1 Getting Started

Thank you for purchasing your new Polaroid DVC-00725F high definition HD Digital Camcoder. This camera with a 5.0 Megapixel sensor can take high definition videos and high quality still images up to 11.0 Mega pixels.

Outstanding features that your DVC-00725F HD Digital Camcoder has:

- A high quality glass lens system for well exposed sharp pictures from 0.5m to infinity including a 5X optical zoom mode and 4X digital zoom mode
- Built-in flash with three modes (Auto, Red-eye reduction and Off)
- Automatic white balance and exposure compensation to suit lighting conditions
- Large 2.7 inch LCD screen for easier image preview and review.

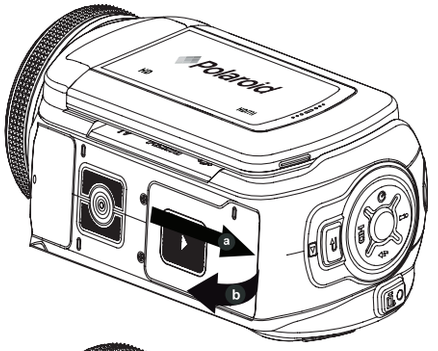
• Checking the Battery Level

Check the battery power level before taking videos or photos.

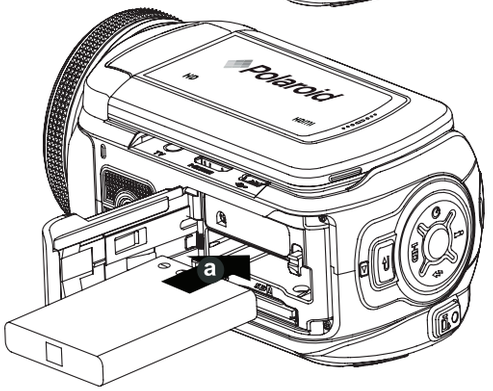
1. Turn on the camera.
2. Check the battery power level that appears on the LCD screen.

Battery power is full.
Battery power is adequate.
Battery power is low.
Battery power is exhausted. Please recharge the battery.

• Installing and Removing the Battery

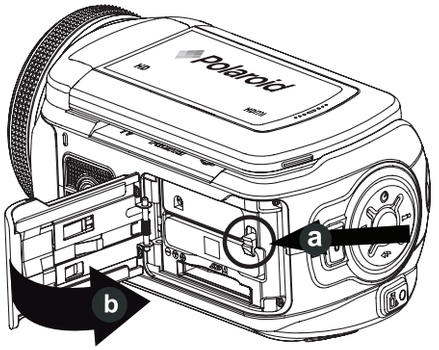


1. Open the camera's battery/SD card door by pushing it outwards as illustrated.



2. Insert the battery as shown.
3. Close the battery/SD card door by pressing it downwards then slide it back to lock.

4. To remove the battery, slide the battery lock and the batteries will eject out of the battery compartment.



5. Pull the battery out with your finger.

• Using Your Battery

Our laboratory testing has shown that our digital camera models comply with industry standard battery consumption levels (Camera & Imaging Products Association commonly known as CIPA).

All digital cameras are high drain products. For the best performance and prolonged battery life, we recommend the use of a high capacity battery designed for such applications. (The lithium ion battery included with your camera is a high capacity battery).

Here are some helpful hints to extend battery life considerably by limiting the following activities:

- Reviewing photos on the LCD Screen
- Excessive use of the flash
- Remove the battery from your camera when not in use to prevent battery leakage.

WARNING!

- The battery should be replaced by an adult.
- Use recommended or equivalent type of batteries only.
- Insert the batteries in the correct orientation.
- Remove the exhausted battery from the camera immediately.
- Do not short the supply terminals.
- Please dispose of the battery properly.

These instructions should be retained for future reference.

• Turning the Camera On and Getting Started

1. To turn on the camera: Flip out the LCD panel or press the (POWER) button for one second. When the camera is turned on, the green LED will light up.
2. To take a video: press the Record button ( ).
3. To take a picture: press the Camera Shutter button ( ) halfway down till the focusing frame turns from white to green. Press the fully down to take pictures. (Should you see the focus frame turn red that indicates that your subject is not in focus. Remove your finger from the Camera Shutter button, frame your subject and press the Camera Shutter button until the focus frame turns green and press all the way down to take your picture)

Focusing Frame: White

Focusing Frame: Green

Focusing Frame: Red

4. To take video in HD resolution, press the Down button (HD) to switch to HD mode. Press the Record button ( ).
5. To view stored videos or pictures, press Playback button ( ) once to switch to to the Videos or Photos screen. Use the right ( ) or left ( ) button to make your choice and press the OK button ( ). Press again to return to Record mode.

• Turning the Camera Off

1. To turn off the camera: Return the LCD Panel back to its original position or press the (POWER) button for one second.

