Door Plates Hundred Square Inch Size Chart

To calculate the list price of kick plate, use the hundred square inch number times the list price. Use the next higher even number for odd or fractional sizes. (Example: 9" x 33 1/2" — price as 10" x 34" which is 3.40 square inches.) Take that number times the list price from the following page. (Example: 32D list \$19 x 3.40 = \$64.60)

Special Finishes Description

32DMS (MicroShield®): As part of its promise to provide innovative solutions to their customers, ASSA ABLOY Group companies offer the MicroShield® technology, a silver-based antimicrobial coating designed to inhibit the spread of germs and bacteria.

32316 and **32D316** are made from alloy 316 stainless steel containing molybdenum and extra nickel giving it substantially higher corrosion resistance than the standard stainless steels typically used in door hardware. This finish is ideal for use in coastal, urban, and industrial areas that have harsh environmental conditions. **32316** (polish) finishes offer the best corrosion resistance and should be used in caustic environments.

10BE Dark Oxidized Satin Bronze equivalent: This finish provides the richness and warmth of the 10B/613 "living" finish, but maintains its original color and appearance and will not fade or wear over time. The 10BE finish is offered by Corbin Russwin, McKinney, Norton, Rixson, Rockwood, SARGENT and Yale, providing visual consistency between ASSA ABLOY Group brands.

* On most bronze finishes we will supply solid bronze material. Where solid bronze material is not available, we will use brass as a base material with a bronze look powder coat in its place.

*** Available on select items as indicated by the finish icon throughout the catalog.
