1 Introduction

This document defines the SC20 module and describes its air interface and hardware interface which are connected with your application.

This document can help you quickly understand module interface specifications, electrical and mechanical details as well as other related information of SC20 module. Associated with application notes and user guide, you can use SC20 module to design and set up mobile applications easily.

1.1. Safety Information

The following safety precautions must be observed during all phases of operation, such as usage, service or repair of any cellular terminal or mobile incorporating SC20 module. Manufacturers of the cellular terminal should send the following safety information to users and operating personnel and to incorporate these guidelines into all manuals supplied with the product. If not so, Quectel assumes no liability for the customer's failure to comply with these precautions.

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a mobile while driving (even with a handsfree kit) causes distraction and can lead to an accident. You must comply with laws and regulations restricting the use of wireless devices while driving.

Switch off the cellular terminal or mobile before boarding an aircraft. Make sure it is switched off. The operation of wireless appliances in an aircraft is forbidden, so as to prevent interference with communication systems. Consult the airline staff about the use of wireless devices on boarding the aircraft, if your device offers an Airplane Mode which must be enabled prior to boarding an aircraft.

Switch off your wireless device when in hospitals or clinics or other health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Cellular terminals or mobiles operating over radio frequency signal and cellular network cannot be guaranteed to connect in all conditions, for example no mobile fee or with an invalid SIM card. While you are in this condition and need emergent help, please remember using emergency call. In order to make or receive a call, the cellular terminal or mobile must be switched on and in a service area with adequate cellular signal strength.

Your cellular terminal or mobile contains a transmitter and receiver. When it is ON , it receives and transmits radio frequency energy. RF interference can occur if it is used close to TV set, radio, computer or other electric equipment.

In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your phone or other cellular terminals. Areas with potentially exposable atmospheres include fuelling areas, below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles such as grain, dust or metal powders, etc.

Please do not discard. Maybe wireless devices have an impact on the environment so please do not arbitrarily discarded.

The device is restricted to indoor use only when operating in the 5150 to 5350 Mhz frequency range.

2 Product Concept

2.1. General Description

SC20 is a series of 4G smart modules based on Qualcomm platform and Android operating system, with providing industrial grade performance. It supports worldwide LTE-FDD/LTE-TDD/WCDMA/TD-SCDMA/EVDO/CDMA/GSM coverage, and also supports short-range wireless communication via Wi-Fi 802.11a/b/g/n and BT4.1 LE. Additionally, SC20 integrates GPS/GLONASS/BeiDou satellite positioning systems. Due to multiple speech and audio codecs as well as the built-in high performance Adreno™ 304 graphics processing unit, it enables smooth play of 720P videos. The module also offers multiple audio and video input/output interfaces as well as abundant GPIO interfaces.

The following table shows the supported network types and frequency bands of SC20. Including a series of product such as:SC20-CE,SC20-A,SC20-AU,SC20-E,SC20-J.

Table 1: SC20-A Frequency Bands

Type	Frequency
LTE-FDD	B2/B4/B5/B7/B12/B13/B25/B26
WCDMA	B1/B2/B4/B5/B8
GSM	850/1900MHz
Wi-Fi 802.11a/b/g/n	2412-2472MHz; 5180-5825MHz
BT4.1 LE	2402-2480MHz
GNSS	GPS/GLONASS/BeiDou

SC20 is an SMD type module, which can be embedded into applications through its 210-pin pads including 146 LCC signal pads and 64 other pads. With a compact profile of 40.5mm × 40.5mm × 2.8mm, SC20 can meet almost all requirements for M2M applications such as CPE,automotive, smart metering, tracking, security, routers, wireless POS, mobile computing devices, PDA phone, tablet PC, etc.

2.2. Key Features

The following table describes the detailed features of SC20 module.

Table 2: SC20 Key Features

Feature	Details
Applications Processor	ARM Cortex-A7 microprocessor cores (quad-core) up to 1.1 GHz 512KB L2 cache
Modem DSP	QDSP6 v5 core up to 691.2 MHz 768KB L2 cache
Memory	8GB EMMC+8Gb LPDDR3
Operating System	Android OS 5.1
Power Supply	Supply voltage: 3.5V~4.2V Typical supply voltage: 3.8V
LTE Features	Support 3GPP R10 CAT4 FDD and TDD Support 1.4 to 20 MHz RF bandwidth Support DL 2 x 2 MIMO FDD data rate: Max 150Mbps (DL), 50Mbps (UL) TDD data rate: Max 130Mbps (DL), 35Mbps (UL)
WCDMA Features	Support 3GPP R8 DC-HSPA+ Support 16-QAM, 64-QAM and QPSK modulation 3GPP R6 HSUPA: Max 5.76Mbps (UL) 3GPP R8 DC-HSPA+: Max 42Mbps (DL)
TD-SCDMA Features	Support CCSA Release 3 Max 4.2Mbps (DL), 2.2Mbps (UL)
CDMA Features	Max 3.1Mbps (DL), 1.8Mbps (UL)
GSM/GPRS/EDGE Data Features	GPRS Support GPRS multi-slot class 33 Coding scheme: CS-1, CS-2, CS-3 and CS-4 Maximum of four Rx time slots per frame EDGE Support EDGE multi-slot class 33 Support GMSK and 8-PSK
WLAN Features	Support 2.4G and 5G frequency band, (SC20-CE does not support 5G frequency). Support 802.11a/b/g/n, data rate up to 150Mbps Support AP mode;
Bluetooth Feature	BT4.1 LE

