

OUTLINED

Preparing PowerStand

With PowerStand powered up, you can now unfold PowerStand into the stand position

Positioning

There a wide range of angles that PowerStand supports. You can also increase the height by pulling the spine upwards. Also the 2 feet that the phone rests on can be pulled downwards for more options.

Wireless Charging

PowerStand is a device stand and it can also charge your device if it supports Wireless Charging.

Simply place your phone on PowerStand and it will begin charging.

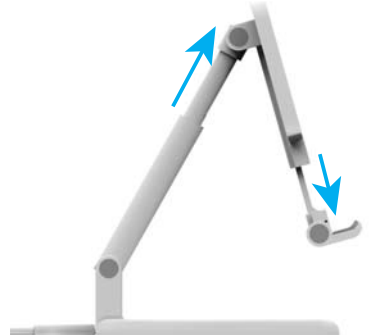

You may need to adjust the 2 feet that your device rests on to line up the Wireless Charging Coils.

LED Status Lights

Solid Green LED means that your phone is wirelessly charging

Blinking Red LED means there is an error. Check that there is nothing in between the phone and PowerStand.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
