Chargers and batteries
Before charging, the battery pack should be charged: 1) If the specifications of the charger itself is in accordance with the requirements; 2) If the battery output voltage should be DC0V or 0.25 output voltage (should be within: 24V ±0.2); 3) If the battery voltage is too high or too low which will damage the battery.

Warning: Use the configured charger. Use other types of chargers may violate the regulations of equipment or warranty, and could lead to disasters. If there is a USB cable, it should be connected to the charger or computer which pass C, Class II, contribute.

4. Damage by wrongly operation or bad result
5. Damage caused by Accident or carelessness
6. Damage caused by commercial purpose and with no normal using conditions
7. Other situation similar to the above

Warm Tips
1. To extend the battery life, the manufacturer recommends changing its head at least once every month.
2. Use only Roman-approved chargers. Unapproved or non-Roman chargers could cause damage to the headset.

3. Use only a moderate volume setting necessary to hear your conversation or music.
4. Do not use while driving, sleeping, or as to avoid disturbing battery current or increasing your battery current. Then it needs to be recharged: 2-use the plug of the charger cable into headjack.

13. Only use the moderate volume setting necessary to hear your conversation or music. 14. Do not overload the battery. This may cause some children. Small parts may cause choking or serious injury if swallowed.
