Main Functions:

● 7" HD TFT capacitive touch screen, resolution 800*480.

● Support built-in 0.3 Mega front camera (optional)

● Support built-in microphone recording function

● Support external USB mouse, keyboard, etc;

● Support HDMI; 2160P,3D Vide(all-digital multimedia connector)output,make your high HD TV set show the effect of cinema level

● Support OTG function, support U-disc, portable hard disc by OTG to transfer data. (While connecting to portable hard disc, DC power must be connected to supply power for the

product; otherwise the tablet PC will get crashed due to insufficient power supply)

●Multiple network access to the Internet. Supporting Wi-Fi/3G/2G, you can enjoy the internet life anywhere, anytime.

●Gravity sensor (G-sensor), in addition to the horizontal, vertical screen switch, you can also install various software to extent this function, such as turning the text, switching songs, and funny games, etc.

●With Google Android intelligent operating system, abundant software extension function, you can you're your personalized space with apks by yourself.

●Supporting apk installation and application, abundant software can be downloaded and installed from Android Market in your MID or from your PC to download from the Internet.

●With this product, you can easily have business and entertainment via abundant applications, such as E-Mail, word, website browsing, news, instant messaging, financial, blog, games online, video online, stock market , weather report ,

mobile TV, maps, fun software, etc.

●Supporting MP3, M4A, WMA, APE, FLAC, AAC, MID, WAV, AMR, OGG, etc.

●Supporting full HD video decoding (2160P, 1080P, 720P, 480P); video formats: MKV, AVI, RM/RMVB, WMV, 3GP, MOV, MP4, ASF, MPG, DAT, VOB, FLV, etc.

●Supporting JPG, JPEG, BMP, PNG, etc. formats image browsing..

●Supporting TF Card, with capacity up to 128MB-32GB.

●Personalized settings-freely adjustable brightness, key tone on or off, changing wallpaper and so on.

● Supporting multi-languages.

● More functions could be added by Firmware updating

remove. When the player runs slow, this function will stop

some unused applications in order to solve the problem of

running slow.

Setting icon, click this icon to enter system setting

interface.

Chapter 3．Application Installation

This device can install apk(Android Package) freely, you can

get third-party application program which is suitable for this

Android system from Android Market and Internet and you can

install the apks into this player.

First open "Setting/Application Program", select after

"unknown sources".

3-1-1. Program achieves method:

Method 1: Download from the website and copy the applications into the TF card and insert into the product.

Method 2: Through the "Android Market" of the product to download the application program into the TF card.

3-2-2. Program Install:

Method 1: Click the main interface shortcut key, select "apk installer" then select "Installer" to enter the SD card sub-menu, select install application, pop up install option , click "Install". Finish it according to the guide.

Method 2 :Click the main interface shortcut key, select "ES files browser" to enter the SD card sub-menu, select install application , the install method is same as the "Method 1"

Notes: In the website, all files are .apk suffix in the third-party program.

3-3-3. Program Uninstall:

Click the main interface shortcut key, select "apk installer", and select "Manager" to enter apk list, click the wanted-to-uninstall

program, select "Uninstall" in the pop up dialogue box, then
click "Yes" to install.

Click to enter application interface, this interface will
show all the installed applications. Click the icon to go to
the manager of applications, see below:

Uninstall: uninstall this application, click to go back to
previous interface

Chapter 4. Internet

4-1. Network Setting

Click the shortcut in the main interface, choose

"Setting/Wireless and Network" to enter network setting

interface:

4-1-1.   WI-FI Connection

Click the main interface shortcut, select "Internet connects manager", click "WIFI setting", enter WIFI setting interface, select the "WI-FI" and turns it on.

After WIFI opened, it will automatically search for the wireless Internet, and show in the list, click the wireless Internet , enter the password interface, input the password and connect it, seconds later it will connect to the wireless Internet automatically.

When open the WIFI, it will add about 1/4 power consumption to the palyer. When not using the WIFI, please turn it off to extend the using time of the player.

4-2． 3G Connection

"Setting / Wi-Fi and Network", select "Mobile Network" and the system will connect to the network automatically. Connection completed, you can use 3G.

Before connecting 3G, please close Wi-Fi.

Before connecting 3G, please make sure the product is with enough power or connected to DC charger charging. Since 3G will consume more power (add about 1/3 more), If you don't use 3G, unplug the dongle to save power to extend battery life.