2 Record Mode

• Button Functions

	**Right Button:** Auto Flash/Red Eye Reduction/ OFF **Left Button:** Self timer ON/OFF **Up Button:** Intelligent Lighting ON/OFF **Down Button:** HD Recording Mode **OK/Enter Button:** Setup Menu On

3. Press the Playback Button to view the Two in One Photo.	

Photo Frame (Photo Record Mode Only)

Your camera features a popular electronic photo frame feature. You can take your pictures with a preferred electronic photo frame.

To enable Photo Frame Feature:

1. In the Still Capture menu, use the Up/Down Buttons to select the Photo Frame option, then press the OK Button to switch to the Photo Frame submenu.
2. Use the Up/Down Buttons to locate your preferred photo frame then select the Set option and Press the OK Button to confirm the setting and exit.

Record Menu Setup Screen	Photo Frame option
OK Button 	

Flash (Photo Record Mode Only)

This camera has three flash settings. You can change the flash setting by either the hot key (Right Button) or using the Option Setting.

- Auto Flash (A) — The flash fires automatically according to lighting conditions. Use this setting for most photographic scenes.
- Red Eye Reduction — The pre-flash will fire to reduce the red-eye effect.
- Flash off — The flash will not fire under any circumstances. Use this mode when taking images in a place where flash photography is prohibited, or when the subject is far away (beyond 10 feet).

To change the Flash setting:

1. When in the Still Capture menu, use Up/Down Buttons to select the Flash Option, then press the OK Button to switch to the Flash submenu.
2. Use the Up/Down Buttons to move between the three settings.
3. Press the OK Button to confirm the setting and exit.

NOTE:
The flash will be disabled automatically when battery power is low.

Record Menu Setup Screen	Flash option

Selftimer (Photo Record Mode Only)

The selftimer allows you to take pictures with a ten-second time delay. The Self-timer LED on the front of the camera will also blink. The speed of blinking will increase just before the Photo is taken.

To enable the Selftimer:

1. When in the Still Capture menu, use the Up/Down Buttons to select the Selftimer, then press the OK Button to switch to the Selftimer submenu.
2. Use the Up/Down Buttons to choose between On or Off.
3. Press the OK Button to confirm the setting and exit.

Record Menu Setup Screen	Selftimer option

4 Transferring & Viewing Video onto a PC

• Transferring Photos or Videos to a Computer

You can transfer pictures or videos stored on your camera to a computer and send them in emails to friends or post them on websites.

To do this you should:

1. Connect the computer and camera with the provided mini USB 2.0 cable. The LED will light up and blink.
2. After the LED stops blinking, videos can be found on your computer at “My Computer\Removable Disk\DCIM\200MOVIE”, while Photo(s) can be found on your computer at “My Computer\Removable Disk\ DCIM\100PHOTO”
3. In these folders, you can read, delete, move, or copy any Video/Photo you want.
4. Use the bundled ArcSoft application software to edit the videos or pictures.

• Viewing a Video on a PC

When playing a Video for the first time, the correct Video Codec should be installed in PC. To do this:

1. Insert the CD-ROM into the computer’s CD-ROM drive. Click “Install Video Codec” and follow the on-screen instructions to complete the installation.
2. Start the video player such as Windows Media Player to view AVI Videos.

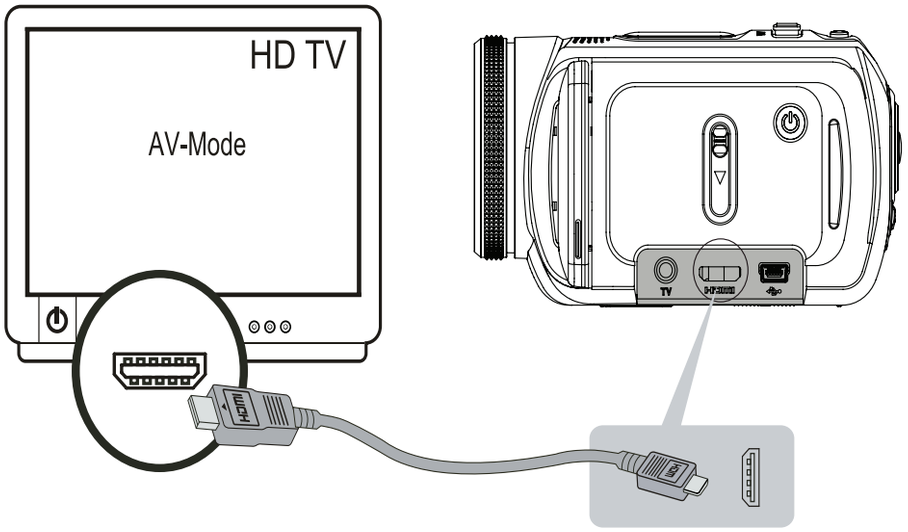
• Sharing A Video

You can share the recorded videos with your friends via internet or CD. Make sure the correct Video Codec is installed on your friends’ PC. Video Codec is available in the provided CD.

5 Viewing Photos and Videos on a TV

• Connecting to a High-Definition TV

1. Connect HDMI cable to a HD TV.
2. Set video input source of a TV to " HDMI" option.
3. The steps for viewing stored pictures and Video on a TV are exactly the same as for viewing them on the LCD display.



