FCC NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be corrected by one of more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**CONSULT YOUR LOCAL RADIO AGENCY ABOUT THE POSSIBILITY OF OPERATION OF THIS DEVICE**

## SPECIFICATIONS

<b>ELECTRICAL</b>	
Operating Voltage:	3 V Battery
Current Consumption:	20 $\mu$ A standby
Frequency:	318 MHz / 433.92 MHz
Dead Time (normal mode):	2.5 minutes
Supervision Transmission:	Every 65 minutes / or 12 minutes
Battery Life:	5 years (Normal Mode)

<b>OPTICAL</b>	
Filtrering:	White Light Protection
Vertical Adjustment:	Per Scale Position

<b>PHYSICAL</b>	
Size:	127.6 x 64.2 x 40.9 mm (5 x 2.5 x 1.6 in.)

<b>ENVIRONMENTAL</b>	
Operating temperature:	0°C to 55°C (32°F to 131°F)
Storage temperature:	-20°C to 60°C (-4°F to 140°F)

Specifications are subject to change without prior notice.

Should any questions arise please contact your supplier.

## ROKONET LIMITED WARRANTY

Rokonet Electronics, Ltd. and its subsidiaries and affiliates ("Seller") warrants its products to be free from defects in materials and workmanship under normal use for 18 months from the date of production. Because Seller does not install or connect the product and because the product may be used in conjunction with products not manufactured by the Seller, Seller can not guarantee the performance of the security system which uses this product. Seller's obligation under this warranty will not include the repair or replacement of any part of the security system which is reasonable time after the date of delivery, any product not meeting the specification. Seller makes no other warranty, expressed or implied, or upon any other basis of liability whatsoever.

Seller's obligation under this warranty shall not include any transportation charge or costs of installation or any liability for damage, whether direct or indirect, resulting from the use of the product. Seller does not represent that its product may not be damaged or circumferenced by fire, theft, robbery, or burglar.

Consequently, Seller shall have no liability for any personal injury, property damage or loss based on a claim that the product fails to give warning. However, if seller is held liable, whether directly or indirectly, for any loss or damage arising from the use of the product, Seller's liability will not exceed the purchase price of the product, which shall be complete and exclusive remedy against seller. No employee or representative of Seller is authorized to change this warranty in any way or grant any other warranty.

WARNING: This product should be tested at least once a week.

Changes or modifications to this equipment not expressly approved by the party responsible for compliance, Rokonet Electronics Ltd. could void the user's authority to operate the equipment.