4-3． Ethernet Setting:

Use cable Ethernet card (USB-RJ45) connecting to Internet

instruction

There are two requirements as below to use USB-RJ45 connecting to Internet:

1. ADSL aacount and password are set up correctly on router.

2. USB-RJ45 network card is the model which this device can support (usually netcard which supports Android system is suitable for this device).

Models supported are listed below:

AX88772/AX88772a/AX88772B/AX88178/AX88760/QF9700/SR9600/MCS7830/MCS7832/MCS7730

Steps for Internet Connection:

First connect network cable to USB Ethernet card, then use the OTG cable which is for this device to insert into USB Ethernet card and the other end into USB port of this device.

Notes:

1. First close WIFI network, only one could be used, otherwise there will be conflict.

2. This device will automatically detect USB Ethernet card and switch on the "Ethernet", there will be a network icon in the status column at this time.

3.Hold on for moment, this device will try to connect to Internet automatically, if the router, the DHCP service is

already open and the netgate, DNS and relevant setting have been made, then it will connect to Internet automatically.(Ethernet card function must be selected already)

4. If this device fails to connect, usually the reason is something is wrong with setting in router. You can set the parameters in this device as follows:

a. Enter setting/Eterhnet setting, select and open Ethernet.

Enter configuration information, choose "static IP setting, enter static IP setting interface (default is automatic aquiring IP, usually automatic aquiring IP is OK for all, but some companies'router will use specified IP, not allowing aotomatic aquiring IP, it depends on router setting, static IP needs to be used at this time.)

b.There is no need to fill in the Ethernet card device and physical address. Player will detect automatically after connecting Ehternet successfully.

In the IP address column enter the IP address, usually default is 192.168.1.1xx.

c.in "subnet mask", enter network segmentmask,default is 255.255.255.0

d. In the "DNS server", enter your local network service provider's DNS server IP, for example, Shenzhen DNS server IP is 202.96.134.133, different location has different DNS server IP, if you don't know, you can search by Google.

e. Fill gateway in the "default gateway", the general default is 192.168.1.1 (you can check the router's manual). It must be set to the same as the router; otherwise connection will be shown, but cannot connect to the Ethernet.

f. Finally, click the lower right corner of the "Save" button,

31

select Save, the system will automatically connect after saving, then you can use the Ethernet.

5. Close the Ethernet, click the hook in the back of "Ethernet", you can turn off the Ethernet connection.

6. Unplug the OTG cable.

Attention:

1. If you don't know about router settings and the DHCP service, please consult the router manufacturer, point-of-service, network service providers (or ask network management, network experts, etc.), or find relevant information by yourself. Our company does not support this kind of service and support.

2. If you do not use Ethernet, please unplug the OTG cable and Ethernet card, otherwise the player will continue to consume power.

4-4．2G Connection

Firstly insert the SIM card into the SIM slot.

Enter Setting/Wireless and Network, choose more, then coose Mobile networks. Check Module Power & Use only 2G

32

networks.   Then choose Network Operators, the system will connect the network automatically.

4-5. Webpage browser

Set up the network according to the method of 2-1 chapters, you can use the browser to browse web pages. .

Click shortcuts in the main interface, select the "browser" into the browser interface, click the "Menu" button, pop-up browser settings menu; Click "Start" pop-up address bar, enter the URL to be determined. Open a Web page; slide your finger up and down the screen to view other parts of the page. Drag web pages, the bottom of the browser will appear zoom button; you can click it to browse the Web.

33

4-5.1. Bookmark manager

●Setting bookmark

In the browsing interface, if you want to add the current address to bookmark. Click "Menu" to select "Bookmark", then click "Add bookmark". Click "Yes" to confirm.

●Open bookmark

In the interface of browser, click "Menu" to select "Bookmark", select the bookmark which you want and open the webpage.

●Edit bookmark

In the interface of browser, click "Menu" to select "Bookmark", click and press bookmark to open the menu option. Select the bookmark which you like to edit, select "Edit bookmark" to edit it, and click "Yes" to confirm.

Set up the network according to the method of 2-1 chapters, you can use the browser to browse web pages. .

Click shortcuts in the main interface, select the "browser" into the browser interface, click the "Menu" button, pop-up browser settings menu; Click "Start" pop-up address bar, enter the URL to be determined. Open a Web page; slide your finger up and down the screen to view other parts of the page. Drag web

pages, the bottom of the browser will appear zoom button; you can click it to browse the Web.