NOTE:
The camera can not capture videos or photos when it is connected to a high-definition TV. The LCD Panel does not work when the camera is connected to a high-definitionTV.

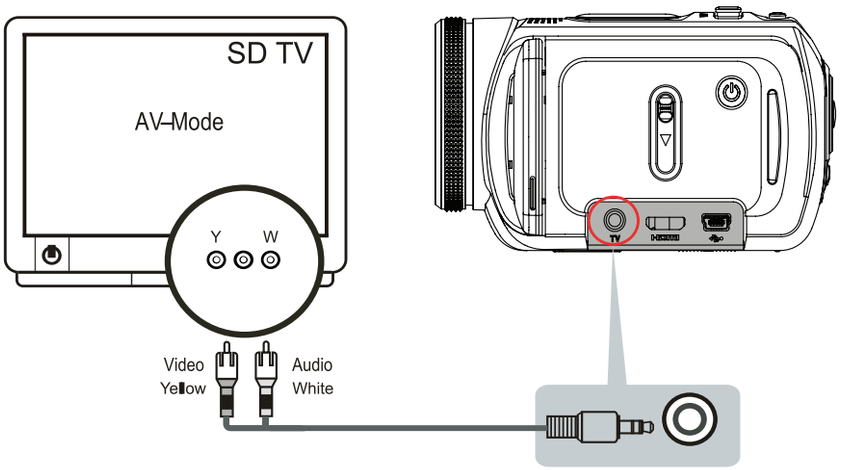
Need help with your digital camera?

Call our toll-free customer service number. Look for the insert with this icon:

Or visit www.polaroid.com.

• Connecting to a non-high-definition 16:9 (Wide) or 4:3 TV

1. Connect one end of the AV cable to your camera's AV Out port.



2. Connect the other end of the cable to a TV.
3. The steps for viewing stored photos and Video on a TV are exactly the same as for viewing them on the LCD display.

NOTE:
The LCD display does not work when the camera is connected to a TV.

6 Video File Converter

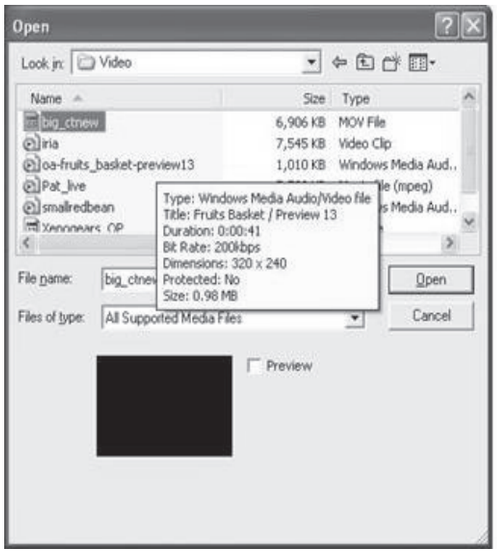
Bundled software CD contains ArcSoft MediaConverter that features video file converter to convert multiple video formats into compatible format with your camera. In this way, you can convert various video files formats and playback your favorite videos on your camera.

• Media Converter

To convert a video file:

1. Install the ArcSoft MediaConverter onto your PC (Refer to section 10).
2. Click [Start] -->[(All) Programs] --> [ArcSoft MediaConverter] --> [MediaConverter] .
3. MediaConverter main Screen will appear on your desktop.
4. Click [Add File] .

5. Select the Video file you want to convert.



6. You can preview your media files before converting. To preview media files, use the following control functions.

   - Click ▶ to start previewing.
   - Click ■ to stop previewing.

Make sure your media files can be previewed before converting.

7. Click on [Start] to begin converting files.

8. The Task Report window will pop up after the task is completed.
9. Before transferring the converted file to your camera, rename the converted file to " CLIPXXXX.avi". (XXXX should be a four figures,eg 0001 to 9999)
10. Connect your camera to PC and copy the converted video to "My Computer\Removable Disk\ DCIM\200MOVIE" in your camera.
11. After transferring the converted video to the camera, press Playback Button to enjoy your favorite Video.

7 Using the SD (Secure Digital) Card

• Using the SD Card

Your camera comes with built-in flash memory for storing photos and video clips. You can expand the memory by using a Polaroid SD card (sold separately) (up to 4GB). The camera senses whether a memory card is inserted, and automatically saves photos and video clips accordingly. Note that you cannot save photos or video clips to the built-in flash memory while a memory card is installed in the camera.

Memory card precautions:

1. Use only a compatible SD memory card with this camera preferably a Polaroid SD card.
2. Electrostatic charge, electrical noise, and other phenomena can cause data corruption or even loss. Always make sure that you always back up important data on other media (MO disc, computer hard drive, etc.).
3. If a memory card starts to behave abnormally, you can restore normal operation by formatting it. However, we recommend that you always take along with more than one memory card whenever using the camera far away from your home or office.
4. We recommend that you format a memory card when using it for the first time, or whenever the card you are using seems to be the cause of abnormal pictures. Remember to format a memory card if it was used in another digital camera or other devices.

Need help with your digital camera?

