For the best sound performance and a secure, comfortable fit, be sure to adjust the headphones to rest gently in your ear and drape around the back of your neck.

ADJUST THE FIT

1. Drape the stereo cable behind your neck.
2. Guide one earpiece behind your ear and secure the eartip inside your ear using the telescoping/swivel adjustments.
3. Repeat step 2 with the other earpiece and continue to adjust the fit in either ear until both eartips rest comfortably and securely in your ears.

Understand the Lights You See:

The LED will advise status of headphones.

- **Charging** (solid red)
- **Fully charged** (solid blue)
- **Low battery** (2 red flashes every 15 minutes)
- **On a call** (blue flash every 2 seconds)
- **Missed call** (3 purple flashes. Repeats for 5 minutes or until cancelled)
- **Pairing mode** (repeating red/blue flashes)

TIPS

Check the Battery Level:

If you are on a call or listening to music and hear 3 high tones then you have under 5 minutes talk time remaining.

At other times, you can check the battery level by tapping the Power button. The headphones will say how many hours of use remain. The LED also flashes red to show the charge level.

- 1 flash = more than 2/3 full
- 2 flashes = 1/3 - 2/3 full
- 3 flashes = less than 1/3 full

Stay Near Your Device:

Bluetooth has a working "range" of up to 30 feet between the device and headphones before audio degrades and the connection is lost. For best audio reception, keep your device on the left side of your body.

Know How to Reconnect:

Your headphones try to reconnect a lost connection. If they can't, then tap the Call button once or manually reconnect via the device's Bluetooth menu.

TAKE A GOOD LOOK

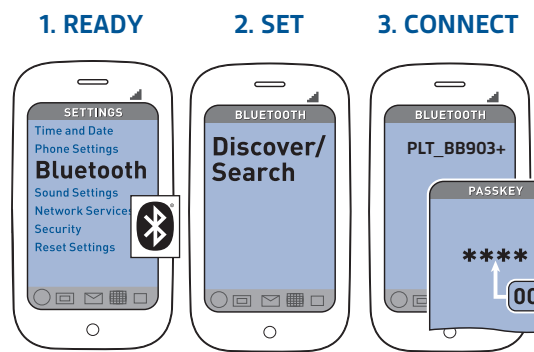

- CALL BUTTON**
- Take a call or end it (1 tap)
 - Redial (2 taps)
 - Initiate phone's voice-dialing (2-second press until tone is heard)
 - Reconnect lost Bluetooth connection (1 tap if the headset doesn't automatically reconnect)
 - Cancel missed call LED (1 tap)
 - Reject a call (2-second press)
 - Transfer call to/from phone (during call, 2-second press)
 - Enable/disable Online Indicator (while powered on, 2-second press Call and Volume Up buttons)
- MUSIC BUTTON**
- Play/Pause (1 tap)
 - Bass Boost (2-second press)
 - Mute Music or Call (1 tap)
 - Enable/disable OpenMic™ to pause music and activate mic (1 tap)
- POWER/PAIRING BUTTON**
- On/Off (2-second press to turn on, 4 second press to turn off)
 - Activate pairing mode after initial set up (press until red/blue LED flashes)
 - Check battery level (1 tap)
- VOLUME/TRACKING BUTTONS**
- Volume Up/Down (1 tap per level change)
 - Track Forward/Back (2-second press per track change)

Bluetooth wireless technology provides a way for devices, like headphones and phones, to communicate with each other without wires.

"Pairing" is the set-up process of introducing your headphones to your phone. Before using your headphones for the first time, you must pair them with your Bluetooth-enabled phone.

Pairing is a one-time process unless your phone loses the connection or you want to pair to a new phone.

CONNECT TO YOUR PHONE

1. READY

Activate the Bluetooth feature on your device, then get it to add / search for / discover new Bluetooth devices.

Phones have different menus to select from:

iPhone: Settings > General > Bluetooth > On (starts the search for devices)

BlackBerry® smartphone: Settings/options > Bluetooth: On > Search for devices

VIDEO TUTORIAL:

www.plantronics.com/pairing

2. SET

First time, right out of the box:

With headphones turned off, activate Bluetooth pairing mode by pressing Power/Pairing button on. The LED flashes red/blue to indicate pairing mode.

Pairing new phone/reconnecting original:

With headphones turned off, press Power/Pairing button until the LED flashes red/blue.

3. CONNECT

Select "PLT_BB903+" from the list of Bluetooth devices shown on your device.

If device asks for a passcode, enter four zeros (0000). You may see **** on screen.

Some devices also ask to confirm connection after pairing.

The headphone's LED will stop flashing red/blue once successfully paired/connected.

You can now make a call using your device's keypad or voice-dialing feature.
