

## STEP 1 CABLE SETUP

## EASY DEVICE INTEGRATION

### HANDLE CALLS *Works via audio cable*

Take smartphone calls through your headset with the call button.

### MANAGE AUDIO

Hop between receiving PC and device audio through your connected headset.

### TYPE TO DEVICE *Works via Bluetooth*

Quickly switch back and forth between PC and device input typing.

### OPEN / CLOSE SWARM

Hit the Swarm button to quicklaunch the feature-rich Swarm software in an instant.

## WHAT'S ROCCAT® SWARM?

Swarm provides computer to smartphone integration for Skeltr. PC side it offers a software suite and an overview of all your ROCCAT® device settings. Smartphone side it's an extension of the computer software, letting you quicklaunch games, configure illumination options, check your APM, your GPU/CPU temperatures – and more.

## STEP 2 CONNECT YOUR DEVICE

Turn on Bluetooth on your device

Press the button and hold for 2s. The Bluetooth status LED will start flashing and the Skeltr will be visible on your smartphone or tablet as an available Bluetooth device to connect to.
