable down firmly to ensure that it is fully seated in the clamp.

5. Align the feet on the MMS with the locating shoes (1) on the mounting plate and slide the MMS onto the mounting plate.

6. Ensure that the cable is securely fixed to the MMS. Once fixed, do not remove the cable from the MMS clamp.

## Replacement Part Installation Instructions

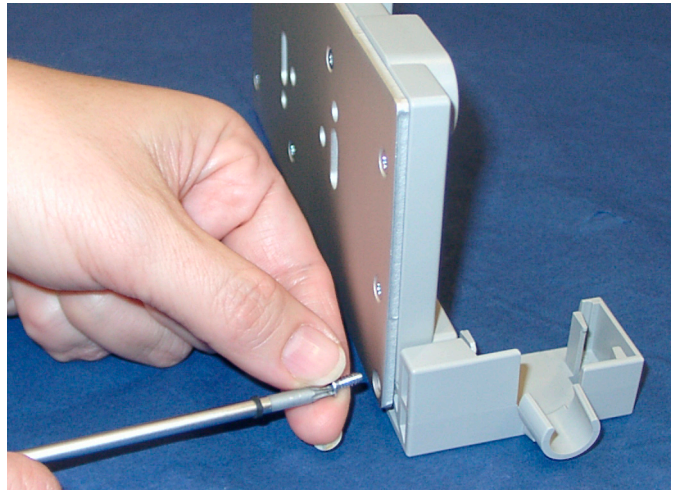

M8000-60012 kit contains:

- 1 x MMS MSL (Multi Measurement Module Measurement Link) clamp.

Before mounting the multi measurement module onto the mounting plate, you must first screw the clamp to the mounting plate, using a Torx T10 screwdriver.

- 1 x Screw
- 1 x Installation Note

Tool required: Torx T10 screwdriver (not included).
