## Setting Your Remote Dip Switches

Your dip switches control the radio frequency signal that is used to control your ceiling fan. The dip switches in the remote should be the same as the dip switches/pin jumpers in the receiver that is installed in your ceiling fan.

1. Remove the battery compartment cover.
2. Set the dip switches in the remote to the same code as the dip switches in the receiver.

This remote is only compatible with two kinds of Frequency System: 303.875-304MHz and 350MHz.

Note: If your ceiling fan receiver is provided with five code switches and frequency 303.875-304MHz, slide the first code switch to ON position and slide other four code switches to the same positions as set on the transmitter.

## Battery Installation

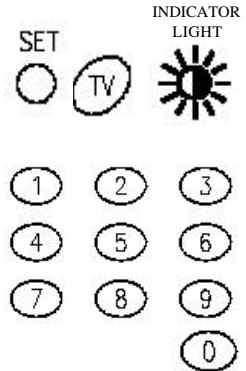

Your Universal Remote requires 4 new AAA alkaline batteries.

To install the batteries:

1. Match the batteries to the + and - marks inside the battery case, then insert the batteries.
2. Replace the battery cover.

## Programming For TV

1. Manually turn on the TV.  
Find the three-digit code for your TV in the code list below.
2. Press and hold the **SET** button; meanwhile, press and release the **TV** button, until the **INDICATOR LIGHT** lights, then release the **SET** button.
3. Enter the code using the Number Buttons.

After your code is entered, the **INDICATOR LIGHT** will turn off.

Note: If your code is unavailable, the **INDICATOR LIGHT** will blink twice then remain lit. Please repeat the step 3.

4. Aim the remote at your TV and press the **POWER** button.  
Your TV should turn off.

Note: If your TV does not respond, try all the codes for your brand.  
If the codes do not work, or your brand is not listed,  
try the Code Search method on page xx.

5. Write your code here for easy reference.

## Programming For DVD

1. Manually turn on the DVD.  
Find the three-digit code for your DVD in the code list below.

2. Press and hold the **SET** button; meanwhile, press and release the **DVD** button, until the **INDICATOR LIGHT** lights, then release the **SET** button.

3. Enter the code using the Number Buttons.

After your code is entered, the **INDICATOR LIGHT** will turn off.

Note: If your code is unavailable, the **INDICATOR LIGHT** will blink twice then remain lit. Please repeat the step 3.

4. Aim the remote at your DVD and press the **POWER** button.  
Your DVD should turn off.

Note: If your DVD does not respond, try all the codes for your brand.  
If the codes do not work, or your brand is not listed,  
try the Code Search method on page xx.

5. Write your code here for easy reference.

## Programming For FAN

1. Manually turn on the FAN.  
Find the three-digit code for your FAN in the code list below.

2. Press and hold the **SET** button; meanwhile, press and release the **FAN** button, until the **INDICATOR LIGHT** lights, then release the **SET** button.

3. Enter the code using the Number Buttons.

After your code is entered, the **INDICATOR LIGHT** will turn off.

Note: If your code is unavailable, the **INDICATOR LIGHT** will blink twice then remain lit. Please repeat the step 3.

4. Aim the remote at your FAN and press the **POWER** button.  
Your FAN should turn off.

Note: If your FAN does not respond, try all the codes for your brand.  
If the codes do not work, or your brand is not listed,  
try the Code Search method on page xx.

5. Write your code here for easy reference.

FAN CODE		
<input type="text"/>	<input type="text"/>	<input type="text"/>

## Programming With Code Search

If your TV, VCR, DVD or Cable/Satellite doesn't respond after you have tried all the codes for your brand, or if your brand is not listed, try searching for your code by following the steps below.

Note: The code search function is not available for the fan device.

1. Turn on the device you wish to program.
2. Press and hold the **SET** button; meanwhile, press and release the device button for the device you are programming (**TV, VCR, DVD** or **Cable/Satellite**).  
Until the **INDICATOR LIGHT** lights, then release the **SET** button.
3. Press and release the **SET** button again to start the search action.  
The **INDICATOR LIGHT** will keep blinking.
4. Press and release the **POWER** button until your device turns off.
5. When your device turns off, press and release the device button to store the code. The **INDICATOR LIGHT** will turn off to indicate the code search is completed.

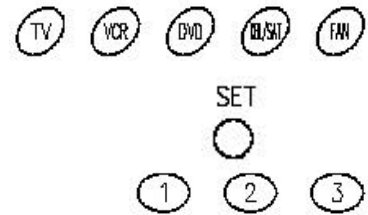

Note: While pressing the **POWER** button to search your device code, you may also advance to the proper code quickly by pressing the **SET** button to change the searching direction forward or backward.

## Retrieving Codes

If you need to find the three-digit code for your TV, VCR, DVD, Cable/Satellite or FAN after your device is set-up, use this procedure.

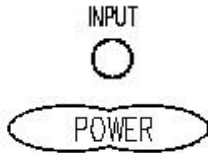

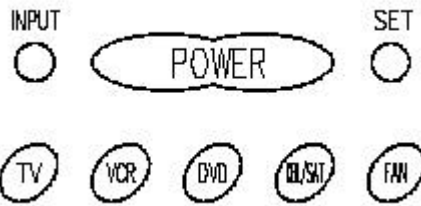

1. Press and release the device button.
2. Press and hold the **SET** button, then press and release the Number Buttons (**1**, **2** or **3**) to retrieve the digit of the code which you want (First, second or third).
3. Release the **SET** button, the number of times which the **INDICATOR LIGHT** blinks is the digit of your code.

