

**Quick Start Guide
Of
2.4GHz Wireless Super Mini Mouse**

Installation

1. Plug the Nano receiver into a USB port of your computer.
2. Push the Battery Cover Switch aside, open the battery door and install battery, then close the battery cover.

Receiver storage and ON/OFF the mouse

1. You can store or take out the Nano receiver from the Nano receiver storage by push/pull the Nano receiver.
2. You can switch On or shut off the mouse by use the ON/OFF switch on the bottom of the mouse.

Mouse Functions

Trouble Shooting

1. Check Nano receiver connection; try to insert Nano Receiver to another USB port on your computer.
2. Check to see if the batteries in the mouse are installed correctly. Make sure the polarity of the batteries corresponds with the polarity signs in the battery compartment.

3. Replace the batteries to make sure the batteries are not low on power.
