A Quick Look at Your Device

Pairing Your Earphones Together

When using your earphones for the first time, it is necessary to first pair the two earphones together so that you can hear audio from both your left and right earphone. To do so, follow the steps below.

- Press and hold the power buttons on both earphones simultaneously for approximately 7 seconds.
- Your earbuds will power on and after a few moments they will pair together. Your left earphone will audibly say "LEFT CHANNEL", while your right earphone will audibly say "RIGHT CHANNEL".

Once you pair your earphones together for the first time, they should pair together automatically each subsequent time they are powered on. Furthermore, they can be powered on by pressing the power button for two seconds.

Pairing Your Earphones with a Smartphone

- Press and hold the power buttons on each earphone for approximately 2 seconds to power them on.
- The LED indicator lights will alternately flash red and blue to indicate that your earphones are in pairing mode.
- Go to the Bluetooth settings menu on your phone. Make sure that Bluetooth is turned on. Connect to the device listed as "Vivitar TWS earbud".
- The LED indicator lights will stop flashing to indicate that your earphones are paired with your phone.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
