

# RP-1000

## RP-1000: 2-Slot Redundant Power System

### Key Features

- Supports device status detect Signal for managed switch system:
  - Power A,B position
  - Power On/Off status
  - DC-DC or AC-DC input Power
  - Power module inserted or removed
  - +5V output voltage status
  - Power A,B FAN RPM status
  - Case temperature detect
  - Device Name RP-1000 read/write (write protection)
  - S/N Number read/write (write protection)
  - HW/ME Version read/write (write protection)
- Supports I2C interface for device status detect
- AC power input 100V ~ 240V, 47-63Hz or DC power input 36 ~ 72V
- Up to +5V/16A 80W power output with 10 pin Mini-Fit 4.2 connector
- Redundant power supply to prevent system failure, if one fails, the redundant power supply is capable of taking over immediately (Load-sharing).
- System LEDs :
  - Power (RP-1000 Power A or B or FGS-2924R internal AC Power ON),
  - Power A (+5V Good),
  - Power B (+5V Good)

### Overview

The RP-1000 External Redundancy Power Supply is designed as a power supply that can supply backup power to so equipped RubyTech FGS-2924R. It has 2 redundant power supply (RPS) ports supporting backup power to 2 supported RubyTech FGS-2924R switches. User can detect RP-1000 status (Power A,B , Power insert/remove , DC or AC Power, FAN RPM , Temperature, Device Name, S/N Number) by the managed Switch's web UI. Moreover, a redundant power supply is offered in the power supply set to cope with any accidental breakdown of power supply.

### Ruby Tech Corp.

3F, No.1, Lane 50, Nan Kang Road, Sec.3, Taipei, Taiwan  
 TEL:886-2-2785-3961 FAX:886-2-2786-3012

### Technical Specifications

- Diagnostic LED: Power A, Power B, Power
- Power Requirement:

AC Power Module Input	100-240VAC, 50-60Hz
DC Power Module Input	48VDC
Consumption	80W
Slot Power Plug Output	+5V/16A
Ambient Temperature	0 to 40°C
Storage Temperature	-20°C to 70°C
Humidity	5% to 90%
Dimensions	440(W) x 211.2 (D) x 44 (H) mm

- Complies with FCC Part 15 Class A & CE Mark Approval
- LED Description

LED	Color	Function
Power A	Green	Lit when Power Module A +5V output is coming up.
Power B	Green	Lit when Power Module B +5V output is coming up.
Power	Green	Lit when RP-1000 Power A or B or FGS-2924R internal AC Power ON.

### Ordering Information

Model	Description
RP-1000RAC	RP-1000 with Dual AC Input Redundant Power Supply
RP-1000RDC	RP-1000 with Dual DC Input Redundant Power Supply
RP-1000RADC	RP-1000 with AC+DC Input Redundant Power Supply
