Your music universe ...converged

on one wireless system

Music makes your world go round, but it shouldn't make your head spin.

Just gravitate towards the Philips Streamium wireless music center WAC3500D, which has the uncanny ability to simplify your life, while expanding your music enjoyment.

The latest member of the Streamium family lets you relish all your music from diverse sources – from your iPod and USB device to your PC – on one sleek and savvy wireless music system.

Go on and dock, stream, plug, rip n' store, tune in... or simply play whatever you desire. The WAC3500D delivers solid, hi-fi quality sound so you can turn it up or just chill out.

Still, the new Philips Streamium WAC3500D is not just about convenience and convergence. It's about adding another dimension to all-in-one... and making it more-in-one. ■

Music united

Music unites people.
But what unites your music?

Well, you... and your Wireless music center WAC3500D.

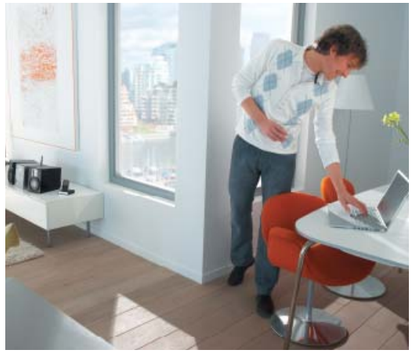
Be the DJ of your music empire and stream a selection – or your entire collection – of tunes from your PC to the WAC3500D. No cables, no hassles.

Or access your music library of 1500 CDs that you've effortlessly ripped and stored on the Center's massive 80 GB hard disk.

Say you've been on the go with your trusty iPod. Now you're home, but you're only midway through your favorite track? Keep the groove and juice going simply by docking – and charging – your iPod on the WAC3500D. Turn up the sound and soak it in.

And yes, the WAC3500D lets you play CDs or plug n' play USB flash memory devices.

Multiple choices never sounded this good.



Easy does it

You'll be surprised at how easy it is to consolidate and control all your music – and your listening pleasure.

To track down your tunes, just reach for the handy remote control. Hit the alphanumeric keys to instantly locate your song according to artist, album or genre in the navigation menu. The cool, white-backlit LCD display on the WAC3500D makes it easy to see what you're doing.

To stream it like a dream, connect to your WiFi network and wirelessly transfer your music from your PC to the Center. It's as easy as drag n' drop. Ready to let it rip? Just slide your CD into the WAC3500D and it will do the rest. Plus, Gracenote's automatic song information search will track down and add necessary data like the artist name and song and album title to each ripped music file.

We keep things simple so you can focus on more important things... like having fun.

Sound it out

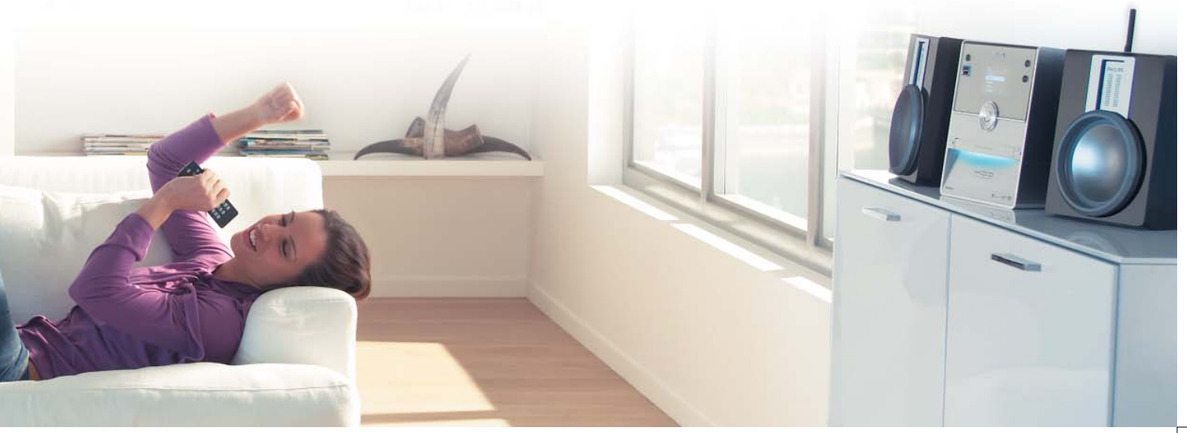
Now, you can enjoy all your music – whatever the music source – in high quality, high fidelity sound.

No more tinny tunes from inferior PC speakers and no more discomfort from earphones. Just play it up and as loud as you like on the Wireless music center WAC3500D.

With 2 x 40W speakers and a Class 'D' Amplifier, your ears are in for truly dynamic sound.

To take things up a notch, the 2-way speaker is integrated with a tweeter so you get crystal-clear high frequency sounds. To balance the sublime tones, the 5" woofer delivers rich bass sounds.