Call our toll-free customer service number. Look for the insert with this icon:

Or visit www.polaroid.com.

IMPORTANT!

- Make sure you turn off the camera before inserting or removing a memory card.
- Be sure to orient the card correctly when inserting it. Never try to force a memory card into the slot when you feel resistance.
- SD memory cards have a write protection switch that you can use to protect files from accidental deletion. However, you must remove the write protection whenever you want to record new files onto it, format it, or delete its files.
- **Files contained in the SD card recorded by other cameras may conflict with the DVC-00725F camera, and valuable data in your existing SD card may be distorted or lost when the card is inserted in the DVC-00725F camera. We strongly recommend the user to use a new or formatted Polaroid (not included) SD card for the DVC-00725F camera. The manufacturer is not liable for losing or corrupting any valuable data or files in your SD card due to improper operation.**

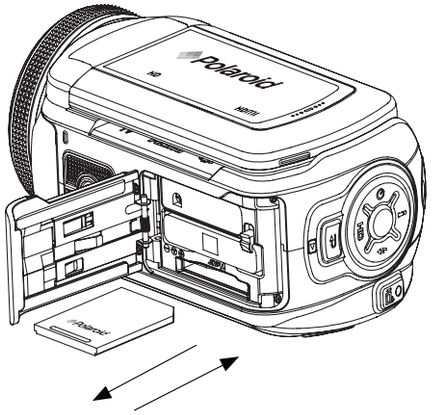
Need help with your digital camera?

Call our toll-free customer service number. Look for the insert with this icon:

Or visit www.polaroid.com.

Inserting the SD card

1. Turn off the camera.
2. Open the camera's battery/SD card door by pushing it outwards as illustrated.
3. Insert the SD card and ensure the card is inserted the correct position as illustrated.
4. Close the camera's battery/SD card door by pressing it downwards and slide it back to lock.



Removing the SD card

To remove the SD card, turn off your camera and open the camera's battery/SD card door. Gently push the SD card inwards and then release it. The SD card will eject out of the SD card slot.

IMPORTANT!

- Never insert any other object into the camera's SD card slot. Doing so results in the risk of damage to the camera and card.
- Should water or any foreign objects ever get into the card slot, immediately turn off the camera, remove the battery or disconnect the AC adapter, and contact your dealer or the nearest service provider.
- Never remove a card from the camera while the camera is powered on. Doing so can cause the Photo or video recording operation to fail, and even damage the memory card.

8 Burning the Recorded Clip into DVD

Bundled software CD contains ArcSoft MediaImpression also features burning the video clip into DVD. You can preserve your precious videos on DVD to share with family and friends.

To create a DVD:

1. Install the ArcSoft MediaImpression onto your PC (Refer to Section 10).

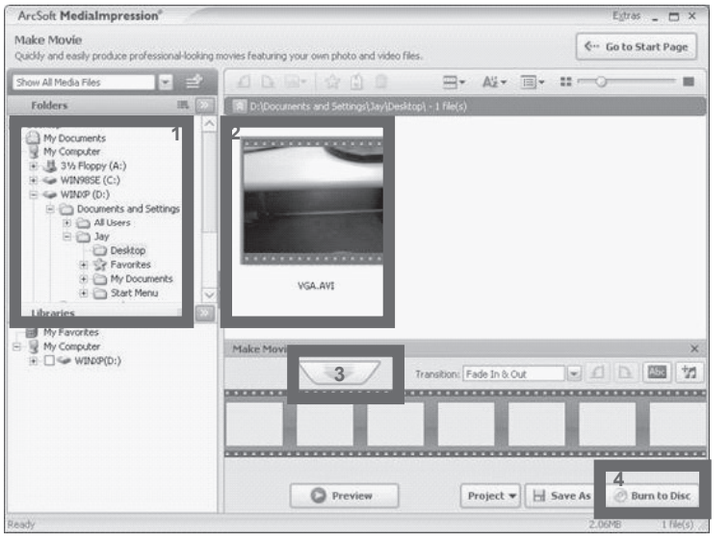
2. Click [Start]-->[(All) Programs]-->[ArcSoft MediaImpression]

3. ArcSoft MediaImpression main Screen will appear on your desktop.

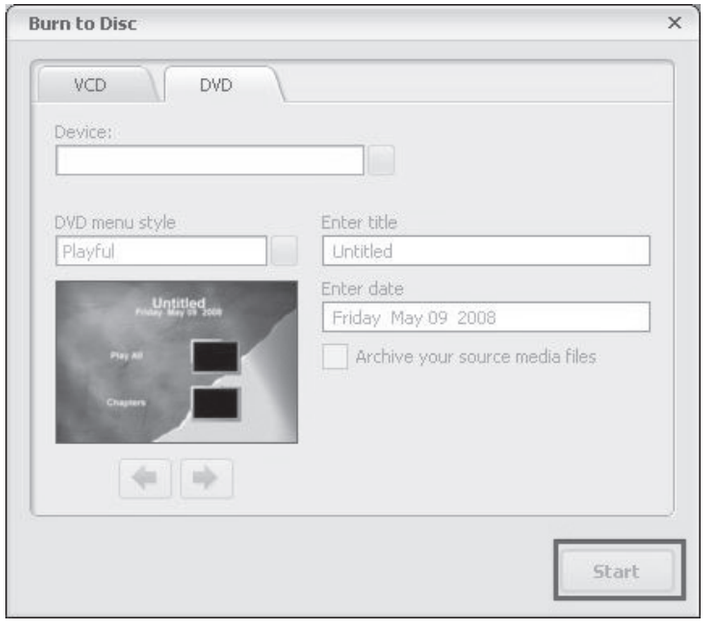
4. Click [Make Video].