GNSS Features	GPS/GLONASS/BeiDou
SMS	Text and PDU mode Point to point MO and MT SMS cell broadcast SMS storage: ME by default
AT Commands	Compliant with 3GPP TS 27.007, 27.005 and Quectel enhanced AT commands
LCM Interface	4 lanes MIPI_DSI, up to 1.5Gbps each Support WVGA (2 lanes MIPI_DSI), up to 720p (4 lanes MIPI_DSI) 24bit color depth
Camera Interface	Use MIPI_CSI, up to 1.5Gbps per lane, support two cameras 2-lane MIPI_CSI for rear camera, up to 8MP 1-lane MIPI_CSI for front camera, up to 2MP
Audio Interface	Audio input 2 groups analog microphone input, integrate internal bias voltage Audio output Class AB stereo headphone output Class AB earpiece differential output Class D speaker differential amplifier output
USB Interface	Compliant with USB 2.0 specification; the data transfer rate can reach up to 480Mbps Used for AT command communication, data transmission, software debugging and firmware upgrade Support USB OTG (Need additional 5V power supply chip) USB Driver: Support Windows XP, Windows Vista, Windows 7, Windows 8, Windows CE5.0/6.0*, Linux 2.6/3.0, Android 2.3/4.0/4.2
USIM Interface	2 groups of USIM interface Support USIM/SIM card: 1.8V, 3.0V
UART Interface	2 groups of UART interface 4-wire UART interface with RTS and CTS hardware flow control 2-wire UART interface for software debugging Baud rate up to 4Mbps
SDIO Interface	Support SD3.0; 4bit SDIO; SD Card Support hot plug
I2C Interface	3 groups I2C, used for TP, camera, sensor peripherals, etc.
ADC Interface	Support 3 ADC interfaces, used for input voltage sense, battery temperature detection and general purpose ADC
Real Time Clock	Implemented
Antenna Interface	MAIN antenna, DRX antenna, GNSS antenna and Wi-Fi/BT antenna
Physical Characteristics	Size: 40.5±0.15 × 40.5±0.15 × 2.8±0.2 mm Interface: LCC

	Weight: approx. 9.6g
Temperature Range	Operating temperature range: -35°C~+65°C 1) Extended temperature range : -40°C~+75°C 2)
Firmware Upgrade	Over USB interface
RoHS	All hardware components are fully compliant with EU RoHS directive

NOTES

- 1) Within operation temperature range, the module is 3GPP compliant.
 - 2) Within extended temperature range, the module remains the ability to establish and maintain a voice, SMS, data transmission, emergency call, etc. There is no unrecoverable malfunction. There are also no effects on radio spectrum and no harm to radio network. Only one or more parameters like Pout might reduce in their value and exceed the specified tolerances. When the temperature returns to the normal operating temperature levels, the module will meet 3GPP compliant again.
- * means this feature is under development.

2.3. Functional Diagram

The following figure shows a block diagram of SC20 and illustrates the major functional parts.

- Power management
- Radio frequency
- Baseband
- LPDDR3+EMMC flash
- Peripheral interface
 - USB interface
 - USIM interface
 - UART interface
 - SDIO interface
 - I2C interface
 - ADC interface
 - LCD (MIPI) interface
 - TP interface
 - CAM (MIPI) interface
 - AUDIO interface

2.4. Evaluation Board

In order to help you to develop applications with SC20, Quectel supplies an evaluation board (SMART-EVB), RS-232 to USB cable, USB data cable, power adapter, earphone, antenna and other peripherals to control or test the module. For details, please refer to **document [1]**.

3 Application Interfaces

3.1. General Description

SC20 is equipped with 146-pin 1.0mm pitch SMT pads plus 64-pin ground pads and reserved pads that can be embedded into cellular application platform. The following chapters provide the detailed description of pins/interfaces listed below.

- Power supply
- VRTC interface
- LCM interface
- TP interface
- Camera interface
- Audio interface
- USB interface
- USIM interface
- UART interface
- SDIO interface
- I2C interface
- ADC interface

3.2. Pin Assignment

The following figure shows the pin assignment of SC20 module.

