If you would like more detailed instructions beyond the Easy Guide, the full camera manual is available on the Home screen or in the "Help" menu after installing the Vivitar Experience Image Manager software

Windows and the Windows logo are registered trademarks of Microsoft Corporation. All other trademarks are the property of their respective companies.

This camera is a plug and play device. You can download the pictures and videos captured by your camera without the software by directly accessing the camera's memory card from your computer. It is recommended however that you install the Vivitar Experience Image Manager Software to enjoy the full Vivitar experience.

Install Software

- 1  Locate software CD found in package
- 2  Connect your PC or MAC to the internet
- 3  Insert CD
- 4  Follow all instructions to install software
- 5  Software will open

Download Images

- 1  Turn on your camera
- 2  Connect camera via USB to computer
- 3  Open software and press the "Get Images" button
- 4  Follow instructions on the screen to download images
- 5  Edit and Upload images to social networks

This device complies with the part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with instructions may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on. The user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or experienced radio/TV technician for help.

1 What's Included

1. Digital Camcorder
2. USB Cable
3. Installation CD
4. Wrist Strap
5. Built-in Lithium Battery not shown

Micro SD Memory Card not included

2 Parts of the Camera

4 Main Camera Modes

Your camera has different modes for the various camera functions.

You can switch modes by pressing the HOME button on your camera after the camera has been powered ON.

Video Capture Mode

Use this mode to capture videos with your digital camcorder.

This is the default mode when your camera is powered ON.

To take a video, aim your camera as desired and press the "Shutter" button or tap the visual area of the touch screen to start the recording. A red recording indicator will appear while the recording is in progress. To stop the recording, press the "Shutter" button or tap the visual area of the touch screen again. The video will be automatically saved to the memory card.

To access the various menus for the Video Capture mode, press the MENU button or tap the Menu icon which is at the lower left corner of the touch screen while in the Video Capture mode.

For more information, please refer to the camera's User Manual in the software or online.

3 Initial Setup

Charging the batteries

This is a built-in lithium battery device.

To Charge the Battery:

- Power Off the camera.
- Connect the camera using the USB cable to the computer's USB port (which is then connected to a standard wall socket).
- Charge light will turn off when battery is fully charged.

Installing memory card

Class 4 or higher Micro SD Memory card (up to 32GB) needed for normal use

Turning on and using the camcorder

Initial Camera Setup

After powering on your camcorder for the first time, you will be prompted to select a language, the date/time and the Vivilink for your camcorder.

To complete the initial setup:

1. Power on your camcorder (first time only).

2. You will first be prompted to select a language.

- Touch the LCD screen and slide your finger up or down on the screen to scroll and select the desired language.
- Tap an option on the LCD screen to select it.
- Tap SAVE & EXIT to confirm and save your selection.

3. After selecting the language, you will be asked if you would like to continue with the setup or exit.

- Tap 'Yes' if you would like to set the date, time and Vivilink option.
 - Tap 'No' if you would like to exit the setup.
- Note: If you select 'No' and decide to leave the setup, the settings can be adjusted at any time by pressing the HOME button and then tapping the 'Setup' icon.

4. If you have chosen to continue with the setup, the next step is to set the camcorder's date and time.

- Tap the triangle button above or below the fields in the screen to increase or decrease the hour, minutes, days, months, etc.
- Once you have set the date and time as desired, tap SAVE & EXIT to confirm the setting and continue to the next part of the setup.

5. The next step is to select your default Vivilink destination.

- Vivilink enables you to select your favorite web sharing site for a one click upload. Note: If you do not want to use this feature, you can select 'None' as the Vivilink option.
- First select the Vivilink social network for your photos. Touch the LCD screen and slide your finger up or down on the screen to scroll and select the desired Vivilink for photos. Tap SAVE & EXIT to confirm your selection and continue to the next part of the setup.
- Then select the Vivilink social network for your videos. Touch the LCD screen and slide your finger up or down on the screen to scroll and select the desired Vivilink for videos. Tap SAVE & EXIT to confirm your selection.

6. Congratulations! This completes your initial setup.

Remember: This is a onetime setup and you will not be prompted to determine these settings again. If you would like to change any of these settings you can do so by going to HOME >> Setup.

Photo Capture Mode

Use this mode to capture photos with your digital camera.

After powering on your camera, press the HOME button once to open the home page and then tap the camera icon to open the Photo Capture mode.

To take a photo, aim your camera as desired and press the "Shutter" button or tap the visual area of the touch screen. The photo will be automatically saved to the memory card.

To access the various menus for the Photo Capture mode, press the MENU button or tap the MENU icon which is at the lower left corner of the touch screen while in the Photo Capture mode.

For more information, please refer to the camera's User manual in the software or online.

Playback Mode (Photos & Videos)

Use this mode to view and manage the photos and videos on your camera.

After powering on your camcorder, press the HOME button to open the home page and then tap the PLAYBACK icon to open Playback mode.

You can swipe left/right on the touch screen to scroll through the videos and photos that you captured with your camcorder to view or delete as desired.

To access the various menus for the Playback mode for videos and photos, press the MENU icon and other icons which are displayed on the LCD.

For more information, please refer to the camera's User Manual in the software or online.
