Getting started

Statement: our company ceaselessly devotes itself to the improvement product quality and software versions are updated continuously. If there are differences between the outgoing product and functions described in this instruction, please kind prevail. Thank you!

2.1 Battery charging

The tablet palmtop computer is equipped with a built-in battery. System will suggest to charge when the battery is low.

Power adapter

Connect one end of the power adapter to a socket and the other end to the power jack of the device to charge the device. (Strongly recommended to use allocative power adapter from the company to avoid damage to the machine)

Charging methods

1. Plug the power adapters, the charging indicator of the battery will turn red to

show that charging is in process. When the battery is full, the charging indicator goes out.

2. Users can still use tablet palmtop computer during charging.

2.2 Use of memory card

Insert memory card:

Insert the memory card into the card slot and press it into the card slot until hear the sound of "Click". A prompt will appear on the top left corner of the screen: The memory card is preparing.

Browse the documents in the memory card:

Run "My Pad" program. Display all files under the root directory and select "Memory Card 1" to open it to browse the content in the card.

Pull out memory card:

Close all the files opened from the card: click menu, select settings → internal memory of memory card device → memory card 1 → uninstall memory card. The system will prompt that "memory card has been safely removed": Gently press the card and it will popup a part. Then take it out: "memory card has been safely removed" will be prompted on the top left corner of the screen.

Note:

1. The card should be inserted into correct position, otherwise it will be damaged;
2. Please do not forcibly pull out the card before the appearance of the prompt that "remove the memory card", lest that the car will be damaged;
3. Memory cards of main brands is suggested to be used to avoid the incompatibility of the card

2.3 Hot swapping between memory card and external USB flash disk

Please do not carry out hot swapping when using or browsing files in memory card and external USB flash disk. Directly pull out memory card or external USB flash disk when browsing or using files in them in My Video, My Music, My Album and other softwares may damage the card and USB flash disk and they may automatically exit process for self-protection. Please refer to "2.2 Use of memory card" on insert and extract of memory card. Please close all files being used in the external USB flash disk before pulling it out.

2.4 Storage space

The device has three storage spaces: internal storage of the device, USB flash disk and memory card. Internal storage of the device is not displayed; the displayed folder name of memory card is: "SD Card 1"; the displayed folder name of external USB flash disk is "USB Flash Disk 1". System storage area can only be used for storing system files. The total internal storage space of the device is 4 GB. The storage space of USB flash disk and memory card is determined by their specific capacity.

Please refer to 9.7 storage card and device storage for related specific information on storage.

2.5 ON OFF

1. Starting up: when the battery has sufficient electricity, long press the power key for 2 seconds to start up. Screen lock will be entered after starting up. Slide unlock icon upward to enter main interface; (slide it downward to turn off sound and slide it downward again to turn on sound)

To restore the device to original factory settings and clear all information, press the menu button - system settings - privacy right - restore factory settings.

Warning: After selecting to reset the device, Google account, data and settings of system and application and downloaded applications will be deleted. Please cautiously use this function.

There is one ferrite core attached with the adapter.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and

receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
