MX6

◆ Product Diagram

◆ Quick Guide

1 Battery Chamber

USB Receiver inside

2 Connecting

Plug the USB Receiver into the USB port

3 Power On

Power on right after battery installed

4 Ready to work

◆ FAQ

- Q1: The cursor is out of control or randomly moving around.
A: Put the remote control on the desktop, and wait for 5 seconds before use.
- Q2: The indicator light is flashing, but the remote control works well.
A: This state is the battery low state, please replace the battery with new battery.
- Q3: The indicator light is flashing, but the remote control can not control anything on the device.
A1: Check if the receiver is plugged in firmly, you can replug in the receiver again to see if it can recover to work again. if no, please do step A2.
A2: Place the remote control very close to the receiver, then press the <OK> key and <OK> key at the same time to see if it can recover to work again.
- Q4: The <OK> key does not work
A: The <OK> key is an infrared function key. You need to let it learn before using it. Please refer to the "Learning Procedure" section.

◆ Keyboard layout

Keyboard keys are the regular letter keys. The blue characters output needs pressing corresponding key and FN as well.

Ⓢ This key is with infrared function, it can learn and act as the other infrared remote control button's function.

◆ Cursor movement speed adjustment

Press and hold OK, press VOL+ or VOL- to increase or decrease cursor movement speed. There are total three speeds to choose, slow, medium and fast. The default speed is medium.

◆ System Requirements

HID compatible device
Terminal with USB port
Window 2000 • Window XP
Windows Vista, Windows CE, Windows 7, Window 8
Linux(Debian-3.1,Redhat-9.0,Ubuntu-8.10,
Fedora-7.0 tested)
Android OS (With standard USB interface)

◆ Specifications:

- Receiver(dongle): Nano style
- Compatible with: USB2.0 or above
- Transmission mode: GFSK 2.4GHz, up to 10 meters
- Transmission power: Less than +4db
- Power supply: AAA * 2 battery
- Sleeping current class1: 45uA
- Operation voltage: 3V
- Operating current: <20mA
- Product weight: 128g (Not Contains battery)
- Product size: 186*56*22.3mm

	Mute
	Home
	Menu
	Volume +/-
	Page UP/Page Dn

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
o Reorient or relocate the receiving antenna.
o Increase the separation between the equipment and receiver.
o Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
o Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction

◆ Learning procedure:

1. Press the Power key for 3 seconds, the LED will be on to indicate that it has entered in learning state.

2. Let the learnt remote controller's infrared focus on the FS6231's receiving infrared, keep the distance as close as 1 to 3cm and then pressing down the learnt button.

3. If the learning is completed with success, the LED will flash for 2 seconds and quit learning state.
4. The learning state will be ended if it has not detected any infrared signal within 10 seconds.

Note: Only one set of original remote can be programmed and memorized.

◆ LED Indicator:

There is a blue light indicator on the remote controller. It will be always on if the connection is normal.

- The light will flashes once when any key pressed.
- When the remote control is not connected to the receiver, this light will flash at a lower rate.
- The remote light will flashes at a higher rate when the remote control is at low power state.
- Backlight: The backlight will light on for 5 seconds when there is any key pressed, and then off if there is no more key pressed.
- Sleep: The Remote controller will enter into sleep (low power consumption) mode if there is no operation in 3 minutes. It will wake up and operate again once there is any operation with any key on the remote controller.

◆ Please note:

1. It can work on Amazon Fire TV with an App-app2 fire on android. You can install any App on fire TV . Note that it only works on smart loaded applications. For example Google chrome, Firefox, show box, KODI is a native app on fire.
2. Not suitable for all smart TV. Some smart TV does not support external input device. Before you place the order, please use a wired keyboard to check if it can work.