Note: If the **INDICATOR LIGHT** does not blink, that means the digit is “ 0 “.

4. Repeat the above steps until you have retrieved all three numbers in the code.

## Button Function

**INPUT** - Press the INPUT button to switch viewing between television and other devices.

**POWER** - Press the POWER button to turn off or on the selected device. Note: May only turn the device off. Try the device button to turn the device on.

**TV** - Press the TV button to select the television to control.

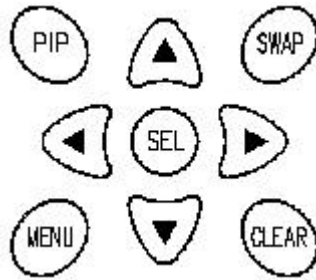

**VCR** - Press the VCR button to select the VCR to control.

**DVD** - Press the DVD button to select the DVD to control.

**CBL/SAT** - Press the CBL/SAT button to select the cable/satellite to control.

**FAN** - Press the FAN button to select the ceiling fan to control.

PIP - Press the PIP button to turn on or off the picture-in-picture feature.

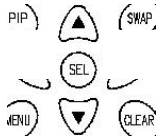

SWAP - Press the SWAP button to exchange the view in the picture-in-picture with the view on the main television screen.

MENU - Press the MENU button to view the selected device's menu.

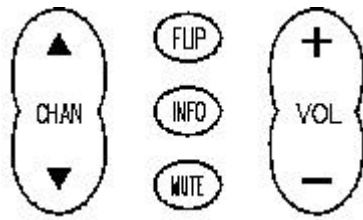

CLEAR - Press the CLEAR button to exit the selected device's menu.

DIRECTION KEYS - Press the DIRECTION KEYS to move the cursor in the menu screens and program guide of the selected device.

SELECT - Press the SELECT button to select items from the selected device's screen menu

CHANNEL - Press the CHANNEL button to select the next higher or lower channel.

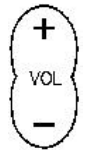

FLIP - Press the FLIP button to display the previous television channel.

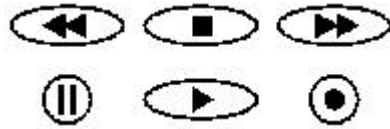

INFO - Press the INFO button to display information on the selected device.

MUTE - Press the MUTE button to turn off or on the sound.

VOLUME - Press the VOLUME button to raise or lower the volume.

REW - Press the REW button to fast rewind on your selected device.

STOP - Press the STOP button to stop your selected device.

FFD - Press the FFD button to fast forward on your selected device.

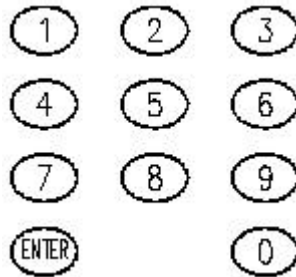

PAUSE - Press the PAUSE button to pause on your screen while using your selected device.

PLAY - Press the PLAY button to play while using your selected device.

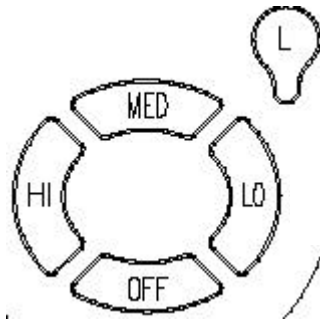

REC - Press the REC button to record your VCR.

NUMBER BUTTONS - Press the NUMBER BUTTONS to manually enter the channel numbers.

ENTER - Press the Enter button after entering channel numbers if necessary.

LIGHT - Press the LIGHT button to turn your light off or on. Press and hold the LIGHT button to dim or brighten the light.

HI - Press the HI button to select your fan on high speed.

MED - Press the MED button to select your fan on medium speed.

LO - Press the LO button to select your fan on low speed.

OFF - Press the OFF button to turn off your fan.

IMPORTANT NOTE: To comply with the FCC RF exposure compliance requirements, no change to the antenna or the device is permitted. Any change to the antenna or the device could result in the device exceeding the RF exposure requirements and void user's authority to operate the device.

NOTICE : The changes or modifications not expressly approved by the party responsible for compliance could void user's authority to operate the equipment .

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions. (1) This device may not cause harmful interference and (2) This device must accept any interference received, including interference that may cause undesired operation.

*The term "IC:" before the radio certification number only signifies that Industry Canada Technical specifications were met.*

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

## Troubles Shooting

Indicator light not blinking when you press any button.

1. Check that batteries are properly installed.
2. Replace the batteries with 4 new AAA Alkaline batteries.

The remote does not operate your device.

1. Try all the codes listed for your brand.
2. Try the Code Search method (page xx).

No performing commands properly.

Start Code Search over again to locate the proper code.

Nothing happens when operating ceiling fan.

1. Make sure dip switches in both the transmitter and receiver are set to the same code.
2. Make sure ceiling fan is initially set on high speed.

No respond after pressing a button.

1. Make sure you have new batteries, and you are aiming your remote at your device.
2. Check that batteries are properly installed.

Note: reprogramming may be required after batteries are removed.
