

Wireless Mouse

- The USB nano receiver is located in the battery compartment.
- Plug USB nano receiver into any USB port on your laptop / computer.
- The mouse is powered by 2 AAA batteries (not included).
- To activate, toggle on / off switch. This will establish / disconnect a connection between the computer and the mouse.
- Battery life may vary based on user and computing conditions.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
