5. Text Input

The device provides several text input modes so that you can

write text or input data in your "contacts", edit "contacts" record, search English names and write SMS and to-do list.

In "text input" mode, if you want to change the input way, you can press "#" key. The selected input way will appear on the top left of the screen.

Letter (Capital, Normal)

Enter edit page, press "#"and switch the input mode to "letter", then press the keys on keypad, selected letters will appear on the screen.

Press the number key can get the first letter marked on the key, press twice quickly can get the second letter marked on the key. Similarly, if the letter you want to input have the same key with the former letter, please wait until the cursor appears again, then input the new letter.

For example, if you want to input "ok", you need to press the "6" key three times continuously and get "o", then press the key"5" twice, " k" will appear on the screen. Press right soft key, you can delete the text you input.

Number

Enter "edit" mode, press "＃" key you can change the input way to " number". Then press the keys, number will appear on the screen. The key 0-9 separately represents the figure from 0 to 9.

You can press corresponding key to get desired number. Press right soft key can delete the number you input.

Punctuation

Enter the "edit" mode, press key "1", the punctuations will appear. You can scroll the direction key so that the cursor can select desired punctuation. Press left soft key can select the desired punctuation.

6. Care and Maintenance

Maintenance of battery

·Your device is powered by a rechargeable battery. It is necessary to have the battery charged when it is going to wear out. The full performance of a new battery is achieved only when it is fully wore out.

·Unplug the charger from the electrical plug and the device when not in use. Do not leave fully a charged battery connected to a charger over a week, since overcharging may shorten its lifetime.

·Temperature tends to affect the limit of battery to be charged. Therefore, it is necessary for the battery to be cooled or warmed

before it is charged. If the temperature of batter exceeds 40ºC ,the battery cannot be charged.

·Use the battery only for its intended purpose and avoid short-circuiting. Accidental short-circuiting can occur when a metallic object causes direct connection of the positive (+) and negative (-) terminals of the battery.

·Do not use damaged battery.

·Leave the battery in hot or cold places will reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily, even when the battery is fully charged.

·Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations.

Care of maintenance of your device

The suggestions below will help you protect your warranty coverage.

·Keep the device and accessories out of the reach of small children.

·Keep the device dry. All types of liquids or moisture will corrode electronic circuits.

· Do not store the device in hot areas. High temperatures can shorten the life of electronic devices and warp or melt certain plastics.

·Do not attempt to open the device other than as instructed in this guide. Non-professional handling may damage the device.

·Do not use harsh chemicals or strong detergents to clean the device.

·Use only the supplied or an approved replacement attachments, for the unauthorized ones could invalidate the warranty of maintenance.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and,

if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This **GSM Mobile Phone** meets the government's requirements for exposure to radio waves. The guidelines

are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: **F6 Pro (FCC ID: AODZKTXIPROF6)** has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the **ear is 0.784W/kg** and when properly worn on the **body is 1.131W/kg**. This device was tested for typical body-worn operations with the back of the handset kept **1.5cm** from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a **1.5cm** separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **1.5 cm** must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
