

# Quick-Start Guide

Arrival Sensor

## Meet your Arrival Sensor

The Arrival Sensor lets you stay connected to people, pets, and cars by sending you a push notification when they arrive and leave home.

### Installation Tips

The Arrival Sensor works best if it's within 15 feet (4.5 meters) of the SmartThings Hub when you connect it.

### If your device doesn't connect

If your device doesn't connect in the SmartThings app when you remove the pull-tab, hold the "Connect" button for six seconds or until the LED light turns off. Then select "Connect New Device" in the SmartThings app and press and quickly release the "Connect" button.

### Using the Arrival Sensor:

You can place the SmartThings Arrival Sensor in a child's bag, in a car, or around a pet's collar and it will send you a notification when people, pets, and cars arrive or leave your home.

### Using the Arrival Sensor:

If you place the Arrival Sensor on a keychain, it can emit a beeping noise to help you find where you left your keys in the house.

### Replacing the battery

**USE CARE** when replacing the battery to avoid damaging the battery clip. See a detailed how-to video at <http://support.SmartThings.com>.

### Information to the User

Changes or modifications not expressly approved by the manufacturer, could void your authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## Correct disposal of batteries in this product

(Waste Electrical & Electronic Equipment)

(Applicable in countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.

(Applicable in countries with separate collection systems)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
