

Instruction Manual

Product Description

It is an ideal accessory for iPod. Now you can use your portable audio device to enjoy your favorite music through any FM stereo receiver. Our wireless FM stereo transmitter allows you to play your Digital music through your car or home stereo. Just simply plug the FM stereo transmitter into the headphone jack of any portable audio source including CD, MD players or MP3; or PDA. Tune the frequency of the car or home stereo to FM 88.1, 88.3, 88.5, 88.7 MHz. You will hear the music playing in the stereo. Sit back and enjoy your favorite music with full sound and convenience.

Usage:

Remove the battery cap and insert 2 AAA batteries. Please make sure the batteries are inserted correctly and the battery cap is put back into position securely. Push the power button to the "ON" position. Choose one channel from the following frequencies: 88.1, 88.3, 88.5, 88.7 MHz and connect the product to audio sources. Turn on both the audio source and the car radio system; tune your car radio to the same frequency as the product. The music from the audio source will then be heard via your car radio system.

Power Source Voltage: 2 AAA size DC 1.5 batteries.

FCC Warning

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The user's manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.
- Consult the dealer or an experienced radio/TV technician for help.