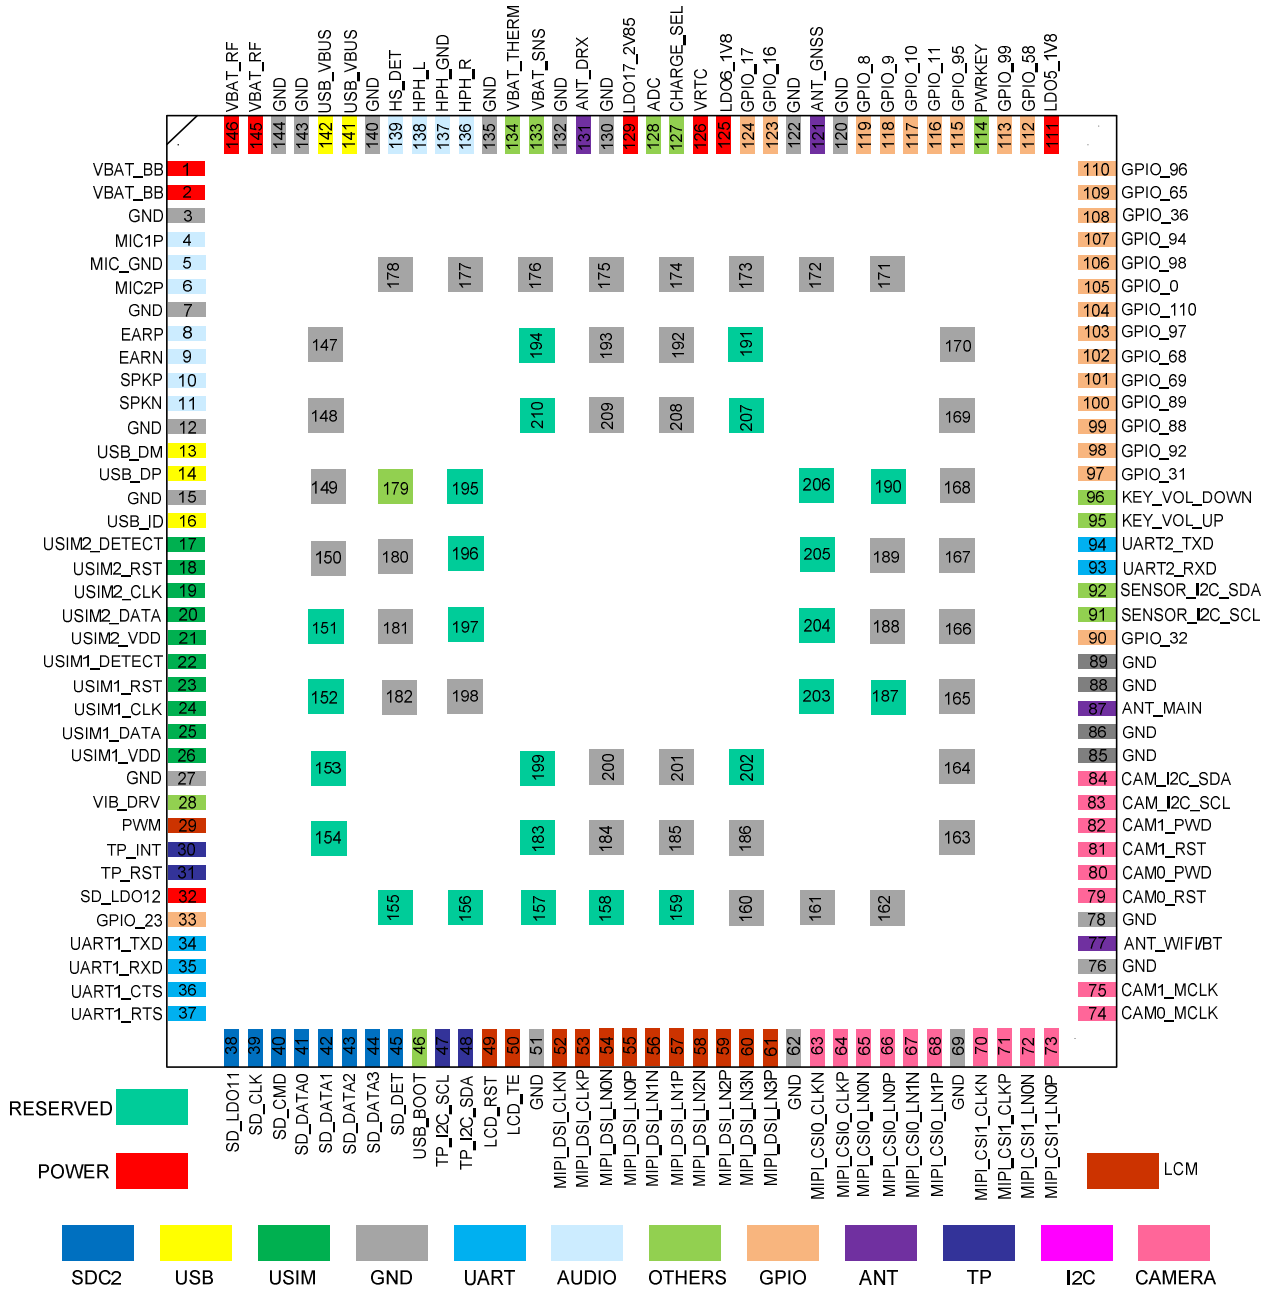

Figure 2: Pin Assignment (Top View)

4 Wi-Fi and BT

SC20 module provides a shared antenna interface ANT_WIFI/BT for Wi-Fi and Bluetooth (BT) functions. The interface impedance is 50Ω. External antennas such as dipole antenna can be connected to the module via the interface, so as to achieve Wi-Fi and BT functions.

