

VGP-WMS20

Instruction Guide

Your VGP-WMS20 provides unrivaled precision and convenience.

To begin using your VGP-WMS20, you will need to:

1. Install the batteries
2. Plug the USB Wireless Receiver into a USB port on your computer.
3. Push the button of receiver and the connect button of mouse.

The VGP-WMS20 will then be ready to use.

Declaration of Conformity Compliance Statement for the Sony VGP-WMS20

The Wireless Laser Mouse VGP-WMS20 complies with Part 15 of the FCC Rules. Operation is subject to two conditions: 1. This device may not cause harmful interference, and, 2. this device must accept any interference received, including interference that may cause undesired operation. As defined in Section 2.909 of the FCC Rules, the responsible party for this device is Sony Corporation 6-7-35 Kitashinagawa Shinagawa-ku, Tokyo, 141-0001 Japan.

International Standards and Safety:

This laser device complies with International Standard IEC 60825-1:2001-08, Class 1 Laser Product and also complies with 21 CFR 1040.10 and 1040.1, except for deviations pursuant to laser Notice Nr. 50, dated Jul 26, 2001:

1. Emission of a parallel beam of infrared user-invisible light;
2. Maximum Power of 716 microwatts CW, wavelengths range 832-865 nanometers;
3. Operating temp between 0° C 32° F to 40° C 104° F.

CAUTION: This device has no serviceable parts. Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Safety and Usage Guidelines

1. In the absence of proper operation and if customer initiated troubleshooting is unsuccessful, switch off device and call Sony technical support.
2. Do not disassemble product or expose it to liquid, humidity, moisture or temperatures outside the specified operating ranges of 0° C 32° F to 40° C 104° F.
3. If your product is exposed to out of range temperatures, switch it off and allow temperature to return to the normal operating range.

Interference Statement

Note: The Sony VGP-WMS20 has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Important: Computer User Health Information

In recent years, medical attention on occupational injuries has identified normal, seemingly harmless activities as a potential cause of a wide range of problems collectively known as Repetitive Stress Injuries RSI or Cumulative Trauma Disorders CTD. It is now recognized that any repetitive motion may contribute to these health problems. As a computer user, you might also be at risk. By paying attention to the way you perform your work, use your computer and phone, play sports, and work around the house, you can identify the behaviors that may be putting you at risk. If you experience pain, swelling, numbness, or weakness in your wrists or hands especially during sleep, see your physician immediately. These symptoms could mean that you are developing a repetitive stress injury that requires prompt medical attention. For more detailed information, consult your doctor.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

CAUTION: Any changes of modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

Note:

This wireless device is similar to an FM radio, the position of your computer and surrounding objects (especially metal objects) may effect your wireless reception and range (average range is approximately 10 meters or 30 feet).

Unlike older optical mice, a laser mouse does not emit visible light. Your new mouse will operate correctly even if you do not see a light.
