

PREMIUM PHOTO PAPER: GLOSSY

To achieve optimum image results – please read instructions prior to printing

Printworks Premium Photo Paper allows you to print high quality photos from your inkjet printer. The bright, glossy finish gives excellent contrast and produces sharp, photo quality images from digital cameras, CD's, scanners, the Internet and more.

PRODUCT HANDLING AND STORAGE

Always handle photo paper carefully. To avoid getting fingerprints on the printable surface, always handle the paper by the edges.

- Keep paper away from moisture and high humidity.
- To extend the life of your prints, do **not** expose printed or unprinted paper to bright lights or direct sunlight for long periods of time as ultra-violet rays have damaging effects on **any** photo paper.

Step 1: Capture your image

- Use a digital camera, scanner, CD or the Internet to capture an image and load into your computer.

Step 2: Manipulate your image

- You can enhance images using any software program that handles graphics. You may need to adjust for color, brightness and size to achieve optimal results ...follow instructions of your software program.

Step 3: Print your image

- Select "Print" and "Name" of printer being used
- Select "Properties"
- Select "Paper Size" you are using and "Borderless" if desired
- **Printer Settings** – Select printer settings from the chart below:

-for brands and models not in table, refer to your printer manual for instructions on settings for glossy photo papers or visit our website for the most up-to-date settings: www.myprintworks.com

- **Test Print** – We suggest first printing the image on a plain piece of paper to ensure desired size and location of image. Note: Image quality will not be as good when printed on plain paper.
- **Load Media** – Load a single sheet of Premium Photo Paper into your printer according to your printer type (See below). Image is to be printed on glossy or shiny side of the paper. Although some printers may allow stack feeding, **we recommend single sheet feeding.**

- Let sheet dry for 15-20 minutes before handling to ensure it has dried thoroughly. Allow 24hrs. before placing in frame or album.
- For additional information or assistance: www.myprintworks.com or e-mail us at printworks@pariscorp.com

Capture those special moments forever with Printworks Premium Photo 4 x 6. The small size is ideal for printing and sharing your favorite photographs, and fits in standard photo albums and frames.

The high gloss finish creates photo rich snapshots with vibrant colors and crisp details. The heavyweight paper feels just like traditional photos.

Instructions: For best results, read and follow all instructions before proceeding.

Printing Your Image

Printworks Photo papers are compatible with most color inkjet printers.

Test Print: We recommend first printing the image on a plain piece of paper to ensure desired size and location of image. Note: Image quality will not be as good when printed on plain papers.

Load Media: Printworks Premium Photo 4 x 6 has a printable and non-printable side. Load a single sheet of paper into your printer according to your printer type. (Refer to below diagrams) The image is to be printed on the glossy or coated side of paper. Although some printers may allow stack feeding, **we recommend single sheet feeding.**