4.1. Wi-Fi Overview

SC20 module supports 2.4G and 5G double-band WLAN wireless communication based on IEEE 802.11 a/802.11b/ 802.11g/ 802.11n standard protocols. The maximum data rate is up to 150 Mbps.

The features are as below:

- Support Wake-on-WLAN (WoWLAN)
- Support ad hoc mode
- Support WAPI SMS4 hardware encryption
- Support AP mode
- Support Wi-Fi Direct
- Support MCS 0-7 for HT20 and HT40

NOTE

SC20-CE only supports 2.4G single band WIFI, and does not support 802.11a.

4.1.1. Wi-Fi Performance

The following table lists the Wi-Fi transmitting and receiving performance of SC20 module (SC20-CE does not support 5G frequency band).

Referenced specifications are listed below:

No.	Document
1	IEEE 802.11n WLAN MAC and PHY, October 2009 + IEEE 802.11-2007 WLAN MAC and PHY, June 2007

2 IEEE Std 802.11b, IEEE Std 802.11d, IEEE Std 802.11e, IEEE Std 802.11g, IEEE Std 802.11i: IEEE 802.11-2007 WLAN MAC and PHY, June 2007

4.2. BT Overview

SC20 module supports BT4.1 (BR/EDR+BLE) specification, as well as GFSK, 8-DPSK, $\pi/4$ -DQPSK modulation modes.

- Supports max. 7 wireless connections.
- Supports max. 3.5 piconets at the same time.
- Supports one SCO (Synchronous Connection Oriented) or eSCO connection.

The BR/EDR channel bandwidth is 1MHz, and can accommodate 79 channels. The BLE channel bandwidth is 2MHz, and can accommodate 40 channels.

Table 3: BT Data Rate and Version

Version	Data rate	Maximum Application Throughput	Comment
1.2	1 Mbit/s	>80 Kbit/s	
2.0 + EDR	3 Mbit/s	>80 Kbit/s	
3.0 + HS	24 Mbit/s	Reference 3.0 + HS	
4.0	24 Mbit/s	Reference 4.0 LE

2	Bluetooth Low Energy RF PHY Test Specification, RF-PHY.TS/4.0.0, December 15, 2009

4.2.1. BT Performance

The following table lists the BT transmitting and receiving performance of SC20 module.

Table 4: BT Transmitting and Receiving Performance

Transmitter Performance

Packet Types	DH5	2-DH5	3-DH5
Transmitting Power	10dBm	8dBm	8dBm
Receiver Performance			
Packet Types	DH5	2-DH5	3-DH5
Receiving Sensitivity	-92dBm	-91dBm	-86dBm

5 GNSS

SC20 module integrates a Qualcomm IZat™ GNSS engine (GEN 8C) which supports multiple positioning and navigation systems including GPS, GLONASS and BeiDou. With an embedded LNA, the module provides greatly improved positioning accuracy.

5.1. GNSS Performance

The following table lists the GNSS performance of SC20 module in conduction mode.

Table 5: GNSS Performance

Parameter	Description	Typ.	Unit
Sensitivity (GNSS)	Cold start	-146	dBm
	Reacquisition	-158	dBm

	Warm start	30	s
	Hot start	2	s
Static Drift (GNSS)	CEP-50	6	m

6 Antenna Interface

SC20 antenna interface includes a main antenna, an Rx-diversity/MIMO antenna, a GNSS antenna and a Wi-Fi/BT antenna. The antenna interface has an impedance of 50Ω.

6.1. Main/Rx-diversity Antenna Interface

6.1.1. Pin Definition

The main antenna and Rx-diversity antenna pins' definition are shown below.

Table 6: Pin Definition of the Main/Rx-diversity Antenna

Conclusion:

The analysis concludes that this product when transmitting in standalone within a host device, is compliant with the RF exposure requirements in mobile exposure condition, provided the conducted power and antenna gain do not exceed the limits for each given frequency band per wireless technology as follow table:

Technology	Band	Maximum Conducted Power (dBm)	Maximum Antenna Gain (dBi)
GSM	GSM850	33.0	3.0
	GSM1900	30.5	2.5
WCDMA	Band II	24.0	2.5
	Band IV	24.0	5.0

Extended temperature range ²⁾	-40		+75	°C

NOTES

1. ¹⁾ Operating temperature range ---- 3GPP compliant.
- 2) Within extended temperature range, the module remains the ability to establish and maintain a voice, SMS, data transmission, emergency call, etc. There is no unrecoverable malfunction. There are also no effects on radio spectrum and no harm to radio network. Only one or more parameters like P_{out} might reduce in their value and exceed the specified tolerances. When the temperature returns to the normal operating temperature levels, the module will meet 3GPP compliant again.

7.5. Current Consumption

The values of current consumption are shown below.

7.6. Electrostatic Discharge

The module is not protected against electrostatic discharge (ESD) in general. Consequently, it should be subject to ESD handling precautions that are typically applied to ESD sensitive components. Proper ESD handling and packaging procedures must be applied throughout the processing, handling and operation of any application that incorporates the module.

