Studio 500-USB

version 10

Quickly Enhance and Share Your Memories with Video

Product Overview

Studio 500-USB version 10 is the most friendly, complete and powerful home video editing solution available today. Studio 500-USB combines the legendary ease of its intuitive three-step movie creation process with the

power to quickly and reliably capture all of your precious memories from photos, videos and audio from popular digital and analogue consumer electronic devices. Next, Studio 500-USB intuitively walks one through adding groundbreaking effects, like Pan-and-Zoom, music and titles to create blockbuster home movies for preserving and sharing on DVD, the Web and beyond.

Studio 500-USB is one of three flavours created to better accommodate the specific needs and requirements of entry level to intermediate video storytellers alike. Studio software delivers comprehensive support for all-digital workflows while Studio 500-PCI adds an easy to install internal PCI card for capturing and outputting from and to analogue video cameras and VCR's. Studio 500-USB provides the power and flexibility in the form of an attractively designed F.A. Porsche plug and play USB-2 device with support for all video cameras from either a PC or a laptop.

Key Features in Studio

- **Simplicity and Ease of Use** – The intuitive user interface with simple three step process effortlessly guides you through the 1) Capture, 2) Edit (Enhance) and 3) Share steps and makes learning and using Studio literally a breeze.
- **SmartMovie** – Pinnacle Studio's SmartMovie feature literally walks you through the creation of amazing movies from capture to adding spectacular effects, transitions, titles and music in minutes.
- **Built-in DVD Authoring** - Pinnacle's fully integrated CD and DVD authoring workflow allows you to easily create DVDs with menus and custom navigation on the fly.
- **Instant Transfer to DVD** – Pinnacle Studio provides a quick and easy way to instantly create robust DVD's with menus without first copying your files over to your PC hard drive.
- **Pan and Zoom** – Effortlessly create high quality movies by animating your digital photos with close ups and pans and scans in any direction.
- **Video and Audio Restoration** – Pinnacle Studio includes tools like video cleaning to restore old damaged video tapes; image stabilization for shaky and jerky footage; as well as

Positioning

Studio 500-USB version 10, from Pinnacle Systems, the leader in home video editing solutions, is a complete set of home video editing tools created to get the entry level storyteller started right away. Studio provides users with the easiest way to enhance, preserve, and share their precious memories on DVD, the Web and more in minutes. More specifically, Studio 500-USB provides the power and flexibility in the form of an attractively designed F.A. Porsche plug and play USB-2 device with support for all video cameras from either a PC or a laptop.

Target Market

The complete family of hardware and software solutions anchored by Pinnacle Studio version 10 covers the needs and requirements of everyone from the entry level to intermediate video storyteller who wants a simple and complete way to quickly edit, enhance and preserve all of their precious media so that it is all available to view and share with anyone at anytime.

colour correction for bringing out the genuine quality in poorly lit video shoots; and noise reduction for the elimination of sounds such as wind and rain.

- **Real-time Effects with Preview** - Pinnacle Studio includes hundred of real-time effects and transitions that can be previewed immediately, in full screen, right on your computer monitor.
- **SmartSound®** – The SmartSound feature provides a vast library of categorized royalty free music to compliment your visual creation.
- **Many Popular Sources and Formats** – Pinnacle Studio now gives you the power to capture video from the latest consumer cameras and devices including DVD video cameras. With Studio, you can actually import videos from non-encrypted DVD's for added enhancement and re-mastering.
- **Background Saving** – Now with Studio, you can transparently save in the background to the high quality format of your choice.
