When I use my headset with a softphone, the headset call control and mute buttons don't work.

Check the following:

- Make sure the softphone you are using is supported by viewing our software compatibility guide.
- If required to enable headset control (answer/end and mute) functionality, ensure you have Plantronics Hub for Windows/Mac installed. See Load software.

The headset sound is not working as expected when connected to your computer.

- During a call, nobody can hear me
- During a call, I can't hear anybody
- Music is not coming through my headset
- When I play music and a call comes in, the music is too loud or doesn't pause

To configure the headset sound on your computer, see Configure for media.

I can't unmute my headset when I'm on a softphone call.

Install Plantronics Hub for Windows/Mac.

During a call, I get interference and drops in sound.

Your headset is configured for optimal performance during conference calls. Stereo telephony is on by default. To increase Bluetooth density, change the setting by going to Plantronics Hub > Settings > Wireless > Extended Range Mode.

The headset talk time is not accurate.

Charge the headset fully to reset the accuracy of the talk time prompts.
