Elf Eye Functions

You can access all Elf Eye's functions here.

Check SD Card File
View Photo
Elf Eye Settings

- **Album**

When you take a picture or record a video from Robelf App, all files will be saved to your mobile device as well. When deleting from the App, it will be deleted synchronously.

* iOS and Android devices works differently.

- **All Day Monitoring**

The Elf Eye will automatically record a footage every 60 seconds into your MicroSD Card. If the SD card is full, it will erase data from the earliest ones.

- **Smart Detection**

You can also turn on the Smart Detection. Under this mode, when Elf Eye detects abnormal movement, it will send push notification to the Robelf App.

- **Push Notifications**

The Elf Eye will send notifications during the following:

1. Disconnect from power charging (dock/ Robelf).

2. Detects unusual motions/movements.

3. When firmware update is available.

4. Low battery.

- **Remote Monitoring**

You can remote monitoring Elf Eye's image and sound from Robelf App and it supports multiple connections simultaneously.

- **Watch Security Videos**

All the footages will be saved to the MicroSD card in the Elf Eye. Through Robelf App, you are allowed to manage those files.

Turn Off Elf Eye

Press the on/off button on the side for about 3 seconds to turn it off.
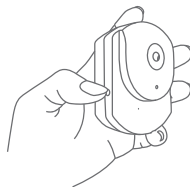

Notices

1. Please put the Elf Eye in a network environment.

2. Please keep the Elf Eye away from metals.

3. Please avoid putting the Elf Eye near by the microwave oven or behind furniture.

4. The Elf Eye can be used for up to 1 hours with the built-in battery under a full charge. Please make sure it is connected to the power at all times in case of an emergency use.

Troubleshooting

Reset or Switch Network Connection

1. If you are unable to see Elf Eye's image, try to reconnect it, and if it still fails, you can reset the network connection for the Elf Eye.

2. Switching to another network connection will also be a solution.
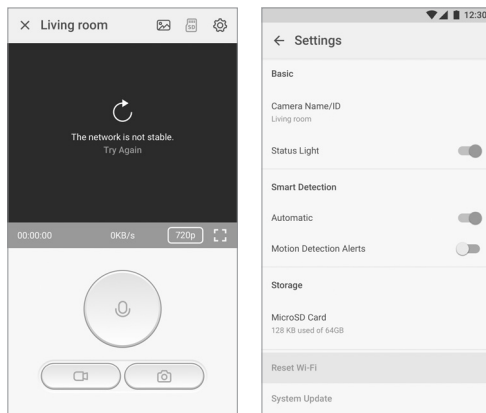

Appendix

Federal Communications Commission (FCC) Statement

15.21
You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

15.105(b)
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the

instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference and

2. This device must accept any interference received, including interference that may cause undesired operation of the device.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the

radiator and your body.