ENGLISH	ITALIANO	FRANÇAIS	DEUTSCH	ESPAÑOL	PORTEGUES	
<p><b>STEP 8 - FINAL SETUP</b></p> <p>1. Open the unit and reset the jumpers to the following positions. PULSE COUNT: 1, 2 or 3 as desired (See note below). MODE: As desired. LED: ON or OFF, as desired. Unused LED jumper should be placed on one leg (see Fig. 8)</p> <p><b>STEP 7 - WALK TEST</b></p> <p>1. Set MODE jumpers to FULL SIGN, LED jumper to ON and PULSE to any desired count (1,2 or 3). 2. Close cover, prepare WALK TEST (fig. 7). Observe LED confirmation. Verify that the receiver is properly receiving the signals.</p> <p><b>NOTES:</b> 1. A higher pulse count reduces the overall detection performance but increases immunity to false alarms. However, for long range lens use only pulse count of "1"</p>	<p><b>Long Range Lens (position LONG):</b> Pulse count - 1 Height 2.5 m. Range 15m (50ft) When the adjustment is completed, fasten the screw to the PCB in the desired position.</p> <p><b>STEP 7 - WALK TEST</b></p> <p>1. Set MODE jumpers to FULL SIGN, LED jumper to ON and PULSE to any desired count (1,2 or 3). 2. Close cover, prepare WALK TEST (fig. 7). Observe LED confirmation. Verify that the receiver is properly receiving the signals.</p> <p><b>NOTES:</b> 1. Forare le predisposizioni di fissaggio (vedere fig. 5). 2. Fissare il rivelatore nella posizione definitiva. 3. Montare la scheda elettronica.</p> <p><b>PASSO 6 - REGOLAZIONE DELLA SCHEDA ELETTRONICA</b></p> <p>Usare i riferimenti marcati nella parte inferiore destra della scheda elettronica per scegliere la regolazione verticale corretta come di seguito spiegato:</p> <p>Regolazione Fine per l'area da proteggere (fig. 6): Lenti Grand'Angolo: Altezza d'installazione: 2.5 m. Grandezza Stanza 3-6 m (posizione "SHORT") figura 6a Grandezza Stanza 6-16 m (posizione "LONG") figura 6b</p> <p><b>PASSO 7 - PROVA DI MOVIMENTO</b></p> <p>1. Predisporre i ponticelli MODE in Modo Segnalazione Completa (FULL SIGN), il ponticello di alimentazione LED in ON (inserito) e il ponticello PULSE sul conteggio impulsi desiderato (1,2 o 3).</p>	<p><b>Long Range Portata (posizione "LONG"):</b> Conteggio Impulsi: 1 Altezza d'installazione: 2.5 m. Portata 15m figura 6b</p> <p>Dopo aver completato la regolazione della scheda elettronica, stringere la vite di fissaggio con la scheda allineata al riferimento desiderato (fig. 6b).</p> <p><b>PASSO 8 - CONFIGURAZIONE FINALE</b></p> <p>1. Aprire il coperchio dell'unità e ripristinare i ponticelli nelle posizioni seguenti. CONTEGGIO IMPULSI (PULSE COUNT): 1, 2 o 3 impulsi , come richiesto (Vedere nota in basso).</p> <p><b>MODI DI FUNZIONAMENTO (MODE):</b> Come desiderato. (Vedere nota in basso).</p> <p><b>PROCEDURA PER LA SOSTITUZIONE DELLE LENTI</b></p> <p>1. Rimuovere la protezione plastica dell'ottica del sensore (Fig.9). 2. Rimuovere la lente dal suo alloggiamento (Fig.10). 3. Effettuare la procedura inversa per inserire la nuova lente.</p>	<p><b>Lenti Lunga Portata (posizione "LONG"):</b> Conteggio d'impulsions 1 Hauteur 2.5m Portée 15m figura 6b</p> <p>Quand l'ajustement est terminé, resserrer la vis sur la carte dans la position désirée.</p> <p><b>Etape 7 - Test de Passage</b></p> <p>1. Placez le cavalier Mode sur FULL SIGN (Test de passage), le cavalier LED sur ON et le cavalier PULSE (impulsions) sur le comptage désiré (1, 2 ou 3). 2. Refermez le couvercle et préparez le test de passage. (fig. 7) Observez la confirmation par LED, puis la réception du signal par le récepteur.</p>	<p><b>Lentille Longue Portée (position "LONG") :</b> Comptage d'impulsions 1 Hauteur 2.5m Portée 15m figura 6b</p> <p>Quand l'ajustement est terminé, resserrer la vis sur la carte dans la position désirée.