5. The operation screen will appear:

- Select the folder that contains the file(s) you want to use.
- Select the file(s)
- Click button to put the file(s) into slide
- Click [Burn to Disc]



6. Click [Start] to start DVD burning.



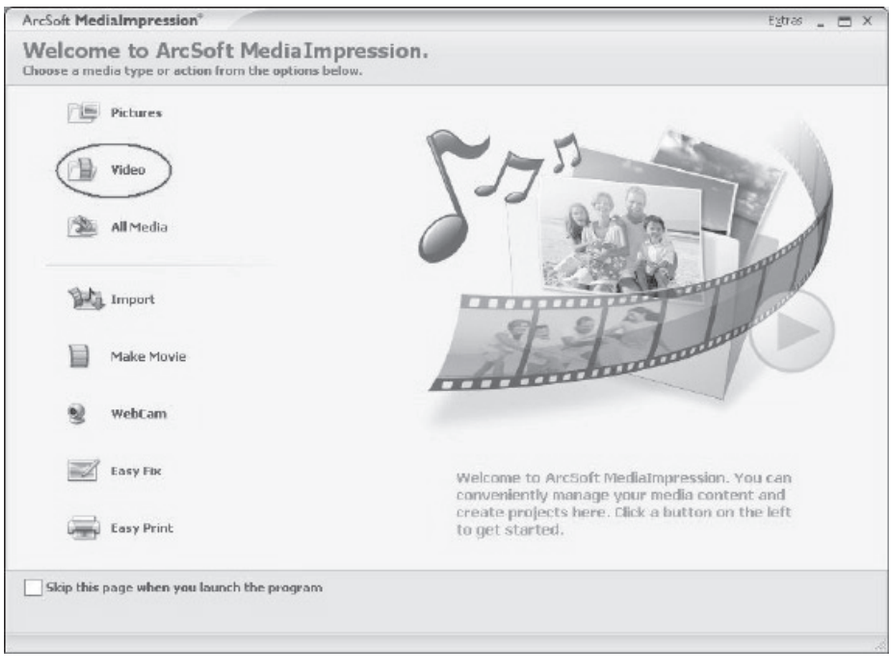
9 Uploading Video Files to YouTube

The bundled software CD contains ArcSoft MediaImpression which features uploading the recorded videos to YouTube. It will help you to share them with your family and friends on the YouTube website.

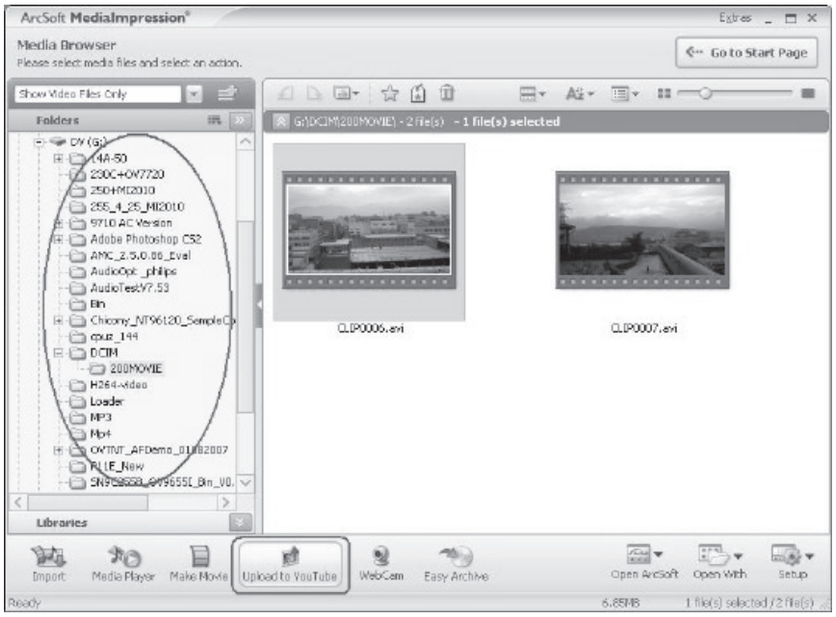
• ArcSoft MediaImpression

To upload video files to YouTube:

