- Picture

- **Main Function：**

  Remote control duplicator which can copy 90% fixed code remote control in market.

- **How to work(3 functions)：**

  1. To remove the existing code:
Press buttons A and B simultaneously until the LED flashes (approximatelyv 10seconds), release both buttons and all codes will be eliminated .

  2. To duplicate code

Hold the The original and duplicator as close as possible to each other. Press button A on both duplicator and original transmitter at the same time, after 5 seconds, the LED will flash steadily,release both buttons and the code will have been accepted. Repeat the above operation to duplicate the code of the other buttons.

  3. Code retrieval

If the code is inadvertently removed previous code can be retrieved by pressing buttons C and D simultaneously until the LED flashes (approximately 10 seconds).