The following table shows the module electrostatic discharge characteristics.

Table 21: Electrostatic Discharge Characteristics (Temperature: 25°C, Humidity: 45%)

Tested Points	Contact Discharge	Air Discharge	Unit
VBAT, GND	+/-5	+/-10	KV
All Antenna Interfaces	+/-5	+/-10	KV
USB Interfaces	+/-0.5	+/-1	KV
Other Interfaces	+/-0.5	+/-1	KV

8 Technical Dimensions

This chapter describes the mechanical dimensions of the module. All dimensions are measured in mm.

8.2. Recommended Footprint

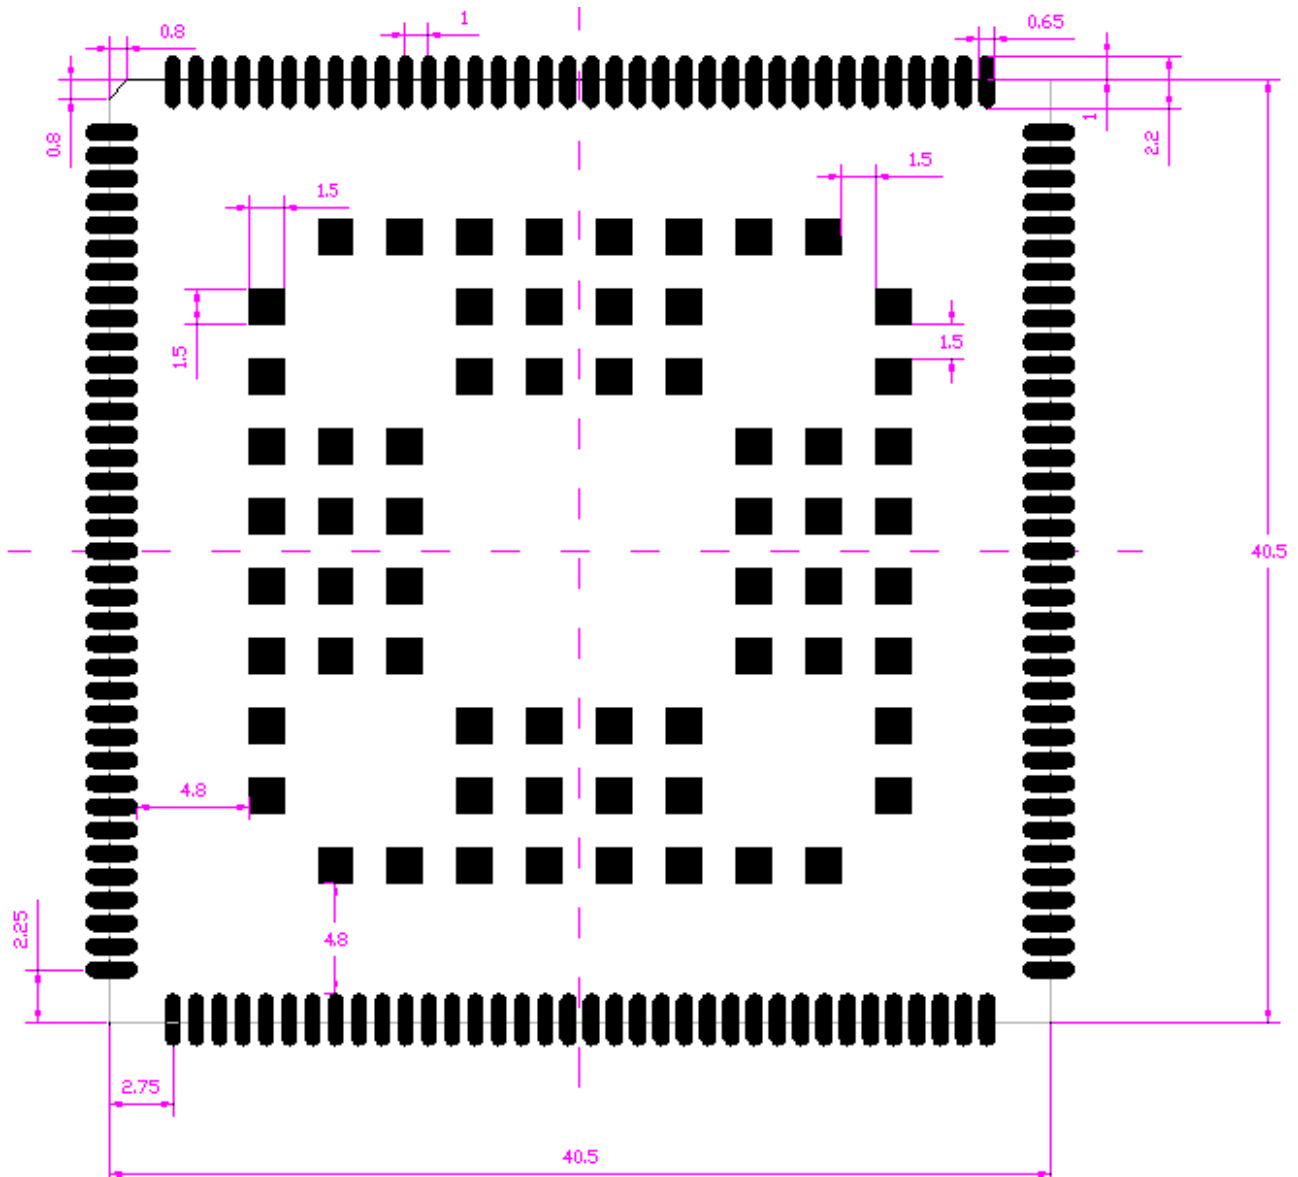

Figure 5: Recommended Footprint (Top View)