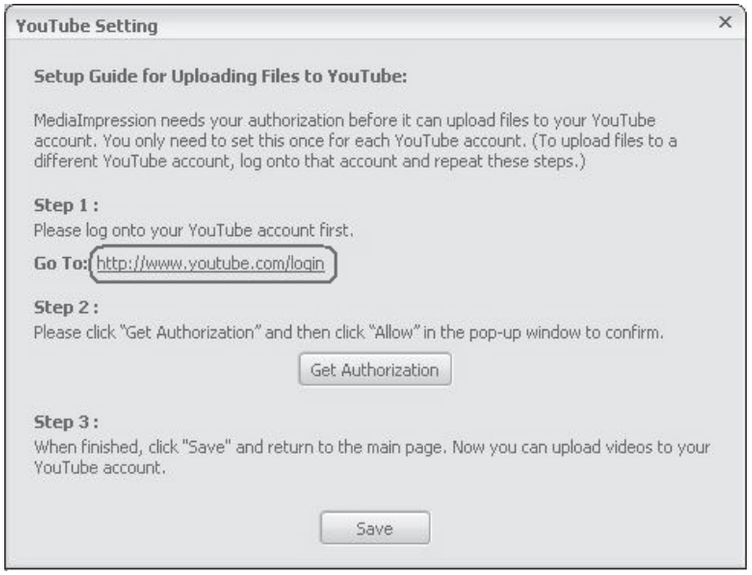
1. Install the ArcSoft MediaImpression onto your PC (Refer to Section 10).
2. Click [Start]-->[(All) Programs]-->[ArcSoft MediaImpression]
3. ArcSoft MediaImpression main Screen will appear on your desktop.
4. Click [Video] Option.



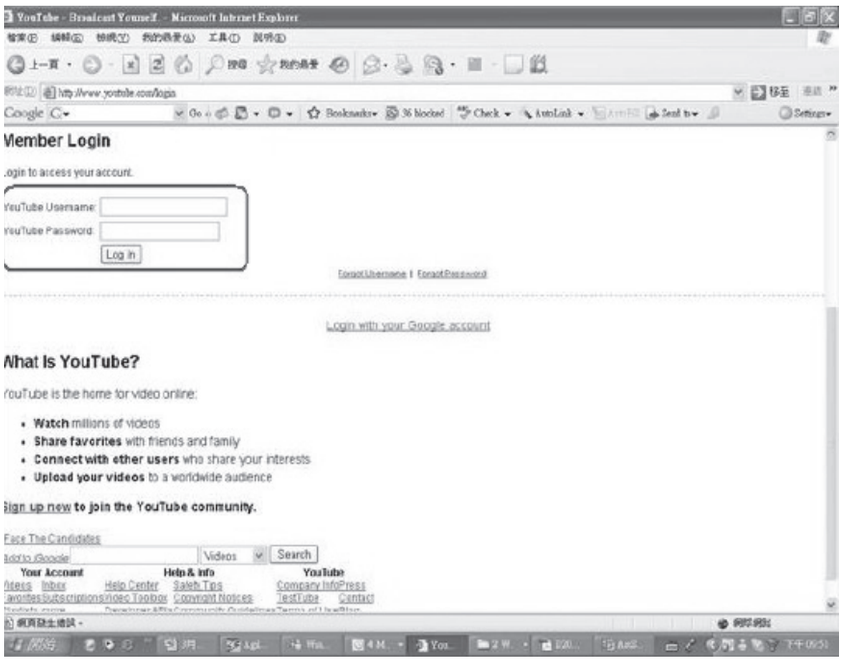
5. Select the video file you want to upload and click [Upload to YouTube] option at the bottom menu.



