

SELECT LANGUAGE

Wearing your headset, power it on. The first time you do, you will be prompted to select your language from a set of three options. When completed, you will hear "pairing", go to the "settings" menu on your phone to connect to your headset.

GET PAIRED

- 1 When the headset indicator lights  flashes red and blue activate Bluetooth® on your phone and set it to search for new devices.
 - **iPhone*** Settings > Bluetooth > On
 - **Android™ Smartphones*** Settings > Wireless & Networks > Bluetooth: On > Scan for devices
- 2 If necessary, enter four zeros (0000) for the passcode or accept the connection.
Once successfully paired, the indicator lights  stops flashing.

TAKE CONTROL

Answer or end a call

Tap the Call button .

Decline a call

Press the Call button  for 2 seconds.

Adjust the volume

Tap the Volume up (+) or down (-) button.

Mute on

During a conversation, simultaneously tap the Volume (+) and (-) buttons. You will hear "mute on", this voice alert will be repeated once. After that an alert tone repeats every 15 minutes when mute is on.

Activate voice dial (phone feature)

Press the Call button  for 2 seconds, wait for the phone prompt and then tell the phone to dial the name of a stored contact.

Change language

Reselect the headset language at any time by putting your headset into pair mode.

Press the Call button  until the indicator light flashes red and blue and you hear "pairing, please select a different language."

Redial

To call your last number dialed, double tap the Call button .

ADJUST THE FIT

The universal-fit eartip has a thin loop that bends to gently tuck into the contours of either ear. To adjust the fit, you can rotate the eartip on the headset or add the optional clip-on earloop.

For the best voice pickup, always check that the headset points toward the corner of your mouth.

CHARGE

Your new headset has enough power to pair and make a few calls. It takes 2 hours to fully charge the headset; the indicator light  turns solid blue once charging is complete.

FCC statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generate, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF exposure warning

- The equipment complies with FCC RF exposure limits set forth for uncontrolled environment.

The equipment must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: THE GRANTEE IS NOT RESPONSIBLE FOR ANY CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

IC Radiation Exposure Statement for Canada

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

SAVE POWER

If you leave your headset powered on but out of range of your paired phone for more than 90 minutes, your headset will conserve its battery power by entering into a DeepSleep™ mode.

Once back in range with your phone, tap the Call button  to exit DeepSleep mode. If your phone is also ringing, tap the Call button  again to answer your call.

HEAR IT WHISPER

Your headset tells you about status changes in English. For example:

“Power on”

“Pairing successful”

“Talk time (x) hours”

“Mute on”

"Incoming call"

"Answering call"

“Lost connection”

“Recharge headset”

USE TWO PHONES

Once you have paired your two phones, it's easy to answer calls from either phone.

When on a call, you will hear a ringtone notification of an incoming call from the second paired phone. To answer the second call, you must first end your current call (tap the Call  button) so new call automatically answers.

To pair a second phone or a new phone see "Change language" in the Take Control section.

STAY CONNECTED

Bluetooth has a working “range” of up to 33 feet (10 meters) between the phone and headset before audio degrades and the connection is lost. If you lose connection your headset will try to reconnect once you move back into range.

For best audio reception, keep your phone and headset on the same side of your body.

KNOW HOW TO RECONNECT

If your headset loses the Bluetooth® connection with your phone, it will automatically try to reconnect.

If your headset can't reconnect, tap the Call button once or manually connect through the phone's Bluetooth device menu.

If your headset remains out of range for more than 90 minutes, the DeepSleep™ mode will activate.

LISTEN TO MUSIC AND MORE

If your phone also has the Bluetooth A2DP (Advanced Audio Distribution Profile) stereo music feature, your music, podcasts, navigation and other streaming audio can be heard through this headset.

Music Tracking

While in A2DP mode you can adjust the volume by tapping the Volume up or Volume down button. To skip tracks, press and hold the Volume up or Volume down button until the track skips forward or backward. To play/pause hold both sides of the Volume button at the same time.