Every added sound feature is geared to ensure a superb, all-round sound experience. How's that for keeping the harmony in your home?



Simplicity expressed

The epitome of simplicity. That is the new Wireless Music Center WAC3500D. Just one look at it and you will understand.

Our designers went back to basics while preserving the sleek, signature look of the Philips Streamium. High-gloss black seamlessly extends around corners to meet with contrasting silver brush foil on an ultra-compact form factor. With its clean lines and precise detailing, the set exudes timeless sophistication.

To add an edge to our Streamium design – literally – the WAC3500D's center and speakers flaunt a subtly angled front. This makes it easier for you to view the LCD display and interact with the system.

When switched off, you can see your own reflection in the mirror finish on the front and top. Power it up and information on the large screen display is entrancingly revealed. A discreet blue glow emits from the set's sturdy aluminum base, making it seem like it's floating.

Which is pretty apt, since it's prepping you for a totally cool audio experience.

Add it on, play it up

The Streamium wireless music center WAC3500D not only grows on you, but also grows with you.

That's right, you can choose to add up to five Wireless music stations throughout your home and fill it entirely with music... wirelessly.

Now that you've effectively converged all your music on one Center and have installed Stations in each room, you can easily divide and conquer your music all through your house. Plus, there are innovative features to help you accomplish this:

My Room, My Music

Because you run a democratic household, you can choose to workout to the latest pop hit in the den while your better half relaxes to jazz in the bedroom. With 'My Room, My Music', you can stream and enjoy up to six different music options in any space – at the same time!

Music Follows Me

How would you like the music that moves you to move with you? Forget the hassle of hunting for the remote to stop, search and restart tracks when you're moving from room to room. Just hit the 'Music Follows Me' button and the track you're listening to will resume playing in the room that you're currently in. So you can keep bopping to that R&B track from your study... to the kitchen.

Music Broadcast

With this cool feature, you're the DJ of your own party! One touch of this button and you can instantly broadcast your desired music or playlist to every Station located throughout your home. Set the mood and get the groove going – your way.

Smart and easy

Feature highlights

80GB hard disk/ 1500 CDs

The 80GB hard disk offers a very large capacity for you to store your digital music files. It easily holds up to 1500 CDs of your music collection, and the recording speed is so fast that you can basically play and rip a particular song almost at the same time.

iPod docking

The iPod docking cradle lets you connect your iPod directly to the Wireless music center and enjoy it in superb sound. Simply switch the Wireless music center to AUX IN mode before docking your portable player. Use the Center's remote control for music navigation and control on your docked player to enjoy the music collection in your portable devices.

USB Direct

With the USB Direct mode, you can simply select the music on a USB device and playback all your content through the Wireless music center. All you have to do is plug in your USB device to playback music or export content from the Wireless music center to the device.

Gracenote

Gracenote is a database that contains the meta-data of the most popular CDs. Once you insert a CD in the tray of your Wireless music center, it will search for the album, artist and track information before displaying it. If the CD cannot be recognized by the Gracenote, the Center can perform an online query as long as you have connected the Center in an infrastructure mode with internet access. No need to look up CD song information in the booklet! Plus, you can now easily organize your music according to artist, genre, album and song title.

Class 'D' Digital Amplifier

Class 'D' Digital Amplifier takes an analog signal, converts it into a digital signal and then amplifies the signal digitally. The signal then enters a demodulation filter to give the final output. The amplified digital output delivers all the advantages of digital audio, including improved sound quality. In addition, Class 'D' Digital Amplifier has greater than 90% efficiency compared to traditional AB amplifiers. This high efficiency translates into a powerful amplifier with a small footprint.

My Room, My Music

My room, my music

With 'My Room, My Music', your family member can enjoy their chosen music from the stored collections in any room equipped with a Wireless music station. Multiple User Access technology simultaneously stream music selected by the client Wireless music station from the Wireless music center. One Wireless music center can stream music to up to five Stations. That's six different music options for your whole family to enjoy in any room – simultaneously and instantly.

Music Follows Me

Music follows me

'Music Follows Me' feature allows you to bring your favorite music from room to room in your house without having to restart navigation and playback of that particular track. By simply pressing a button, your favorite song will follow you anywhere you go in your house.

Music Broadcast

Music broadcast

Be your own DJ at your home party and simultaneously broadcast your favorite dance music from the Wireless music center to all Wireless music stations installed in various parts of your home. Great for parties!

Stream, dock and play

For true convenience, the all-in-one Wireless Music Center WAC3500D with 80GB hard disk lets you stream music from your PC, dock your iPod, plug and play from USB devices, and enjoy HDD playback – all in superb sound.

Streamium Wireless Music Center