6. If this is your first time using of this function, please follow the instruction on YouTube Setting Panel.

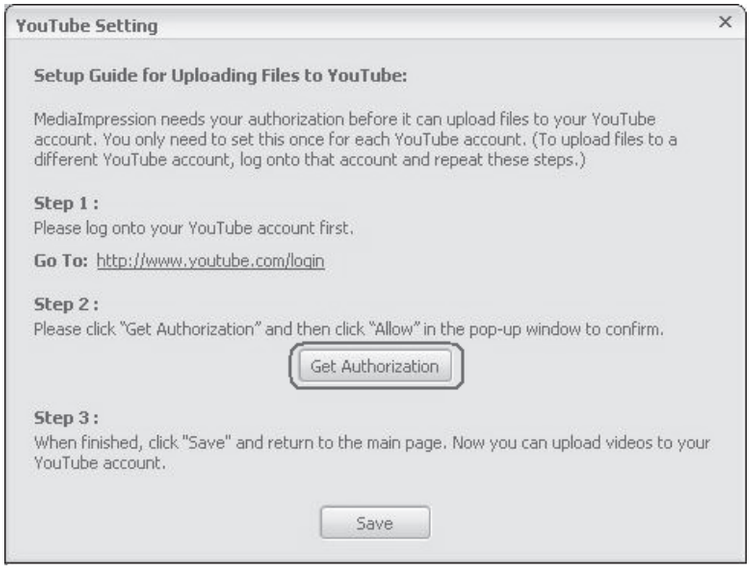


7. Go to http://www.youtube.com/login, then Log onto your YouTube account.

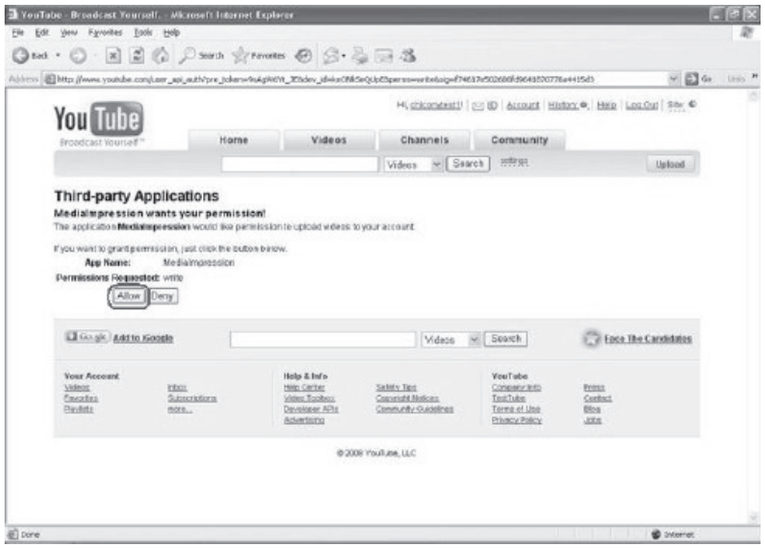


(If you do not have a YouTube account, sign up here first.)

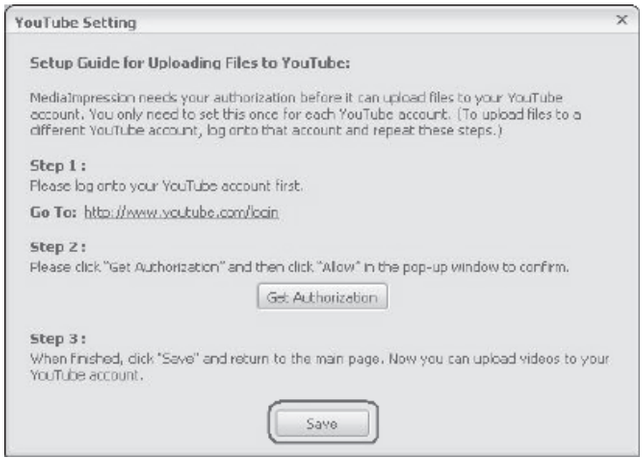
8. After you log onto your YouTube account, Click [Get Authorization] button below.

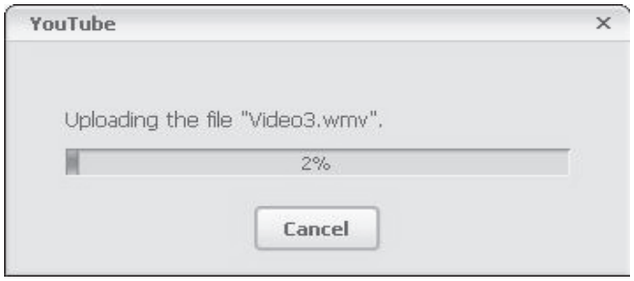


Click [Allow] Button shown on YouTube website.



9. Click [Save] Button to upload the video.





10 Installing Bundled Software

• Installing Video Codec to view videos correctly on PC

Before connecting this camera to a computer for the first time, you should install the correct Video Codec on the computer in order to view videos on PC. The Video Codec is on the CD-ROM disc provided in the package.

To install Video Codec:

1. Insert the CD-ROM into the computer's CD-ROM drive. The autorun screen will appear.
2. Click "Install Video Codec". Follow the on-screen instructions to complete the installation. Depending on your operating system, you may have to restart your computer after installing it.

• Installing Bundled ArcSoft Software

The CD-ROM supplied with this camera contains the other 2 pieces of software.

- **ArcSoft MediaConverter** can convert multiple video formats into compatible format with your camera.
- **ArcSoft MediaImpression** is a user-friendly application that helps you managing your media for you, and gives you funny and exciting ways to create and share projects featuring your photo and video files. Support the feature of uploading videos easily to YouTube.

The detailed information can be found in online help of all the bundled software.

To install the bundled software:

1. Insert the CD-ROM into your computer's CD-ROM drive. The autorun screen appears.
2. Select the piece(s) of software you want to install from the list, then click Install Application Software. Follow the on-screen instructions to complete the installation.

12 Appendix

• Technical specifications

Sensor	• Sensor: 5.0 MP CMOS
Lens	• Focal Length: 6.8～34 mm • Normal focus: 1cm ～ infinite • Macro focus:1cm ～ 30cm • F No.:3.5～3.7
LCD Screen	2.7″ LCD
Exposure Control	-/+1.0 EV in 1/3 step
Image Resolution	High: 3744X2808 Standard: 2592X1944 Low:1600X1200
Video Resolution	HD: 1280X720 30fps D1: 720X480 30fps VGA: 640X480 30fps QVGA: 320X240 30fps
Shutter	Electrical shutter
Optical Zoom	5X
White Balance	Auto / Manual (Daylight / Fluorescent / Tungsten)
Storage	• Internal Memory: 64MB Nand Flash • External Memory: Supports SD/MMC card
Self-timer	Approx. 10 seconds
File Format	• Still Image: JPEG • Video Clip: AVI (H.264)
Flash (for still)	Auto / Red Eye Reduction / Off
Flash Range	3m (9.9 ft)
Image Play	Single / Thumbnails / Slideshow
TV Out	Digital : HDMI Analog: Composite Video (NTSC/PAL Selectable)
Power Supply	NP60 Lithium-ion Rechargeable Battery
Dimension	• Size: (W) 117 mm x (D) 56 mm x (H) 65 mm • Weight: Approximately 314g (without battery); 340(with battery)
PC Interface	Mini USB2.0