4-5.2. Open new window

●Open new browser window

In the interface of browser, click "Menu", select "New window" to open a new browser window.

●Switching the browser window

In the browser window, click the "Menu" and click "window" to open a new browser window..

4-5.3． Change your browser homepage

In the interface of browser, click "Menu" and pop up browser setting menu, click "More" and then click "Setting", click "Setting homepage" in the setting interface, then enter URL, click "Yes" to save it.

4-5.4． Setting of browser

In the interface of browser, click "Menu" and click "More", then click "Setting" to set browser.

4-5.5. E-mail

You can receive and send E-Mail with this player. There are

E-Mail setting guide in the application program, it can add POP3 OR IMAP E-Mail account of normal WEB E-Mail server (Such as Yahoo, Gmail, Hotmail).

Notes: Before setting E-Mail guide, please ensure your Internet is working and the device time is right.

4-5.6. E-mail Setting Guide

Click shortcut icon in the main interface, an E-Mail setting guide will appear to help your setting.

Click the button "Next", input your E-Mail address and password of your E-Mail account. Click the button "Next"; select your E-Mail form, POP3 or IMAP. Click the button "Next", to check whether the E-Mail sending and receiving servers can be used or not, input account name and sending E-Mail name, click "Finish". If E-Mail is available, it will enter

your inbox automatically.

4-5.7. Receiving and Sending E-mail

Click shortcut key in the main interface, select icon "E-mail" to enter inbox, it will refresh new E-Mail automatically, click it to read.

In the inbox, click "Menu", click "Writing" to enter writing new E-Mail interface. Input the receiver's E-Mail, subject and information in the receiver's field; if you want to add attachment, click "Menu" to pop up the menu option, click "Add attachment" to select the attachment. Then click "Send" to send the E-Mail.

Notes: If you have more than one account, and hope to send E-Mail using one specific account, click and choose the account name and write the E-Mail.

4-5.8. Delete E-mail Account

You can delete the POP3 OR IMAP E-Mail account from your E-Mail program.

Click shortcut icon in the main interface, select "E-Mail" icon to enter your inbox, click "Menu", then click "Account", choose the account you want to delete , then it will pop-up the

37

menu list, click "Delete account" , then click "Yes" to delete.

4-5.9. Instant Message

You can send instant messages with friends through the built-in "Google Talk" or "Mobile QQ" or other apks.

Chapter 5. Operating Details of Main Interface

Chapter 6．OTG Function

This product has OTG function, It can support USB disk and some other devices like MP3, MP4, self-powered hard

disk, etc.

This product will automatically detect the USB device after connecting to it via OTG cable. And you can have access to the USB device files like the files on the player.

⚠With low battery or DC charger not charging, please don't use OTG function, or the player may turn off automatically because of low power.

Chapter 7. External USB Mouse/Keyboard Function

After mouse connected, mouse pointer will appear on the screen. The left button is confirm button, the right button to return and the middle slider to slide up and down .

Note: Some keys cannot work on this player. And keyboard code will be revised as per the definition of Android system. We recommend a standard USB keyboard to be used.

Chapter 8. Usage of TF Card

This product comes with TF card slot. It supports reading the files in TF card. When using, inset the TF card to the product.

To drag out the TF card, push the TF card inside a little and release; TF card will pop out automatically and you can take it out. This product supports TF card from 1GB to 16GB.

Tips:

A. Please insert TF card to the card slot on the right correctly.

B. When TF card is working (such as reading, copying, etc.), please do not pull out the card or it will lead to data errors.

C. Avoid using the memory card in high temperature or high humidity environment.

D. Keep the memory card away from liquid or corrosive material.

Note: If you cannot take out the memory card, or it's stuck with other material or smudged and so on, you can use tweezers or other tools to pull it out slowly and carefully.

Chapter 9. Basic Setting

Click ➕ ➖ to set up year, month, day, click 设置 to confirm.

B ： Select Time Zone；

Select your time zone and confirm.

C: Set Time

Click ✛ ▬ to set up hour, minute，for example：10：56，
click 设置 to confirm.
D：Set
Date Format; Click the date format you prefer and confirm.

9-12. **Accessibility**

9-13. Developer Options

9-14．About Tablet

You can check legal information, model number, Android version, Baseband version.

Chapter 10. Trouble Shooting

1. The tablet turns on slowly at first time

●After system update, factory restore, it takes about 2-3 minutes to install some pre-install applications at the first time, then starting time will be quicker.