NOTES

1. For easy maintenance of the module, keep about 3mm between the module and other components in the host PCB.
2. All RESERVED pins must not be connected to GND.

These are design effect drawings of SC20 module. For more accurate pictures, please refer to the module that you get from Quectel.

9 Storage, Manufacturing and Packaging

9.1. Storage

SC20 is stored in a vacuum-sealed bag. The restrictions of storage condition are shown as below.

1. Shelf life in sealed bag is 12 months at < 40°C/90%RH.
2. After this bag is opened, devices that will be subjected to reflow soldering or other high temperature process must be:
 - Mounted within 72 hours at factory conditions of ≤ 30°C/60%RH.
 - Stored at < 10% RH.
3. Devices require baking before mounting, if:
 - Humidity indicator card is > 10% when ambient temperature is 23°C±5°C.
 - Mounting cannot be finished within 72 hours at factory conditions of ≤ 30°C/60% RH.
4. If baking is required, devices may be baked for 48 hours at 125°C±5°C.

NOTE

As plastic package cannot be subjected to high temperatures, the package must be removed from devices before high temperature (125°C) baking. If shorter baking time is desired, please refer to IPC/JEDECJ-STD-033 for baking procedure.

9.2. Manufacturing and Welding

Push the squeegee to apply the solder paste on the surface of stencil, thus making the paste fill the stencil openings and then penetrate to the PCB. The force on the squeegee should be adjusted properly so as to produce a clean stencil surface on a single pass. To ensure the module soldering quality, the thickness of stencil at the hole of the module pads should be 0.18mm. For details, please refer to *document [3]*.

Figure 8: Recommended Stencil Design for LGA Pads

It is suggested that the peak reflow temperature is from 235 to 245°C (for SnAg3.0Cu0.5 alloy). The absolute maximum reflow temperature is 260°C. To avoid damage to the module caused by repeated heating, it is suggested that the module should be mounted after reflow soldering for the other side of PCB has been completed. Recommended reflow soldering thermal profile is shown below:

Figure 9: Reflow Soldering Thermal Profile

9.3. Packaging

SC20 is packaged in tape and reel carriers. One reel is 12.32 meters long and contains 200pcs modules. The following figures show the package details, measured in mm.

11 Appendix B GPRS Multi-slot Classes

Twenty-nine classes of GPRS multi-slot modes are defined for MS in GPRS specification. Multi-slot classes are product dependent, and determine the maximum achievable data rates in both the uplink and downlink directions. Written as 3+1 or 2+2, the first number indicates the amount of downlink timeslots, while the second number indicates the amount of uplink timeslots. The active slots determine the total number of slots the GPRS device can use simultaneously for both uplink and downlink communications.

The description of different multi-slot classes is shown in the following table.

3. Table 24: GPRS Multi-slot Classes

Multislot Class	Downlink Slots	Uplink Slots	Active Slots
1	1	1	2

13 CE Requirement

The minimum distance between the user and/or any bystander and the radiating structure of the transmitter is 20cm.

Hereby, Quectel Wireless Solutions Co., Ltd. declares that the radio equipment type SC20-E is in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at the following internet address:

7th Floor, Hongye Building, No.1801 Hongmei Road, Xuhui District, Shanghai 200233, China

<http://www.quectel.com/support/downloadb/TechnicalDocuments.htm>

This SC20-E operates with the following frequency bands and maximum radio-frequency power:

GSM850/900 : 35dBm

GSM1800/1900: 32dBm

UMTS Band 1/5/8: 25 dBm

LTE Band 1/3/5/7/8/20/38/40/41: 25.7 dBm

Bluetooth: <20 dBm

WiFi 2.4GHz <20 dBm;

WiFi 5GHz band 1/2/3 <23 dBm

14 IC & FCC Requirement

14.1. FCC Regulations:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

14.2. RF Exposure Information

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.

14.3. ISED Notice

This device complies with Innovation, Science and Economic Development Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause interference, and
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

14.4. ISED Radiation Exposure Statement

This device complies with RSS-102 radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the ISED radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.

Cet appareil est conforme aux limites d'exposition aux rayonnements de la CNR-102 définies pour un environnement non contrôlé. Afin d'éviter la possibilité de dépasser les limites d'exposition aux fréquences radio de la CNR-102, la proximité humaine à l'antenne ne doit pas être inférieure à 20 cm (8 pouces) pendant le fonctionnement normal.

