

## User Manual - Zoox Wireless Charger

The Zoox Wireless Charger (Model #: P00001122) is designed to charge up to 2 Qi-enabled devices (such as smartphones) at up to 15W simultaneously. The Zoox Wireless Charger is installed in the Zoox Vehicle. (model: Zoox Vehicle). A Qi-enabled device will automatically start charging when it is placed fully within one of the module's two charging zones, given that the vehicle is powered on and is in service. The device will not continue to charge if it does not sit fully within a charging zone (e.g. placed across the center divider between the two charging zones), or if the vehicle is powered off.

**NOTE:** The Zoox Wireless Charger may not function properly if a device's case is too large to fit fully within a charging zone, too thick, or made of a conductive material such as metal. In these scenarios, remove the case before placing the device on the charger. Do not place metallic or magnetic objects such as credit cards between the device and the charger. Doing so could cause damage to the object and/or charger. Remove any case-mounted wallets prior to charging.

**NOTE**: The Zoox wireless charger is directly installed in the car body, and non-maintenance personnel are prohibited from disassembling it, otherwise it will cause damage to the wireless charging.

**NOTE**: Passengers are not allowed to take the wireless charger (red area), otherwise the wireless charger will be damaged.