2. Unable to connect WIFI or weak signal

●Ensure the Network is working properly.

●Ensure the user name and password is correct.

●Ensure the internal antenna is not blocked.

●Ensure the tablet is within the proper distance of the Network
and there is no wall or other obstructions between.

3. Unable to connect 3G or weak signal

●Ensure the 3G is connected to the tablet
correctly and the SIM card with enough fees to access to the
Internet.

●Ensure the 3G is among the models supported
by the tablet.

●Ensure you are in an area that gets access to the signal

●Check if the "Wireless and Network" is correctly set.

4. Indicator light does not turn on after 3G card is
plugged in.

●Check connected properly, 3G card
can work well, 3G connects successfully.

5. 3G card connection fails-it indicates failure or it stay at the same
status all the time

●Check whether the 3G card is with enough fee.

●Ensure you are in a location with stable and strong signal.

●Close and restart the 3G

62

●Close 3G, and then plug OTG cable and re-plug in the cable
and 3G card again correctly.

●Close 3G and restart the tablet

6. Fail to copy files

●Ensure the tablet is connected to the computer correctly.

●Ensure there is still disk space.

●Ensure the USB cable is functionally well.

7. No sound in the earphone

●Ensure that the volume is not set to 0.

●Check whether the headset is correctly connected and the
wire is broken.

8. The system has some trouble

●When you install some third-party applications it may lead to
some functional problems. You can restart the tablet or
uninstall the applications.

9. Unable to set E-mail or use registration applications.

●Ensure your Network is working properly.

●Ensure the E-Mail account is correctly set.

●Ensure your system time is the same with the local time.

●Please run the "Advanced Task Manager" to stop some other

running applications.

10. The memory capacity is different from the nominal figure.

●Just like hard disk on computer, the capacity shown on the computer is usually less than the nominal capacity; this is due to different unit conversion used by computer and storage device manufacturers.

In computer, 1GB=1024MB, but storage device manufacturers use 1GB=1000MB as default. The actual capacity is not lessened.

●The OS of this tablet pre-installs some applications, games and the OS itself occupies some capacity. This is also one reason why the capacity that can be used for storage is less than the nominal figure.

11. Specification

Dimension	193mm*122mm*13mm	
Display	7 inch HD TFT touch-screen display; resolution 800*480 pixels	
PC connection	High speed USB 2.0	
Configurati	CPU	Allwinner A10

on	Memory	8GB, 16GB, 32GB(Optional)
	TF card	128MB～32GB
	OS	Android 4.0
	Wifi	IEEE802.11b/g/n
	Battery	Lithium battery 3.7V
Power	DC Adapter	DC 5V, 1.5-2A
	Max earphone output	（L）7mW＋（R）7mW（32 ohm）
Audio Parameter	MP3 bit rate	32K bps － 320K bps
	WMA bit rate	16K bps －320K bps
	Frequency response	20Hz 至 20KHz +/-3dB
	SNR	＞=85dB
	Distortion degree	＜0.6%
Music Formats	MP3, M4A, WMA, APE, FLAC, AAC, MID, WAV, AMR, OGG, etc	
Video Formats	Supporting Full HD video decoding（2160P,1080P,720P,480P）；Video formats：MKV,AVI,RM/RMVB,WMV,3GP,MOV,MP4,AS	

	F,MPG,DAT,VOB,FLV, etc
Image Formats	JPG, JPEG, BMP, etc
Temperature	-30° ~ +50°C
Language	Traditional Chinese, Simplified Chinese, English, Multi-Languages supported
OS Supported	Windows2K/XP/Vista/Windows7/Linux2.4/MAC OS 10.4

FCC Warning:

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and

- (2) this device must accept any interference received, including interference that may cause undesired operation.

- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These

66

limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -- Reorient or relocate the receiving antenna.
- -- Increase the separation between the equipment and receiver.
- -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure and SAR Statements SAR Statement the（Tablet MID MODEL No.: B7916H3） has been tested for body-worn Specific Absorption Rate (SAR) compliance. The FCC has established detailed SAR requirements and has established that these requirements. RF Exposure Information The radio module has been evaluated under FCC Bulletin OET 65C (01-01) and found to be compliant to the requirements as set forth in CFR 47 Sections, 2.1093, and 15.247 (b) (4) addressing RF Exposure from

radio frequency devices. This model meets the applicable government requirements for

exposure to radio frequency waves. The highest SAR level measured for this device was

(1.191w/kg).