14.5. IMPORTANT NOTE:

This module is intended for OEM integrator. The OEM integrator is still responsible for the FCC compliance requirement of the end product, which integrates this module. 20cm minimum distance has to be able to be maintained between the antenna and the users for the host this module is integrated into. Under such configuration, the FCC radiation exposure limits set forth for an population/uncontrolled environment can be satisfied.

Any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate this equipment.

14.6. USERS MANUAL OF THE END PRODUCT:

In the users manual of the end product, the end user has to be informed to keep at least 20cm separation with the antenna while this end product is installed and operated. The end user has to be informed that the FCC radio-frequency exposure guidelines for an uncontrolled environment can be satisfied. The end user has to also be informed that any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate this equipment. If the size of the end product is smaller than 8x10cm, then additional FCC part 15.19 statement is required to be available in the users manual: This device complies with Part 15 of FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

14.7. LABEL OF THE END PRODUCT:

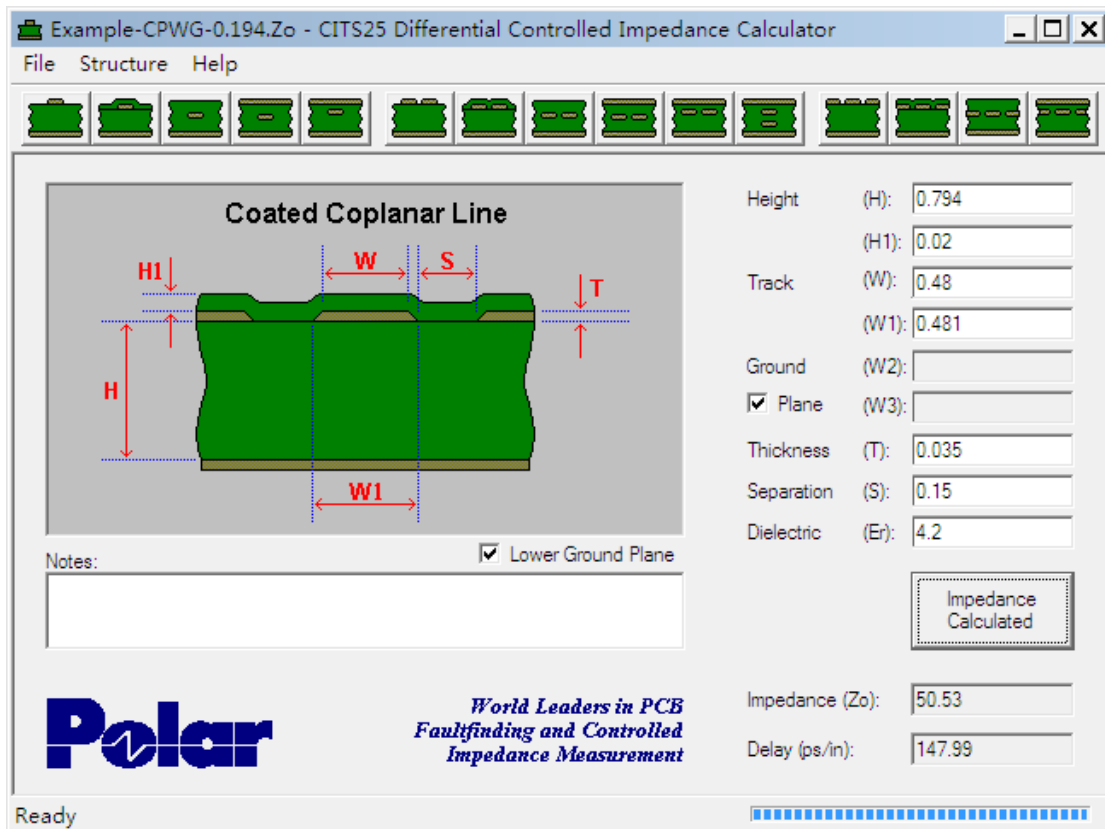

The final end product must be labeled in a visible area with the following " Contains Transmitter Module FCC ID: XMR201706SC20A". If the size of the end product is larger than 8x10cm, then the following FCC part 15.19 statement has to also be available on the label: This device complies with Part 15 of FCC rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

