Radiant Sensors

RSPOS-100

UHF RFID POS Scanner

User Manual

This document is to serve as a guide on how to setup and work with Radiant Sensors POS UHF RFID SCANNER. It will provide useful information on how to connect and operate POS UHF RFID SCANNER. Read it carefully before and during using POS UHF RFID SCANNER. Keep this user manual handy for future use.

Feedback from User

Thanks for using **POS UHF RFID SCANNER.** As always, our goal is to make your experience the best possible ever, and your constructive comments and feedback are highly appreciated. Share your thoughts, comments, suggestion and ideas with us. Tell us what you like or dislike about software, hardware and even the datasheet of **POS UHF RFID SCANNER**. You can contact us by any of the following ways, we look forward to hearing from you.

The software, hardware and document of **POS UHF RFID SCANNER** contain proprietary information of Radiant Sensors that is provided under a license agreement containing restrictions on use and disclosure, and are also protected by copyright. Reverse engineering, disassembly or de-compilation of the device is prohibited.

Information contained in this document is subject to change without notice. If you find any problems in the document, please write them to us. In your license agreement, it is expressly stated that no part of the software and hardware of the device may be reproduced or transmitted in any form, by any means, electronic or mechanical for any purpose without the expressed written permission of Radiant Sensors.

Limitation of Liability

In no event shall Radiant Sensors be liable for any damages whatsoever (damages for loss of business profits, business interruption, loss of business information or any other pecuniary loss ,without limitation) arising out of the use of, or inability to use this device.

The content of this document is furnished for informational use only. It is subject to change without notice, and should not be construed as a commitment by Radiant Sensors. Radiant Sensors assumes no responsibility or liability for any errors or inaccuracies that may appear in this manual. Neither Radiant Sensors nor anyone else who has been involved in creating, producing or delivering this document shall be liable for any indirect, incidental, special, exemplary or consequential damages. But not limited to any loss of anticipated profit or benefits, resulting from the use of this documentation or sample code.

Intellectual Property

Radiant Sensors may have patents, patent applications, trademarks, copyrights, or other intellectual property rights covering subject matter in this document. Except as expressly provided in any written license agreement from Radiant Sensors, the furnishing of this document does not give you any license to these patents, trademarks, copyrights, or other intellectual property.

Warranty Product

- Warranty is valid for 12 months.
- Warranty only applies to manufacturing defect in materials and malfunctions.
- Damage caused by misuse, abuse, neglect, alteration, problems with electrical power, usage not in accordance with product instructions, acts of nature, or improper installation or repairs made by anyone other than Radiant Sensors authorized third-party service provider is not covered under warranty.
- Warranty does not cover freight cost for both ways.

Contents

POS UHF RFID SCANNER

POS UHF RFID SCANNER is a new data capturing device from Radiant Sensors which is designed to grab EPC of RFID tags and deliver that data securely to a host for processing. It renders superior performance and read reliability for a wealth of applications; with incredible speed and at an economical price point.

Snap-On installation along with exceptional ergonomic design has made **POS UHF RFID SCANNER** literally convenient to setup and comfortable to use. In press of a button **POS UHF RFID SCANNER** can toggle between two scanning modes to read RFID tags individually or continuously. With its high RF sensitivity that provides for greater accuracy, higher throughput and longer reads, you can readily know the detailed information of the packages without unpacking or opening the container.

POS UHF RFID SCANNER reaches further to bring reliable data about your products right to your fingertips.

Features

- Snap - On installation
- Driver free setup eliminates integration with any software or hardware
- Orientation insensitive design resulting in faster and more accurate tag reads
- Single or Continuous scanning modes
- Fast read rate for demanding applications
- Region free application
- Best-in-class receive sensitivity
- Enhanced interference rejection
- Expansive read range settings
- Rugged yet compact and lightweight for effortless use
- Superior ergonomic design for both left and right handed user
- USB 2.0 for power and communication line
- IP41 sealing for dust and water resistance

Applications

- Any applications requiring a reliable and easy UHF RFID tag scanning
- Retail POS
- Hypermarket
- Pharmacy & Healthcare
- Warehouse
- Receiving/Shipping
- Product authentication
- Office

Specifications

Dimensions	(H × W × L) 3.34 × 3.46 × 6.73 in (8.5 × 8.8 × 17.1 cm)
Weight	150 g
Storage Temperature	-10 °C to +70 °C
Humidity Operating Range	Up to 80% relative humidity
Material	ABS
Colour	Lava
Ingress Protection	IP41
Input Voltage	5 VDC
Input Current	500 mA @ 5VDC
Power Connector	USB 2.0
Connectivity	USB 2.0
Operating Modes	• Single Scan • Continuous Scan
Communication Standards	USB 2.0
Operating System	Windows, MAC, Linux, Android
Nominal Read Range	10-15 cm
Frequency Range	Region Free
Supported Standards	EPC Gen 2
RFID Antenna Type	Integrated, Orientation Insensitive

Closer View

No.	Description
1	Scanning Area
2	Activity Indicator LED
3	Activation/Toggle Button

Sample Usage

ERP, WMS, CSM and the like

USB 2.0

Setup

As mentioned earlier, **POS UHF RFID SCANNER** is quiet easy to setup and exploit. No driver is needed to be installed before using it. Just plug the USB cable into USB port and that's all. **POS UHF RFID SCANNER** is now ready. **POS UHF RFID SCANNER** can be used in two different modes; Single Scanning and Continuous Scanning.

Single Scanning Mode

In this mode **POS UHF RFID SCANNER** reads a single tag with each press of activation/toggle button. The EPC of the tag is then sent to the host through USB port.

Continuous Scanning Mode

To use **POS UHF RFID SCANNER** in Continuous Scanning mode, press activation/toggle button and hold it for more than 1 second. Keep holding the button and **POS UHF RFID SCANNER** continually reads in range tags and sends their EPC to the host through USB port.

Records of Revision

This page keeps the records of changes to this document. The document was originally released as Revision A.

REV	NAME	DESCRIPTION OF REVISION	DATE
A	R.PRS	Initial Release	2015-11-14

Radiant Sensors is addressing challenges of global intricacy in today's omnipresent digital devices, affording its customers to create novel experiences for end users.

Radiant Sensors designs, develops, and manufactures passive and active RFID hardware products as well as IOT sensor devices for short and long range wireless identification technology.

Radiant Sensors is positioned as a major player in the worldwide market for sub gigahertz UHF (Ultra-High Frequency) and Active radio-frequency identification (2.45 GHz) technologies. Our devices are field proven and have been in operation for many years throughout the world.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
