## WHAT'S IN THE BOX

Please ensure the product package has all the following contents

- A. Android TV Box
- B. Remote Control
- C. Power adapter
- D. User manual
- E. AV Cable

## ABOUT REMOTE

①	Turn the player on / off
②	Go to mouse mode
③	Press it to mute
④	Direction keys
⑤	Confirm / OK
⑥	Adjust the volume
⑦	Go to last menu
⑧	Go back to home
⑨	To pop up the main menu
⑩	Go to all files
⑪	Go to play store
⑫	Go to Application page
⑬	Go to setup

## CONNECTION PORTS INTRODUCTION

- USB inputs 1&2
- HDMI output
- SD card input
- Power/DC in
- AV output
- LAN input
- S/PDIF, Optical output

## CONNECTION GUIDE

## USING YOUR ANDROID TV BOX

The player will boot up once you have connected the power , which will take few minutes. The following main menu will appear after booting up:

Use the directional buttons on the remote to highlight an option, press OK to select it. You can also press the “Mouse” button to switch to Mouse Mode.

## MAIN MENU INTERFACE

**Applications:** access the apps screen, where you can browse through apps and use Play Store etc to access more apps or media.

**Web browser:** go to google browser

**Download:** check all your download files

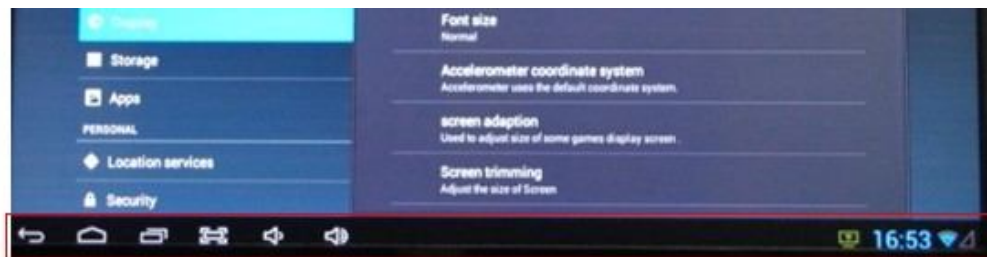

**FileManager:** check all folders

**Settings:** set up the player

**Media:** show all videos / photos

## MAIN MENU INTERFACE

Below is a screenshot of the Android OS menu bar.

Reading in order from left to right are descriptions of the Android OS menu bar icons

**Back:** to go backwards one step (same function as on Remote)

**Home:** to return to the Main Interface menu (same function as on Remote)

**Task Bar:** to view any apps running in the background. Tip: this is useful for closing down apps running in the background

**Screen Shot:** capture a photo of the screen (Screen Shots are stored in local memory://Pictures/Screenshots)

**Volume Down:** to adjust volume lower

**Volume Up:** to adjust volume higher

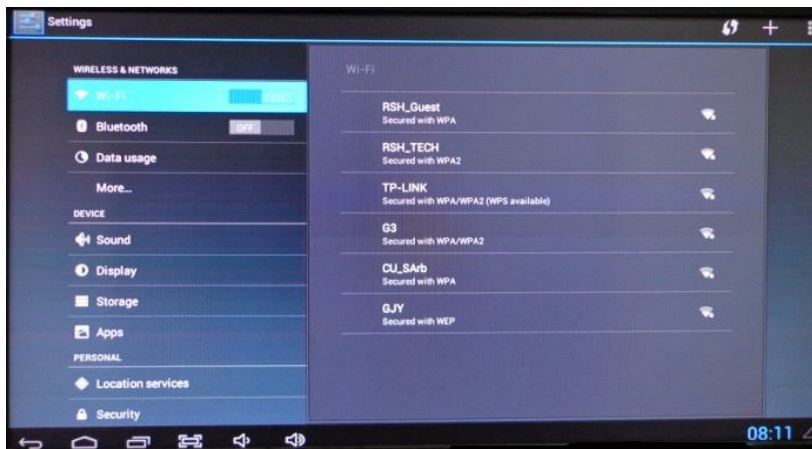

# CONNECTING TO THE INTERNET

## Connect by LAN Cable

Connect a LAN cable directly from your router to the LAN input on the player, the network will connect automatically

## Connect by WIFI

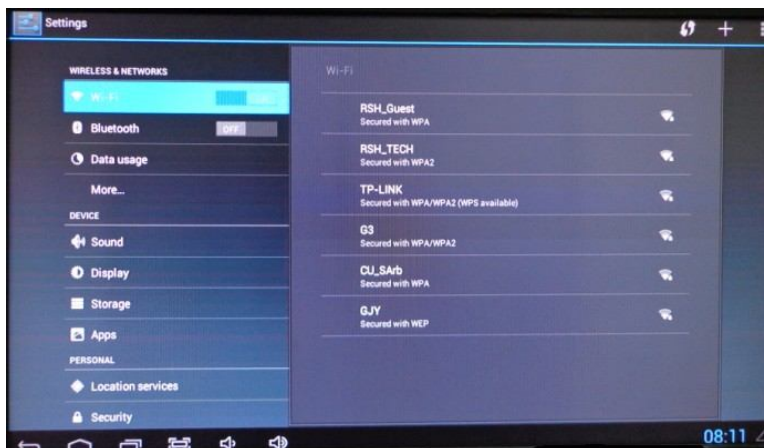

The wifi is built in the player, you just need to go to “setting” choose wifi, switch on, the player will begin to search wifi signal nearby, choose one and input password, click connect, the player will connect to network automatically. Noted: the player can remember the password for the same wifi signal, if you choose the same network next time, the player will connect to network automatically, no need to input password again.

# ADJUSTING YOUR SETTINGS

Use the directional buttons on the remote control to highlight an option, press OK to select an option, follow the prompts to make adjustments

Tip: Switching to “mouse” mode on the remote is useful to select some options.

## CONNECTING EXTERNAL DEVICES

There are various devices the Player is compatible with. Most USB keyboard, mouse, storage and webcam devices will be detected. To connect an external device, simply plug it into one of the USB ports on the Player. After a few seconds, a window will pop up explaining if it has successfully connected. For some devices you may be able to download an app to make your device compatible with the Player.

## Warnings

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

**Warning:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