</p> <p><b>Etape 8 - Montage final</b></p> <p>1. Ouvrez le détecteur et placez les différents cavaliers ainsi : PULSE (impulsions) : 1, 2 ou 3 selon les besoins (voir § NOTES ci-dessous) MODE : Selon votre choix. (voir § NOTES) LED : ON ou OFF selon votre choix. Pour ne pas utiliser la LED, placez le cavalier sur une seule broche. (Voir figure 8)</p> <p><b>CHANGEMENT DE LENTILLE</b></p> <p>1. Retirez la protection du capteur (Figure 9) 2. Retirez la lente de la protection du capteur (Figure 10) 3. Inversez la procédure pour placer la nouvelle lentille.</p>	<p><b>NOTES :</b> 1. Un conteggio d'impulsions à 3 riduce la rapidità di deteczione ma aumenta l'immunità ai falsi allarmi. In ogni caso, se si utilizzano le lenti a lunga portata, utilizzare solo la configurazione a un (1) impulso. 2. Per assicurare una più longa autonomia della batteria, utilizzare il Modo Normale di funzionamento.</p> <p><b>AVVERTENZA</b></p> <p>Questo dispositivo è conforme alle normative Europee ETS I 300 220 (solo opzione frequenza 433.92).</p> <p><b>Modifiche e Cambiamenti non esplicitamente approvati da ROKONET possono invalidare la concessione all'utilizzo da parte dell'utente.</b></p> <p><b>CAUTION NOTICE</b></p> <p>This device complies with U.S. FCC Part 15 and with RSS-210 of Industry Canada. Operation is subject to the following two conditions: (1) This device may not cause interference. (2) This device must accept any interference, including interference that may</p>	<p><b>NOTES :</b> 1. Eine höhere Impulszahl reduziert die allgemeine Detektionsempfindlichkeit, steigert aber die Immunität gegen Fehlalarme. Beim Einsatz einer Langstrecken-Linse darf nur die Impulszahl "1" gewählt werden. 2. Um eine plus längere Batterielaufzeit zu erhalten, den MODE-Stecker auf NORMAL stellen.</p> <p><b>WÄRTUNG</b></p> <p>Rokonet Electronics garantiert kein Interferenzen verursachen. 2. Der Melder muss Interferenzen empfangen, auch wenn diese zu Fehlerfunktionen führen. Wenn zwei oder mehrere Sender gleichzeitig senden kann zu Informationsverlust führen. Die Kommunikationsqualität ist von den Umwelteinflüssen abhängig. Montieren Sie den Melder nicht nahe an leitenden (Metall) Objekten oder Geräten, die Radiofrequenzen erzeugen.</p> <p><b>HINWEIS :</b></p> <ol style="list-style-type: none"> <li>1. Eine höhere Impulszahl reduziert die allgemeine Detektionsempfindlichkeit, steigert aber die Immunität gegen Fehlalarme. Beim Einsatz einer Langstrecken-Linse darf nur die Impulszahl "1" gewählt werden.</li> <li>2. Um eine längere Batterielaufzeit zu erhalten, den MODE-Stecker auf NORMAL stellen.</li> </ol> <p><b>VORSICHTSMASNAHMEN</b></p> <ol style="list-style-type: none"> <li>1. Dieser Melder kann keine Interferenzen verursachen.</li> <li>2. Der Melder muss Interferenzen empfangen, auch wenn diese zu Fehlerfunktionen führen. Wenn zwei oder mehrere Sender gleichzeitig senden kann zu Informationsverlust führen.</li> </ol> <p><b>AUSTAUSCH VON LINSEN</b></p> <ol style="list-style-type: none"> <li>1. Entfernen Sie die Sensor-Schutz-Halterung (fig.9)</li> <li>2. Lösen Sie die Linse von der Halterung (fig.10)</li> <li>3. Wählen Sie nun die gewünschte Linse und bringen Sie diese in umgekehrte Reihenfolge wieder auf die Halterung auf.</li> </ol>
<p><b>PASSO 8 - AJUSTE FINAL</b></p> <p>1. Abrir la unidad y colocar los puentes en las posiciones siguientes: PULSE COUNT: 1, 2 o 3 de la manera deseada MODE: De la manera deseada LED: ON o OFF, como sea deseado Si el puente del LED no es utilizado, debe ser colocado sobre una de las patas (ver fig. 8)</p> <p><b>PASO 7 - PRUEBA DE CAMINATA</b></p> <p>1. Colocar los puentes de MODO en FULL SIGN, puente de LED en ON y PULSE de acuerdo al contado deseado (1, 2 o 3). 2. Cerrar la cubierta, preparar la prueba de caminata (fig. 7). Observar la confirmación del LED. Verificar que el receptor recibe correctamente las señales.</p> <p><b>NOTAS:</b> 1. Un contado de pulsos más alto reduce el desempeño total de captura pero aumenta la inmunidad a falsas alarmas. De todos modos, para lentes de largo alcance debe utilizarse sólo contado de pulsos "1".