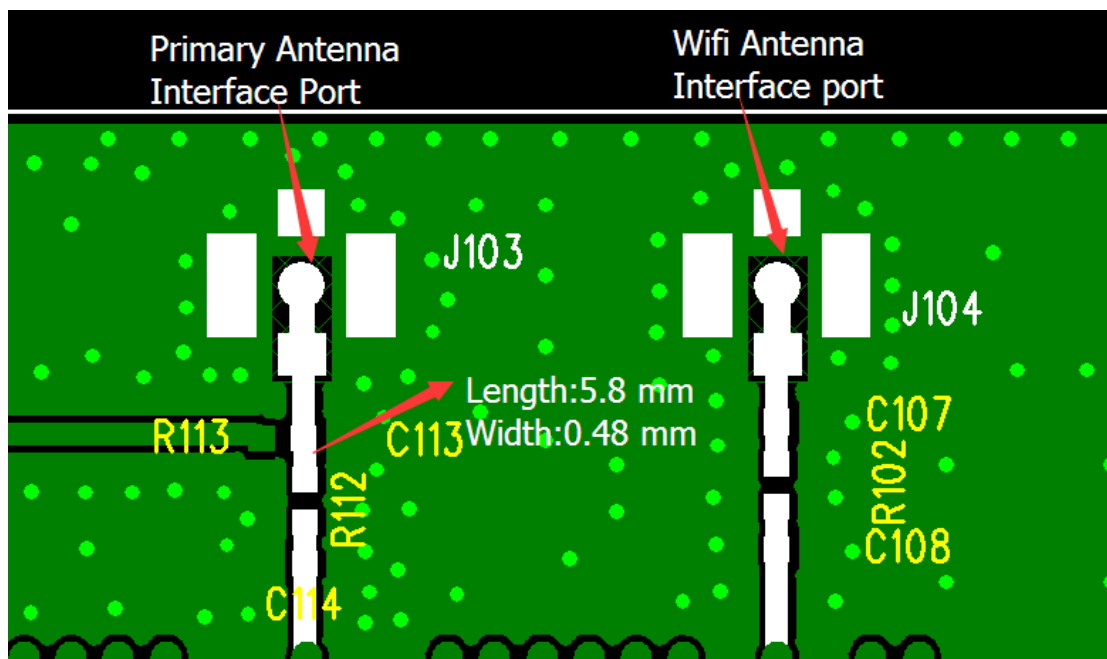

The Innovation, Science and Economic Development Canada certification label of a module shall be clearly visible at all times when installed in the host device; otherwise, the host device must be labeled to display the Innovation, Science and Economic Development Canada certification number for the module, preceded by the words "Contains transmitter module IC: 10224A-201707SC20A".

The device is going on be operated in 5150~5250 frequency range. It is restricted indoor environment only in Canada.

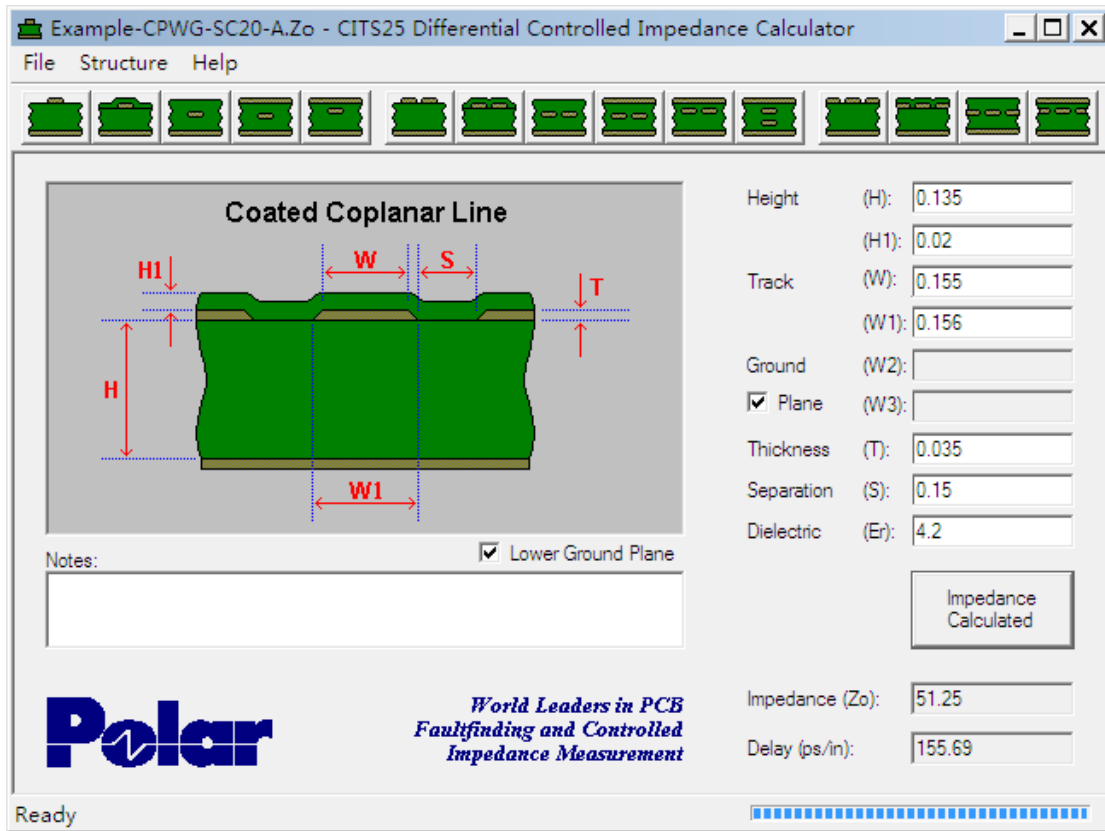

1、 the characteristic impedance depends on the dielectric of PCB, the trace width and the grand plane spacing, Coated Coplanar Line is required. the detail simulation as below.

2、 the RF trace of the test board which was used in the FCC test is defined as below.