• Default Settings

The following table indicates the camera's default settings as well as the functionality of the feature. Either it is always on or only functions one time.

NOTE:
The "One Time" setting is valid once (either Video or Photo capture) or until the power goes off.

Setting	Functionality	Default Factory Setting
Resolution	Always	HD for Video Standard for Photos
Stabilization	Always	Off
Flash	Always	Off
Date Printing	Always	Off
Night Mode	Always	Off
Sound	Always	On
TV System	Always	NTSC
Language	Always	English
Volume	Always	Level 8
Macro	One Time	
Exposure	One Time	0EV
Sharpness	One Time	Level 5
White Balance	One Time	Auto
Two in One	One Time	Off
Photo Frame	One Time	Off
Self timer	One Time	Off

Multi-snap	One Time	Off
Backlight Mode	One Time	Off
Motion Detect	One Time	Off
Effect	One Time	Normal
Format Memory / Format Card	One Time	Off
Information	One Time	On
Intelligent Lighting	One Time	Off

NOTE:
The default language for the LCD screen may vary with the different shipment destinations.

• System requirements

- Microsoft Windows 2000/XP/Vista
- Intel Pentium III 800MHz or above
- 256 MB RAM
- CD-ROM Drive
- 700 MB free HDD space
- Available USB port
- 16-bit Color Display

NOTE:
The LCD screen is manufactured using extremely high-precision technology. However, some tiny black and/or bright dots (white, red, blue or green) may appear on the LCD screen. These dots are a normal result of the manufacturing process, and do not affect the recording.

13 Troubleshooting

• Troubleshooting

1.If the LCD image is not clear when shooting, how can the focus be adjusted?

Make sure the subject is within the focus range; Normal mode is at least 30 cm (11.8 inches) away from the lens.

In the Macro mode, the subject needs to be between 1 to 30 cm (0.39 to 11.8 inches) away.

Make sure the camera is not in the Marco mode if your subject is within the normal focus range. If it is on, you will see the Macro [ ] on the lower right side of the LCD display. If your subject is at least 30cm (11.8 inches) away and the camera is set to Macro, the subject will look out of focus on the LCD display.

2.The flash is not working.

The camera is in Macro Mode.
The battery power is low.

3.When recording, the digital zoom does not function.

If the “Stabilization” function is activated when recording videos, the “Tele/Wide” button for digital zooming will be disabled.

4.The files on the memory card do not display smoothly when the LCD shows the “!” or “funnel” marking.

The “!” means the file format is not supported and the “funnel” marking indicates the file is not read smoothly. Delete these files and the others can then be played normally. It is recommended that you first format the memory card before using it and avoid placing files with different formats in the same folder.

5.Why is camera Flash not active when taking pictures?

Make sure that the focus range is NOT set in the Macro mode; the flash is disable in this mode. Scroll through Photo modes and set Flash to Auto. In Auto mode camera flash fires ONLY when necessary (in dark setting as example).

6.Why do some of my indoor pictures look blurry and dark?
In these photo capture conditions, the camera's shutter time is much longer, therefore you may need to turn on the flash and/or use a tripod. You will hear the shutter sound when the photo is taken.

7.How do I charge battery?
Your computer will not charge battery when connected. ONLY the supplied AC charger can be used. Your camera must be turned OFF; the blinking led indicates charging, when the light is green charging is complete.

Need help with your digital camera?

Call our toll-free customer service number. Look for the insert with this icon:

Or visit www.polaroid.com.

• Tips, Your Safety & Maintenance

Your Camera should only be operated within the following environment.

- 32 - 95º Fahrenheit; 5 - 35º Celsius
- 20% - 80% relative humidity, non condensing

The battery life and image quality may be impaired when the camera is operated beyond these conditions.

⚠ Camera Cautions

- NEVER immerse any part of the camera or its accessories into any fluid or liquid.
- ALWAYS disconnect the camera from your PC or TV before cleaning it.
- ALWAYS remove dust or stains on the camera with a soft cloth dampened with water or neutral detergent.
- NEVER place hot items on the surface of the camera.
- NEVER attempt to open or disassemble the camera because such doing will violate any warranty claim.

• Regulatory Information

FCC Notice

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.
- Consult the dealer or an experienced radio/TV technician for help.

Shielded cable must be used with this unit to ensure compliance with the Class B FCC limits.

Under the environment with electrostatic discharge, the product may malfunction and require user to reset the product.