</p>	<p><b>PASO 8 - AJUSTE FINAL</b></p> <p>1. Abrir la unidad y colocar los puentes en las posiciones siguientes: PULSE COUNT: 1, 2 o 3 de la manera deseada MODE: De la manera deseada LED: ON o OFF, como sea deseado Si el puente del LED no es utilizado, debe ser colocado sobre una de las patas (ver fig. 8)</p> <p><b>PASO 7 - PRUEBA DE CAMINATA</b></p> <p>1. Colocar los puentes de MODO en FULL SIGN, puente de LED en ON y PULSE de acuerdo al contado deseado (1, 2 o 3). 2. Cerrar la cubierta, preparar la prueba de caminata (fig. 7). Observar la confirmación del LED. Verificar que el receptor recibe correctamente las señales.</p> <p><b>NOTAS:</b> 1. Una contagem mais alta de pulsos reduz a atuação do detector, porém, aumenta a sua imunidade contra alarme falso.</p>	<p><b>PASO 8 - AJUSTE FINAL</b></p> <p>1. Abrir o aparelho e coloque os jumper nas seguintes posições: CONTADOR DE PULSOS: 1, 2 ou 3, conforme o desejado (veja observação abaixo)</p> <p><b>MODO OPERACIONAL:</b> Conforme o desejado. LED: ON (ligado) ou OFF (desligado), conforme o desejado.O jumper do LED, quando não é usado, deve ser colocado num dos pinos de sua base (fig. 8)</p> <p><b>OBSERVAÇÕES :</b></p> <ol style="list-style-type: none"> <li>1. Uma contagem mais alta de pulsos reduz a atuação do detector, porém, aumenta a sua imunidade contra alarme falso.</li> </ol>	<p>De qualquer forma, com lente de longo alcance use somente a contagem de 1 pulso.</p> <p><b>PROCEDIMENTO PARA EL CAMBIO DE LENTES</b></p> <p>1. Remover el mangote del sensor (fig. 9). 2. Remover la lente del mangote (fig. 10). 3. Invertir el procedimiento para instalar una lente nueva.</p> <p><b>ADVERTENCIA</b></p> <p>Este dispositivo es conforme a la norma Europea ETS I 300220 (sólo la opción de frecuencia 433.92 MHz).</p> <p><b>CUALQUIER MODIFICACIÓN NO EXPRESAMENTE APROBADA POR ROKONET PUEDE ANULAR EL DERECHO DEL USUARIO A OPERAR EL EQUIPO.</b></p> <p><b>PROCEDIMIENTO PARA EL CAMBIO DE LENTES</b></p> <p>La calidad de comunicación del dispositivo puede ser influenciada por el ambiente en el cual está instalado. Aparatos electrónicos situados en la proximidad del dispositivo pueden interferir con su operación normal. Por lo tanto, la operación de la unidad debe ser probada en cada instalación ya que su calidad de transmisión puede variar como resultado de las condiciones de operación.</p> <p>La transmisión simultánea de dos unidades diferentes puede causar interferencia en los mensajes, resultando en pérdida de información.</p> <p><b>AVISOS DE CAUTELA (para instalaciones nos Estados Unidos e no Canadá)</b></p> <p>This device complies with U.S. FCC Part 15 and with RSS-210 of Industry Canada. Operation is subject to the following two conditions: (1) This device may not cause interference. (2) This device must accept any interference, including interference that may cause undesired operation of the device.</p> <p><b>PROCEDIMENTOS PARA LA TROCA DE LENTES</b></p> <p>1. Remova a manga protetora do sensor (fig. 9). 2. Remova a lente da sua posição na manga (fig. 10). 3. Faça o procedimento oposto para colocar uma nova lente.</p> <p>Simultaneous transmissions from two different units may cause message interference resulting in loss of information.</p> <p>The communication quality of this unit may be affected by its surrounding environment. Nearby electrical equipment may interfere with its normal operation. The operation of this unit must, therefore, be tested at each installation since its transmission quality may vary as a result of operational conditions.</p>			
<p><b>PASSO 6 - AJUSTE DA POSIÇÃO DA PLACA DO CIRCUITO (PCB)</b></p> <p>Use a escala no lado direito inferior da placa (PCB) para selecionar a posição adequada do ajuste vertical, de acordo com o seguinte:</p> <p>Ajuste fino da Área Protegida (fig. 6): Lente de Gran Angular : Altura: 2.5 m. Tamaño de habitación 3-6 m (9-18 pies) (posición SHORT) figura 6a Tamaño de habitación 6-16m (18-50 pies) (posición LONG) figura 6b</p> <p><b>P</b></p>
