Head and Foot Position Adjustments (A, B, C, D)

- Use to raise or lower the head and foot sections of your adjustable bed. The premium "Wall-Glide" feature will automatically synchronize with all Head & Foot adjustments.

Bed "Flat" Button (F)

- Press down and hold for 3 seconds to return bed to the flat position.

Head and Foot Massage Adjustments (H, I, J, K)

- Use to activate the massage feature on the head and foot of the bed (starting at intensity 4 of 8). Gradually increase or decrease intensity of massage vibration by pressing the appropriate button. The lowest setting on each massage unit will turn off the respective vibration. The massage feature is programmed with an Auto Shut-Off Timer that will automatically turn off the massage after 15 minutes of continuous use. A 5 minute cool down is required before initiating an additional massage sequence.

Exclusive "Head Tilt Body-Hugger" Feature Included

Wireless Adjustable Bed

Wireless Hand Remote Operation *Continued*

Wave Massage Adjustments (N)

- Activates both units to wave mode massage. **NOTE:** You must stop the massage in order to activate another massage setting such as full body or another wave massage.

Full Body Massage (M)

- Press to activate both the head and foot massages at the same time.

Pre-Programmed Memory Position (G)

- These 3 program function keys allow you to select the most popular positions with 1 touch.

Stop Button (L)

- Hold down for 2 seconds to stop massage.

REMEMBER: YOU MUST STOP MASSAGE BEFORE ALTERNATING BETWEEN MASSAGE FUNCTIONS.

Under Bed Light (O)

- Press the button to turn on or off the under bed light. (Button on back of Hand Wand)

Remote Features

- The Wall-Glide Adjustable Bed uses a RF (Radio Frequency) hand control system.

NOTE: *This bed may show minor intermittent performance because of typical RF interference. This is normal in the operation of the bed, not a defect.*

- The buttons are backlit, when a button is pressed, to aid in the visibility of the remote in low light environments.
- It is not necessary to face the receiver to operate the remote control. Remote signal is best transmitted within 9 feet (3 meters) of the receiver.

Safety

- In the case that an overload of weight is placed on the head or foot mechanism, the control unit will automatically stop all functions. The control unit will automatically resume all functions 30 seconds after excess weight is removed.
- Massage motors will automatically shut off after running continuously for 15 minutes. All massage functions will be operational again after 5 minutes. Automatic Shut Off will occur after 15 minutes of continuous use.
- The input transformer voltage is AC120V 60HZ, the output voltage is DC24V 3A. In the case of a short-circuit, a fuse on the transformer will blow to protect the electrical equipment (Fuse: 1A-1.5A.). Should this occur, you **MUST** seek professional assistance to replace the fuse. **Call Customer Care at: 1-877-826-8757**
